author. Here, on the contrary, he favours us with twenty pages of "Exposition,"—with a new "exposure," in which "the Lily" is introduced as by a prelude on *Apollo's* lute, and the Bee, as it were, by the soothing drone of a soft Recorder. Spenser, says Mr. Warren, wrote a letter to Sir Walter Raleigh, to expound the meaning of his 'Faery Queene,'—Mr. Warren will follow Spenser's example. Milton poured out the choruses of his 'Samson Agonistes' in "rhythmical prose,"—and accordingly in rhythmical prose is "England's dear epitome" (Queen Victoria!) accompanied by Mr. Warren, from the great organ of Mr. Willis down to the American reaping-machine.—"The Bee," continues our author, "was a wonderful exhibitor, though he never had a medal awarded him, of skilled industry; a perfect Geometer, Architect and Manufacturer, and, moreover, a citizen of a well-compacted State; his springs of action hidden in dense mystery."—Our Victorian Spenser has in his pocket the medal for the Bee. "The Angel of the Annunciation is generally represented as bearing a lily in his hand,"—*argal*, our Milton of the Crystal Palace conceived that the Lily might be "taken up" into "the wondrous tale" also! Can anything be more clear than Mr. Warren's exposures? Can anything display greater lowliness of heart, greater loftiness of conception, than his parallels and parables?—To be serious, in conclusion:—the extreme of plain severity is not too extreme to characterize the coarseness, presumption and folly which are shut up within these four volumes, together with one specious quality and one sound gift. The sonority of period with which Mr. Warren has caught the ear of his public,—the deliberation with which, once having got hold of a notion, he works it out, however excellent in themselves as accessory qualities,—must not be allowed to pass for eloquence and imagination; they must not be permitted to supersede that genial appreciation of character which distinguishes drama from melo-drama—'The Merchant of Venice' from 'The Hatchet of Horror.' We hold Mr. Warren's tales and rhapsodies to be bad in point of art,—to be bad in point of nature,—to be bad in point of morals (taking the philosopher's, and not the country-justice's, view of morality),—and say so, without misgiving and without management—since we perceive an attempt made to place them beside the permanent works of the ancient and modern masters of imaginative creation.

After what has been said, we run no risk of being charged with partiality, in declaring that the 'Miscellanies' of Mr. Warren, so far as they are "juridical," afford interesting reading, and exhibit our author's strength as a follower-out of circumstantial evidence, without laying bare those weaknesses on which we have animadverted. His elaborate articles on certain celebrated trials—in particular, the Stirling Peerage case—and his biographical notices of Follett and Smith, come within the sphere of this commendation. Take Mr. Warren away from the sphere of the law, however, and he becomes turgid and unreal. His sketch of 'Calais,' for instance, is twaddle,—fitter for the *Old Lady's Diary* than for *Blackwood's Magazine*. His 'Few Personal Recollections of Christopher North' inform us how instantaneously civil Prof. Wilson was to "the Mr. Warren that gained the prize for English verse," and records for us how that gentleman, when promoted to the honours of sitting at supper opposite to Mr. De Quincey's laudanum bottle, ventured to tell a story of "a man overboard,"—but they will not avail to bring one of the most peculiar literary men of modern times before the eyes of those who never saw him, nor were glorified

by a compliment from him and an invitation to supper!

The Seventh Census of the United States, 1850; embracing a Statistical View of each of the States and Territories, arranged by Counties, Towns, &c. By J. D. B. De Bow. Washington, Armstrong.

In this solid volume we have ten years of United States' history written in figures. The decade from 1840 to 1850 is compared with five preceding decades, from 1790, as well as with similar stages in the progress of various countries in the Old World. Mr. De Bow, under whose superintendence the work was performed, complains that there are defects in the present census system which render errors inevitable. He proposes the establishment of State bureaus for statistical purposes, to keep the accounts and prepare the decennial balance-sheet of the nation. Criticism is thus anticipated,—and judiciously, as many of the returns are obviously inaccurate. Nor would it have been possible with any organization less than perfect to arrange in immaculate tables nearly fifteen millions of figures, collected by different persons, and during several years. The schedules of the Census, comprising 640,000 pages, have been printed on about a hundred tons of paper, and are to be bound in seven or eight hundred volumes; and this body of statistics, classified and indexed, will be stored up in the archives of the Union.

The difficulty of constructing a correct census was enhanced by the vast area over which its statistics had to be taken. Europe is divided into fifty-nine or sixty States, and its territorial surface exceeds only by one-sixth that of the North American Republic, which contains nearly a million of square miles more than the Russian empire. The density of population is far greater, however, in Russia; but this facilitates an enumeration of the people. The public accountant, in America, follows industry into the wilderness, and reckons its gains; watches the rising village, and registers its children; reports on the longevity of the inhabitants in every new hamlet, and marks, in parallel lines, the growth of rival towns. Some of the general results appear inconsistent with the details. Everywhere we remark incessant vitality,—progress continually accelerated,—society ripening and bearing fruit. Yet the first city of the Union would be second-rate in Europe and in Asia. New York, standing at the head of the list, with Philadelphia, Baltimore, Boston, New Orleans and Cincinnati in order below it, has 515,000 inhabitants,—one-fifth of the population of London, one-half that of Paris, and less than that of Constantinople. In the East Indies, Calcutta is threefold as large as New York; and in China—where they juggle with statistics,—nearly two millions of souls are set down as dwellers in Peking, with eight hundred thousand in Nankin, and the same in Canton. Yet it is at Washington that the disparity becomes most striking. The lord of cities, named after the first of American warriors and the first of American statesmen, the political centre, beloved from the Atlantic to the Pacific, has a population of forty thousand,—less than that of many helpless places in Germany, unhappy places in Italy, and hopeless places in Spain. Clearly, the Americans have little tendency to centralization: but Washington is scarcely more than forty years old; it is the seat of grave assemblies, and not of a gaudy court; it leaves commerce to one city, and manufactures to another, and continues in select isolation,—renowned throughout the world, yet not equal in extent to Königsberg, Dantzic, or Bremen.

In the returns, which exhibit the distribution

of employments, some results may be noted that illustrate the special character of American civilization. Population spreads over a surface in agricultural regions, and converges to a point in manufacturing or commercial districts. About five millions—out of the total number of twenty-three millions of souls—are described as persons engaged in distinct occupations. Two millions-and-a-half are addicted to husbandry, one million-and-a-half to trade, manufactures, mechanics and mining, and one million to labour “not agricultural.” Pursuits requiring education absorb about two hundred thousand; the civil service, 24,000; the army only 5,000. In Great Britain ships and factories fill the highest rank of figures, and the land the second; in America the order is reversed. The profession of the sea is followed in both countries by nearly equal numbers, as well as “pursuits requiring education.” The golden catalogue of “persons enjoying independent incomes,” though containing half a million of names in Great Britain, does not occur in the United States Census.

More than two thousand individuals returned themselves as artists, upwards of seven hundred as actors, thirteen hundred as editors, and no more than eighty-two as “authors,” while 355 declare themselves to be publishers. Therefore, one of two things must be understood,—either each American writer produces enough to keep four publishers and a fraction in business; or upwards of three-fourths of the American publishers thrive by piracy and reprint.

The educational statistics are interesting. No less than a million of male adults are described as unable to read or write,—a large number for the United States, though “beautifully less” in comparison with the figures which represent popular ignorance in Great Britain. There are fifteen thousand public and school libraries, containing upwards of 4,600,000 volumes; and two thousand five hundred periodical publications, circulating annually 426,000,000 of copies. Of these 568 are literary, 83 “neutral,” 191 religious, 53 scientific, and 1,630 political.

In a calculation which embraces the entire half-century, the growth of the white population in the several states is marked. Only in one state—Delaware—is a decrease reported, and that in the ratio of 14 per cent. Since 1790, the North-western States, with the territories of Wisconsin and Iowa, exhibit the largest proportionate development in population and wealth; in the second rank stand California, with the territories of Minnesota, New Mexico, Oregon, and Utah; in the third are the Middle States, with the district of Columbia; in the fourth, the New England States; and in the last, those of the South. The Indians within the limits of the Union were reckoned, in 1789, at seventy-six thousand; at present they are five times as numerous; but these statistics point not to an increase of their nation, but to the extension of the confederated territories. Texas alone added a large Indian population.

In the long recapitulation of provinces, counties and cities, some curious and some hallowed names meet our observation. We are amused to find Athens, Corinth and Troy; we notice the singular fancy of giving to districts such names as Anne-Arundel or Angelina; Vermilion and Jasper indicate, perhaps, some natural phenomena; Washington and Franklin are intelligible at once, and do honour to the citizens who named them, as to the men whose acts they commemorate: but Raleigh is a name which makes us pause, to inquire into the fortunes of this city of North Carolina, where the great Englishman planted many a seed of social happiness and political glory. North America no historical associations! Why, the “City of

Raleigh,” though neither ancient nor vast, has more meaning to the readers of English history than all the masonry in the Valley of the Nile, and perhaps not less than many of the castles which, with their fractured walls and moss-wrapped turrets, we cherish among us as temples of the *lares* and *penates* of our land! Raleigh has a population of 4,518. It lies in County Wake, in Carolina,—that “delicate garden, abounding with all kinds of odoriferous flowers,” of which the deputies of the gallant and unhappy knight took possession in the name of Queen Elizabeth. Here did Raleigh determine to found a state and “the city of Raleigh.” In this city, while yet a hamlet, Virginia Dare, the first English child, was born on the American soil; but the hamlet never rose to be a city, and the name of its founder disappeared. James the First gratified himself by consigning a paralytic old man to the block, and by reducing his family to beggary; but Stuart malevolence could not obliterate the traces which the hero of great enterprises had left on the American soil. Nearly two centuries afterwards, the State of North Carolina, by “a solemn act of legislation” revived in its capital “The City of Raleigh,” which gradually prospers, and may emulate in the future the most noble and brilliant cities of Europe.

In such histories there is a perpetual charm. It might appear, at first, as if a heavy quarto volume, replete only with figures, could add nothing to historical romance, and supply nothing more than economical details. But the results exhibited in these “Census Returns,” if systematically studied, contain a marvellous chapter in the annals of human progress. They enable us to compare the American Union with the empires and kingdoms of Europe, and each of its component States with every other. To trace the facts thus communicated through their various relations, and thus to sum up and analyze the statistical history of the Republic, is a difficult task, because the compilers of the work have not placed the results before us in other than a tabular form; but the knowledge thus acquired is worth the trouble of acquiring it.

NEW NOVELS.

Grace Lee: a Tale. By Julia Kavanagh. 3 vols. Smith, Elder & Co.

IN ‘Grace Lee’ there is abundant talent, as there usually is in Miss Kavanagh’s writings; but it has here pleased this lady to write a book “all out of her own head,” as children say, and to leave human life and human probability out of the question. The effect is not pleasant; there is a monotonous unreality which fatigues the reader to no purpose. The story is not only improbable, but the absolute impossibility of it stares the reader in the face and asserts itself in every page. “The realms of imagination,” as they are called, have undoubtedly great resources of their own, and can afford to ignore many of the difficulties and impediments which hinder the ordinary course of worldly affairs,—but they are not altogether superior to the laws of gravitation, and Miss Kavanagh should not exhibit her disregard to these when she professes to deal with men and women. Grace Lee, the heroine, is intended to be an elaborate ideal of a woman “equal to either fortune,” sufficient to herself, and queen over her own will. This may be a grand abstract idea; but the contradictions of human nature are a tribe of wild Arabs, and have never yet been brought “within the belt of rule” by any abstract idea or theory that has ever been put forth,—and to attempt it in a book professing to be a record of life and character is resented by the reader as an attempt to

take him into custody. Grace Lee does not fill out Miss Kavanagh’s intention. She is simply a fantastic, self-willed, eccentric young woman, who loves her own self better than anything else in the world,—and egoism, no matter how disguised or decorated, makes a poor figure when it comes to be dissected, as every one who knows his own heart can testify. Grace Lee, when quite a girl and living with her uncle, an old Catholic priest, and his sister, has a fine fortune left to her—how much, the reader is not told; but apparently it has no limit, for she begins her career of heroine by being perfectly regardless of expense,—indeed, the power of unlimited extravagance seems to be Miss Kavanagh’s notion of enjoying a fortune and making the best use of it. Grace goes out into the world a young woman of one-and-twenty, travels alone, and visits every place of note far and near,—and at the end of one year comes to Rome, where she is the guest of the French ambassadress, and, like Mrs. Jarley and her wax-work, “the delight of the nobility and gentry,” both English and foreign, who are there congregated. Everybody is represented as raving about her, and all the men, of course, wish to marry her,—but she is miraculously clear-sighted, and declines their proposals, whilst she consoles them by magnificent gifts from the fortune for which most of them wished to marry her.

Here is the record of one well-spent day presented to her retrospection by an approving conscience, after her lady’s-maid has retired:—

“Oh life, thou art sweet!” thought Grace as she sat in her room thinking. * * Full of faith and hope with the happy presumption of inexperience; never doubting her power to do good, she smiled at the remembrance of that day. She saw a brother saved from life-long remorse,—a reluctant girl restored to liberty,—a worldly man tasting one sweet drop in his worldly life,—and glorious, though delusive vision, a nation liberated,—all through her!”

Grace Lee has, however, been smitten with a romantic attachment to John Owen, the hero, a poor, proud, cynical young man,—a doctor’s assistant, who leaves that profession to study the law, with the intention of becoming a great man. He is singularly detestable throughout the book, his chief attribute being a remarkably bad temper, not a fine Corsair or Lara-like moodiness, but an unadorned, uncontrolled brutality of nature, such as brings men to the police office. Whilst he is starving and studying, Grace Lee makes her *début* in fashionable life, in London, without a *chaperon*, in a house in Park Lane, furnished like a palace in the ‘Arabian Nights,’ with all the peerage and baronetage paying her the greatest attention, to say nothing of all the literary and scientific Societies, who elect her a Member in spite of herself. She endows charitable institutions with fabulous sums, and answers every begging letter in the affirmative. Between whiles, she endeavours to befriend John Owen and to entice him; but he will not be charmed, and behaves in the rudest possible manner. At the end of two years, however, she has to surrender her splendour, not to bailiffs, as might have been expected, but to a cousin, whom she has been ordered to marry in the event of his becoming free, under the penalty of forfeiting half her fortune if she declines. She declines, of course; and, as her own half is already spent, she gracefully abdicates and retires to live in a cottage in Wales. At first it is a cottage *orné*, for she has still a small competence left to her by her mother. She is always represented as gay and happy, and perfectly content in solitude, never for a moment regretting what she has lost, or feeling a particle of *ennui*. She again meets Mr. Owen, who has retired from the world in

disgust and returned to his old profession of medicine. They see one another several times, but he altogether declines falling in love until—and really Miss Kavanagh must pardon us for saying that it is a very revolting and disagreeable incident—he is called in to attend her for a very malignant fever; and whilst she is lying quite insensible and half exposed, he is struck with her fine form and magnificent proportions, which are described with very unnecessary minuteness and fervour, and is inspired there and then with a *grande passion*. But as he becomes ardent Grace becomes coy: she will not accept him, nor own that she cares for him. She is at this crisis deprived of the remnant of her property, and goes up to London to earn her living by elegant industry, and also to conceal herself from John Owen, who grows rich as she grows poor. The game of cross-purposes, of hide and seek, becomes wearisome exceedingly to the reader as well as to John Owen. All these scenes are morbid and unreal, and not at all interesting. John Owen shows himself detestable; for seven years he goes about trying to marry different women, getting rich, and making “electrifying speeches” in the House of Commons, until one day he suddenly discovers Grace—looking always well and happy—living with her blind uncle, and taking in plain work. They are both old enough to regret their past waywardness; they have a rapturous reconciliation, and live transcendently happy at a fine place that bears the emblematic name of “Eden.”

Miss Kavanagh has great talent,—and it is a pity she should exhaust herself. Our counsel to her is, to leave novel-writing for a while—to allow that field to lie fallow—and to give herself to some other branch of literary labour, until her eye recovers its freshness of perception and her hand its firmness of touch. ‘Grace Lee’ bears traces of fatigue, and is not equal to what she has done, or what she can do.

The Secret History of a Household. By the Author of ‘Alice Wentworth.’ 3 vols. Hurst & Blackett.

It is much to be regretted that authors should betake themselves, as a matter of choice, to illustrate crime and intrigue, when so many subjects of lawful interest, offering “ample room and verge enough” for all purposes of fiction, lie open before them.

It is a mistake to suppose that such topics afford more scope for powerful description and display of psychological investigation: it requires more skill and mastery of art to delineate truly than to exaggerate. A strong stage effect may undoubtedly be produced by placing exaggerated virtues in striking contrast to equally exaggerated incidents of wrong and cruelty; nor is it to be denied that very strong situations may thereby be produced, which shall carry away the reader's interest and disguise the absence of all solid well-elaborated knowledge of the world and “the deep heart of man.” It is the comparative ease with which such results may be produced that beguiles second-class writers of fiction into patchouli-scented creations of vice and virtue, which, by dint of drapery and description, hang together through three volumes, but which, having no life in them, go to corrupt the literature to which they belong. The work before us is one of this class:—with much talent, and the power to interest and carry along the reader, it is as bad and pernicious a book as we ever read. There are no highly-coloured, over-drawn scenes of vice, but there is a total want of all faculty to discriminate between right and wrong,—an entire disorganization of the moral perceptions. Ralph Stapleton, the hero, is represented as a

proud, self-willed, tyrannical man, with no sense of justice, not even possessing the generosity which sometimes does duty for the more Spartan virtue. Divested of the hues of rhetoric, he is a very bad-tempered man; but with all this, he is stately in his bearing, and has the gift of being indescribably and dangerously fascinating to women when he chooses. This gift enables him to add great profligacy to his other claims to be the hero of a novel. He has married a young, innocent girl, entirely to prevent the discovery of an intrigue he has been carrying on with her half-sister; and he is presented to the reader, at the outset of the book, as neglecting his wife and still carrying on intrigues—many and various—with great success. His wife, the heroine of the book, is a small, pale, exquisitely lovely victim-woman, who adores her husband in spite of his coldness and estrangement, and believes him to be the perfection of all that is good, in spite of the attempts to open her eyes by his intimate friend, who has designs upon her,—which, of course, she is far too good and too simple to understand.

Part of the interest of the book is made to turn upon the attachment of Stapleton's only sister to his wife's cousin, to which there is no earthly objection, except the implacable and causeless hatred which Stapleton has conceived against him, and to which, without any scruple, he sacrifices his sister's happiness in the most arbitrary and tyrannical fashion. Although he has no reason to hate his sister's lover, he speedily gives cause for a deadly feud, by proceeding to carry on an intrigue with the young man's sister, a beautiful, coquettish, ill-conducted young widow. When the consequences can no longer be concealed, and discovery is imminent, he goes to his wife, who has resolutely been refusing to believe any evil against him, tells her the whole affair, and appeals to her wifely affection to enable him to save the reputation of his mistress! His wife consents, hoping thereby to win her husband's affection, and the three of them proceed abroad, where they take up their abode in an obscure town in the south of France. During the months of their sojourn, the wife has ample leisure to work out her self-abnegation and generosity, having every day her rival before her eyes,—and the spectacle of her husband's tender solicitude for the safety of his mistress, and the delicate care he takes not to wound her feelings or hurt her susceptibilities, in contrast to the coldness and neglect which she, his wife, experienced when her own children were born. The whole of this horrible and unnatural mode of life,—all the trials, and miseries, and disgusts it develops,—are dwelt upon with painful minuteness. They are dreary and revolting enough; but if such situations must be delineated at all, we are bound to say, that this part of the book is well done after its kind. Of course, the wife's superhuman virtue and self-devotion are intended to be the highest possible model of womanly and conjugal love; and her husband, partly from *ennui* at the inksome position he has brought upon himself, partly from caprice, begins to fall in love with his wife, and, with King Ahasuerus-like magnanimity, resolves to reward her for all her sufferings. But in novels, as in real life, something very particular generally occurs to prevent virtue being rewarded, and poor Mrs. Stapleton is an example of it. Her husband, being the immaculate man he is, has, of course, strong ideas about female propriety, and he listens to calumnies against his wife, which have their origin in false appearances, produced, quite unconsciously, by her zealous efforts to keep her husband's secret. All her further history and trials—to which those of St. Griselda, the mirror of wives, were

little,—must be read to be understood; and, undoubtedly, those who begin the book will not leave it before the end. We appeal, however, to the author (from various indications, we judge her to be a woman), and we ask her, whether to write such tales as the above is either a worthy exercise of her own talents, or calculated to do credit to literature?

Puschkin's Eugene Onägin.—[*Eugen Onägin, von Alexander Puschkin; deutsch von Friedrich Bodenstedt*]. Berlin, Deckersche Hofbuchdruckerei; London, Williams & Norgate.

THAT portion of the European educated world which confines itself to languages usually voted accessible—and, if it has mastered its French and its German, with more or less Italian, thinks it has sacrificed enough time and labour to the comprehension of the modern Babel, and shrinks alike from the Hindostanee and the Slavonic,—is largely indebted to Friedrich Bodenstedt, who having a good knowledge of the Russian language and literature, and having besides a power over German verse which has led to a comparison between himself and the great Rückert, employs his acquisitions and his talent on a close and lively rendering of one of the most celebrated poets of Russia.

The first volume of Bodenstedt's translation of Puschkin contained miscellaneous poems; the second, which is complete in itself, is occupied by the metrical romance of ‘Eugene Onägin,’—or as it might be more phonetically spelt, with reference to the original tongue, ‘Jewgënj Onjagin,’ the letters being sounded on the German principle. This romance is almost professedly the result of a Byronic influence upon the mind of the author. The hero is the proud, dark, *blasé*, misanthropic, gentlemanlike personage who was so fashionable in English literature thirty years ago,—a “Childe Harold,” whom the poet treats in the “Don Juan” fashion, that he may make his work susceptible of any digression, on social or literary subjects, which he may find convenient. Both sides of Byron are thus represented in one poem. The simple but intensely interesting action, the impassioned characters, and the motives, all belong to the earlier period,—the author's way of regarding the events he records, to the later period of the great English poet. At the same time, Puschkin's poem derives a peculiar charm from the fact, that his story is laid in the midst of modern Russian society, and that his desultory manner allows him to touch on all the phenomena of town and country life, on the most varied literary and social topics of the gigantic Empire of the North-East. The inspiring muse is British, but the subjects of her song are thoroughly Muscovite, and of that detailed kind that we do not often find in any books save fashionable novels. Hence, even the chosen few who are blessed with the faculty of reading Puschkin in the original will do well to possess themselves of M. Bodenstedt's translation. Puschkin without notes would be a degree worse than Dante without notes,—but M. Bodenstedt gives a choice little comment, that not only enables the reader to proceed pleasantly, but sets forth many Muscovite facts of life and literature that might not readily be picked up elsewhere.

The story of ‘Eugene Onägin’ is, as we have already said, simplicity itself. The hero, who gives the poem its title, is a young, fashionable gentleman of St. Petersburg, who is completely “used up,” and travels on business to a secluded country village. Here he becomes acquainted with a family named Larin, the most conspicuous objects of which are two daughters, Tatjane and Olga. Tatjane is the heroine of

the tale. Trained up in a simple country life, and utterly unacquainted with the usages of the great world, as represented at St. Petersburg and Moscow, she no sooner sees the young lion from the metropolis than she falls violently in love with him. Shortly afterwards, she goes further still, and actually *makes* love to him, writing him a glowing epistle, worthy of a Heloise. Eugene Onägin, wisely perceiving that his own restless, dissatisfied character contains little to ensure the happiness of an unsophisticated, impassioned creature like Tatjane, kindly repels her, accompanying the repulsion with much excellent advice, and ceases to visit the family. However, Tatjane's "name day" approaches; and Lensky, a neighbour, who is the suitor of the other sister, Olga, and the most intimate friend of Eugene, comes with an invitation to the misanthrope, which can scarcely be declined, as all that has passed between him and Tatjane has remained a profound secret. He, therefore, goes to the family festival, but in a malicious mood, which inspires him to flirt desperately with Olga, and thus to stir the jealousy of both Lensky and Tatjane. Lensky is so deeply hurt that he "calls out" the offender, and is killed in the duel that ensues: whereupon Eugene leaves the village, Olga takes unto herself another admirer, whom she marries, and Tatjane is removed to Moscow, that she may make a brilliant match. A gap now occurs in the progress of events. Eugene, once more in the fashionable world, meets, at a ball, a Prince with a stately young wife,—and that wife is Tatjane, apparently frozen down into an ideal of feminine coldness. She treats her former idol with cutting indifference, which, of course, has the effect of making him fall desperately in love; and it is now his turn to write in passionate strain. The lady becomes colder than ever; but Eugene, at last, steals upon her unawares; and, in the conversation which takes place, she confesses that she loves him still, though she is determined to remain faithful to her husband. With this avowal, she quits Eugene and the apartment,—her husband walks in,—and—the story leaves off. This sudden break is not, be it understood, the result of an untimely accident; but Puschkin feels that he has said his say, and formally takes leave of his reader, his hero and his heroine.

The above simple story is admirably suited for its purpose. The chief characters are few, but they are strongly marked. Tatjane is a passionate creature that any poet might love,—and the whimsical malecontent, Eugene, is well contrasted with his friend and victim, Lensky, who, likewise a Russian, has been educated in Germany, and has come back glowing with the poetical and philosophical enthusiasm of a "Bursch." The subordinate characters, however trifling their importance, all indicate some phase in Russian society, and, however the scene shifts from one kind of life to another, a picture of the fullest detail is presented to the reader.

To convey some faint notion of Puschkin's manner of telling a story, we give an English version of the description of the duel in which Lensky falls. Saretzky, who appears as Lensky's second, is a Russian adventurer, who has been a scamp in Western Europe, but has now settled down into respectability as a Muscovite country gentleman. The stanzas of fourteen lines each, with the rhymes in a fixed order, are uniformly preserved through the whole of the poem.

Lensky was tired of standing still,
And more and more impatient grew;
Saretzky criticized the mill,
As one who well mechanics knew.
Then Eugene came,—apologized
For keeping them.—With look surprised,
Saretzky ask'd, "Where is your second?"
A classic pedant he was reckon'd

In all the lore of honour's school;
And though a duel was a labour
Of love with him, he wish'd his neighbour
Ever to fall by strictest rule,
According to time-sanctioned practice,—
And greatly to his praise the fact is.

"My second is already present—
A friend of mine, Monsieur Le Coq:
I trust I'm doing naught unpleasant,
And no one's prejudices shock.
He cannot boast a noble name,
But is a valet without blame."
Saretzky bit his lips;—Eugene
Requested that they might begin
At once, without procrastination.

Young Lensky nodded, and they walk'd
Straight to the nook: Saretzky talk'd
Apart, engag'd in conversation
With friend Le Coq. The enemies
Stood silent, and with downcast eyes.

The enemies! So lately brought
To this sad strait! That friendly pair
Accustom'd ev'ry deed and thought,
And almost ev'ry meal to share!
And now each seeks the other's life,
As though hereditary strife
Inspired his rage. Such changes seem
The fitful wanderings of a dream.
No doubt this plan would be the best:
To laugh, and then the wrong forget;
Shake hands, not stained with blood as yet,
As if the matter were a jest;
But modern heroism is wont
To have a deal of *mauvaise honte*.

Now with the weapons they begin;
The rifled barrels look so bright:
The charge is quietly put in,
Then ram'm'd until the ball sticks tight.
The lock gives its first boding crack;
They prime the pan, and then draw back
The sharpen'd flint once more. Le Coq
Conceals himself behind a block,
Frighten'd. Each hero now uncases
And flings his cloak upon the ground.
Saretzky with a look profound
Measures out two-and-thirty paces,
Then tells the heroes where to stand;—
The pistol glitters in the hand.

"Now, now advance!"

With equal stride
In coolest blood,—(no aim they take)—
The two advance from either side,
And both of them four footsteps make.
Alas! to death each footstep leads!
Eugene Onägin still proceeds,
And lifts his arm with movement slow.
Another step—a fifth—they go.
With one eye open—'tis the right,—
Lensky takes aim,—not yet expires
An instant, when Onägin fires.
Lensky turns pale. Oh woeful sight!
The pistol quits his powerless hand,
Tott'ring and speechless does he stand.

To reach his wounded heart he makes
One clutch, but with a hand that drops,
His look of death, not anguish, speaks—
He falls,—as from the mountain tops,
Warm'd by the sun, descends the snow,
An avalanche, to the vale below.
A sudden shudder overcame
Eugene, who called his friend by name,
Hast'ning to aid him, but in vain.
The flame which once a poet fired,
Upon its altar has expired.
No traces of warm life remain:
A storm has, with destructive power,
Too early snapp'd the fragile flower.

With lips compress'd, upon the ground
He lies—a terrible repose
Is on his brow; while from his wound
His heart's blood, red and smoking, flows,—
That heart, which was so lately rife
With inspiration and with life,
With youthful recklessness and fire,
With hope, and hate, and warm desire,
To life for evermore is shut:

A mansion uninhabited,
Except by silence, dull and dread.
Together are the shutters put:
The lady is not living there,
She's gone away to—Heav'n knows where!

Sundry *lacunæ*, in the form of constellated dots, where stanzas should have been, are to be found in 'Eugene Onägin.' The cause of this must be sought with the Russian censors, not with the German translator.

Travels of an Arab Merchant in Soudan (the Black Kingdoms of Central Africa). I. Darfur.—II. Wadai. Abridged from the French by Bayle St. John. Chapman & Hall.

THIS book may be described as a piece of good service neatly executed. The task of abridgment is not easy; and its results are often unacceptable to the student, as distinguished

from the smatterer,—since the details, which are necessary to the completion of the picture, are often left out under a mistaken idea that prolixity can be relieved of its tediousness by breaking up a long and heavy work into fragments. Further, Oriental prolixity can only be condensed with any chance of success by one who is familiar with the Oriental style; so that our praise of Mr. Bayle St. John implies more than the wholesale commendation of a writer who has produced a readable version of a strange book on a strange subject.

Stranger subject could hardly be mentioned than the Black Kingdoms of Central Africa. The mysteries of China, even, seem to be more penetrable than the secrets of those vast districts which have allured, by their very obscurity, so many travellers, and from which so few have returned to tell what they have seen and suffered. But it must be borne in mind that "the pious Sheikh Mohammed of Tunis" wrote without the fear of the Geographical Society before his eyes. Though he shows himself an acute observer, he has faith in marvels. Family ties and home affections, as Mr. Bayle St. John remarks in his Epilogue, hang loose about him; though the prime motive of his journey into the Black Kingdoms was the quest of his father. He was born, says Mr. St. John, in his Preface,—

"in 1789, and commenced his travels when a mere boy, inheriting, and always preserving, the character of a trader. * * He travelled with peculiar advantages in countries, one of which, Darfur, has been only once visited by a European, namely, Brown, in 1793; whilst the other has never been described, except in this instance, by an eye-witness. Accurate geographical details are, of course, not to be expected from the Sheikh. He writes from memory, and from an Oriental point of view. But his descriptions of manners, and the general appearance of tribes and regions, are, to all appearance, accurate. They are certainly interesting."

In the above, the work of the Sheikh seems to be characterized fairly, and not in the book-maker's flattering fashion. It was rendered into French by Dr. Perron,—of whose version Mr. St. John's is an abridgment. It may be read, we imagine, with a reasonable amount of credence, as well as with interest; and the credit will be determined by the reader's previous acquaintance with Orientalism. In one respect, however, the Arab Merchant is satisfactory:—he is simple in giving up his authorities, and in stating his qualifications. As an instance, he informs us that his historical facts concerning the Sultans of Darfur were gathered from no roll or record, but from "several old men." Hence his book, without the value of its testimony being impaired by the avowal, acquires a legendary and romantic air, which will recommend it to other readers besides those who may consult it for information. Having said this, without following the Arab Merchant step by step on his travels, we will endeavour to indicate the variety of topics which his revelations touch, and his manner of touching these. First, as to history. To judge from the "old men's tales," a Black King must hold his throne in the midst of a net of peril and conspiracy as complicated as that which used to surround the sovereign ruler of All the Russias. Black Queens have been, in their day, as artful in contrivance and audacious in conspiracy as the Princess Dashkoff herself; and Darfur dishes may contain matter almost as malicious as that celebrated piece of oven-architecture, out of which Sir Geoffrey, the King's dwarf, leaped on to the table, armed cap-a-pie, and danced a saraband.

"One by one, the whole of Abd-er-Rahman's enemies fell before him. It will be remembered that he had promised great privilege and power to the

Yakoury Kinaneh; but, when he had reached the throne, he neglected to fulfil the promises he had made, either on account of business, which occupied him, or because he feared something from this clever woman or her son, Habib. Angry at this indifference, and finding herself forgotten in the harem, and separated from her son, who lived at a distance, the Yakoury set on foot a conspiracy to place Habib on the throne, for she had lost all hope of his elevation, according to the arrangement made, since a new son had been born to Abd-er-Rahman. This prince, however, though he had neglected her, had maintained her in the rank of Yakoury, having supreme authority in the interior of the palace. She set about the execution of her project in the following manner:—'My son,' said she to Abd-er-Rahman, 'wishes to give a great feast, and I should be glad to help him by sending dishes from hence.' The Sultan gave permission, and she accordingly prepared great wooden bowls, and placed therein coats of mail and swords, and put food upon the top, and sent forth a hundred at a time, in order to prepare for an insurrection. Having succeeded the first time, she allowed some days to pass, and again asked permission to send to her son the materials of a second repast. Again the Sultan consented, for he did not suspect that Kinaneh harboured any evil design against him, for he was a man without guile or thought of evil. Kinaneh was successful a second time, and, some days afterwards, she determined to make a third attempt. But, about this time, Abd-er-Rahman perceived, by accident, with Kinaneh, a young girl whom she was bringing up, and who was of high birth and extraordinary beauty. He became enamoured of her, and resolved to speak to the Yakoury, that he might marry her; but Kinaneh, who had seen the effect produced by the girl's beauty, and who destined her for her son Habib, punished her for allowing herself to be seen. This was the cause of the failure of her conspiracy. The girl, angered by her ill-treatment, and knowing of her conspiracy, escaped, and went and spoke secretly to the Sultan, and announced to him that Kinaneh was carrying away weapons from the armoury of his highness, and that all the dishes sent for the festivals concealed cuirasses and swords. 'If you doubt the truth of this,' said she, 'upset one of the bowls which are to be carried forth to-morrow, and you will be convinced.' The Sultan begged her not to speak of what she knew to any one, and she left him agitated and disquieted. Next day Abd-er-Rahman was informed, by a man whom he had set as a watch, that the bowls destined for Habib were about to be carried forth. He went immediately and ordered the covers to be taken off, that he might look at the dishes prepared. Among them was one of which he was very fond, so he said,—'Leave me this, and pour it out into little vases; I want to eat of it.' The slaves were about to obey, when Kinaneh came in hastily, and said,—'Prince, I conjure you not to touch these dishes. I will prepare for you exactly similar.'—'No,' said he, 'for what you may now make may not please me so well.' Kinaneh was obliged to yield, and said,—'Well, let the slaves carry away the others, and keep that one.'—'No,' said he, 'empty it, and when you have filled it again, you may take away the whole together.' So the bowl was emptied, and a cuirass was found at the bottom. 'Oh!' said the Sultan, 'what is this?' Kinaneh was troubled, and knew not what to answer. She was immediately seized, and all the bowls were upset, and found to be full of weapons and money. 'What evil have I done to thee?' said the Sultan to the Yakoury. 'Wherefore dost thou conspire against me?' Kinaneh had nothing to say in reply, and she was immediately put to death. Her son was seized and sent into prison, in the Marrah mountains, and all his wealth was confiscated. As for his accomplices, they were put to death every one, and the country remained tranquil."

There are many other passages of history as curious as this. By way of contrast, we will now show what manner of mischief is still found among certain races in the Black Kingdoms.—

"I shall now say something of the marvellous qualities of some plants of Darfur. I do so with some hesitation, fearing to be accused of falsehood; but there are some extraordinary things which must

be told. The chief properties of these magic plants are in the roots. There exist in Darfur master-herbalists, who have scholars under them. They unite from time to time to go on expeditions, and climb the mountains, and plunge into the valleys in search of plants. They are called in Darfur, Magicians, and enjoy a certain reputation. They are all in rivalry one against another, and in strong competition. They keep their roots in horns of goats, rams, or oxen. * * The Forians also possess roots by which they can do evil to their enemies. There is one which causes death if it be buried in the earth, in the shade of the head of the intended victim, who is at once struck with bewilderment and loses all consciousness, and perishes if a proper antidote be not administered. By similar means any particular member is paralyzed. Others stun people by the smoke of certain roots, collected in a sleeve, which they shake in their faces. The Forians also possess roots, the quality of which is to overcome people with a singular lethargy. They are principally used by robbers, who penetrate with them by night into houses, and if they find the inhabitants awake shake them towards them three times, upon which God shuts their ears and they understand nothing. The robber then comes and goes without fear; and sometimes kills a sheep, skins it, roasts it, and eats some of it, and puts a piece of the liver into the hands of each of the sleepers, and goes away, carrying with him what he wants. A little after the people awake from their trance, and ask one another what kind of man it was they had seen, and what he can have been doing. Then only they discover, but too late, the robbery that has been committed. * * The persons most celebrated in Darfur for their charms and magical doings are the Foulans, or Felatahs. One of them, named Tamourrou, used to perform the most miraculous acts. A person worthy of credit related to me the following instance: 'I went with Tamourrou,' he said, 'from Jedid-kerio to the Fasher; the sun was burning hot; the magician was mounted on a camel; he took his cloak and spread it before him, and then folded it up, and, placing it on his knee, pronounced certain words: afterwards he threw it in the air, and it unfolded and remained spread over him and me like a parasol, as if held by invisible hands. Wherever Tamourrou's camel moved it followed. This was an extraordinary fact. Well, we were proceeding on in the shade, when suddenly the rain came on and fell in torrents. Upon this Tamourrou said to his servant, who was following him on foot: 'Give me a handful of sand,' and having pronounced certain words, whirled his hand round his head in a circle, scattering the sand as he did so. The rain-cloud immediately separated, one part going to the right and the other to the left, and we continued our route without having a thread wetted.' It is also related that some people have the power of paralyzing whoever attempts to attack them. But the most extraordinary facts are those which are related of the Massalls and the Temourkehs, who have the power of metamorphosing themselves into different kinds of animals. All the Forians say that the former can change into hyenas, cats, and dogs, and the latter into lions. Another extraordinary thing related of the Temourkehs is that, according to their own account, three days after their death, they resuscitate and come out of their tombs, and go into other countries to marry again, and accomplish a second life. In Darfur, every one acknowledges that the Sultan has under his orders a number of men having the power of metamorphosing themselves. They are used as agents and ambassadors. If they are in danger of being seized, they transform themselves into air or wind. I once became very intimate with one of these people, and at length ventured to speak on the subject of his wonderful power, but he turned aside the conversation, and avoided a direct answer. Another time I pressed the question closer, upon which he smiled, and said:—'I did not think you were so simple as to believe all that is said on this subject.' Then he talked of other things, and soon left me, and from that time forward, whenever he met me he turned aside, and our acquaintance utterly ceased."

—If we recollect right, an air-trick, something like the one described in the extract, is commemorated in the 'Memoirs of the Emperor

Baber,' when the feats of the Indian jugglers are spoken of. After all, we suspect that there are as few primal varieties in prestidigitation as in fiction; and that the connexion among the sorceries of cunning impostors of all countries is as intimate as the secret tie of masonic intercourse. But the Arab Merchant spoils all, by having honestly given the rebuke to his credulity administered by the man-metamorphoser. There is a touch of modern scepticism in it, such as would argue that intellectual incredulity may, through some crevice or other, be creeping into even the Black Kingdoms of Central Africa. If it be so, farewell to their unbroken silence and mystery. We shall have the trader there ere another half-century; and with trade will arrive teaching, for better for worse. With or without such prophecy, however, and all the speculation which comes in its train, this book is a pleasant and peculiar volume of reading, which after it has been read may take its place in every miscellaneous library.

The Life of Horace Greeley, Editor of the New York Tribune. By J. Parton. New York, Mason.

HERE is a biography of four hundred and twenty-four closely-printed octavo pages. On a rough calculation, it is about twenty times as big as the 'Agricola' of Tacitus,—nearly twice as big as the whole Twelve Cæsars of Suetonius,—and occupies about half the space which Johnson found necessary for his 'Lives of the Poets.' Mr. Greeley has no reason to complain; but we cannot say as much for the reading public, which ought to have been consulted in the matter as well as Mr. Greeley. We are told, indeed, in the Preface that he is "innocent of the book;" but, at the same time, the author's statement shows that he must have approved of its being written. It is, indeed, a work as curious in its way as Mr. Barnum's "woolly horse," which that gentleman described in a bill as "Nature's last." Under that aspect, we propose to look at it. "Nature's last" it may be appropriately enough styled; and if it prove Mr. Parton's last, nobody—not even Mr. Greeley—need very much regret it.

The custom of writing the biographies of men still alive appears to be gaining ground. It is a very singular one—so singular, that only in China do we know any custom similarly odd. That strange people (according to M. Huc) present each other, occasionally, with a handsomely-painted wooden coffin, in pleasant anticipation of the final day. Mr. Parton has made Mr. Greeley just such a gift. Generally speaking, we should think it the most delicate matter possible to talk to a man about his "biography,"—the very mention of which seems to smack of the odours of the funeral pile. But Mr. Parton takes his friend's measure in a business-like manner—scans him—weighs him, even—notes the dimensions as carefully as an undertaker's apprentice—and produces, as the result, an object similar in its oddity (and still more, in its material) to the Chinese presents we have mentioned. How far this custom of writing biographies of the living will ultimately conduce to the well-being of nations, it would be difficult to say. It would seem (we venture to think) slightly injurious to the general cause of private modesty, literary delicacy, and historical impartiality. But the inquiry would lead us too far; and we are somewhat re-assured by our conviction, that nothing could so effectually discredit it as its being done in the style in which it has been done in the work before us.

At one time, we thought Mr. Parton a wag, who, having been injured by the *Tribune*, was

revenging himself in an elaborately ironical performance. But a further acquaintance with Mr. Parton's powers of humour induced us to abandon this superficial notion. We found that he was solemnly in earnest,—when, strange to say, he became more amusing than ever. Finally, we thought his work so curious, in all its particulars, that we resolved that our readers should enjoy,—in the idolatry of Mr. Greeley by Mr. Parton,—a treat, which the *intentional* humour of the worshipper, we fear, would never afford them. We shall best serve our purpose by a well-selected series of extracts. In our first, we begin with the infant Greeley—having taken the great liberty of skipping some fourteen pages about his father, grandfather and grandmother.—

"There, on the 3rd of February, 1811, Horace Greeley was born. He is the third of seven children, of whom the two elder died before he was born, and the four younger are still living. The mode of his entrance upon the stage of the world was, to say the least of it, unusual. The effort was almost too much for him, and, to use the language of one who was present, 'he came into the world as black as a chimney.' There were no signs of life. He uttered no cry; he made no motion; he did not breathe. But the little discoloured stranger had articles to write, and was not permitted to escape his destiny. In this alarming crisis of his existence, a kind-hearted and experienced aunt came to his rescue, and by arts, which to kind-hearted and experienced aunts are well known, but of which the present chronicler remains in ignorance, the boy was brought to life. He soon began to breathe; then he began to blush; and by the time he had attained the age of twenty minutes, lay on his mother's arm, a red and smiling infant. In due time, the boy received the name of Horace. There had been another little Horace Greeley before him, but he had died in infancy, and his parents wished to preserve in their second son a living memento of their first. The name was not introduced into the family from any partiality on the part of his parents for the Roman poet, but because his father had a relative so named, and because the mother had read the name in a book and liked the sound of it. The sound of it, however, did not often regale the maternal ear; for, in New England, where the name of the courtly satirist is frequently given, its household name is 'Hod'; and by that elegant monosyllable the boy was commonly called among his juvenile friends."

—This is perfect.

In his youth, Mr. Greeley was fond of fishing—read a weekly newspaper—showed remarkable intelligence—and lived among a population in New Hampshire much addicted to rum:—so his biographer tells us in the space of another twenty pages. Family difficulties began, it appeared, about the time of his tenth year. He was then removed to Westhaven, Vermont. But what was his personal appearance in youth?—

"More than three garments at the same time Horace seldom wore in the summer, and these were—a straw hat, generally in a state of dilapidation, a tow-shirt, never buttoned, a pair of trousers made of the family material, and *having the peculiarity of being very short in both legs, but shorter in one than the other*. In the winter he added a pair of shoes and a jacket. During the five years of his life at Westhaven, probably his clothes did not cost three dollars a year; and I believe that during the whole period of his childhood, up to the time when he came of age, not fifty dollars in all were expended upon his dress. He never manifested, on any occasion, in any company, nor at any part of his early life, the *slightest* interest in his attire, nor the *least* care for its effect upon others. That amiable trait in human nature which inclines us to decoration, which makes us desirous to present an agreeable figure to others, and to abhor peculiarity in our appearance, is a trait which Horace never gave the smallest evidence of possessing."

—We are sorry to find Mr. Parton at fault, here. He is negligent. He does not tell us *which* of

the two legs of Mr. Greeley was shorter than the other. But he makes up further on.—

"A few months after, it may be as well to mention here, Mr. Greeley removed to Erie county, Pennsylvania, and bought some wild land there, from which he gradually created a farm, leaving Horace alone in Vermont. Grass now grows where the little house stood in Westhaven, in which the family lived longest, and the barn in which they stored their hay and kept their cattle, leans forward like a kneeling elephant, and lets in the daylight through ten thousand apertures. But the neighbours point out the tree that stood before their front door, and the tree that shaded the kitchen window, and the tree that stood behind the house, and the tree whose apples Horace liked, and the bed of mint with which he regaled his nose. And both the people of Westhaven and those of Amherst assert that whenever the Editor of the *Tribune* revisits the scenes of his early life, at the season when apples are ripe, one of the things that he is surest to do is, to visit the apple-trees that produce the fruit which he liked best when he was a boy, and which he still prefers before all the apples of the world."

It will not be in our power to follow every step in Mr. Greeley's career with Mr. Parton's minuteness. If his style has a fault, it is a slight tendency to prosaic detail. Mr. Greeley became a printer—and his fellow-workmen daubed him with ink—and he joined a debating society in "East Poutney," in which he was a "real giant"—and so forth. We reluctantly omit a passage about his "first over-coat," and a long account of "a sore leg" he had in his youth. In the course of a hundred and twenty pages, the biographer brings him to New York. He started the *New Yorker* in 1834; or, in Mr. Parton's language, "the dream of editorship revived in the soul of Horace Greeley!" He wrote poetry, too, in the *New Yorker*; and as Mr. Parton must not have all the fun to himself, we shall allow his demi-god to contribute his share.—

"A series of poems, entitled 'Historic Pencilings,' appear in the first volume of the *New Yorker*, over the initials 'H. G.' These were the poetized reminiscences of his boyish historical reading. Of these poems, the following is, perhaps, the most pleasing and characteristic:—

Nero's Tomb.

* When Nero perished by the justest doom, *
Some hand unseen strewed flowers upon his grave."—*Dryden.*

The tyrant slept in death;
His long career of blood had ceased for ever,
And but an empire's execrating breath
Remained to tell of crimes exampled never.
Alone remained? Ah! no;
Rome's scathed and blackened walls retold the story
Of conflagration's broad and baleful glow.
Such was the halo of the despot's glory!

And round his gilded tomb
Came crowds of sufferers—but not to weep—
Not theirs the wish to light the house of gloom
With sympathy. No! Curses wild and deep
His only requiem made.
But soft! see, strewed around his dreamless bed
The trophies bright of many a verdant glade,
The living's tribute to the honored dead."

Mr. Greeley became a partner with Mr. Thomas M'Elrath. They were joint partners in the *Tribune*. Our biographer is seized here with "the enthusiastic fit."—

"A strict disciplinarian, a close calculator, a man of method and order, experienced in business, Mr. M'Elrath possessed in an eminent degree the very qualities in which the editor of the *Tribune* was most deficient. Roll Horace Greeley and Thomas M'Elrath into one, and the result would be a very respectable approximation to a Perfect Man. The two, united in partnership, have been able to produce a very respectable approximation to a perfect newspaper. As Damon and Pythias are the types of perfect friendship, so may Greeley and M'Elrath be of a perfect partnership; and one may say, with a sigh at the many discordant unions the world presents, Oh! that every Greeley could find his M'Elrath! and blessed is the M'Elrath that finds his Greeley."

Blessed—may we not add?—is the Greeley who finds his Parton!

But Mr. Greeley, it seems, visited England at the time of the Exhibition. We shall here see what Mr. Greeley thought of England. He does not appear to have got as much amusement out of us as we—thanks to his biographer—have had out of him.—

"On the first of May the Great Exhibition was opened, and our traveller saw the show both within and without the Crystal Palace. The day was a fine one—for England. He thought the London sunshine a little superior in brilliancy to American moonlight; and wondered how the government could have the conscience to tax *such* light. The royal procession, he says, was not much; a parade of the New York Firemen or Odd Fellows could beat it; but then it was a new thing to see a Queen, a court, and an aristocracy doing honour to industry. He was glad to see the Queen in the pageant, though he could not but feel that her *vocation* was behind the intelligence of the age, and likely to go out of fashion at no distant day; but not through *her* fault. He could not see, however, what the Master of the Buck-hounds, the Groom of the Stole, the Mistress of the Robes, and 'such uncouth fossils,' had to do with a grand exhibition of the fruits of industry. The Mistress of the Robes *made* no robes; the Ladies of the Bed-chamber did nothing with beds but sleep on them. The posts of honour nearest the Queen's person ought to have been confided to the descendants of Watt and Arkwright, 'Napoleon's *real* conquerors;' while the foreign ambassadors should have been the sons of Fitch, Fulton, Whitney, Daguerre and Morse; and the places less conspicuous should have been assigned, not to Gold-stick, Silver-stick, and 'kindred absurdities,' but to the Queen's gardeners, horticulturists, carpenters, upholsterers, and milliners! (Fancy Gold-stick reading this passage!) The traveller, however, even at such a moment is not unmindful of similar nuisances across the ocean, and pauses to express the hope that we may be able, before the century is out, to elect 'something else' than Generals to the Presidency."

Mr. Greeley made a speech—and it was "not published in the newspaper report of the banquet!" We think we can trace a connexion between the omission and the following paragraph.—

"The sights in and about London seem to have made no great impression on the mind of Horace Greeley. He spent a day at Hampton Court, which he oddly describes as larger than the Astor House, but less lofty and containing fewer rooms. Westminster Abbey appeared to him a mere barbaric profusion of lofty ceilings, stained windows, carving, graining, and all manner of contrivances for absorbing labour and money—'waste, not taste; the contortions of the sibyl without her inspiration.' The part of the building devoted to public worship he thought less adapted to that purpose *than a fifty-thousand dollar church* in New York."

Is it possible that the English people neglected a man of whose wit, good manners, good sense, and good taste, such specimens can be produced by a biographer as we now subjoin?—

"He seems never so happy as when he is at bay, and is never so funny as when he is repelling a personal assault. I have before me several hundreds of his editorial hits and repartees, some serious, more comic, some refuting argument, others exposing slander, some merely vituperative, others very witty, all extremely readable, though the occasions that called them forth have long passed by. My plan is to select and condense a few of each kind, presenting only the *point* of each. * * In reply to a personal attack by Major Noah, of the Union, he begins, 'We ought not to notice this old villain again.' On another occasion, 'What a silly old joker this last hard bargain of Tylerism is!' On another, 'Major Noah! why *won't* you tell the truth once in a century, for the variety of the thing.' On another, 'And it is by such poor drivels as this that the superannuated renegade from all parties and all principles attempts to earn his forced contributions and "Official" advertisements! Surely his latest purchasers

must despise their worn-out tool, and most heartily repent of their hard bargain." * * "Mr. Benton! each of the above observations is a deliberate falsehood, and you are an unqualified villain!"—"The *Express* is surely the basest and paltriest of all possible journals."

"If Horace Greeley were a flower," says this irresistible writer, "botanists would call him 'single.'" Our readers who have seen some of the leaves can determine what flower they would liken him to without our assistance.

But before we part with Mr. Parton, we must hear him on his hero's "white coat." It is not generally known in England, we fear, that Mr. Greeley wears a "white coat"; but Mr. Parton evidently thinks that it is one of the most important and widely-known facts of the age. He inserts a letter from an enthusiastic youth (of his own calibre) who visited Mr. Greeley, on which occasion the great man made the important declaration which we have put in italics, and which will for ever set a high and disputed question at rest.—

"As I passed the hat-stand in the hall, I said, 'Here is that immortal white coat.' He smiled and said, 'People suppose it's the same old coat, but it isn't.' I looked questioningly, and he continued, 'The original white coat came from Ireland. An emigrant brought it out; he wanted money and I wanted a coat; so I bought it of him for twenty dollars, and it was the best coat I ever had.'"

One thing only was left for this biographer when he drew towards the end of his long "Life." That was, to describe his hero's person. He has done it in a passage which we deliberately pronounce the gem of the book.—

"Horace Greeley stands five feet ten and a half inches, in his stockings. He weighs one hundred and forty-five pounds. Since his return from Europe in 1851, he has increased in weight, and promises to attain, in due time, something of the dignity which belongs to amplitude of person. He stoops considerably, not from age, but from a constitutional pliancy of the back-bone, aided by his early habit of incessant reading. In walking, he swings or sways from side to side. Seen from behind, he looks, as he walks with head depressed, bended back, and swaying gait, like an old man; an illusion which is heightened, if a stray lock of white hair escapes from under his hat. But the expression of his face is singularly and engagingly youthful. His complexion is extremely fair, and a smile plays ever upon his countenance. His head, measured round the organs of Individuality and Philoprogenitiveness, is twenty-three and a half inches in circumference, which is considerably larger than the average. His forehead is round and full, and rises into a high and ample dome. The hair is white, inclining to red at the ends, and thinly scattered over the head. Seated in company, with his hat off, he looks not unlike the 'Philosopher' he is often called; no one could take him for a common man."

The descriptive talent here is of a peculiar character, however,—the kind of talent which is confined, in this country, chiefly to the *Hue and Cry*. But Mr. Parton has a right to choose his own style,—and we are far from saying that he is not equal to the subject. We thank him for another Curiosity of Literature.

THE WAR.

To assist the discussion on Army Reform, Mr. H. Bryerley Thompson, author of a treatise on the Laws of War affecting Commerce and Shipping, has compiled a volume on *The Military Forces and Institutions of Great Britain and Ireland; their Constitution, Administration, and Government, Military and Civil*. (Smith, Elder & Co.)—Desirous of interesting the public, as well as of serving the profession, he has interwoven with the contents of an officer's manual an outline of English history in its relation to military establishments. A plain description of the regular army and of the militia; a recapitulation of the methods by which they are organized and kept

in a state of efficiency—and inefficiency; an abstract of the laws which affect them; and a review of the system by which promotions are regulated, form the contents of the work, in addition to notes on miscellaneous topics connected with the pomp and circumstance of war. Mr. Thompson cites in his text the authority of Dupin—the ablest French writer on English military affairs—of several judges, generals, and legal essayists, but refrains from arguments on general theories. The object he proposes is, to furnish information of special as well as of popular utility: and so far his book is a serviceable publication. The author, however, would have done more service to the state had he applied some critical analysis to his subject, and brought the vexed opinions of the day to the test of practical examination. Of manuals we have enough; a writer who asks for a long hearing ought to have views of his own, and an original manner of explaining them.

The distinction suggested by Mr. Thompson between the British and Continental armies begins with the system of enlistment. Here a man selects the military service, as he selects any other calling; but, once selected (due time being given for reflection), it is not his choice, but his fate. He and his flag are wedded for the best days of life, and any attempt to break the bond leads to punishment and infamy. In the other states of Europe, though voluntary enlistment is not excluded, all men are liable to bear arms for a shorter or longer period. Nearly every citizen is or has been a soldier; before his time arrives, he is taught to expect it with ardour; afterwards, he recurs to it with pride. Such, at least, is the Continental ideal; which we may accept, if a courteous silence be maintained as to the horror with which the martial yoke is regarded by peasants and artificers who understand the word *independence* better than the word *glory*.

The inhabitants of large towns who are tired of factories, and agricultural labourers who are tired of the field, appear to make up the bulk of the English army. The former are the more turbulent, the latter the more patient; but both classes in the aggregate, though once supposed to represent idleness grown desperate or profligacy become destitute, have gained an historical character as the steadiest in battle, the most forbearing in victory, the most honest on their marches, of any soldiers in Europe.

Mr. Thompson, after a categorical description of the army in its several branches, touches on the subject of commissions, and states that "gentlemen who have been pages to the Queen invariably obtain commissions in the Guards when they attain the age of sixteen." He adds, "with very few exceptions, the rank of field-marshal has been limited to princes, who never commanded an army; the highest military office of dignity may therefore be regarded as merely a titular rank or sinecure." Sometimes, however, military honours have been obtained, as civil salaries occasionally are, by payment of a surreptitious fee, or by what Lord Chancellor Henley called "a contract of turpitude." Mr. Thompson has a good story to tell *à propos* of this. A person named Morris gave 200*l.* to a linen-draper named Mc-Culloch, who, through the influence of a lady, acting first on a captain, and then on an admiral, procured him a commission in the marines. The linen-draper had three-fourths of the money, and the lady one-fourth. But Mr. Morris, having messed with his brother officers for six months, was discovered by them to have been—at one epoch of his life—a livery-servant: whereupon they would not march with him through Coventry; they shunned his society, refused him a place among them, and complained to the Admiralty. In due course

the Admiralty returned its answer, and Morris was discharged "for having been a livery-servant." On a trial which followed for the recovery of his money, it was proved that the gallant gentlemen of the marines had nothing to complain of, except that their companion "had been" something which he was not then.

The successive chapters of Mr. Thompson's work are illustrated and enlivened by the introduction of similar instances from the records of military administration. Many of these are of a surprising nature; and in some of them, as we believe, may be discovered evidences of long-established modes of thought and feeling prevalent, not in the army only, but among all sorts and conditions of people in this country. The subject is distributed into its proper divisions, and is treated in a practical, if not in a critical, manner.

Mr. Bright's 'Letter on the War' has elicited a formal *Reply* from Mr. John Coleman (Hatchard). The argument of his pamphlet is made up of materials which journalism has well nigh exhausted:—the story of the Holy Places—the policy of Lord Aberdeen—the despatches of Sir Hamilton Seymour—the Vienna Note—the diplomatic attitude of the Ottoman Porte, and the occupation of the Danubian Principalities. Mr. Coleman is painstaking and tedious. His enthusiasm explodes in monstrous figures of speech, and his efforts at sarcasm result in mere imitations of Burke and Junius. We cannot assign any value to such a statement of a great public question. Mr. Coleman's prejudices incapacitate him from making a logical use of the facts he has compiled from blue-books and newspapers. He confuses his narrative by the discussion of irrelevant topics, and finds an excuse for pronouncing, in terms at once gross, flippant and ridiculous, on historical parties and characters, which he vituperates without comprehending. A sense of propriety should have induced him to expunge from his pages certain expressions which are too repulsive for quotation. We are much mistaken if English readers will elect such a declaimer as their champion against the doctrines of any man or party. The vindication of the Russian war, the plea of England before Europe, the companion to the alluring rhetoric of Burke's 'Reflections,' and to the persuasive but monotonous reasoning of Mackintosh, has yet to appear. None of the War pamphlets have made themselves felt by the nation. Mr. Coleman assails some of the purest public characters and most admirable writers of the age with language which is simply discreditable to himself. Moreover, his style is a compound of incorrectness and inflation. The last French Constitution was (in the same metaphorical paragraph) first "created," then "begotten," then "cradled." It had "defects" which at every "step" "bespoke" its origin. Next it "drifted about,"—then it was a "Gordian knot," and so forth:—the entire pamphlet displaying no more than a plenitude of commonplaces, distended into a volume by the inflation of Mr. Coleman's style.

Alexander von Humboldt's Preface to Prince Waldemar's 'Travels'.—[Vorwort von Alex. v. Humboldt zu den 'Erinnerungen der Reise nach Indien von S.R.H. dem Prinzen Waldemar von Preussen'.]

THIS *éloge* or prospectus, which is issued separately, serves to announce a work apparently of almost unprecedented splendour. The brother and two sisters of the late Prince Waldemar of Prussia—namely, Prince Adalbert of Prussia, Princess Elizabeth of Hesse, and Queen Maria of Bavaria—have united together to publish in grand style the result of his scientific voyage

to India, and thus to raise a monument to his memory. More than 100 plates executed by Herren Bellermann and Kretschmer, after sketches by the princely traveller, are to illustrate the letter-press.

Prince Waldemar, who was engaged in the operations against the Sikhs under Sir Henry Hardinge, and was afterwards well received in this country, was the son of Prince William, uncle to the present king. A journey over the Swiss Alps and through Italy, in the company of his father and his elder brother, Adalbert, who has himself acquired a reputation for scientific travel by his expedition to Brazil and the Amazon River, seems first to have inspired him with the desire to visit the great Oriental Peninsula, where he hoped at once to satisfy his thirst for knowledge and to gain military experience by joining the English army. The chosen companions of his voyage were all men of good reputation,—viz., Count von Oriolla, who had accompanied Prince Adalbert on his Brazilian expedition, Count von der Gröben, Carl Werner, a subaltern officer, who had already seen Indian service, and Dr. Werner Hoffmeister, the distinguished naturalist, who unfortunately fell in one of the battles against the Sikhs, at the early age of twenty-six, having established an European reputation by his 'Briefe von Indien,' which were translated into English directly after their publication in Germany.

The Prince set off in the beginning of September, 1844. Having visited Egypt, Corfu, and Athens, he landed at Ceylon in the middle of the following November, and reached the mouth of the Ganges in the beginning of January 1845. This part of the expedition is described in the first section of the work. The second section is devoted to a journey through Hindostan, which comprised Patna, Catmandu, Benares, Delhi, and Naini Tal;—the third to an excursion in the Himalayas, which lasted from May to October;—and the fourth to the campaign against the Sikhs and the return of the Prince by the way of Bombay. This return was followed in about two years and a half by the death of the traveller, who expired at Munster, on the 17th of February 1849, having only completed the thirty-third year of his age.

The materials left by the young Prince for the benefit of posterity consisted of a journal, which had been regularly kept, but did not reach further than the beginning of the second section of the edited work,—of a number of isolated notes and observations,—and of epistolary correspondence. The posthumous writings of Dr. Hoffmeister have also been used, and a most important addition to the manuscripts is a series of sketches made by the Prince, and partly lithographed during his lifetime.

Count Oriolla, the companion of the Prince during the expedition, has done good service in preparing the record for publication. At his suggestion, an introduction has been prefixed to each of the four sections; and he has entirely taken upon himself that portion of the work which comprises the Himalayas and the incidents of the campaign,—making use of his own reminiscences, notes and plans, to render it as complete as possible. Count von der Gröben, who also belonged to the party, was to have re-written the text of the first volume, but as he had not leisure sufficient for the undertaking, this part of the work has been placed under the superintendence of Herr H. Mahlmann, a distinguished geographer, who has also furnished a series of maps.

And let us not forget the fact with which we set out:—the princely work, published under the auspices of royalty, has the honour of being introduced to the world by a preface

written by the illustrious Alexander von Humboldt.

OUR LIBRARY TABLE.

History of the Arabs. By L. A. Sédillot. (Paris, Hachette.)—M. Sédillot belongs to a family distinguished for their studies in connexion with Arabian literature. His father, M. J. J. Sédillot, translated from the original Arabic the astronomical work of Abu'l-Hasan Ali, which was written in the thirteenth century, and this translation, in 1809, gained one of the great decennial prizes granted at Paris. His brother, M. Ch. Sédillot, wrote a history of the campaign of Constantine,—and he has himself contributed several valuable papers to the *Journal Asiatique*. In the volume before us he presents us with a manual of Arabian history,—the fruit of extensive reading and research. In a work necessarily so condensed there is, of course, but scanty room for description. Events are chronicled as concisely as possible, so that it is unnecessary to give lengthened extracts, when the only question that can be raised is one of truthfulness, not of style. In general, the correctness of M. Sédillot's facts cannot be impugned. Occasionally, however, we perceive some inaccuracies. Thus, at page 161, the Arabs are said to have overrun the plains of Kashmir in the early part of the eighth century after Christ, whereas there is no solid ground for thinking that, at that time, they penetrated further than Multán. At the next page, in the account of Muhammad bin Kásim's death, the story of his accusation by Dabir's daughter, which is supported by the concurrent testimony of all Mohammedan writers, is omitted, and a different turn given to the narrative. At page 193, Yákúb is said to have been arrested by death, in the midst of his triumphant career, in 879, and his brother and successor to have made peace with Motamed, and obtained the recognition of his sovereignty, in 877. Nor can we accord our belief to what is said in the concluding chapters of the intrigues of the English in Arabia. That the British Government took the Wahabis into pay to oppose the League which M. Lascaris is said to have formed in Arabia, or that it made use of Lady Hester Stanhope's influence with the Bedouins for that purpose, is, we venture to aver, a mere fancy. Still less can we believe that a battle took place at Hamah, between 100,000 of the said Wahabis and 80,000 Arabs, in the French interest. These things wear too exaggerated an aspect. For the rest, M. Sédillot's book may, in general, be commended as a useful summary of the progress and decline of Islam.

Remarks on the Right Hon. J. W. Croker's Review of the 'Memoirs of Thomas Moore,' in the Quarterly. By Nemesis. (Orr & Co.)—The readers of the *Athenæum* need not be reminded that Mr. Croker the Right Honourable, and Mr. Croker of antiquarian memory, appear to have been tormented with an active desire to lessen the fame and to darken the reputation of the Author of the "Irish Melodies." "Nemesis," fortifying his title-page with a slashing quotation from the Right Hon. *Quarterly* reviewer, thinks that there has been too much of this bitter work, and criticizes the critic in the little pamphlet before us. The intention is generous; and the execution is not amiss. "Nemesis," however, comes into court against an antagonist as implacable, and as full of quips and devices in the pursuance of his "pound of flesh" as *Shylock's* self,—at all events, these "Remarks" do not contain any such lightning flash as *Portia's* point of law, whereby malice was silenced, and the whetted knife was stricken out of the hands of paralyzed revenge. There is little fear that Posterity will not be just to the Irish Melodist, with all his littleness on the surface,—also, to the Right Honourable reviewer, with all his greatness in the background.

Quicksands of Fashion. By Mrs. Martin Lucas. 3 vols. (Newby.)—Those who wish for plenty of incident and a complicated plot, with distressed innocence, heartless villains, angelic benevolence and black ingratitude,—with faithful servants, incredible turns of fortune, dark intrigues and heart-rending distresses—all issuing, however, in vice

being punished and virtue rewarded,—may find in this novel their taste amply gratified. It is not remarkable for its probability or for its knowledge of human nature; but it hangs together, and is more readable and amusing than many novels of greater pretension.

Married Women: a Novel. By the Author of 'Broomhill; or, Country Beauties.' 3 vols. (Newby.)—We have read this novel ourselves with much pleasure, and we have no doubt that many others will do the same. If rigidly criticized, the story will be found straggling:—it concerns too many people, who are all independent of each other, and do not work together to produce any unity of result. But, notwithstanding this, the book is extremely interesting, and, what is more, the tendency is healthy and unexceptionable. The characters are well and firmly drawn. Our favourite is little "Millie," the girl-wife of Capt. St. Clair Glenny; who, in his turn, is an excellent sketch, very like life. Some of the scenes evince quiet power and force of delineation, without ambitious straining after effect.

The Baths of France, Central Germany, and Switzerland. By Edwin Lee. (Churchill.)—Those who are seeking health by bathing in or drinking the mineral waters of France and Germany will find Mr. Lee's judicious notices of great value. The work will also serve as a guide to the medical man in directing his patients.

Mesmerism proved True. By the Rev. Chauncy Hare Townshend, A.M. (Bosworth.)—An article in a recent number of the *Quarterly Review* seems to have done considerable damage in public estimation to the so-called sciences of Mesmerism, Phreno-Mesmerism, Electro-Biology, and Odylism. The reviewer having pointed out in a very lucid manner the numerous errors into which the cultivators of these delusions had fallen, it was not to be expected that they would sit down quietly under the rebuke administered; and in this work the Rev. Chauncy Hare Townshend has undertaken to do battle on behalf of mesmerism. We cannot congratulate the reverend author on the tone and style of his volume, both alike inconsistent with the dignity of science and the love of truth. It is very evident that the reviewer has indicated the method by which all the marvels of mesmerism may be reduced to the laws which are known to regulate human thought and action. It is to this the mesmerists object. On the one hand, they have misinterpreted the facts presented to them; and on the other, been led away by the impositions of those they have operated on. They are ashamed to confess their weakness; and Mr. Townshend is only striving to be consistent in this protest against the reviewer's arguments. It is very clear, however, that he has neither the knowledge of the subject, nor the logical power, of the accomplished physiologist who is reputed to be the author of the offending review in the *Quarterly*.

St. Louis and Henry the Fourth; being a Series of Historical Sketches. By J. H. Gurney. (Longman & Co.)—Mr. Gurney undertakes to describe, for young persons, the events of great epochs, and to surround the leading names of history with such accessories of incident and character as may suggest them correctly to the student's mind. In executing his task, he adopts an unassuming style, and tries rather to stimulate the attention of his reader than to imbue his mind with strong opinions and force a premature judgment on subjects at all times difficult and involved. His narrative of St. Louis's career is full of such details as are likely to interest those to whom it is addressed; while in his account of Henry the Fourth he has avoided the common error of school historians, and has not copied Voltaire, whose 'Henriade'—like his 'Life of Peter'—is a tissue of romantic eulogy. Mr. Gurney produces a more faithful portrait, though it is impossible not to feel that, while the true story, roughly told, is forgotten and neglected, one generation after another of readers will still be enticed, by a charming style, to Voltaire's pages, though their historical worthlessness has been acknowledged, and though the little sentimental sayings—the philanthropic epigrams—of the monarch have ceased to be balanced against his portentous acts of vice and cruelty.

Mary Howitt's Illustrated Library for the Young. Part I.—Human Habitations. (Cassell.)—This is an instructive and amusing work for little people. The illustrations are pretty, and the type is good. The price, we are glad to see, places it within the reach of poor men's children; and the pictures are such as may be copied by the nursery artist, with profit and pleasure, at the winter hearth.

The House that Jack Built Philosophically Considered and Practically Illustrated. (Cox & Co.)—There must be great paucity of invention when a person takes up such an old nursery rhyme as 'The House that Jack Built' to explain and illustrate without having some fancy to ingraft upon it or some moral to serve. The language here used is unsuited to the vocabulary of those children who are interested in the adventures of Jack's domestic animals, and the likenesses of these useful quadrupeds are anything but faithfully represented.

Something to Laugh at: a Book for all Circles and all Seasons. (Piper & Co.)—Most people will find 'Something to Laugh at' no laughing matter. It is evidently written for the "fast boys" of the day, and carries out its title, if coarseness be the same thing as fun. There is a "yarn," which will amuse those young gentlemen who have a fancy for nautical matters. The White Cloud and the Kick-o-Ways is a very absurd exposition of the benefits of civilization to savages.

The Unspeaking; or, the Life and Adventures of a Stammerer. (Clarke & Beeton.)—This little book purports in its Preface to be an offering of gratitude from the author to Mr. Hunt, of Regent Street, who cured him of the habit of stammering, and whose system and mode of treatment he recommends. 'The life and adventures form an exaggerated, distracted story, which, for literary merit, stands about upon a par with the poetical effusions of the poet attached to the establishment of Moses & Son. The only good point about the book is the description of the nervous suffering entailed by the consciousness of being liable to stammer.

The Roving Bee; or, a Peep into Many Hives. By the Author of 'Quicksands on Foreign Shores.' Edited by Mrs. Whateley. (Nisbet & Co.)—An excellent little book, and one that may be a valuable present to young governesses at the outset of their career. The story is Irish, and the characteristic trials are Irish,—consequently, not exactly like those that would fall to the lot of a young lady in England; but the spirit and sense are admirable, and the counsel inculcated will be useful everywhere to those who are willing to accept it. Meanwhile, the Irish colouring and locality give the story a freshness and charm which will render it acceptable to the general reader.

The Moor of Venice, Cinthio's Tale, and Shakspeare's Tragedy. By I. E. Taylor. (Chapman & Hall.)—Mr. Taylor's version of Cinthio's Tale is neat and plain. Some of the brief dialogues are rendered with almost metrical euphony; but in the narration of incidents the simplicity of the old Italian is so preserved as to suggest less of the tragic than of the ridiculous, even in Desdemona's fate. It is superfluous to speculate now on the chances of a play, even of Shakspeare's, which should have retained the awkward machinery of Cinthio, and represented the Moor killing his wife, not with the pillow, but with a stocking full of sand. Such devices, however, were frequently made use of in the earlier romances of the South, and the description of the jealous husband and his accomplice fulfilling their design is not a shade more tragic than the instrument they employed. In fact, in the original tale, Othello is a vulgar assassin; and had Shakspeare done nothing but dress the Italian narrative in a dramatic form, the result might have justified Rymer in calling the piece "a bloody farce, without salt or savour." As it is, Shakspeare took little more than a suggestion from the nobleman of Venice. Mr. Taylor makes the most of his translation, and prefaces it by some intelligent criticisms on the comparative merits of the drama and of the romance.

We have also on our library-table a variety of books and pamphlets on religious subjects. Of these we can do little more than announce the names.—*The Doctrines of the Bible developed in*

the Facts of the Bible, by the Rev. S. Lewis, is an attempt to sum up the argument of Christian history, and to deduce from it a positive and formal creed.—*In Scripture History, designed for the use of Young Persons*, Miss Finch proceeds over the same historical ground, but by a more practical method, and brings her narrative, in a second part, as far as the last book of the Old Testament.—*An Introductory Sketch of Sacred History, being a Concise Digest of Notes and Extracts from the Bible, and from the works of Approved Authors*, is more ambitious in plan and purpose. It professes, however, to be a compilation, from the pen of a "lay" writer. The matter is solid, and the treatment judicious.—Connecting the past eras to which it refers, with the present and the future, the Rev. W. H. Johnstone writes *Israel in the World; or, the Mission of the Hebrews to the Great Military Monarchies*. In this the proposition is suggested, though somewhat illogically, that the Laws of the Jews were humane, because those of other nations were cruel. Mr. Johnstone advises the Jews to lend no money to despots, and arranges a plan for restoring them to Palestine, as a national and natural barrier against the Czar. However, he argues fairly, if not correctly.—It is in the miscellanies which touch on the more debatable ground of right and wrong, that we find dogmatism most wise in its own conceit. *The Anti-Sabbatarian Defenceless; or, the Sabbath established upon the Ruins of the Objections of its Enemies*, is a furious tract, in which the Rev. J. G. Stewart sets up a notion of his own: first declares that he is infallible, anticipates all objections as "falsehoods," and then says, "Let us argue!" More rampant nonsense we have seldom met with.—Without at all approaching the discussion in which Mr. Herman Heinfetter enters in *The Revealed History of Man*, we may compliment him highly, in comparison with the above-named disputant, on the modest and candid tone adopted by him in his laborious, and sometimes learned, investigations.—Among controversies we have also a report of one of those useless *Public Discussions between the Rev. B. Grant and G. J. Holyoake*, held at Glasgow, in October, 1854. The substance is heavy, vague, and dull. It is a relief to turn from it to Mr. Latter's *Burdens of the Church*, which is at least vigorous, and meant to be satirical. *The Church and Her Destinies*, by James Biden, is, on the contrary, a profession from one who believes himself to have been intrusted with an important mission. Its seriousness is its only recommendation.—Archdeacon Law's *Christ in All* contains a series of florid discourses, addressed to the inhabitants of Weston-super-Mare.—We have, besides, *The Good Fight: an Allegory, —The Word, a Thought, a Prayer,—Religion, its Sources, Character and Supports*, by Caleb Webb, —and a Sermon, by Dean Elliott, of Bristol, on *The Gunpowder Plot*. It savours rather of war among men than of peace and good-will. The Dean leaves us doubtful whether or not he would amend the Liturgy, and expunge such terms as "hellish malice."—Parts I. and II. of *Short Sermons for Family Reading* have appeared, with *Hymns for the Sundays and Holidays of the Year*, by J. Fearn. Our popular hymns, as a body of verses, do little credit to English poetry.

LIST OF NEW BOOKS.

Bloomfield's Poetical Works, new edit. illust. sq. 16mo. 2s. 6d. cl.
Buckingham's (J. S.) Autobiography. Vols. 1. and 2. 21s. cl.
Butler's Geography of the Globe, by Rowbotham, new edit. 4s. 6d.
Butler's Geography of the Human Races, by Whewell, 3rd ed. 4s. 6d.
Cheever and Headley's Travels among Alpine Scenery, 3s. 6d. cl.
Constance Herbert, by Miss Jewsbury, 3 vols. post 8vo. 31s. 6d. cl.
Davy's Angler and his Friend, 6s. 6d. cl.
Edith Vernon, 2 vols. post 8vo. 21s. cl.
Enc. Cyclopaedia, & Geography Vol. 3, Nat. Hist. Vol. 3, 10s. each.
Frank Wildman's Adventures on Land and Water, by Gers-taecker, 12mo. 5s. cl.
Higginson's Astro-Theology, 8s. 2s. 6d. cl.
Last Scene in the Jewish Drama, 15mo. 1s. cl. swd.
Lenn's Questions on Titler's History, new edit. 8s. 2s. cl.
Morris's British Game-Birds, 4to. col. 4to. 2l. 5s. half-morocco.
Newton's Rev. II. Resurrection of Israel, 8s. 3s. 6d. cl.
Nugent's French & English Dictionary, 27th ed. by Tarver, 7s. 6d.
Our Library and its History, 8s. 2s. 6d. cl.
Pike and Hayward's Religious Cases of Conscience, 8s. 4s. cl.
Pratt's Law relating to Highways, 7th edit. 12mo. 6s. bds.
Pretty, Pleading Picture-Book, col. illust. folio. 5s. 6d. bds.
Robinson's (Rev. E. J.) Romanism in Ceylon, post 8vo. 5s. cl.
Sowerby and Johnson's Remains of Great Britain, royal 8vo. 14s. partly coloured; 27s. full coloured. cl.
Tanner's (Mrs. Joseph) Life and Last Illness, 8s. 2s. cl.
The Fortune Hunter, 12mo. 1s. bds.
Thrower's Questions in Arithmetic, new edit. 12mo. 2s. cl.
Thrower's Answers to Ditto, new edit. 8vo. 3s. 6d. cl.
Tracts for the Times, 'No. 9,' Reprinted, Notes, by Frew, 2s. 6d.

Velasquez and his Works, by Stirling, 12mo. 5s. cl.
Works of Virgil rendered into English Rhythm, by Singleton, 9s.
Wrightson's History of Modern Italy, post 8vo. 10s. 6d. cl.

ROYAL LITERARY FUND.

ON Wednesday was held the Annual General Meeting of the Literary Fund, with an attendance of literary celebrities rarely—if ever—seen before in the rooms of the Society. Sir R. H. INGLES presided. Among the company were, Sir E. Bulwer Lytton, M.P., The Very Rev. the Dean of St. Paul's, Sir H. Ellis, Sir J. Forbes, Sir C. P. Roney, the Rev. Dr. Croly, Dr. Arnott, Dr. Roget, Dr. W. Smith, Messrs. C. Baldwin, E. Bell, Bentley, Birch, Bohn, J. Bruce, Chapman, Colburn, B. Corney, Cunningham, Charles Dickens, C. W. Dilke, C. Wentworth Dilke, Hepworth Dixon, J. Forster, Foss, Godwin, Graham, C. Grattan, Hardwicke, Holmes, Mark Lemon, Longman, Murray, Panizzi, J. W. Parker, and Pickersgill.

For the first time during many years, the public press was not turned to the door, and thus the public have been made aware that if the officers of the institution are well content with their administration, the members are by no means satisfied. From the report of the day's proceedings in the daily papers, we borrow some paragraphs illustrative of the feeling of the literary public, the subscribers to the Fund, and of the startling facts which the *Athenæum* has long and earnestly pressed on the attention of its readers.

After the statement of the accounts, which showed that the gross receipts of the year amounted to 2,119l. 10s. 2d., making, with 452l. 13s. 11d. (the balance in hand from previous year), 2,572l. 9s. 1d.;—the disbursements, 2,113l. 15s. 11d.,—that is, 1,470l. in grants for the relief of literary distress, and 643l. 15s. 11d. in expenses!—and leaving a balance in the banker's hands of 178l. 3s. 2d., after making an additional investment of 280l. 10s. in purchase of stock,—

MR. DILKE, as the daily papers report, said, that at the anniversary dinner of 1853, the chairman of that dinner, illustrating the advantages of the Literary Fund, quoted three cases in which aid had been afforded to men of learning and genius, but he had been obliged to go back into the last century for his examples. He even believed that these parties had been relieved twenty years before the founder of this Society (Mr. David Williams) died, and more than twenty years before the Society had a corporate existence. He should say a few words as to the economy with which this benevolence was granted. In 1802, it was stated in a Report issued by the Society, that all the offices were discharged gratuitously, except those of collector and messenger, —and it was very natural that it should be so. It was the policy of the founder, that all the offices of the Society should be gratuitously filled. In 1802 all the duties of the Society were discharged gratuitously, except those of the collector and the porter. In 1805, by the exertions and economy of the founder, its funds were increased to 6,000l., with an income of 800l. per annum. Their founder then presented to the Prince Regent a memorial praying for a place of abode for the Society near the Palace. The Prince did not give them that; but instead of doing so, he charged the revenues of the Duchy of Cornwall with a sum of 230l. per annum to defray house-rent and taxes. That grant of course expired on the death of the Prince. The moment that grant expired, he contended, the Society ought to have contracted its expenditure to something like the amount which it stood at before the grant was obtained; more especially as it had not carried out any of the objects which the founder evidently had in view, since in his petition to the Prince Regent he dwelt upon the advantages that could be derived from such a house, which should contain a library of books and manuscripts, and should attract the subscribers as to a common centre of communication and action. The founder hoped that the institution might one day become a college for decayed and superannuated genius—the most pitiable of all objects. If that common centre for literary men had been established, Mr. Dilke was of opinion it would have been one of the most

beneficial things to literature and to literary men that was ever projected. In 1840 the duties of the registrars were set down; and it was arranged that a registrar should attend every general meeting of the Council and the General Committee, that they should take minutes of the business transacted, and of the orders made at each meeting, and that they should superintend the correspondence of the Society. Now, if the registrars performed that duty without remuneration, what was there for any one else to do? The Committee met nine times a year. There were three registrars, and, if they divided the labours between them, each registrar would have three meetings to attend, each meeting occupying about two hours. The first assistance which the registrars applied for was for a clerk at 40*l.* per annum. The clerk had now grown to a secretary, and the 40*l.* a year had become 200*l.*, while the same duty had been for years performed for the Artists' General Benevolent Fund for 50*l.* The Committee of that Society met in a room at the Freemasons' Tavern, which they paid for, and thus avoided a charge for house-rent; and, as the Committee met twelve times a year, the remuneration to the Secretary of the Artists' Fund was about 47*s.* a day, which he thought ample. He knew that the comparison he had on former occasions instituted between the Literary Fund and the Artists' Benevolent Fund had been met by the answer, that the latter was a fund for the relief of members subscribing to another fund for the widows and orphans of members, and, therefore, that no preliminary inquiry was necessary. Now, he could not admit that distinction, for, if the Committee of the Literary Fund properly represented the literary character of this country, they would have some knowledge of men of genius and learning, and he could not, therefore, admit the necessity for this previous inquiry, which led to so large an expenditure of the Society's funds. But he would give up the Artists' Benevolent Fund, and he would take the Artists' General Benevolent Fund, between which and the Literary Fund there was no difference whatever. That fund was subscribed for artists generally, and he was sure there was as much difficulty of inquiry in the one case as in the other. Collector's poundage (a per-centage on the money collected), advertisements, and expenses attending the anniversary dinner—charges which involved questions of policy and management, and were therefore open to discussion—he had omitted, and the comparison was confined to the cost, in each case, of like things; salary with salary, rent with rent, miscellaneous charges with miscellaneous charges. Mr. Dilke then read the following summary:—

LITERARY FUND.		ARTISTS' GENERAL BENEVOLENT FUND.	
1844, 31 applicants relieved at a cost of £535 6 10		55 applicants relieved at a cost of £904 17 9	
1845, 38 466 16 2	43 82 8 10		
1846, 46 515 13 7	42 37 7 11		
1847, 38 504 5 9	55 166 19 2		
1848, 50 498 11 10	54 86 5 0		
1849, 41 527 18 4	57 88 8 5		
1850, 38 493 11 0	69 36 13 8		
1851, 51 528 14 6	63 88 8 4		
1852, 49 513 17 8	56 101 13 8		
1853, 47 506 4 5	65 85 14 4		
429 £5,094 0 1	559 £904 17 1		

—In other words, every draft drawn for the benefit of applicants for the Society's aid cost 11*l.* 17*s.*, in addition to the sum voted by the Committee for their relief. He then moved the following resolution:—

"That, whereas during the ten years from 1844 to 1853, both inclusive, the cost of assisting 429 applicants to the Literary Fund amounted to 5,094*l.* 0*s.* 1*d.* (exclusive of collector's poundage, advertisements, and expenses attending the anniversary dinner); and whereas the cost of assisting 559 applicants to the Artists' General Benevolent Fund, within the same ten years, amounted to 904*l.* 17*s.* 1*d.* (also exclusive of collector's poundage, advertisements, and expenses attending the anniversary dinner); this meeting is of opinion that the expenses of managing the Literary Fund are unreasonable and enormous, and that a great change must be made in the administration of its affairs."

Sir EDWARD BULWER LYTTON seconded this resolution, which was sustained by twenty-eight votes against thirty-two—the former consisting, as far as we could ascertain, chiefly of the outside literary Members; the latter, chiefly of the Committee themselves. This vote was, in fact, a much stronger condemnation of the past system than the warmest friends of reform had dared to hope:—such a minority being equal to a large majority under ordinary circumstances, and quite sufficient for the practical objects of the literary reformers.

On the question for the appointment of officers for the year being put, Mr. C. WENTWORTH DILKE said, he thought a Society like the Literary Fund ought to have at its head a literary man, and he would, therefore, propose to insert the name of Mr. Hallam, as President, in the place of the Marquis of Lansdowne, who was proposed for re-election by the Committee.

The DEAN of ST. PAUL'S:—Have you the consent of Mr. Hallam to put him in nomination?

Mr. DILKE replied in the negative, stating that he did not think it of any importance, as this was a question not of persons, but of principle.

Mr. C. DICKENS said, he did not care whether Mr. Hallam did or did not serve. The question was not one of men, but of principle. What he and those who acted with him contended for was, that this, being a Literary Society, should be in the hands of literary men; and that no other person had any business there.

The DEAN of ST. PAUL'S did not think that the administration of the affairs of the Society should be confined exclusively to those who had published books.

The CHAIRMAN objected to the Literary List being handed round, on the ground that it had not been previously laid on the table. Some confusion hereupon arose, it being physically impossible for all the Members to get pens and ink to score the names out of the Official List, and enter those of their own candidates, as the Chairman suggested. The voting papers were gathered in during the confusion,—and, of course, the Official List was returned. This was, indeed, of only secondary consequence,—the object of the literary men being gained with the strong assertion of a principle sure to be victorious in the end.

Mr. C. DICKENS rose to move a resolution respecting the reconstruction of the Charter. He said he should, in a few words, give his reasons for thinking it necessary to re-incorporate the Society under a new charter. He thought the present charter so absurdly ridiculous, so preposterous, that it ought at once to be abandoned by every man of sound mind and understanding. Whether it was in construction legal or illegal he did not know, but this he did know, that it was sheer nonsense, and, therefore, he thought it ought to be abandoned. He need not remind them, he said, that about seven years ago the literary powers of the Literary Fund ascertained that for thirty years before all their proceedings had been illegal. The Members bestirred themselves in an extraordinary manner for the purpose of reconciling their acts, if possible, with the outraged majesty of the law; and the result was, that one of the governing bodies called the Council, which conceived it had a right to sit and vote with the General Committee, was thenceforward understood to be for ever banished from the light of the General Committee's countenance. Now, before he followed this Council into its extraordinary position in space, let him inquire how both bodies came into existence. The charter declared that the Council and the General Committee, the President and so forth, were to have the entire direction and management of the affairs of the institution, and in the next paragraph the charter referred to the meeting of Council, clearly expressing in homely English that the Council should meet, and should have as much share in the business as the General Committee or the other officers. This intention the charter expressed by requiring that every member of the body—"the potent, grave, and reverend signiors"—should meet and discuss every question brought before them during the year. Now, this Council being thus in express terms constituted and limited, he hoped the meeting

would excuse him for suggesting that, out of the Literary Fund and the two large establishments of St. Luke's and Bedlam, no one could doubt that the Council ought to have a real existence, and ought to have something to do. Had it a real existence, and had it anything to do? He could appeal to his own knowledge and experience. He had had the honour of being elected a member, and of retiring from it when he found it out. Having, in the first instance, retired from the General Committee, he received a letter from the Secretary asking whether he should like to be a member of the Council. He pictured to himself a set of sages peaceably meeting to regulate the pecuniary expenditure by a profuse expenditure of the midnight oil. So much was he impressed with the importance of his new function, that for some months he never left home without leaving word where he was to be found, in hopes that the Council might want him, but he found that they got on without requiring his assistance. He then asked, when they did meet what they had to do, and found to his inexpressible amazement that they never had, never could have, anything to do with anything in all creation. They had, in short, no purpose nor object in existence. Now, he asked, what would the public think of such a mode of doing business in any other institution? What would people say to directors who were not to direct, or judges who were not to judge? Imagine a physician who was never to prescribe, or a surgeon who must not set a bone. Conceive a corps of firemen enjoined never to go within fifty miles of a fire, or officers of the Humane Society directed by a bye-law not to approach the water. That was the case with the Council at the present moment, while the charter called it a governing body which was to have the entire management of the institution. He submitted to the Meeting that such practices would not be tolerated in any other institution. It was wrong in a public institution having control over large sums subscribed for certain objects; first, because there should be nothing like a false pretence in such an institution, leaving it open to suspicion; secondly, because a continued endurance of this phenomenon would lead to the conclusion, either that it was used to shelve incompatible members of the committee, or to prop up the faults of the committee with the names of men who had nothing to do with them. He submitted, therefore, that the charter was utterly defective and rotten, inasmuch as it appointed a governing body, the Council, specifying its duties, while the latter never could discharge the duties solemnly confided to it by the charter. He hoped, perhaps not at the present moment, but certainly at some future one, to have this matter set right. Mr. Dickens concluded by moving "That whether the General Committee's construction of the existing charter be legal or illegal (as to which there are differences of opinion), it is manifestly absurd, as constituting a body expressly to be elected from members of the General Committee, with at least three years' experience, called a Council, to which it confides no powers and no duties, and which never meets, because it cannot even be called together by any authority for any purpose. And that it is, therefore, desirable to apply for a new charter, and that a Committee be specially appointed with this object, with instructions to report the result of their labours to a general meeting to be convened for this purpose. That such Committee be composed of the following members:—The President, The Very Rev. the Dean of St. Paul's, B. W. Procter, Esq., Sir Edward Bulwer Lytton, John Forster, Esq., W. M. Thackeray, Esq., Charles Dickens, Esq., Robert Bell, Esq., The Rev. G. R. Gleig, C. W. Dilke, Esq., Sir H. Ellis, Sir J. Forbes, and Messrs. Tooke and Auldjo."

Mr. J. FORSTER seconded the resolution; which, after some conversational discussion, was unanimously agreed to.

This Committee, under the sanction of any general meeting to which it may think right to appeal, has before it the arduous and honourable task of re-organizing the Society on better and broader grounds—of reviving the beneficent and

economical action of the founder—and of rescuing a noble institution from all those abuses of times and persons which are so apt to gather round our best charities.

PICTORIAL COPY-RIGHT AND COPY-WRONG.

ON the question raised in the police court by the complaint of Mr. Ward, we have received a number of suggestions more or less practical, as it seems to us, from artists and lawyers:—but the question has many sides, and its just and equitable settlement is, we fear, as yet far off. The wrong in Mr. E. M. Ward's case is not peculiar. Few artists of name and place are free from the competition of spurious copies of their own works;—copies which are sold as originals, both by private dealers and in public auctions. No one will for an instant say that this is right; but who, on the other side, will affirm that pictures of established fame shall not be copied by the young artist—by the student anxious to improve his style, his drawing, or his handling? Yet, if pictures may be copied, it is absurd to contend that the copies may not be sold for whatever they are worth; and, once the sale of these copies is allowed, false description or assertion of authorship is left to the conscience of the dealer or possessor. A government stamp has been proposed,—which, to a certain extent, would guard the authenticity of a picture, as registration guards the copyright of a book. One of our Correspondents says, on this proposal:—

"The idea of fixing a stamp to pictures, suggested by Mr. Darvill, had previously occurred to me,—and I think it might be made a means of effectually preventing the continued and gross impositions on the public now so successfully carried on. I propose, that a government stamp be printed upon the back of the canvas; that the stamp by which the impression is made should have moveable types, so as to have the advantage of printing the subject or title of the picture, with a blank space left for the artist to write his name and the date, together with that of the government official who makes the impression: added to which, a warranty might be given, to accompany the picture at all times, into whosever hands it might pass. That no stamp be given, but upon the *personal application* of the artist. And likewise, for further satisfaction that he is the painter of that picture, it is necessary that he should send a notice to the authorities, shortly before the picture is finished, of his intention to apply for a stamp, that some one from the office may identify both him and the picture. Other suggestions might be proposed with regard to artists in the country, but sufficient have been thrown out at present for your opinion, and to call forth the observations of others. Of course it would not be fair to make this compulsory upon artists; they ought still to be at liberty to sell their pictures without the stamp if they pleased; but such a means of protection might be made available by those who desire it. If the above plan, or something to the same effect, were carried out by an act of parliament, all the difficulties at present attending the prosecution of dishonesty would vanish; for when it became publicly known that an artist invariably stamped his pictures, no one would purchase a picture without the stamp, while to imitate it would be an act of felony."

Names, it is well known, are constantly written on pictures to mislead; and it is a question whether the possession of a spurious picture, having a forged name, would not subject the possessor to a penalty at law.

As regards the particular case of Mr. Ward's picture, the solicitor, Mr. Darvill, tells the following story,—which we bring before our readers on his authority, that the whole body of essential facts may be under their eyes for judgment.—

"When I appeared on Monday last before Mr. Hardwick, to state the facts connected with the spurious copy of Mr. E. M. Ward's picture now in the market, I did so for the purpose of drawing public attention to the circumstance, and with a view to some ultimate enactment for the protection of artists and collectors. I stated that Mr. Ward, in 1851, sold to Messrs. Melton & Clark a picture of James II., which was a copy made by the artist himself from his original picture in the possession of Mr. Jacob Bell. I also stated that a spurious copy of that picture had subsequently been sold, and was alleged to be an original picture by Mr. Ward. I see by the *Daily News* of the 8th and 9th instant, that Mr. Melton, of the firm of Clark & Melton, seeks to wash his hands of any suspicion, by asserting that he did not sell the picture to Mr. Pashall, and by stating that the picture had not been with his firm a sufficient time to make a copy, even had they been desirous of doing so (?). Now, as Mr. Melton has exhibited peculiar innocence in reference to the spurious picture of which Mr. Ward complains, I deem it necessary that you should be made acquainted with the following facts. In 1851 Mr. Ward sold his own copy of the original picture to Messrs. Clark & Melton—they sold it to Mr. Agnew, of Manchester, who, through his agent, Mr. Chester, sold it to Mr. Pashall, and it has remained in his valuable collection ever since, and has even been touched up by Mr. Ward since Mr. Pashall acquired it. Mr. Ward never painted more than two pictures of 'James the Second receiving Intelligence of

the Landing of the Prince of Orange.' One of them was the original, sold to Mr. Jacob Bell; and the other, the artist's copy, sold to Messrs. Clark & Melton, and now in the possession of Mr. Pashall. Dates are now material. Last year (1854) Mr. Melton took a spurious copy of the picture I have alluded to, having considerable merit, to a most respectable party in Bond Street, connected with the picture trade, and offered it to him as an original picture by Mr. Ward for 70*l.* The party was astonished at the price, and proposed to purchase if Mr. Melton would let him have the picture to show to Mr. Ward for verification; but Mr. Melton declined doing so, alleging that the picture belonged to a gentleman at some hotel, who would not part with it for any time out of his possession. The party in Bond Street to whom I have alluded saw Mr. Ward, and informed him of the circumstances, and stated how clever the copy really was, and that the lowness of the price alone had raised his suspicions; had the picture been an original, it would have been worth 350*l.* instead of 70*l.*, although a small sized copy. Mr. Melton, however, last year sold the spurious copy to Mr. Creswick, who sold it to the highly respectable picture-dealer in Berners Street, Mr. Gambart, who again parted with it to Mr. Lloyd, the publisher, who sold it to a dealer in Liverpool. From the above facts, it is clear that there were three pictures of the same subject in existence—two original works by Mr. Ward, and one spurious copy. The two originals I have traced, and one of them is now the property of Mr. Jacob Bell, and the other is the property of Mr. Pashall. The third—the spurious copy—I have traced into the possession of a Manchester picture-dealer; but it is certainly remarkable, that the artist's original copy and the spurious copy are both traced to the possession of Mr. Melton; and it will be for him to explain the parentage of the spurious copy.

"Windsor, March 10.

HENRY DARVILL."

We understand that Mr. Darvill—who adds a deep respect for Art to a knowledge of law and an energetic temperament—means to pursue the subject of these spurious reproductions of good pictures until he has embodied his experience and sagacity in an act of parliament. No penalty can be awarded that will over-punish fraudulent dealers in works the very purpose of which is to purify and adorn.

ON THE LIABILITY OF THE MAGNETIC CONDITION OF IRON SHIPS TO RAPID OR SUDDEN CHANGES.

III. The effect of the principles referred to and elucidated in the former part of this paper [*ante*, p. 292] is, as has been shown, to produce a special arrangement of the *retentive magnetism* developed in iron ships by the mechanical violence applied to their materials whilst building, with its polar axis in the *oblique* direction of the dipping needle; to change this direction, after the ships are launched, whenever mechanical action is applied in *new* directions of the ships' heads; and so as ultimately to tend to produce a *normal* position in the polar axis *vertical* to the keel.

The operation of the same principles, under the violent mechanical action to which ships are sometimes subjected at sea, must, as may easily be shown, inevitably tend, when terrestrial induction may be acting in complete discordance with the existing magnetic distribution of the ship, to disturb (for a time) the *normal* condition into which the general magnetism may have happened to be shaken down.

This brings us to the consideration of the general proposition already enunciated, and here professed to be maintained—that *all iron ships are liable to rapid or sudden changes in their magnetic condition, and so to compass disturbances.*

For the satisfactory discussion of this point, it will be important to attain to some definite understanding of the exact question at issue. My proposition is—That whilst *new ships*, previous to the attainment of the normal magnetic axis, are specially liable to rapid or sudden changes of large amount, *all iron ships*, under certain conditions of position, mechanical force, &c., are liable to similar, though not to so great changes,—yet to changes, it may be, of so large an amount in compass deviation as may subject the unsuspecting navigator to the most imminent danger. Mr. Airy, as more distinctly shown in his first paper, denies this; and takes, as I understand it, something like this position,—that if changes do occur, these (taken in connexion with his process of compass adjustment) are, in the northern hemisphere, unimportant, and in no substantiated case amount to a quantity likely to involve danger. If this be a fair statement of our two positions, as I have most honestly endeavoured to express them, then the points at issue are reducible to two of a very intelligible nature,—the *quantity* of change to

which the compass is liable, and the *frequency* or *infrequency* of the larger quantity.

Personally, my views here are, that changes, sudden or rapid, as great as from two to four points, may occur, and do occasionally occur, in compasses, having large original deviations, in *new* iron ships; and that changes, extending from half a point to two points, if not more, may occur, and in not a few cases have occurred, in iron ships not being new. Mr. Airy's views as to quantity of probable or possible change can only be safely given in his own words; and fortunately in his first paper [*Athen.* Oct. 28, p. 1304, IV.] we have these views very distinctly stated. Referring, objectingly, to my paper on the 'Loss of the Tayleur,' given at the meeting of the British Association, Mr. Airy says, "The question at issue is the very abstract one, Is it likely that in two days the magnetism of a ship could be so much changed that the compass would be disturbed through an angle of two points? I unhesitatingly answer, it is not likely; and, speaking with our present knowledge on the subject, it is not possible. I conceive the causes pointed out by Dr. Scoresby to be wholly inadequate to produce such a rapid change. And I aver that there is no known instance of such a change; and I do not believe [I add the italics merely for guidance to the reader] that an instance can be produced of a rapid change of one-fourth or one-tenth part of this amount;" that is, reduced to degrees, not a change of five-and-three-quarters, or even two-and-a-quarter degrees.

Happily, the differences here betwixt us, as to the amount of compass changes, are so exceedingly great, and the appeal to facts so specific, that no difficulty could be reasonably apprehended of our being enabled to come to some conclusive result on the question;—and difficulty there is none.

The appeal is to actual cases and facts, which we, on our side of the argument, are challenged to produce. And such cases and facts, bearing on the general question [under circumstances that have been specified in 'Magnetical Investigations,' vol. ii. pp. 342, 394, 411, 432, and 'Letter to Underwriters,' pp. 33—39] of the liability to rapid or sudden compass changes in iron ships, will be found to be by no means so meagre as has been supposed. And in recalling attention to facts, I may properly correct a mistake into which Mr. Airy has fallen, of supposing that the assumed meagreness of my previously adduced cases afforded any measure of the proportion of available or attainable evidence. My opportunities, except when at Liverpool last autumn, were by no means favourable for getting the desirable information; and when at Liverpool I was mainly engaged in researches on the actual magnetic conditions of iron ships,—of the results of which I regret to find Mr. Airy speaking so lightly. Recently, however, I have given more attention to this particular inquiry,—the results of which I now, sketchily, adduce. But not to elaborate differences as to the precise applicability of the several cases, I give them in a general list, re-stating the cases from the beginning, with as few words of explanation as may conveniently serve for their intelligibility and authority.

1. The case of the *Imperator* [*Athen.* Dec. 16, p. 1526, col. 2], where a change in the original inclination of the polar axis towards the starboard side, had, undoubtedly, taken place betwixt the moment of launching and her equipment for sea, of above 10°, or rather say, about 12°.

2. The case of the *Ripon*, on which Mr. Airy comments so slightly in an appeal to the reader [*Athen.* Feb. 3, p. 146, c. 3], is not to be dismissed as evidence, though "the change in the compass was [only] between two and three degrees"; for the reader will find on referring to Mr. Airy's own words, quoted near the head of this section, that this amount of change is within the limit of the challenge of proof, and within a limit, too, in the special case, which, had it occurred in thick weather, might have been fatal to the safety of the ship.

3. The case of the *Tayleur*, where, on the evidence of the master, first mate, and carpenter, taken before three competent courts of inquiry, and the results of two of them published in returns made to Parliament, proof is given by them of a change, occurring within about two days, of two

points, or thereabout, in the indications of two "adjusted compasses." The evidence here is that of actual observers of the fact, certified by the endeavour to find out the cause of the perplexing difference by shifting the cards, and set forth as conclusive, both by Capt. Walker, R.N. and the Local Marine Board at Liverpool, in their respective Reports to the Board of Trade!

4. The case of the Ottawa [*Athen.* Dec. 9, p. 1415], where a change of about two points was produced by the stroke of a sea,—an incident which, whilst commenting upon it, Mr. Airy admits, "deserves the most careful inquiry."

Here we come to new evidence, and, introductory to its production, I would recall the attention of the reader to these particulars,—that I am here showing the *general fact* of rapid or sudden and considerable compass changes (in contradistinction to very small and slow changes, or those requiring much time),—and that I adduce, first, actual cases, and then opinions of witnesses, such as those referred to by Mr. Airy and others. For certain cases, for similar reasons as those entertained by Mr. Airy, I find it expedient to use mere reference letters instead of actual names; but in any of these cases, should Mr. Airy wish it, I will communicate to him confidentially the facts and particulars by which the cases may be thoroughly sifted.

5. The case of the Tiber, three years in use, where, after a recent collision, which changed one of the adjusted compasses (a change which gradually subsided) to an extent of *two points and a half*. This case has, I believe, been well investigated by a "compass inquiry committee," now sitting at Liverpool.

6. The recent case of the ship X, which was thrown out of her course by a sudden and unexplained change in the binnacle compass, to the extent of an angle of about *five points*, occasioning, according to measurements on a tracing of the track-chart now before me, an error of the ship's position in one day's run, nearly equal to the breadth of Ireland!

7. The case of the Tenerife steamer, whose magnetism underwent "a strange change"; the ship having "changed her magnetism in coming home a point and a half."—[Evidence of Mr. John Gray, adjuster of compasses at Liverpool, published in the Report to the Board of Trade of the Local Marine Board, p. 9.]

8. The case of the Rattler comprises what is described in the evidence referred to in No. 7 as another "strange change"; the compass having changed (*rapidly*, as seems to be implied) *a point*.

9. The case of the Pampero, described by Mr. Airy's correspondent "B." [*Athen.* Feb. 3, p. 1423, under question 6], where a change of 6°, more than half a point, was "produced in a short experimental trip!"

10. The case of the Hayti, of Glasgow, swung under the direction of Mr. James Napier, and again swung, after being towed to Gourock Bay (some ten leagues down the Clyde, in a direction at about right angles with her position in building), when the deviations, by two unadjusted compasses, were found to be altogether different. In one compass, the effect of this short remove, with an incidental gale, and an interval only of two or three days of time, was to alter the deviations up to *three quarters of a point*, and, in the other, to *above a point*!

11. In the case of the new ship Y, two compasses, very carefully adjusted just before sailing, were found on the first day after leaving port to differ 6° on a west course.

12. The case of the City of Philadelphia, whose loss on her first passage across the Atlantic occasioned so much anxious speculation as to the cause, affords an unquestionable example of rapid magnetic change: a change such that, whilst one out of three or four compasses was stated to be correct, the whole, as indicated by such evidence as has yet been made public, exhibited among themselves the most perplexing differences.

As to the opinions of persons experienced in compass adjustments, I might gather a fair set off against those adduced by Mr. Airy. One official person voluntarily stated to me as a fact he was prepared to prove, that no adjustment of compasses

could be effected so as to stand within half a point where the original deviations extended to about two points, or within twice or thrice that amount with very large deviations.—But I will not extend the consideration of this quality of evidence.

These various cases may surely be appealed to as amply sufficient for the determination of the chief questions at issue betwixt Mr. Airy and myself; conclusively, I believe, against the views already quoted on the *smallness* of any sudden or rapid magnetic changes; and strongly, I think, in support of my own views, that such changes are far from being infrequent, even to an extent calculated to involve much danger to the unwarned navigator. If the cases now adduced are still far from being numerous, they are not the less conclusive on the actual question. And it is to be noted, that information on these points is not easy to be got at,—and of cases, no doubt innumerable, which do occur, but few are observed. A stroke of the sea takes place in a heavy gale, and, most usually, in the open ocean, where a temporary derangement of the compass is of little consequence; it takes place when the compasses are generally unsteady, and attention to corrective celestial observations are impracticable. Thousands of sudden changes may, under such circumstances, occur without one being noticed. And, as the tendency of a ship's magnetism is always to return to the *normal condition*, the derangement for the time, acted on by changes of course, the rolling of the ship, &c., is gradually reduced and commonly, perhaps, almost entirely obliterated before the arrival of the ship in port. This fact, previously deduced from theory, has variety of proof. It was proved in the case of the Ottawa, the Tiber, and several others; and will generally so be found, except in cases where the proper normal position of the ship's polar axis had not previously been attained. Hence, we find, that the evidence against observed changes, obtained from the adjusters of compasses at home, becomes almost entirely *negative*. It proves only, with whatever integrity and completeness it might be designed to be given, that the ship's compasses, which were corrected at starting, were found, as to any material inaccuracies, the same on the return to port. But it shows nothing, nor can it, of changes such as those of the Ottawa, the Tiber, and of whole fleets of iron ships, in which, in the Southern hemisphere, the compass adjustments were found useless; the tendency to restore the normal condition,—aided by renewed applications of vibration, straining, or shocks of the sea, under favourably-acting terrestrial induction,—having sufficed to obliterate the deflexions of the ship's magnetic axis and to bring the greatly-wandering compasses right again!

There is yet a further evidence and proof, just to be noticed, of the proposition now being maintained,—as to the fact of iron ships being liable to rapid or sudden changes,—from which, as to me it seems, there can be no appeal: and this evidence is afforded by the varying indications of two or more adjusted compasses, acting as *tell-tales* on each other. My opportunities of applying this test, indeed, are but very few, as no comparative statements, except only in three cases, have yet come before me, and only one of these in a distinctly continuous tabular form. In this instance, where two compasses had been carefully adjusted by fixed magnets, and their indications, along with those of a compass aloft, examined by an excellent observer almost daily, the rapidity of the magnetic changes, even on courses far from being those likely to show a maximum, was sufficiently striking. On the very day of sailing, as I have already noticed, there was a difference of 6° on a west course, reduced to 2° or 3° on going south-west. After eleven days the difference on a south-west course became again 6°; and in the next four days, whilst going in a more favourable direction, the differences increased to 8° and 11°,—the latter differences occurring betwixt the latitudes of 15° 16' and 7° 27' N. The third day, after crossing the equator, a difference of 14° was registered.

This case, a favourable one, I believe, for the compass adjustments,—the original deviations having been very moderate,—of itself sufficiently

shows either that the principle of adjustment must be wrong, (for I happen to know that it was well and carefully applied,) or the ship's magnetism must have rapidly changed,—or rather, perhaps, that both these suppositions were correct. If the captains of ships, having more than one compass adjusted, would keep comparative registers of their indications daily, very important results bearing on these inquiries would be soon and conclusively supplied by this test alone.

But if such be the facts as to changes of the ship's magnetism, as has been argued, how is it that our iron ships go safe at all? Their measure of safety, as indicated by the rates of insurance, is not because of their compasses being correct or not liable to incidental changes, but in spite of their errors: captains are now well warned, so as, in using their compasses for general guidance, not to trust them in special circumstances. In ships proceeding far into southern latitudes, their adjusted steering compasses are notoriously wont to go wrong, and frequently to become useless; but by watchfulness and tact in the navigator, with the now increasing guidance from a compass aloft, these ships prevalently make rapid and safe passages.

It is not my intention to discuss further the question of change, which in some measure is inevitable in the *retentive magnetism* of ships when proceeding into the southern hemisphere,—though on such change was grounded my objection (still adhered to) to the mode of compass adjustment by fixed magnets which I originally submitted to the British Association at Oxford in 1847. Yet it may not be unuseful to notice a remark of Mr. Airy's in his last paper in the *Athenæum* (p. 147, col. 3) with reference to the admitted changes in compass action in southern regions, where he says, "I do not imagine that in any of these cases the sub-permanent [or retentive] magnetism has undergone any particular change." And this opinion I notice for the purpose of guidance and information as to the actual fact, by referring to a communication at the last meeting of the British Association 'On a Graphic Method of Correcting the Deviation of a Ship's Compass,' in which the investigations of the author—a gentleman having admirable opportunities of obtaining facts, and with the highest mathematical acquirements for applying them—went distinctly to prove a change having taken place in the retentive magnetism of certain ships, whose deviation-registers had been duly kept and examined, when sailing far to the southward. As to the *quantity* of such change, or its proportion to the yet unchanged quantity when the observations were made, I am not prepared positively to speak; but I believe the proportion was far from inconsiderable, or, as my recollection serves, equal to about a fourth part of the original intensity.

IV. As to the results of this and other discussions in which I have been engaged in respect to the general question—as to the best means of overcoming the embarrassments from compass disturbances, and of promoting a higher degree of safety in the navigation of iron ships—it is very satisfactory to find that *good*, to an obvious and practical extent, has been already attained. And evidence of this, of no slight force, is afforded by observable results of the present discussion, especially in the arrival of Mr. Airy with myself, after all other differences, at the *same practical remedy*,—that which from the first I have been continually urging,—of the carrying of a *reference compass* aloft. And this plan of a compass placed on a mast—duly arranged so as to be free from iron in the form of rigging or cross-trees—and elevated as far above the general disturbing influences of the body of the vessel as the case, individually, may need, will be found, there is no doubt, as effective as it is simple.

This appliance, originally employed by me in a ship with extraordinary deviations for one of wooden fabric, so long ago as the year 1820, and published in the 'Journal of Researches and Discoveries on the Coast of Greenland' in 1822,—is, I am rejoiced to find, proposed for adoption by Mr. Airy for the re-adjustment of compasses in the southern hemisphere. The place or elevation of

such compass, and the employment of it only or mainly for reference and correction of the steering compass, as proposed by Mr. Airy, are circumstances of perfect accordance with the original plan, where I carried my elevated compass at the *mast-head*. In certain cases, however, I have found, practically, that a much lower elevation, subject to less vibration and swinging, and more convenient for observation, would do. And, in any case, it is important again to notice what, in my 'Letter to the Liverpool Underwriters' (pp. 46-57), I have largely elucidated,—that a moderate elevation, such as one of 30 to 50 feet, is sufficient for the attainment of vast practical advantages in the way of safety as to compass guidance. At such an elevation, the amount of deviating action on the deck compasses will generally be found to be reduced to a small, if not an unimportant, quantity—a quantity, at any rate, which can easily and safely be corrected by a Table of Deviations, and such table very nearly adjusted for changes of magnetic latitude, according to the "Instructions" by Mr. Archibald Smith. And besides this obvious gain in reducing the quantity of compass error, there are other advantages of the highest importance which are realized by the elevated compass; for on such compass, as I have elsewhere shown, the seriously disturbing effects of *heeling* on the deck compasses are not felt,—and besides this, the otherwise dangerous effects of sudden changes in the direction of the ship's magnetic polar axis, exerts no disturbing influence of any practical moment.

Hence we find reason for much congratulation with those interested in iron ships, in the progress evidently made in the right direction towards the attainment of effective compass guidance. Mr. Airy's present proposal for correcting the aberrations of compass adjustments in the southern hemisphere, should naturally give support to the plan of a *compass aloft* for general practice and utility, with the large body of navigators who have availed themselves of his compensating process. And that process, as I have always been ready to state when the subject has been discussed, may still be employed, under due cautions, with considerable convenience in the navigation of iron ships in the northern hemisphere; whilst my plan, appealed to now, and proposed to be superadded by the talented originator of the popular method of compass adjustments (which already, indeed, is making rapid way amongst iron shipping), will ultimately, I doubt not, become universal, and so *safe in the highest attainable degree to this fine class of our merchant navy*,—so far as it depends on the compass,—may be confidently looked for.

WILLIAM SCORESBY.

Torquay.

OUR WEEKLY GOSSIP.

Dr. Daubeny, it is said, proposes shortly to resign the Chair of Chemistry at Oxford.

On Wednesday evening the students of London University College gave a *soirée* to the members of King's and the affiliated colleges, and to a select circle of distinguished men of letters and artists,—and did the honours and hospitalities of the evening very gracefully. The walls were hung with choice specimens of Art, including Mr. David Roberts's sketches in Spain, Mr. Goodall's drawings, Mr. Mayall's collodion portraits, and on the tables were disposed numerous bronzes, crosses, cups, and other interesting objects. A concert, in which MM. Ernst and Benedict performed, was given during the evening. Indeed, the visitors were rather embarrassed with the richness of their entertainment,—and some of the choicest concerted pieces were played in a surge-like noise of conversation. Such reunions—and we hear that King's will follow suit to University—cannot fail to be as useful in creating good-feeling and harmonious purpose as they are unquestionably pleasant in the play of conversation and the gathering of Art.

Mr. William Chambers writes on the subject of copyright in the colonies:—

"Edinburgh, March 7, 1855.

"Since addressing you on the introduction of American reprints of British copyrights into the colonies, I have procured such further information on the subject as will set the matter at rest. By the *Canadian Literary News Letter*

for January, published at Montreal, it appears that the import of American reprints into the British possessions takes place in a perfectly legal manner; that is to say, under the sanction of the Act of the Imperial Legislature, 9 & 10 Vict. cap. 95, passed on the 22nd of July, 1847. By this Act of Parliament it is provided, that the respective colonial legislatures may enact local laws to admit pirated reprints on making provision 'to secure the rights of British authors,' and that having done so, the Queen by an order in Council, may thereupon suspend the operation of the ordinary existing copyright laws as far as regards the colonies. Having procured this Imperial Act, the Legislature of Canada and Nova Scotia duly complied with its provisions, and the Queen gave her authority accordingly by intimation in the *Gazette*. Thus, the British North American possessions, as regards literature, are regularly handed over to the United States. In the matter of books supplied from New York, Canada is as much a part of the Union as the State of Ohio. And the something may be said of all other British colonies, to which, soon, as a matter of course, the export of books from the United Kingdom must altogether cease, as no one paying heavy prices for copyrights in this country can compete with publishers who take the same copyrights for nothing. The question, however, remains—what measures have been adopted by Canada and Nova Scotia to 'secure the rights of British authors'? The answer is simple. In Canada, a custom-house duty of 12½ per cent. is leviable on American reprints, for the benefit of the authors of the works so imported; and in Nova Scotia this duty is 20 per cent. In both cases, however, the levying of such duties is a 'sham.' In a letter I have just received from Halifax, Nova Scotia, it is stated that since 1847, not more than the sum of 10*l.* has been so collected—that, in fact, the colonial Acts on this point are a dead letter. This confirms the information I received when in the colony. It seems odd that, among the publishers and literary men of Great Britain, there should have been such an utter ignorance of the Act, 9 & 10 Vict. cap. 95, that they required to be informed of it through a colonial authority. The phenomenon is perhaps explained by the singular want of union among all persons connected with literature in this country. I formerly suggested a meeting of publishers to consider what steps should be adopted to protect their interests; but I now fear this would be of little use, as, by their carelessness, the publishers have delivered themselves up to the tender mercies of their more shrewd American brethren, and the passing of an International Copyright Act with the United States is rendered more remote than ever.

Yours, &c., W. CHAMBERS.

"March 12.—In the *Canadian News Letter* just received, it is stated on authority from the Provincial Custom House, 'that the amount collected under existing regulations is scarcely sufficient to pay the expenses incident to the collection of the duties on American reprints of British copyright works.' In short, practical difficulties render the law valueless; its only apparent use being to legalize what was formerly a contraband trade. In such circumstances, American reprints can scarcely be blamed for exporting their wares to our colonies, for they may be said to do so on the presumption that they are *benefiting British authors*!"

"W. C."

The Lords of the Committee of Privy Council charged with the general control of the British department of the Paris Exhibition have appointed Mr. Henry Cole sole Superintendent. Mr. Cole will, therefore, have the entire management of this section,—and with him all persons having interests at issue will enter into communication.

A Correspondent, who gives his name, forwards an extract, with a correction, from a MS. of Campbell's most famous song:—

"I have lately received, amongst a number of autographs, a manuscript of Campbell's naval ode, 'Ye Mariners of England,' in the autograph of the poet. The interest attaching to this manuscript is, that therein the poet makes an alteration, which, I believe, has not yet been noted in any edition of his works. There can be little doubt but that most of your readers would admit the *correction*, even without knowing in what forcible language the poet condemns the original. I annex the passage:—

'The meteor flag of England
Shall yet terrific burn,
Till danger's troubled night depart
And the morn of peace return.†

*Edinburgh, 1839.

THOMAS CAMPBELL.

† Notice here, night and morn of peace. This is an important correction. The other was damnable indeed!—see O. & B.'s edition. T. C."

—You will perceive the correction is, 'morn' for *star*.—Yours, &c., R. H. B."

—The word is usually printed "star;" and we are far from feeling certain that the alleged correction would improve either the music or the sense. Campbell, however, had a right to choose between the two words.

Sir Fortunatus Dwaris has in the press a selection of poems and metrical pieces, designed for the relief of a case of deep distress. "The widow of a former colleague of mine," says Sir Fortunatus, "employed, for many years, upon a legal Commission, involving, as I have sufficient reason to know, the most laborious service and multifarious inquiry,—a barrister of the Middle Temple,—retired Chief Justice, author of a translation of 'Vanden Linden,' and several treatises on 'Colo-

nial and Civil Law,' has just made to me a most heart-rending disclosure of her present reduced and destitute condition. It might be some consolation to her, but it would little avail for her support, to be told, that—

I gave to misery (all I had) a tear;

so I have determined not to mock her in that fashion, but to devote whatever of time I could spare from official duties,—what of energy I have left,—what of zeal and devotion the occasion demands and inspires,—to make an intellectual effort to assist her." We observe that many of the chief persons at the bar and on the bench have lent their names to 'The Widow's Rescue.'

In reference to Mr. Skene's assertion that Sir Walter Scott "never" signed with his initials only, several Correspondents have addressed us; and from the evidence now under our eyes it is impossible to doubt that the great Romancer did sometimes—in his very brief and familiar notes—sign W. S. We state this fact at present, in order that these original autographs may not hereafter come in question through the evidence of so competent an authority as Mr. Skene. But we will add, that the admission does not improve the claims of 'More-dun.' If M. Cabany have no stronger evidence than that already adduced by him, he will gain no converts to his theory, from the external evidence, among persons able to judge and free from bias.

We have received the following from Mr. Nichols.—

"In the Historical Introduction which I have prefixed to 'The Grants, &c. of King Edward the Fifth,' reviewed in the last *Athenæum*, I have admitted how scanty was the gleanings of facts really important to the national historian, that I was able to pick up after the long-protracted inquiries of Sharon Turner and others, my predecessors in the same field. There was one point, however, which I deemed of somewhat greater importance than others, and that was this: Mr. Sharon Turner has argued that the Duke of Gloucester must have assumed the protectorate on the 19th of May. I have now discovered, from the Patent Roll, that he had certainly done so as early as the 14th of that month. This date, in the last number of the *Athenæum*, p. 289, is unfortunately misprinted 'the 4th.' May I be further allowed to remark, in reference to the observation that the book would have been improved by the documents being arranged chronologically, that I made the attempt to effect such arrangement, as I have intimated in my Paper, but that my efforts were foiled by the circumstance that the greater part of the documents in the original manuscript was deficient of their dates. On this account I conformed more than I should otherwise have done to the order of the manuscript. The reviewer remarks that the documents do not seem to continue after the 8th of June. One will be found dated the 11th, at p. 76. The letters patent appointing Humphrey Starkey to be Chief Baron of the Exchequer and John Vavasour to be a king's serjeant passed King Edward's great seal on the 15th of June (p. xxxi). I may here correct an inadvertence of mine in respect to the Serjeants Trenaile, Vavasour and Townsende and the several Judges. The former were all made *king's* serjeants, as the ordinary serjeant-at-law was not made by patent. The Judges are misplaced, by an error I the more regret, having myself sometimes noticed it elsewhere. Those of 'the Bench' were of the *Common Bench*, i. e. the Court we now call the Common Pleas; those appointed to hear *placita coram nobis* were the men appointed to the Court of King's Bench. I am, &c. JOHN GOUGH NICHOLS."

"March 14."

—We are obliged to Mr. Nichols for correcting our misprint of "4th" for 14th. The reason he assigns for not having arranged the documents chronologically is not satisfactory. Those which are dated might have been arranged in dates. As it is, the book is a mere "muddle" of documents, some dated and others undated. We wrote, as may be seen, in some doubt as to the date of the latest document, and it seems—such is the confusion—that we overlooked one document dated subsequently to the 8th of June. The one which Mr. Nichols notices, dated the 15th of June, occurs in another manuscript.

A further portion of the collection of the late Mr. Wilks is announced for sale next week. It contains, among other interesting lots—Burke's assignment to Dodsley, for the sum of fifty guineas, of his 'History of the European Settlements in America,' January 5, 1757. "This document," says a former possessor, "which is entirely autograph, is very curious and interesting, as it 'decides the point frequently controverted, whether Burke be the author of the work. Burke himself has omitted it in the collection of his works.'—The original manuscript of the 'Life of Hayley,'—'Le Second Manuscrit venu de Ste.-Hélène,' with numerous

corrections in the autograph of the Emperor Napoleon,—original manuscript, by R. Southey,—collections relating to Queen Caroline,—Forty-seven original and unpublished letters of Mrs. Montagu, are among the more interesting lots.

Dr. George Wilson, of Edinburgh, has been appointed, by the Board of Trade, Director of the Industrial Museum of Scotland, the active organization of which has now commenced. Ground has been purchased by Government, in the immediate neighbourhood of the University, Edinburgh, for the erection of the Museum; and specimens, illustrating the application of Science to the Arts, are in process of collection, from various quarters. These specimens will be deposited in temporary buildings till the Museum is ready for their reception.

We see it stated that one of the last acts of the Emperor Nicholas was to present a diamond ring to a writer named Rotchoff. It is perhaps a unique instance of any demonstration of a regard for the friendship of literature during the late reign. Of course, the writing was political. Under the title of 'The Truth about England,' M. Rotchoff, we understand, has produced a romance as curious of its kind as M. Ledru-Rollin's 'Decline of England.'

The naturalist, Ch. de Meyer, known to the scientific world by his travels among the Altai Mountains, and in the region of the Caucasus, died on the 28th ult.

The "wonted fires" are not all dead in the colleges across the Channel, as a students' demonstration, worthy of the Bourbon days, has now testified. M. Sainte-Beuve, an old writer in the *National*, and one of those moderate men of the Republican party who gathered round General Cavaignac, some time ago ceased to have the courage of his opinions, as our neighbours phrase it, and embraced the Imperial eagles. As reward, he at once became chief literary light to the readers of the *Moniteur*. From this post he has now been raised to the chair of Poetry and Belles Lettres in the University; very much to the disgust of the students, whose generous instincts keep no terms with literary complaisance. At his first lecture in the College of France, he was met with a storm of hisses, such as rarely greets an expounder of the Muses; and a stentorian voice exclaimed: "We are of your opinion when you wrote in the *National*." M. Ste.-Beuve got angry, and instead of appealing to Apollo and the Nine, threatened to call the police, and at length did so. *Sergents de ville* closed the hall, and thus the Professor and his pupils parted.

In a course of lectures recently delivered by Prof. St.-Hilaire, at Paris, on animals useful to man, the Professor strongly urged the introduction of horseflesh as an aliment. After an elaborate disquisition on the equine physiology, it was stated that the ancient Germans were in the habit of eating horseflesh, and that to this day shops for the sale of this meat, under the superintendence of a Veterinary College, exist by royal authority in Copenhagen. The Professor added, that during the great French wars, the celebrated surgeon Larrey was accustomed to give horseflesh to the wounded soldiers, and that he attributed their cure in many instances to this nourishment. From these and many other facts, M. St.-Hilaire argues that the horse is intended not only to be useful to man as a beast of burden, but also to provide him with wholesome and nutritious food. We believe that Paris restaurants have long been in the habit of mixing horseflesh in their savoury ragouts, which appear by another name in the *carte*. Supported by the scientific authority of M. St.-Hilaire, we fancy *entremets-de-cheval* may figure largely in Paris during the ensuing summer.

Signor Bezzi, who writes under date Turin, 6th of March, 1855, protests against some remarks of a former Correspondent,—and we give his protest as a homage to an honourable self-respect:—

"In the 1426th number of your excellent paper (Feb. 24th), which falls this moment under my eyes, I find an interesting communication from one of your Correspondents, who states that the best sculptors of Tuscany have been at work on statues of Dante, Petrarch, Machiavelli, and other poets, statesmen and philosophers, and that the statues are to be placed in the Palazzo degli Uffizi at Flo-

rence; but he calls the great men who are to receive this national apotheosis 'a part of that intellectual crop which seems to have entailed barrenness upon the soil of Italy for all future generations.' Surely his terrible vaticination of the eternal barrenness of a country, which has had three prolific lives, and is showing symptoms of a fourth, is now, to say the least, in very questionable taste. Your Correspondent stigmatizes prospectively the intended collection of the sculptured images of our historical men in Florence by calling it 'a petrified gathering of incongruous poets, statesmen and philosophers.' Surely this sneer ought not to have proceeded from an Englishman; for England is not happy in the distribution of bronze and marble honours, whether we consider this distribution ethically, or historically, or artistically, or economically, or even practically. The expression 'petrified gathering of poets, statesmen and philosophers,'—made, indeed, incongruous by the absence of monumental statues that England ought to have raised to her great men, and the presence of many awarded to her very smallest,—this expression irresistibly carries my mind to Westminster Abbey. If I mistake not, the *Athenæum* has inveighed more than once against the peculiarly English incongruity or unwillingness to transmit to posterity the lessons of the past through the medium of monumental sculpture. If you will admit in one of your earliest publications this kind of individual protest against your Correspondent's eternal condemnation of my country, you will oblige one of your oldest and most admiring Italian subscribers,

GIOVANNI BEZZI."

Mr. Fielde, a Correspondent who has more than once addressed our readers on the subject of Free Libraries,—a cause in which he has been active and serviceable,—writes to complain that the Crystal Palace Directors have done him, we will assume unwittingly, an injustice in suppressing the fact, that the Crystal Palace Free Library is his idea. "At the request of the late literary Director," says Mr. Fielde, "I prepared at considerable expense and trouble an elaborate and detailed plan of a 'Reading and News Room' in connexion with a library for the use of the Crystal Palace visitors and workmen, and Mr. Phillips on reading it told me 'it was just what he wanted.' I have only to add, that I have corresponded with Sir Joseph Paxton and Mr. Grove, who have both expressed themselves favourable to my project. Under these circumstances, it seems almost incredible that they would sanction such unfair treatment towards one who has so industriously endeavoured to 'advance their purposes,' by promoting additional 'attractions' to the Crystal Palace."

BRITISH INSTITUTION, Pall Mall.—THE GALLERY for the EXHIBITION and SALE of the WORKS of BRITISH ARTISTS, is OPEN DAILY, from Ten till Five. Admission 1s.; Catalogue 6d.

GEORGE NICOL, Secretary.

THE PORTLAND GALLERY, 316, Regent Street (opposite the Royal Polytechnic Institution). THE EIGHTH ANNUAL EXHIBITION of the NATIONAL INSTITUTION of FINE ARTS is NOW OPEN from Nine till dusk. Admission One Shilling. Catalogue Sixpence.

BELL SMITH, Secretary.

Admission Free.—NOW OPEN, at the GALLERY of ART, 121, Pall Mall, (opposite Her Majesty's Theatre), the EXHIBITION of PRIZE PAINTINGS to be distributed amongst the present Year's Members of the GLASGOW ART-UNION.—Hours, from 10 to 5; and in the Evening, from 7 to 9.

The Exhibition will close on the 24th of March.

PHOTOGRAPHIC SOCIETY.—THE SECOND ANNUAL EXHIBITION of this SOCIETY is NOW OPEN at the Rooms of the Society of Water-Colour Painters, Pall Mall East, in the Morning from 10 to 5; in the Evening from 7 to 10.—Admission, Morning, 1s.; Evening, 6d. Catalogues, 6d.

ROYAL GALLERY OF ILLUSTRATION, 14, Regent Street.—Additional Pictures. The Battle of Inkermann, and Great Storm in the Black Sea.—The Cavalry Charge at Balaklava, Battle of the Alma, Pictorial Map of Sebastopol, &c., are also exhibited in the Diorama, illustrating events of the war.—The lecture by Mr. Stocqueler. Daily at 3 and 8.—Admission, 1s., 2s., and 3s.

LOVE'S LENTEN ENTERTAINMENTS.—VENTRILLOQUISM EXTRAORDINARY.—Fifteenth Season in London.—UPPER HALL, 59, REGENT QUADRANT, Regent Street, completely re-fitted for the occasion, with New Entrances, New Stage, New Cloak-rooms, &c. Every Evening at 8, except Saturday: Saturday, at 3.—On Monday and Tuesday, THE NEW ENTERTAINMENT, called 'THE LONDON SEASON,' and other entertainments. On Wednesday, Thursday, and Friday, MR. LOVE will give a LECTURE on the OCCULT POWERS of the VOICE; followed by the entertainment called LOVE IN ALL SHAPES; with LOVE'S LABOUR'S LOST.—On Saturday at 3, Love in all Shapes, with other entertainments.—Pianoforte, Miss Julia Warman.—Stalls, 3s.; Area, 2s.; Gallery, 1s.—Tickets at Mitchell's Royal Library, 33, Old Bond Street; Turner's Music Depot, 19, Poultry; and at the Rooms, between 12 and 3.

PATRON: H.R.H. PRINCE ALBERT.

ROYAL POLYTECHNIC INSTITUTION.—MONDAY EVENING the 19th inst. LECTURE by Dr. LANKESPER, F.R.S. &c.: ON THE RESEMBLANCES of PLANTS and ANIMALS.—Tuesday Evening, TELEPHONIC CONCERT by INVISIBLE PERFORMERS, by J. H. PEPPER, Esq.—Thursday, DRAMATIC READING, by Mr. HUGH LESLIE, MACBETH.—Friday, ASTRONOMY, by Dr. BACHOFFNER, with appropriate music.—The SYROESE MINSTRELS, Monday, Tuesday, Thursday, and Saturday Evenings.—Friday Evening, Mr. Furlong, on ORAL INSTRUCTION.—THE STEAM GUN, DISSOLVING VIEWS of the WAR, DIORAMA of SINDBAD the SAILOR, COSMORAMAS, the Concert by INVISIBLE PERFORMERS, and all the LECTURES, on the NEW BANK NOTE, &c., as usual.

LEICESTER SQUARE.—The AZTECS and the EARTHMEN. The first of either race ever seen in Europe. Exhibited daily from 3 to 5, and 7 to half-past 9. Lectures at 4 and 8. Vocal and Instrumental Concerts every Exhibition.—Admission, Stalls, 2s.; Reserved Seats, 1s.; Gallery, 6d.

ROYAL PANOPTICON OF SCIENCE AND ART, Leicester Square.—A Grand Performance of Sacred Music on the Organ, by Mr. W. T. Best, illustrated in a series of subjects from Sacred History by the Optical Diorama, daily at 4.15, and 8.20.—Dioramic Views of the War in the Crimea, at 8.20 and 9.30. Cosmorama of St. Petersburg and Moscow, with Portrait of the late Czar, Heineke's Diving Apparatus, at 3 and 7.—Luminous Fountain, 4.55, and 9.55.—Lectures and Demonstrations during the week.—Electricity, by Dr. H. M. Noad, Thursday, 7.20, and Mr. Partington on other days, 3.45, and 9.—Chemistry, by Mr. G. F. Ansell, Monday and Thursday, at 2.—The Moon, by Mr. W. R. Birt, Monday, 7.20, Saturday, 2.—Pneumatics, by Mr. Partington, Tuesday and Friday, 2.—The English in the Middle Ages, by Mr. Leicester Buckingham, Tuesday and Friday, 7.20.—General Demonstrations on Scientific Apparatus, Manufactures, and Machinery at intervals.—Doors open in the Morning, from 12 to 5; Evening (Saturdays excepted) 7 to 10. Admission, 1s.; Schools and Children half-price.—On Wednesday this Institution will be closed.

SCIENTIFIC

SOCIETIES.

ROYAL.—March 1.—C. Wheatstone, Esq., V.P., in the chair.—The Earl of Ducie was admitted into the Society.—A paper was read 'On the Structure of the Manducatory Organs in the Class Rotifera,' by P. H. Gosse, Esq.

GEOGRAPHICAL.—March 12.—Sir R. I. Murchison, V.P., in the chair.—Sir J. Login, J. J. Galloway, A. Maclure, and J. Pilkington, M.P., Esqs., were elected Fellows.—'Late Journey from El-Medina to Mecca, down the "Darb-el-Sharki," on the Eastern Road (hitherto unvisited by Europeans),' by Lieut. R. Burton.—'Memoranda on Abyssinia,'—'Account of a Tour up the Gambia to Salum,' by Mr. J. Smyth O'Connor, Governor.

GEOLOGICAL.—Feb. 16.—Annual General Meeting.—W. J. Hamilton, Esq., President, in the chair.—The Secretary read the Reports of the Council, of the Museum and Library Committee, and of the Auditors,—which were adopted and ordered to be printed.—The President announced the award of the Wollaston Palladium Medal to Sir H. T. De la Beche,—of the balance of the proceeds of the Wollaston Donation Fund to MM. G. and F. Sandberger, of Wiesbaden, geologists and palæontologists.—The President proceeded to read his Anniversary Address, and commenced with biographical notices of some of the lately deceased Fellows of the Society,—particularly Prof. E. Forbes, late President of the Society, Prof. Jameson, and Sir J. Franklin.—The ballot for the Council and Officers was taken, and the following were duly elected for the ensuing year:—President, W. J. Hamilton, Esq.; Vice-Presidents, Sir P. Egerton, Bart., Sir C. Lyell, Sir R. I. Murchison, and Prof. J. Phillips; Secretaries, J. C. Moore and J. Prestwich, jun., Esqs.; Foreign Secretary, S. P. Pratt, Esq.; Treasurer, D. Sharpe, Esq.; Council, J. J. Bigsby, M.D., Lieut.-Col. P. T. Cautley, Sir P. G. Egerton, Bart., Earl of Enniskillen, T. F. Gibson, R. A. Godwin Austen, W. J. Hamilton, J. D. Hooker, M.D., Leonard Horner, Sir C. Lyell, J. C. Moore, J. Morris, Sir R. I. Murchison, R. W. Mylne, S. R. Pattison, J. Percy, M.D., Prof. J. Phillips, Lieut.-Col. Portlock, J. Prestwich, jun., S. P. Pratt, Prof. A. C. Ramsay, J. W. Salter, and D. Sharpe.

Feb. 21.—W. J. Hamilton, Esq., President, in the chair.—E. Hull, Esq. was elected a Fellow.—'On the Occurrence of Glaciers and Icebergs during the Permian Epoch,' by Prof. Ramsay.

March 7.—W. J. Hamilton, Esq., President, in the chair.—On the Geology of the Goldfields of Ballarat, Eureka Creek, and Creswick Creek, Victoria,' by Mr. H. Rosales.—'On the Geology of Part of the Peel River District, Australia,' by M. F. Odenheimer.—'On the Occurrence of Obsidian Bombs in the Auriferous Alluvium of Australia,' by the Rev. W. B. Clarke.—'On the Occurrence of Fossil Bones in the Auriferous Alluvium of Australia,' by the Rev. W. B. Clarke.—'Notes on the Geology of New South Wales,' by the Rev. W. B. Clarke, in a letter to Sir R. I. Murchison.

SOCIETY OF ANTIQUARIES.—March 1.—J. P. Collier, Esq., V.P., in the chair.—Mr. J. H. Tonna was elected a Fellow.—The Rev. Thomas Hugo

exhibited a small bronze Celt of unusual form found in Ireland.—Mr. Octavius Morgan exhibited a drum-shaped early clock made at Nuremberg; also, a German MS. with some very curious drawings of costumes.—The reading of Mr. Wylie's account of 'The Graves of the Alemanni at Oberflacht, near Stuttgart,' was concluded.

March 8.—Admiral Smith, V.P., in the chair.—Mr. Pycroft presented a painting of St. Martin on canvas.—Mr. Waterton exhibited several mediæval rings from his collection.—Mr. J. B. Yates communicated a transcript of a proposal submitted to Cromwell for insuring shipping and imports and exports.—A memoir was read 'On the Field of the Battle of Tewkesbury,' by Mr. Brooke.

ROYAL SOCIETY OF LITERATURE.—Feb. 28.—Sir John Doratt, V.P., in the chair.—Mr. Birch read a paper in French by M. François Lenormant, the son of the Keeper of the Antiquities in the Bibliothèque Nationale at Paris, 'On a Monument of the Conquests of Ptolemy Evergetes I.' The object of M. Lenormant's paper was to show the remarkable coincidence between the celebrated Greek inscription found at Adulis, and preserved by Cosmas Indicopleustes, and the Egyptian inscription discovered by M. Champollion at Esneh in Egypt. It was illustrated by a careful philological examination of the names of persons and places occurring in it.

ARCHÆOLOGICAL INSTITUTE.—Feb. 3.—W. H. Blauuw, Esq., in the chair.—The theory of the supposed ancient currency of Ireland, in the form of rings of various sizes, was brought under consideration.—Dr. Bell gave a notice of the establishment of a collection of Roman and German antiquities at Mayence, and of another, comprising mediæval objects, at Nuremberg, according to the plan originated at the Congress of Archæological and Historical Societies at Mayence, in 1852.—Mr. Ashurst Majendie described some memorials of the ancient family of De Vere, and produced an elaborate drawing of the monument of John, fifteenth Earl of Oxford, and his countess,—a fine work of sculpture of the Renaissance style, no mixture of Gothic ornament being discernible.—The Dean of Carlisle communicated the recent discovery of a stone cross, built into the wall, at Carlisle Cathedral, in a part of that structure built about the year 1300.—The Rev. H. Scarth sent fac-similes, taken by means of moistened paper, from the Roman tablet lately found at Bath; and Mr. Franks stated the grounds of his belief that the inscription must be assigned to the time of Heliogabalus.

BRITISH ARCHÆOLOGICAL ASSOCIATION.—Feb. 28.—S. R. Solly, V.P., in the chair.—The Chairman announced that the Earl of Perth and Melfort had been elected President of the Association, and that the Congress for the autumn of 1855 would be held at the Isle of Wight, and several of the tumuli there, by the consent of the proprietors, examined.—Mr. Pettigrew submitted a collection of Roman, Saxon, and Mediæval rings belonging to Mr. Warren, of Ixworth, and collected by him, being found in Norfolk, Suffolk, and Essex.—Mr. Davis, V.P., exhibited a clothes-brush of the time of Charles the Second, which had been handed down along with other heir-looms in his family; and Mr. H. Syer Cuming, the Hon. Sec., made some observations upon its construction and on the antiquity of clothes-brushes. The precise period at which they were first employed in England is unknown. Shakespeare, however, makes allusions to them in his 'Much Ado about Nothing' and the 'Taming of the Shrew.'—Mr. Gunston exhibited eleven ancient iron keys, five of which were piped or tubular, the rest spiked. In three the bows were curiously decorated.—A paper 'On the Remains of Beaulieu Abbey, and on the Priory of St. Dionysius, both in Hampshire,' by Mr. W. D. Bennett, was read, and gave rise to some discussion. Mr. Le Keux referred the Association to some details belonging to Beaulieu given by Mr. Weale in his quarterly architectural publications.—Mr. Planché read a paper, entitled 'Gatherings for a Glossary,' being

the first of a series to be published in the Journal of the Association.

INSTITUTE OF BRITISH ARCHITECTS.—Feb. 5.—Mr. C. C. Nelson, Hon. Sec., read the substance of a work recently published by the Prussian Government, entitled 'Early Christian Monuments of Constantinople, from the Fifth to the Twelfth Century,' by W. Salzenberg. This folio work comprises numerous engravings, in line as well as in chromo-lithography, illustrative of the ancient edifices of Constantinople, and especially of the Church of Sta. Sophia; and as the author enjoyed unprecedented opportunities of examining the latter building, his account and illustrations of it possessed great interest. That the illustrations were exceedingly elaborate and minute may be inferred from the fact that twenty-two plates were devoted to the Church of Sta. Sophia alone. M. Salzenberg's letter-press gives an elaborate history of Byzantine Art as exemplified in Constantinople; it describes the foundation and successive alterations of the Great Mosque,—and gives, for the first time with precise accuracy, the measurement of its celebrated cupola. The dimensions of this famous dome are as follows:—diameter immediately over the pendentive arches, 100 Prussian feet (103 English),—diameter higher up between the ribs forming the inner surface, 104 Prussian feet,—height from the pavement to the underside at the apex, 179 Prussian feet,—thickness over the windows, of which there are forty at the basis of the cupola, 29 inches—at the crown, 24 inches.

Feb. 19.—Mr. M. Digby Wyatt continued the subject of the last Meeting by some remarks on the mosaic and other internal coloured decorations of Sta. Sophia. He observed that one class of Byzantine decorations, as displayed in this church, involved some structural points,—the chief of these being the perforated stone windows round the dome, which there was every reason to believe were filled originally with stained glass.—

"The windows are formed of a series of slabs of marble, pierced in apertures of about 8 inches by 10. In these sash-bars, as I may call them, there is a rebate left on the outside in all cases, and it appears to me most probable that these apertures were filled in with coloured glass. The reason I have for thinking so is, that we know that the Byzantines were perfectly well acquainted with all the processes of glass-making. Their enamels were proverbially beautiful, and Buonarroti has given us many interesting details concerning their glass vessels, which they painted with fluxes, and decorated by other processes, at a very early period. Of many varieties of such vessels there are specimens existing in the Museum Christianum of the Vatican at Rome. These actual remains prove to us that they were masters of the technicalities of glass-work. Paulus Silentiarius alludes to the beautiful effect of light and colour in this building of Sta. Sophia, when seen in the early morning; and Paul the Hermit, and Fortunatus of Poitiers, in his 'Carmina,' also describe this effect. Theophilus, who was a writer on the technical arts a little before our Conquest, has a whole treatise upon the subject of stained glass, which he prefaces by stating that he had taken the pains to go to Sta. Sophia, to examine the effect of the light, coloured by transmission, in order to qualify himself for writing this section of his book. When it is remembered that Sta. Sophia was commenced in the year 532, and completed about 540, it is interesting to have grounds for the belief that stained glass was extensively used at such an early period. Until recently the assertion of the Benedictines, that coloured glass was not known previously to the time of Charlemagne, has been generally regarded as correct. French and English antiquaries have, however, found allusions to its existence at a much earlier period,—as early, indeed, as the year 600; and the details now given to the world concerning Sta. Sophia, afford a strong corroboration of their views."

—The mosaic decorations included the pavement, consisting of large marble slabs, the wall panels, of inlaid marble (being the origin of Florentine mosaic), and the glass mosaic, of the more elaborate and pictorial designs, in the dome and other

elevated portions of the building. These pictorial mosaics were chiefly upon a gold ground; and it appeared, by M. Salzenberg's illustrations, that there were also some upon a silver ground. The mode of executing the latter had been described in ancient manuscripts; but the existence of any actual specimens was not previously known. Mr. Wyatt dwelt upon the skill with which the architectural lines of the building were enforced by the decoration,—upon the extreme beauty of the patterns and the excellence of their execution,—and, particularly, upon a peculiar Oriental character displayed in some of them, and which he supposed to have been derived from Persia in the time of Justinian. He described the principal compositions in mosaic, including figures of the Greek Saints, the Greater and Lesser Prophets, the Evangelists and Cherubim, ascending, by gradual steps, to the cupola, within which was originally a mosaic painting of the Deity. Mr. Wyatt then adverted to the history of the art, showing that the glass mosaics on a gold ground were common both in Rome and at Pompeii; and, finally, described the various technical processes by which these works were executed. He alluded to the wide diffusion of Byzantine art, and referred to a painting in the Cathedral of Kazan, one of the oldest cities in Russia, to show the identity of style with that of Constantinople.

Feb. 26.—At a special meeting of the Members, it was resolved, that the Royal Gold Medal of the Royal Institute of British Architects for 1854 should be awarded to M. Hittorff, architect, Member of the Institute, Paris; the Silver Medal of the Institute to Mr. W. P. Griffith, architect, of St. John's Square, for an Essay on 'Mediæval Decorations and Ornaments'; with two premiums to Mr. C. M. Beazley and one to Mr. Willey, students, for drawings. The Soane Medallion was not awarded, only one set of designs (for a metropolitan hotel) having been sent in, and those not being sufficiently meritorious to justify the award of the Medal.

Feb. 28.—At an adjourned special meeting, the Health of Towns Bill, now before Parliament, was considered, and a Committee was appointed to draw up a petition against its passing in its present form.

HORTICULTURAL.—March 6.—Mr. J. M. Strachan, V.P., in the chair.—Lord Murray, J. Boord, Esq., and Mr. Videon were elected Fellows.—The centre table was loaded with some noble orchids; in front of these were some specimens of pines and early grapes; the other available space was occupied with beautifully grown azaleas, Chinese primroses, hyacinths, cyclamens, and a variety of other forced flowers. Pears unrivalled for their beauty, apples worthy of November, salads and forced vegetables, both of home and foreign growth, attracted the attention of those who are lovers of the products of the fruit and kitchen garden. In another place we observed a most extensive and valuable assortment of fibrous materials, and cordage and paper prepared from them, furnished by Dr. Royle, exhibited by the East India Company. Among them were plantain fibre and tow, plain and dyed, showing that it takes colour well; also fibre from yuccas, pitu or agave (Madras), sansevieria or moorva, moonja (*Saccharum Munja*), a kind of sugar-cane, pine-apple, and jute (*Corchorus olitorius*). There were likewise leaves of bhabhr (*Eriophorum cannabinum*), and Cyperus (*C. tegetum*), together with examples of a kind of bark-cloth from the paper mulberry and flam tree of Borneo. These natural cloths and fibres, together with the papers made from lace-bark, plantain, &c., excited, as might be expected, interest, showing, as they did, the richness of our Indian Empire in textile materials, which are at present so scarce with us. Samples of paper prepared from *Holcus saccharatus* were also exhibited from Mr. Henderson. They were strong, and of tolerably good colour. It was mentioned, that fibre of this plant was some time ago submitted to the Treasury for the purpose of instituting experiments with it, in order to ascertain its value, and that the result of the Government investigations was, that it was

inferior in strength to hemp, but nearly as strong as flax.

INSTITUTION OF CIVIL ENGINEERS.—*March 6 and 13.*—James Simpson, Esq., President, in the chair.—The discussion was renewed on Mr. Allen's paper 'On Steam and Sailing Colliers,' and was continued throughout both evenings.—At the monthly ballot, the following candidates were elected:—Messrs. C. Rammell and F. C. Stileman, as Members; O. Cockayne, E. Loysel, R. F. Reed, B. P. Stockman, T. M. Vigors, and H. Wrigg, as Associates.

ROYAL INSTITUTION.—*General Monthly Meeting.*—*March 5.*—F. Pollock, Esq., in the chair.—J. R. Andrews, J. Baily, C. Beevor, H. Bradbury, H. N. Davis, J. Dickinson, J. V. Gooch, Rev. G. Dalgarno Hill, E. James, Dr. Lee, W. M. Grigor, and Leopold Redpath were duly elected Members; and G. J. Lyons, E. Macrory, and J. W. Wrey were admitted Members.—The Secretary reported, that the following arrangements had been made for the lectures after Easter:—Eight lectures 'On Voltaic Electricity,' by Prof. Tyndall,—eight lectures 'On Christian Art,' by G. Scharf, Esq., jun.,—and eight lectures 'On Electro-Physiology,' by Dr. Du Bois Reymond.

SOCIETY OF ARTS.—*March 7.*—Col. Challoner in the chair.—'On the Sewage of London,' by Mr. J. B. Lawes.

MEETINGS FOR THE ENSUING WEEK.

- MON. Royal Academy, 8.—'On Sculpture,' by Sir R. Westmacott, Statist, 8.—Discussion: 'On the Loans raised by Mr. Pitt during the first French War, 1793–1801, with some statements in Defence of the Methods of Funding employed by Mr. Pitt.'—Society of Arts, 8.—Special. Adjourned discussion 'On the Sewage of London.'
- TUES. Institution of Civil Engineers, 8.—'On the Application of the Screw Propeller to the larger class of Sailing Vessels,' by Mr. Robinson.
- THURS. Royal Institution, 3.—'On Electricity,' by Prof. Tyndall.
- THURS. Society of Antiquaries, 8.
- FRI. Royal Institution, 3.—'On English Literature,' by Mr. Bence.
- FRI. Numismatic, 7.
- FRI. Philological, 8.
- ROYAL INSTITUTION, 8.—'On (so-called) Catalytic Action and Combustion, and Theories of Catalysis,' by the Rev. J. E. Ashby.
- SAT. Royal Institution, 3.—'On the Principles of Chemistry,' by Dr. Gladstone.

FINE ARTS

The Principles of Colouring and Painting. By Charles Martel. Winsor & Newton.

THIS is another of that excellent series of practical handbooks issued by the above firm:—it may be considered as a companion treatise to former volumes, and necessary for the student of any branch of Art, being founded on primary and abstract, and not on individual principles.

The writer, availing himself of Chevreul's newest discoveries, has abridged the science of Colour into a portable and understandable shape. He shows very forcibly that, "to imitate the model faithfully, we must copy it differently from what we see it." It is not enough that the poor uneducated eye sees a colour: it must be sure that such a colour is in the object, and must understand why it is there, and what produces it. In viewing every coloured object, he shows that the eye, constructed to see white light, passes through certain successive stages which cause the colours looked at to appear changed. The law of simultaneous contrast is now for the first time brought before the poorer student.

The Theory and Practice of Landscape Painting in Water-Colours. Illustrated by a Series of Twenty-four Designs, Coloured Diagrams, and numerous Woodcuts; with Extra Plates on Simultaneous Contrasts (Leighton Brothers' Chromatic Process). By George Barnard. Orr & Co.

THIS work we have already reviewed as it appeared in numbers. The examples given are coloured by machinery, and are meant as guides to a hand guided not by springs and pulleys, but by a mind. Excellent as hints, they would be most dangerous to the pupil if slavishly copied, being very coarse, vague, and uncertain, the outline especially being quite lost,—while severity or exactness of form is one of the chief requisites in the modern landscape-painter, who is beginning to find out that

Nature shapes as well as colours objects. With this proviso, we can warmly recommend the book.

NATIONAL INSTITUTION OF FINE ARTS.

THE Annual Exhibition of the National Institution of Fine Arts is now open. On the whole, the paintings are of an inferior order to those of last year. Among the five hundred and odd specimens, there is not one attempt at anything beyond smooth, decorative, drawing-room art;—there is scarcely one good portrait:—the landscapes are of an average and monotonous excellence, and the works of pure imagination are limited to some half dozen. The rest are mere beginnings,—experiments in pigment:—widows of Alma, weeping as if they had lost four thousand men rather than one,—fish like flesh, and flesh like fish. Considering that this Gallery is one to which admission is procured by purchase, and not by merit or favour, we might, we think, reasonably expect to find annually on these walls the works of many impeded, ill-used and neglected geniuses; instead of which, we find no indication of either aspiration or ambition. The same men work on with the same ideas:—this artist has his sabotted peasant, and that his prismatic walls. The same red cows come down, from the same opaque mountains, with a unity of purpose known only in the annals of willow-pattern Art.

Miss Howitt, whose 'Gretchen,' with its simple, quaint pathos and tender poetry, we had last year to praise, is not equal to herself this year. *The Lady* (No. 257) is a mere phantasy, unreal without being poetical, unusual without being suggestive. It has little in common with that Spirit of the Flowers, whom Shelley, in his 'Sensitive Plant,' describes as tending the magic garden. We see only a shepherdess walking, and a woman lying dead. Miss Howitt's technical faults are conspicuous in this work. The drawing is weak and hesitating; the faces seem moon-lit and unpleasantly transparent, and her delicacy of observation has grown almost morbid. The borders of flowers want boldness and relief; and, although a little too much like a valentine in an album, are carefully and truthfully painted, and with much finish and taste. The picture, as a mere poetical sketch, might have pleased; but, as a completed work, it is a feeble interpretation of the ethereal poem—and is, therefore, not worthy of Miss Howitt's genius. We should imagine the picture a commission, and that the artist has been working to pattern.

Equally slight, and more brown and unpleasing in colour, are Mr. W. B. Scott's two pictures, which still interest from their real poetry, their Pre-Raphaelite feeling, rather than style, and the originality of their subjects (vague as they are). The best of the two is *Albert Dürer in Nuremberg* (263). The artist, not very like his portrait, is looking down from the wooden gallery of his house upon the broad market-place leading to the Schloss and Thiergartner gates. He is watching, with keen, perceptive meditation, a knightly procession, while the swallows are flashing past him to and fro, for their nests are built in the roof of the artist's house. Little as there is in this subject, there is a minute poetry of observation, that leads us to dwell with pleasure on the old, cracked frescoes of Adam and Eve, the red roofs, the tall steeples, and the jostling houses, with their full daylight effect. Unaffected simplicity is more attractive than affectation coupled to even a higher art. We regret that Albert Dürer's head should be so feebly painted, so lost in outline, and so foggy in colour. His other picture is *A Country Market Town, Hexham, Northumberland* (245). In this there is even less subject than in the preceding. An ugly young woman, brown as hardbake, is working at a window. Below lies the market-place, and beyond, the quiet church, with its oriel and tower. At the open window are two white pigeons,—one eyeing the brown lady with curious eye, and the other, somewhat bolder, pecking at a cherry. The glass windows are well painted, and in one a fly is buzzing, a thought taken rather from Tennyson than nature, common as flies are.

The maiden is ugly, the room dull and plain; and yet there is singular truth in the women below, washing at the spring; and the distance, although not apparently expressed by tenderness of tone, is singularly deceptive.

The most ambitious picture in the Gallery as to size and subject is one by Mr. J. E. Lauder. It is a scene from that romance of 'Sir Tristram' which Mr. Arnold's poem has so beautifully recast:—*Sir Tristram teaching La Belle Isonde to play the Harp* (375). Pleasing in composition and colour, the artist in this picture has committed the radical fault of making his heroine "flabby" and uninteresting. Such a subject as this admits of two treatments. It must be a picture of sentiment, and the painter will trace the dawning of a deep and fatal passion; or it must be a picture of costume and spectacle, and the artist will dazzle us with steel and gems and cloth of gold, and woven silks and feathers, while the horizon, blending with a sunset, would reflect the splendour of earth. Mr. Lauder has done neither of these things:—we have neither knightly pomp nor attempt at expression. The figures are rehearsing, the dresses are right, and the attitudes are set; but the play has not yet begun. The colour of the flesh is painfully livid and unhealthy, and we think that such a lady had better be studying Buchan's 'Domestic Medicine' than preludes and cadenzas. We must, however, admit that the details are painted in a masterly manner,—and the scene, apart from the drawbacks, is well given.

Mr. R. S. Lauder's *Gow Chrom and Louise* (45) is the well-known scene from 'The Fair Maid of Perth' where the burly honest smith takes the poor glee maiden under his arm and loads himself with all her finery. This picture is pleasing in colour and characteristic in its background and details, but is spoilt by the crippled position in which the figures are placed in the artist's unsuccessful attempt to convey an impression of rapid motion. The face of Louise is simply nothing, and the smith's not much. If there were as much thought as there is clever craftsmanship, this would be an excellent painting.—A more equal and sustained picture, though wanting finish and elaboration in these exacting days, is *Imogene* (300). When we say "Imogene" we mean a landscape with a figure. A more fitting spot could not have been chosen to illustrate the spirit of Shakespeare's scene; but the cave is damp and rheumatic, and suggests slimy toadstools and many efts. The tall, spiry trees growing up to the light, and the brawling stream, all conduce to the true effect. The colour is pleasing and the touch vigorous.

One of the best pictures in the collection is Mr. M'lan's *Battle of Stone Ferry* (77). With a little more power of conveying variety of expression, this excellent work would have taken a higher standing. Of no national interest, like West's 'Death of Wolfe,' it is equally, perhaps more, romantic in the interest of its situation. It represents a small detachment of Fraser's Highlanders, who during the American War defended themselves against two thousand armed insurgents. Only seven out of sixty men escaped to the main body,—the rest, including all the officers, falling like the long-haired Spartans at Thermopylæ. To a Scotchman such heroism must be dear; and Mr. M'lan has painted it as if he had just left the field. He has chosen the moment when a driving cloud of white smoke indicates the arrival of the reinforcement, whom the grim, unmoved piper, built up with slain, greets with "Hech, but ye've been long o' comin'." The few survivors stand on a red, writhing heap of wounded and of dead, their faces still towards the foe,—staunch and at bay, but hedged in with pikes and scythes. In the rear, Indians, ghastly with the war-paint, are stealing round them; a chief, crowned with a crimson crest, drawing an arrow to the head. The white powdered wigs of the slain, stiff and courtly, contrast hideously with the unrestrained passion of the living. The sky, lurid and heavy, lends additional gloom to the scene. The composition of the picture reflects credit on the artist. The dead lie naturally, and the drawing is throughout manful and honest. Mr. M'lan should try Flodden or the combat of the clans at Perth, sub-

jects equally worthy of his talent and his patriotism. We congratulate him on the skill with which he has treated the colour of the plaid, not breaking it into spots and patches, but maintaining its breadth and unity.

Mr. Provis is admirable, as usual, in his Breton interiors, but has nothing better than ordinary.—Mr. Pasmore contributes several of his rainbowed walls, exceedingly poetical, charming—and unnatural. Palace or hovel,—night or day,—sun or shade,—is all one to him. He looks through his prisms, and tints his thin clever sketches with subdued iris, and pleases himself and his spectators,—and is happy.

Mr. F. Wyburd shows an advance in the delicate lady-like beauty of his *Viola* (89). With such perception of grace, we lament that he does not show more enterprise, and throw his figures into scenes. Surely the object of Art is not to throw off stereotypes.

Mr. Egley is clever in his *Hamlet and Ophelia* (97), but his taste is subject to aberrations. Why paint Hamlet with such preposterous yellow hair merely because Ophelia wears an amber-coloured gown? Why pinch up their features into such painful small contractions, which seem contracting as you look at them? The painting, technically, is careful and good, but rather rigid.

A curious little picture, with much elaborate study in it, is *William Tell's Child* (468), by Mr. W. S. Burton. The tree trunk against which the child rests is a miracle of patience and skill. We rejoice the less, however, in the child's deliverance, because we see that water on the brain must ensue in a few months, its head already being as large as a bushel.

Mr. F. Underhill has never done anything better, rough as it is, than *Charity* (137). The woman at the church-door and the group entering are well contrasted. The children are painted with his usual sympathy for infancy.

The best portrait we see is *A Russian Dealer of the Gostyninodor* (86), by Mr. W. C. Thomas. The face is strange, but perhaps true in colour, but the fur is a wonderful piece of imitation without *microscopism*.—Mr. Weekes has a singular power in portraying the shades of ugliness. His Christopher Sly is an educated Caliban. His William, in *Touchstone, Audrey, and William* (514), is a bumpkin of the first water. His detail is very elaborate, but his painting is thin and timid.—Mr. Russel's *Malvolio* (480) is clever, but the head is too large for the figure, and there is almost too much of Mercurio's archness about the face of the steward, who was half a Puritan and wholly a busybody, vain, arrogant, prying, and insolent.—Mr. Rossiter's *Pistol* (499) is very bright in colour and nicely painted.—Mr. Marks's *Vanitas Vanitatum* (227) is scarcely an advance on his 'Cavalier' of last year. The picture is crowded with quaint fancy and thought. We scarcely see, however, what brings the emblems of life round his feet, unless he is a property-man or a bailiff, a toyman taking stock, or an antiquary planning a catalogue.

In no artist do we see more palpable improvement than in Mr. Duffield. His *Citrons* (125) presses very close on Mr. Lance's heels. They are bossy and rich in colour, clean and sharp in finish, and admirable both in composition and imitation.—Mr. Burcham's *Fruit* (177) is very delicate and bright in colour.

The landscapes scarcely deserve much mention. Too many of them are the clever productions of the manufacturer, and are rather thrown off, like printing, than thought out touch by touch by the artist who gropes for wisdom and beauty. We have plenty of Highland and Welsh scenes, clever and impudent, thrown off with an easy, smooth talent that thinks it sees through and through nature, and sees no further than the peel of the rind. We are tired of seeing mountains hidden in square feet of semi-opaque fog, done by the yard, year after year,—fire introduced as a bit of red, and cows to "carry through colour." Such work should be left for machinery, and not be done by men with souls and bodies.—Mr. Wood's architecture is mellow in colour and well drawn as usual.—Messrs. Williams and Percy have some pleasing, fresh, manly scenes, neither very delicate nor very tender

in execution, and rather conventional in treatment. One of the best landscapes is Mr. Hulme's *Walk by the Conway* (315). The foliage is rather too feathery, but the touch of the artist light and pleasing.—*Overschie, near Rotterdam* (484), by Mr. T. S. Robins, though not presuming, is very warm and glowing in colour, and the orange roofs tell brilliantly against the blue sky.—There is some poetry in Mr. T. White's *Haunted House* (483), and he knows the value of obscurity, and throws a weird, blue light over his roofless grange. The whole looks like a dream; and would lose nothing by more boldness and distinctness.—Mr. Swarbrick's *Roslyn Chapel* (244) is careful, but is of a tiring, monotonous equality of execution that never seems to rise or fall.—Of the younger artists, Mr. Lupton's *Banks of the Mole* (301) shows much vivacity and freshness.

FINE-ART GOSSIP.—On Wednesday, at a General Meeting of the Royal Academy of Arts, Mr. E. M. Ward was elected a Royal Academician in the room of the late Mr. J. J. Chalmers.

We are sorry to see it stated in the Irish papers that the Government School of Art in Limerick will be closed at the end of this month, following the example of the schools in Cork and Belfast.

The last descendant of Leonardo da Vinci, the famous Florentine painter, who expired in the arms of Francis the First, died a few days back in the neighbourhood of Roanne (Loire). He was a travelling glazier, says the Paris Correspondent of the *Daily News*, and died from the effects of a fall which he had had when repairing the roof of a boathouse.

At the last meeting of the Oxford Architectural Society, Mr. Street made some interesting remarks on coloured sculpture, and exhibited some fragments of ancient alabaster, where gold had been used for the hair, the edges of draperies, and the lining of robes, giving great distinctness to the form at a distance. Another gentleman observed, that mediæval sculptors, so far from fearing to lose the sharp edge of the chiselled stone, frequently covered their figures with a paste before colouring.

Mr. R. Westmacott, jun., R.A., in a paper, originally read at a meeting of the Archaeological Institute of Great Britain and Ireland, but recently published, appears to agree entirely with our strong and repeated objections to the colouring of statues. He treats the taste, justly, as occasioned by a morbid demand for novelty, that would degrade sculpture to the level of wax-work, and debase and sensualize one of the purest and most spiritual forms that Art can assume. It is, in fact, another manifestation of the demand for Dutch imitation, so prevalent at the present day;—another proof of our growing materialism and restless desire for change, even for the worse. Mr. Westmacott at once admits the proof that the Greeks sometimes coloured their statues, but does not allow that such a precedent must be followed. It still remains to be proved that Phidias coloured his statues,—that such a practice was prevalent in the best age of sculpture,—and that it was an ordinary, and not an exceptional, practice. Suppose the Greeks did smear some statues, as one would a door, with a uniform and ungraduated tint, put in jewel eyes, or inlaid bronze lips with silver,—there is still no reason that because we try to follow their good taste we should also follow their bad. Pausanias mentions a statue of Bacchus, made of gypsum and painted, and another of gold, with the face painted red. What could these have been but mere bedaubed idols and priestly relics? The Baths of Titus and the Villa of Hadrian, it must be remembered, though full of mural decorations, presented no instances of coloured statues. *No great statue has ever yet been found coloured.* The writer shows very judiciously that many passages in the ancient authorities on this subject are very vague, and, as they are at present corrupted in the text, utterly unintelligible. Thus, Pliny speaks of a statue of Athamas, the work of Aristonidas, who mixed iron with bronze to produce a redness that would resemble a blush; and Callistratus speaks of a Cupid, by Praxiteles, in which the same artifice was employed. Plutarch men-

tions a statue of the dying Jocasta, formed of a metal that expressed the death-pallor of her countenance. Callistratus, equally ill understood, describes a statue of a Bacchante, who held in one hand a kid with its entrails exposed, the colour of the marble representing the livid flesh. On such quotations, the chromatic school found their arguments. Mr. Westmacott thinks statue-colouring an Asiatic element in Greek Art. The colour introduced into Greek architectural ornament was intended to complete the chromatic effect, and to insure distinctness or prominence to certain parts of the sculpture. Mr. Westmacott adduces the failure of the painted frieze at Sydenham as an argument in his own favour. The figures have lost their symmetry, the composition its unity, and the finer details are suppressed or lost sight of. The beautiful sculptured procession is now a gilded toy.

The Silesian Art-Union has ordered of Herr Mächtigt, the Breslau sculptor, a statuette of Martin Opitz, the celebrated head of the first Silesian school of poets, whom a bygone age too courteously was in the habit of calling "the Father of German poetry." As model, the artist uses a full-length portrait of old Opitz (painter's name unknown), in the "Ständehaus-Galerie" (Gallery of the Provincial States-house) at Breslau, which shows the poet in the rather fantastical dress of the seventeenth century, but is full of expression, and well adapted to serve as basis to a bust.

The subscriptions for the monument of Count Platen have been so very considerable, that the model of a colossal statue (to be executed by Prof. Halbig, of Munich,) has already been commenced. This great and noble German poet, whose lot in life it was to look out in vain for sympathy and acknowledgment, and who, in the sad isolation of a voluntary exile, found a solitary and untimely grave near "his beloved laurels and cypresses" far away in Sicily,—is also getting, at last, his due share of honours. The statue, we hear, is to stand at Platen's birthplace, in the little town of Ansbach, in Bavaria.

A monument to the antiquarian Winckelmann is about to be erected at Stendal, in the Old Mark of Brandenburg, where, some hundred and thirty years ago, he was born as the son of a poor shoemaker. The expenses are being raised by public subscription, and the model has been contributed gratis by Prof. Wichmann, of Berlin.

In the Royal Bronze Foundry of Munich, a statue of Beethoven, by the American sculptor, Crawford,—representing the great master more youthful and more jovial than Hahnel's statue on the Münster-platz at Bonn,—has been finished, and is about to depart for the Music-Hall at Boston to which it has been presented by an American amateur. At the same establishment a colossal statue of Berzelius, intended for Stockholm, is in the course of progress; and the great equestrian statue of Washington, also by Mr. Crawford, which is to be a part of the intended Washington monument, will be cast in a very short time.

A bust of the late General von Radowitz is being executed, by command of the King of Prussia, under the direction of Prof. Bläser, of Berlin, who modelled it partly from memory, partly from a mask, and some sketches. It is praised as very true, regarding features as well as bearing.

Prof. Retschel, of Dresden, has finished a medallion, in marble, of Dr. Franz Liszt, which is intended for the Paris Exhibition.

A sarcophagus has been found near Sidon. It is covered with inscriptions in the old Phœnician tongue, and promises, if deciphered, to furnish ethnologists with a key to another branch of the Semitic languages. If authentic, a more important discovery has not been made in the present century.

MUSIC AND THE DRAMA

ST. MARTIN'S HALL.—Haydn's 'CREATION' will be performed on THURSDAY, March 22, under the direction of Mr. JOHN HULLAH. Principal Vocalists: Mrs. Sims Reeves, Mr. Sims Reeves, and Mr. Weiss. Tickets, 1s. 2s. 6d., 3s., may be had of the Music-sellers, and at St. Martin's Hall. Commence at half-past seven o'clock.

SACRED HARMONIC SOCIETY, Exeter Hall.—Conductor, Mr. COSTA.—On FRIDAY NEXT, March 23rd, Mendelssohn's 'LOBESANG,' and Mozart's 'REQUIEM.' Vocalists: Madame Clara Novello, Mrs. Luckey, Mr. Sims Reeves, and Mr. Weiss.

On WEDNESDAY, April 4th, Handel's 'MESSIAH.' Vocalists: Madame Clara Novello, Miss Dolby, Mr. Sims Reeves, and Herr Fornes; Trumpet, Mr. Harper.

On FRIDAY, April 13th, Mendelssohn's 'ELIJAH.' The Orchestra, as usual, will consist of nearly 700 Performers.—Tickets, 3s., 5s., and 10s., 6d. each, may be at once secured for these Performances at the Society's sole Office, No. 6, Room, within Exeter Hall. Applications, by letter, must be accompanied by a remittance of the amount; if by post-office order, made payable to Robert Bowley, at Charing-Cross Office.

EXETER HALL.—Sir HENRY BISHOP.—In compliance with numerous applications, Mr. MITCHELL begs to announce that an EVENING CONCERT, upon an extended scale, of Glee, Quartets, and Concerted Vocal Music, with Choruses, selected entirely from the compositions of Sir Henry Bishop, and executed under his personal superintendence and direction, is fixed to take place on TUESDAY EVENING, March 27.—Engagements have been made with Mr. Sims Reeves and Miss Birch, in addition to Masters Sullivan, Cooke, Malsch, and Norton; Mr. Francis, Mr. Benson, Mr. Lawler, Mr. H. Buckland, and Mr. Land; and to give increased effect to many Concerted Pieces, the services of a select Chorus of 200 voices will be added. Sir Henry Bishop will preside at the Piano-forte.—Reserved Seats, not numbered, 5s.; West Gallery, 3s.; Area, 2s. A limited number of Reserved and Numbered Seats, 7s. 6d., may be obtained at Mr. Mitchell's Royal Library, 33, Old Bond Street; at the principal Libraries and Music-sellers; and at the Office, 6, Exeter Hall.

'IMMANUEL'—Under the immediate Patronage of HER MOST GRACIOUS MAJESTY THE QUEEN, and the rest of the Royal Family, this Oratorio will be performed at St. MARTIN'S HALL, on THURSDAY EVENING, March 29, for the benefit of the Home for Gentlewomen. Principal singers: Madame Clara Novello, Miss Amy Dolby, Mrs. Luckey, Mr. Sims Reeves, and Mr. Weiss. Conductor, Mr. HENRY LESLIE.—Tickets, 2s., 6d., 5s., and 10s., 6d., are to be had at Jullien & Co.'s, 214, Regent Street.

Mr. ALFRED MELLON respectfully announces, that the FIRST GRAND ORCHESTRAL UNION CONCERT will take place at ST. MARTIN'S HALL, on MONDAY EVENING, April 2, Vocalists, Madame Clara Novello and Herr Fornes. Soloist, M. Sainton (Violinist to Her Majesty).—Stalls, 7s. 6d.; Reserved Seats, 5s.; Galleries, 2s. 6d.; Area, 1s. Stalls and Reserved Seats to be had at Messrs. Cramer & Beale, 201, Regent Street, Gallery and Area Tickets at St. Martin's Hall.

PHILHARMONIC SOCIETY.—First Concert.—Nothing could be much more familiar to the Philharmonic orchestra than the "full-pieces" selected to inaugurate Herr Wagner's appointment as Conductor for the year. These were Haydn's Seventh Grand Symphony, Mendelssohn's Overture 'The Isles of Fingal,' Beethoven's 'Eroica' Symphony, and Mozart's Overture to 'Zauberflöte.'—Nothing could be stranger than the performance.—The violins were rarely together. The pauses in Haydn's *andante* were very long pauses, and every *forte* was a *fortissimo*. Mendelssohn's Overture was hurried and muddled, without ease or undulation,—and Beethoven's Symphony was a fatiguing piece of exaggeration, stuck full of fierce *sforzandi* and ill-measured *rallentandi*. Further, Dr. Spohr's *Scena Drammatica*, got through heroically by Herr Ernst, was as badly accompanied as *solo* could be,—while the hackneyed *trio* from 'Cosi fan tutte,' 'Soave sia il vento,' would have gone utterly to sleep had not Madame Novello (who was in very fine voice) kept it in motion by giving the time with her head to the conductor. Was it worth while to affront the profession in London and to send a deputation to Zurich for no better result than this?—Spirit Herr Wagner indisputably possesses,—but of his sense as a reader of great compositions by great masters Monday's concert gives us a poor opinion:—and it remains to be seen how far his fits and starts will be able to impress our orchestra should he be intrusted with the production of any unfamiliar music.—The room was thinly attended.

CHAMBER CONCERTS.—Mr. S. Bennett's first *Soirée* was numerously attended, and the programme was agreeably varied, including Mozart's Strinasacchi Duett *Sonata*; and, by way of novelty, two elegant MS. Songs by the Concert-giver, sung by Madame Novello,—the first of which, 'Indian Love,' was *encored*, thanks, in part, to the purity and beauty of tone with which it was sung. Considered abstractedly, the melody seemed to us over-tormented. If our English composers will Germanize themselves, they must bear to be referred to such tunes as those in Beethoven's 'Choral Symphony' and 'Choral Fantasia';—even to the half-melody opening his 'Lieder Kreis' (sung on Tuesday), in proof that German expression may be got without the secondary means to which they resort so disproportionately. These Chamber Concerts of Mr. Bennett's are so liberally frequented by an obviously sympathetic audience, as to warrant another remark. He cannot shelter his supineness in composition under the discouragement pleaded

by other aspirants, who profess that they forbear from writing, because they have no means of bringing forward what they have written. But a panic, just now, seems to have possessed itself both of inventors and undertakers. Observe how mellifluously Mr. Ella glides away from any attempt to produce a novelty at his third *Winter Evening*,—assuring his subscribers, in his programme, that—"experience in catering for musical entertainments, however, soon convinces directors, that experiments of untried compositions of great magnitude are costly pledges at the shrine of Art, and that the public has more satisfaction in recognizing a favourite work, than being at the trouble of appreciating a new production."

Between "the birds who can sing and won't sing," and the bird-fanciers, who fancy that there is no music-market except for tunes as popular as '*Par-tant pour la Syrie*,' or 'The Grenadier's March,' we must dispense with much new musical pleasure, during the early spring at least. Such a course, besides being wearisome to the poor critic, "whom," however, as melancholy *Jaques* hath it, "there was no thought of pleasing,"—and bad for the public, because encouraging it in pharisaical exclusiveness,—is suicidal to the parties most concerned—the makers of music in both senses of the word.

HAYMARKET.—Mr. Stirling Coyne in a new piece, entitled 'The Secret Agent,' has resorted to the German,—a drama in five acts, by T. W. Hackländer, entitled 'Der Geheimer Agent,' of which lately some account has been rendered in *Blackwood*. Mr. Coyne's version is stated to be more from the Magazine than the original play, and his comedy is accordingly "new" in a wider sense than such pieces in general imply. Much of the development is his own, and, indeed, his main indebtedness to Herr Hackländer consists more of the idea conveyed by the title than of its dramatic embodiment. The English adaptation is in two acts. A German *Duke Victor* (Mr. Howe), being held in leading-strings by his Dowager-mother (Mrs. Poynter), is awakened to a true sense of his position by a lady who loves him—the Duchess's niece *Ernestine* (Mrs. Caroline White). He is startled by the fact that a marriage has been contrived for him without his knowledge by the Duchess, and, not to compromise *Ernestine*, is induced to feign that his information proceeded from "a secret agent." Ultimately, he has to disguise himself as the secret agent in a domino and mask, and to fight a duel with *Count Oscar* (Mr. W. Farren), who aspires to the hand of *Ernestine*. Other disguises become needful. *Count Steinhausen*, his prime minister (Mr. Buckstone), and *Baron Standbach*, his grand chamberlain (Mr. Compton), respectively assume the garb of a Spanish dancer and of *Mephistopheles*, in order to discover the mysterious personage, and each becomes so convinced that the other is "the Secret Agent," that they contrive means for their mutual incarceration in the fortress of Spilsberg. At length, the old lady is wearied out with the confusion caused by the odd turn of court affairs, by which all her pet schemes are baffled, and willingly retires from public life,—so that the Duke is free to govern his own duchy and to marry whom he pleases.—The situations are cleverly arranged, but the dialogue is free from any taint of wit, poetry or thought. The second act was preposterously farcical. Two scenes, a palace interior with terrace and gardens, and an illuminated saloon, in which a masked *fête* takes place, are well painted. Mr. Howe's acting of the Duke was rough and ready; Mr. Buckstone as the Count was, as usual, humorous in his grimacing and funny in his make-up, and Mr. Compton as the Baron thoroughly comic.

ADELPHI.—Success in dramatic composition is frequently attributable to other causes than intrinsic merit, even when the latter is considerable. Much always depends on the capacity of the performer, and it makes a serious difference whether the actor support the part or the part the actor. A little piece at this theatre, on Thursday week, was converted into a great one by the force of really great acting in one of its characters. 'Betty Martin' is the title of the farce in question,

derived from a French *vaudeville*, 'Le Chapeau de l'Horloger,' by Madame Girardin, and also the name of the heroine, who was impersonated (emphatically) by Mrs. Keeley. Such a picture of intense terror as this actress exhibited on her first burst on to the stage has scarcely ever been witnessed in tragedy, illustrated even by the highest talent. The life and soul of *Betty Martin*, housemaid to *Major Miltiades Mohawk* (Mr. Selby), had been, as it were, convulsed with mortal agony by some fearful disaster. What could have happened? A magnificent time-piece, adorned with Venus and Cupids, had slipped out of her hands, in her effort to restore it to the mantel-piece, and been fearfully mutilated. When partly recovered from the effects of this dreadful accident, she contrives to send for *Mainspring*, the clockmaker. He undertakes the necessary repairs hopefully; but the difficulty is to get him out of the house with his burthen unseen by master, who has just returned. The poor man is slipped into mistress's bed-room, but leaves his hat on the table. The major, of course, cannot understand the reason of Betty's too evident confusion, but sees the hat, finds the sleeping apartment locked, and, being jealously inclined, guesses all the rest. It is now difficult to determine which distress is greater, that of the housemaid or that of the husband. The hat is got out of the way by the former, is found again by the latter, at last crammed into a sideboard drawer; now convulsively clutched, now indignantly crushed, and now hopelessly ruined by pressure, the true type of an anguish only ridiculous because originating in trivial occasions, but to those who suffer it almost insupportable. The tragic and the comic here are brought into a close alliance, and we could almost suspect Mrs. Keeley emulating the merit of Mr. Robson,—we say, emulating, not imitating, because the original genius displayed by Mrs. Keeley is indisputable, and the impression made on the audience was decided.

Another farce produced on Saturday was not equally successful. 'I'll tell your Wife' is the title.—This also has a foreign prototype; 'Les Marquises de la Fourchette.' The hackneyed contrivance of an hotel with its doors numbered is the obvious stage resource for the production of the situations. Hither an old married man and a young man about to be married arrive, each with his lady, supposed to be other than his wife or his intended. Add, that of the last the old man is the father, and that he and his future son-in-law thus become aware of each other's moral delinquencies;—one writing on the door of No. 8, "You shan't have my daughter," and the other on that of No. 9, "I'll tell your wife," and the reader has the whole plot. He then has only to imagine Mr. Keeley's expression of terror, which rivals that of his wife in the preceding piece. Notwithstanding the force of such acting, however, the audience was sibilant. The idea is certainly not unexceptionable, the main incident of the category yclept "fimsy," and the application pointless, whether as a satire on society or a rule of life. In all probability, the house was right.

PRINCESS'S.—Another translation from the French, by Mr. J. M. Morton, from 'Les Jeux Innocens,' by M. Fouscier, translated out of rhyme into prose, and acted on the London stage, which, in these cases, ranks no higher than as a province of the Parisian, under the title of 'A Game of Roms,' was produced on Monday. There is in it no story worth telling; the main purpose for such being to introduce the 'Game of Roms,' in which Miss Ternan, Miss Leclercq, Miss Heath, and Miss Murray are made to revel with Mr. Harley, a pedantic doctor, as a *ruse* to discover whether Miss Daly, as *Julian*, loves Miss Ternan, as *Violet*. By this means, a certain *Marchioness* (Mrs. Winstanley) is defeated in her intention to make *Julian* a knight of Malta. It will be seen that the cast of the little piece is good; and it is altogether an elegant affair both in its appointment and its acting. The house was moderately attended.

MUSICAL AND DRAMATIC GOSSIP.—Among other of the pleasures which make our Lent in London a carnival of odd entertainments, may be mentioned the *Réunion des Arts*, as continuing its meetings,—the second and third of the *Bishop Concerts*, under Mr. Mitchell's auspices,—Mr. C. Salaman's Lectures, with illustrations on the stringed instruments,—and mixed diversions at the *Panopticon*. These last combine an optical diorama of subjects from Sacred History, with "grand performances of Sacred music" by way of illustration. We cannot but consider such puppet-show work behind the taste of the times, and beneath the requirements of pleasure-seekers in England,—having never seen our public trusted with real works of Art, whether they be classical tragedy in the East or shilling oratorio in Long Acre, without the attempt commanding recognition and success.

Our contemporaries announce that Mr. Thackeray's comedy will not "come to pass" at the Olympic Theatre, having been withdrawn.

The anniversary meeting of the *Royal Society of Musicians* was held on Thursday week;—the volunteer music on the occasion, including a *Fantasia* from Herr Ernst, appears to have been more interesting than usual. The subscription, however, is reported as unprecedentedly small. An impression is beginning to spread, that the old musical establishments of London have been "jobbed" somewhat mercilessly; and though no one seems able to project or carry out new ones, it is inevitable that support and sympathy among a younger generation of professors should cool.—Meanwhile, the treasury of the *Society of Female Musicians* is receiving important additions,—a legacy of one hundred pounds having been just announced as bequeathed to it by the late Mr. Blackburn, an organist. Remonstrances reach us to the effect, that these associated gentlewomen are more willing to inherit than to distribute; and that they allow formality too largely to supersede charity. It was in protest against an exclusive spirit that their Society was founded. But slaves when enfranchised are apt to become despotic;—*Eugenie Grandet*, in M. Balzac's wonderful tale, on being enriched by the decease of her miser-parent, became, like him, a lover of money. So that if the complaint be just, the chary ladies may defend themselves by appealing to the tendencies of humanity and the precedents furnished by history and fiction.

A contemporary states that Mr. and Mrs. Sims Reeves, with companions worthy of them, and improvements duly made in orchestra and chorus, have accepted a short engagement at the Haymarket, during which "at least one new English opera is to be produced."—Mr. Smith is advertising Italian and German opera after Easter. Meanwhile, the Drury Lane advertisements of the week announce the unprecedented success of 'L'Étoile,' and—logical sequence—that the opera will only be played a few nights more. The *Sunday Times* states that MM. Brandus, Dufour & Co., the Parisian holders of M. Meyerbeer's copyrights, have commenced proceedings against the Drury Lane management, for performing the work without due authorization. We fancy that this is a mistake. More to be relied on, we suspect, is an announcement in the *Gazette Musicale* of the cast with which 'L'Étoile' is to be given at our *Royal Italian Opera*. This is to include Madame Bosio, Mdle. Marrai, Signori Gardoni, Lucchesi, Lablache, MM. Tagliafico and Zelger, and Herr Formes.

A new opera by M. Thalberg, on the story of Monaldeschi, the murdered secretary of Queen Christina of Sweden, will shortly be brought forward at Vienna. Are we henceforward to have nothing save crimes, and treasons, and supernatural mysteries in the musical drama? Has comic opera expired for ever, because composers can no longer make melodies, and singers can no longer sing the same?

Mdlle. Cruvelli has tried the part of *Rachel* in 'La Juive,' without adding to her fame. The Parisian journals are agreed upon the violence done by her to M. Halévy's music; and the grim frenzy with which she personates the ill-starred daughter of Israel.—M. Wicart, a tenor, who has distinguished

himself in Belgium, and Mdle. Moreau-Sainti, are also engaged for the *Grand Opéra*, to which theatre Madame Laborde is to return.—The correspondent of the *Morning Post* writes in high praise of Signor Braga, an Italian violoncellist of reputation, who has just been heard in Paris.—M. Berlioz, says the *Gazette Musicale*, has just won another success at Weimar, by what he calls a lyric monodrama,—"The Return to Life,"—spoken before the curtain of the theatre, and accompanied by an invisible orchestra and chorus on the stage behind the curtain. He is now at home again,—we presume to prepare for the production of his 'Te Deum,' on the last days of April.

The *Washington Globe* publishes an account of the State collection of American copyright music, registered according to law,—from which a fact or two may be picked out. The collection

"is made up of a single specimen of each musical composition which has been issued in the United States for the past third of a century, and consists of one hundred and twenty thick volumes—sixty volumes of songs, and sixty volumes of instrumental music—each volume containing at least three times the quantity of music usually comprehended in volumes of the kind. * * The gradual increase in the annual quantity issued is worthy of remark. The songs from 1819 to 1834 are all comprised in a single volume, while those received in 1853 require seven volumes of nearly the same size. One volume comprises also all the songs for the four years from 1834 to 1838, both included; while in 1840, in 1841, and 1846, two volumes were required; in 1843, 1844, and 1845, three; in 1847, 1848, 1849, and 1851, five; and in 1850 and 1852, six. In 1842 only one volume of songs appears, and during the current year the number will probably reach eight."

—The first of the sixty volumes of instrumental music dates no further back than 1835.—Let us return for a moment to the songs. We should be glad to believe that each one of the sixty volumes referred to contained a single specimen of new melody,—without which, for type, germ and basis, there cannot be much creation in music. But we have misgivings. Recent examination of a collection of song-books, purchased in the American cities, and possibly the most ample one of its kind in England, leaves us doubtful as to the existence in America of much nationality or invention. The ditties gathered are either European, or else are pale, stupid, and characterless. We have found nothing more picturesque than 'Woodman, spare that tree,' which hardly gets beyond our own 'Come where the aspens quiver,'—more pathetic than 'Lucy Neal,' no parallel, we submit, to our own 'Auld Robin Gray,'—more piquant than 'Jim Crow,' the piquancy of which lies in the burden with its gesticulations, and not in the stanzas so piquantly *burdened*. Such a meagre state of national verse could hardly be otherwise than accompanied by a want as entire of national melody,—even supposing that America for the last quarter of a century had possessed a school of composers able to express in music the thoughts which verse engendered.

To continue our Transatlantic gossip.—Among singular titles, we have not met one more singular than that of a forthcoming book of American Psalmody for children—'The Young Shawm.'—An American opera, 'Rip van Winkle,' by Mr. Bristow, is about to be produced in New York.—Letters from the United States announce that Mr. Wallace may be shortly expected in England.—It is more curious than edifying to remark the strange concessions to which the thirst for Republican gold will force the very artists who are least complaisant in England. Fancy, for instance, Signor Mario singing the part of *Idreno* in 'Seniramide,' and, in the last scene of the opera, introducing his last scene from 'Lucia.' This Signor Mario did at his last appearance but one in New York.—The Transatlantic press seems to have awakened up to some civility towards Madame Grisi ere she departed; and commended her for never having once disappointed the public during her long and fatiguing engagement.

Mr. Mitchell, we perceive, is intending to give twelve English theatrical performances in Paris during the spring,—we suppose to entertain the public assembling for the Great Exhibition. To good Shakspearian performances it will be impossible to treat the Parisians; and we confess that our slighter theatrical wares are among the last of our productions that we should care to exhibit to

our Allies,—the more, as some of our best actors are tied fast in London. Mr. C. Mathews, it is true, will be free, since we perceive that the *Lyceum* is to be let from Easter to Michaelmas.—Miss Fitzpatrick is "starring it" at the Surrey Theatre.

The courtesies of this strange time almost turn Hood's caricature of civil war into a reality. We last year recorded how the Czar's theatrical agent, General Guedeonoff, recovered damages in the French courts of justice from M. Berton, an actor, who had broken his contract with the theatre in St. Petersburg. We read, a day or two since, that the General has handed over the sum in question to the French Society of Dramatic Authors.—Thither, too, have gone M. Legouvé's damages extorted from Mdle. Rachel.

MISCELLANEA

Shakspeare Interpretation.—"More than three centuries ago, some time about 1520, Raffaello Sanzio was hard at work painting Madonnas, to delight the eyes and gladden the hearts of the simple worshippers of the modern Cybele. His best were probably painted somewhat later. There was rather a passion in those days for Madonnas; everybody painted Madonnas, but none matched his for intellectuality. Now, it is an undoubted, but a melancholy fact, that the licence of those days permitted to patrons, popes and prelates, parish priests and princes, opportunities for exhibiting to the admiring gaze of painters models from whence to draw their inspirations far more pretty than pure,—more correct in their proportions than correct in their morals. It mattered not;—the genius of the painter robbed them in holiness. They were seen and worshipped. Some sixty or seventy years later, when the fame of all these Madonnas had been pretty well bruited about, Shakspeare wrote 'Cymbeline'; and in the fourth act, in alluding to the supposed loss of her husband's affections, Imogen is made to say, that some jay of Italy, so marvellously young and so exquisitely lovely as to be a-painting as a Madonna, had betrayed him. Whether Shakspeare wrote Mother or Madonna I cannot determine; but half-a-dozen changes can be rung with either on the little words without deposing sense, sound, or scanning, so as to render the interpretation clear and distinct. A."

The Metropolitan Bridges.—A Select Committee of the House of Commons has been appointed to inquire into the state of the bridges over the Thames, and the approaches thereto; to report whether the communications and approaches are adequate to the present and increasing traffic to and in the metropolis; if not, the best mode of improving the same, and whether it would be desirable to have one or more bridges over the Thames, and where, and the best mode, out of local funds, of providing the cost of such bridges, and of improving the said communications and approaches, and throwing open to the public the toll-paying bridges.

Calculating Machine.—A Correspondent says:—"If the calculating machine of M. Scheutz of Stockholm, mentioned in the *Athenæum* of February, can be brought to construct tables according to the duodecimal scale of Baron Silvio Ferrari noticed in the *Athenæum* of November, 1854, and all works and calculations in geometry, astronomy, horology, navigation, and military science shortened and made less difficult, a great advantage will be conferred upon the world. An examination into the truth of the matter by competent persons should be made, and if found correct, let a set of the requisite tables be printed without delay, and let England go ahead and carry a light to the nations. The Roman ten, X, or some other sign, would replace the cipher to be removed to the column of dozen or twelves. The eleven might keep its place."

TO CORRESPONDENTS.—Dabbler in Botany.—J. B.—E. H. V.—E. T.—A. S.—M. & Co.—received.

Errata.—For "T. R. T. Tolson," author of some poems noticed in the *Athenæum* [ante, p. 230], read *Tolson*. For "Nelson," as publisher of Gibson's 'Memoirs of the Brave,' noticed last week [ante, p. 250], read *Wilson*.

MR. CHURCHILL'S PUBLICATIONS.

A Manual of Photographic Chemistry.

By T. FREDERICK HARDWICH,
Late Demonstrator of Chemistry, King's College, London.
(Ready next week.)

On the Use of the Blowpipe.

Illustrated by numerous Diagrams.
By Professors PLATTNER and MUSPRATT.
Third Edition, 8vo. cloth, 10s. 6d.

Elements of Natural Philosophy;

Being an Experimental Introduction to the Study of the Physical Sciences. Illustrated with numerous Engravings on Wood.
The Fourth Edition, fols. 8vo. cloth, 12s. 6d.

By GOLDING BIRD, M.D. F.R.S.,
And CHARLES BROOKE, M.B. Cantab., F.R.S.

Fownes's Manual of Chemistry.

Fifth Edition, fcap. 8vo. cloth, 12s. 6d.
Edited by H. BENICE JONES, M.D. F.R.S.,
And A. W. HOFMANN, Ph.D. F.R.S.

Handbook of Chemistry:

Theoretical, Practical, and Technical.

8vo. cloth, 15s.
By F. A. ABEL, F.C.S.
Chemist to the Board of Ordnance;
And C. L. BLOKAM,
Demonstrator of Practical Chemistry in King's College.

Chemical Diagrams.

By ROBERT GALLOWAY.
On FOUR LARGE IMPERIAL SHEETS, for SCHOOL and LECTURE ROOMS. Price 1s. 6d. the Set.

Chemistry, as Exemplifying the Wisdom and Beneficence of God.

Second Edition, fcap. 8vo. cloth, 4s. 6d.
By GEORGE FOWNES, F.R.S.

A Manual of Qualitative Analysis.

Post 8vo. 4s. cloth.
By ROBERT GALLOWAY.

Chemistry of the Four Seasons: Spring, Summer, Autumn, Winter.

Illustrated with Engravings on Wood. Second Edition, fcap. 8vo. cloth, 7s. 6d.
By THOMAS GRIFFITHS.

Practical Chemistry, including Analysis.

With numerous Illustrations on Wood. Second Edition, fcap. 8vo. cloth, 6s. 6d.

By JOHN E. BOWMAN,
Professor of Practical Chemistry in King's College, London.

Medical Chemistry.

With Illustrations on Wood. Second Edit. fcap. 8vo. cloth, 6s. 6d.

Fresenius's Instructions in Chemical Analysis.

QUALITATIVE. Third Edition, 8vo. cloth, 9s.
QUANTITATIVE. Second Edit. 8vo. cloth, 15s.

Edited by LLOYD BULLOCK.

LONDON: NEW BURLINGTON-STREET.

Just published, 8vo. price 10s. 6d.

A HISTORY of the CITY of DUBLIN.

Vol. I. containing an Account of the more Ancient Districts of the Metropolis of Ireland; with Notices of the various Important Personages and Historical Events connected with those localities. Illustrated with a MAP of the ANCIENT CITY, and an Appendix of Documents, now first published from Original Manuscripts. By J. T. GILBERT, Hon. Sec. Irish Archaeological and Celtic Society.

Dublin: James McGlashan, 70, Upper Sackville-street, London: W. S. Orr & Co. Amen-corner, Paternoster-row.

Just published,

A DICTIONARY of the CIRCASSIAN LANGUAGE. In Two Parts:— ENGLISH—CIRCASSIAN—TURKISH.

AND
CIRCASSIAN—ENGLISH—TURKISH.
Containing all the most necessary Words for the Traveller, the Soldier, and the Sailor; with the exact pronunciation of each word in the English character. By Dr. L. LOEW, Member of the Royal Asiatic Society of Great Britain and Ireland, &c. &c.
To be had of the Author, 4, Buckingham-place, Brighton. Price One Guinea.

THE BISHOP of NEW ZEALAND'S FOUR SERMONS.

This day is published, a Second Edition, crown 8vo. price 2s.

THE WORK of CHRIST in THE WORLD.

By GEORGE AUGUSTUS SELWYN, D.D.
Bishop of New Zealand,
Formerly Fellow of St. John's College, Cambridge.
Published for the Benefit of the Mission.
Cambridge: Macmillan & Co. London: Bell & Daldy, 186, Fleet-street.

Now ready,

BALFOUR'S BOTANICAL WORKS:—

I. CLASS BOOK of BOTANY (the Text-Book used by the Professor's Pupils), in One large Volume, 8vo. cloth, with 1,800 Illustrations, 31s. 6d.

II. OUTLINES of BOTANY, for Schools and Elementary Pupils, with 500 Illustrations, 7s. 6d.
Edinburgh: Adam & Charles Black. London: Longman & Co.

Now ready, fols. 8vo. price 5s.

THE AMATEUR GARDENER'S YEAR-BOOK.

By the Rev. HENRY BURGESS.
Edinburgh: Adam & Charles Black. London: Longman & Co.

Just published, imperial 4to. folded, cloth boards, price 12s. 6d.

A
GEOGRAPHY: A Series of Thirty Maps, carefully drawn and full coloured, developing the Three Divisions of Sacred and Classical, Medieval, and Modern Geography. Forming a complete Geographical Chronology, from the period of the Noachic Deluge to that of the General Peace, 1815. With an explanatory Letter-press accompaniment.
"A desirable and valuable acquisition to the professor and student of history."—*Journal of the Archaeological Association.*

Edinburgh: Edward Gower, Princes-street, Bedford-row; and Simpkin, Marshall & Co.

PEOPLE'S EDITION OF THE ILLUSTRATED HISTORY OF ENGLAND.

In crown 8vo. Vol. XII. with Steel Plates and Autographs, price 4s. cloth; and Part XLV. price 1s. sewed.

THE HISTORY of ENGLAND, from the Invasion of Julius Caesar to the Accession of Queen Victoria.

By HUME, SMOLLETT, and HUGHES.
With copious Notes, the Authors' last Corrections, Improvements, and Enlargements.
To be published in Eighteen Monthly Volumes, and in Parts, in order to place within the reach of all classes a more complete History of England than any extant.

Son.

TO MEMBERS OF THE LEGAL PROFESSION.

COMMON LAW and EQUITY REPORTS.
PUBLISHED MONTHLY.

With a view to extend the usefulness of the Work, the Pro-
prietors have resolved upon adding two Divisions to their Series
of Reports,—the one consisting of all the Cases applicable to the
Practice of the QUARTER SESSIONS and COUNTY COURTS, the
other, the LEADING STATUTES passed during the Session,
together with full Abstracts of the less important Titles, Alphas-
betical Indexes, &c. In compliance also with numerous and
urgent applications, they have decided upon receiving separate
subscriptions for each division of the Series. The Annual Sub-
scriptions, therefore, in future, will be as follows:—

ENTIRE SERIES (with Leading Statutes)	£4 4 0
THE REPORTS (without Statutes)	3 3 0
COMMON LAW	2 2 0
EQUITY	2 2 0
BANKRUPTCY and INSOLVENCY	1 1 0
ECCLESIASTICAL and ADMIRALTY (with Prize Court)	1 1 0
SESSIONS and COUNTY COURT CASES, &c.	1 1 0
LEADING STATUTES (Authorized Edition)	1 1 0

Subscriptions received, by Post or otherwise, by
A. & G. A. Spottiswoode, New-street-square, London.

Just published, New and cheaper Edition, price 1s.; or, by post
for 1s. 6d.

THE SCIENCE of LIFE; or, How to Live
and What to Live for: with simple Rules for Diet, Regimen,
and Self-Management; together with Instructions for securing
health, longevity, and that sterling happiness only attainable
through the judicious observance of a well-regulated course of life.
By a PHYSICIAN.—London: Piper Brothers & Co. 23, Patern-
oster-row; Hanway, 64, Oxford-street; Mann, 39, Cornhill; and
all Booksellers.

ENGINEERING SCHOOL CLASS-BOOKS.

I.

In cr. 8vo. 4s. 6d. bd. with 220 Diagrams engraved for the Work,

**EUCLID'S ELEMENTS of PLANE
GEOMETRY;** with EXPLANATORY APPENDIX, and
SUPPLEMENTARY PROPOSITIONS for Exercise. Adapted
for the Use of Schools, or for Self-instruction.
By W. D. COOLEY, A.B.

Author of the 'History of Maritime and Inland Discovery,'
'The Negroland of the Arabs,' &c.

"This is the best edition of the Elements which has yet appeared.
By the occasional use of algebraic symbols for words, the author
has both shortened and simplified the reasoning. The few remarks
on Geometrical Analysis in the Appendix are of great value; and
the Supplementary Propositions will be found useful both to
pupils and teachers."—*Athenæum*.
"A neat and cheap edition of the universal introduction to ma-
thematical study, divested of the diffusiveness with which the great
Alexandrian clothed his expositions. Mr. Cooley has added an
Appendix of additional matter to exercise the student, and pre-
fixed a very sensible Preface on the utility of the study and the
best mode of pursuing it."—*Spectator*.

"Mr. Cooley seems almost to wish to contradict his own motto,
that 'there is no royal road to Geometry,' for following in the steps
of Playfair, he has considerably diminished both the volume of the
work, as well as the labour of the student. Preferred to the Elements
are some remarks on the study of mathematics, as valuable
for the elegance of their style as for the correctness of their reason-
ing."—*Civil Engineer and Architect's Journal*.
"Mr. Cooley has produced an edition of Euclid's Elements, which
for brevity, clearness, and discerning attention to the wants of
learners, cannot be easily surpassed. When we add, that it is re-
markable for its typographical neatness, that its form is convenient
and price moderate, we feel justified in predicting for it an exten-
sive circulation."—*Dublin University Magazine*.

II.

Uniform with the 'Elements,' price 3s. 6d.

**COOLEY'S GEOMETRICAL PROPO-
SITIONS DEMONSTRATED;** or, a Supplement to Euclid;
being a KEY to the Exercises appended to the 'Elements,' for the
use of Teachers and private Students. Upwards of 120 Propositions
deduced from the First Six Books of Euclid, are illustrated in it
by new Diagrams.

"The propositions are demonstrated, in most instances, in the
plainest and neatest manner; so that the work may justly claim
(what it professes) to be a *mapa to the teacher*."—*Scholastic Journal*.
"The key contains a collection of deduced propositions calcu-
lated to make the learner familiar with the chief properties of geo-
metrical figures."—*Dublin University Magazine*.

"Will be found of considerable value as an aid to teachers of the
Mathematics."—*New Monthly Magazine*.

"The propositions, given as exercises in the valuable Appendix,
are demonstrated in the Key, which must, therefore, become a very
important volume in the eyes of the ambitious and inquiring class
of students."—*United Service Gazette*.

III.

In fcap. 8vo. price 1s. 6d.

COOLEY'S FIGURES of EUCLID; being the
Diagrams illustrating the 'Elements,' with the Enunciations
printed separately for Use in the Class-room.
Whittaker & Co. Ave Maria-lane, London.

Now ready, 8vo. stiff cover, 3s.
(As communicated to the last Meeting of the Statistical Society),
ON THE LOANS raised by Mr. PITT during the FIRST FRENCH WAR, 1793-1801.—With some Statements in Defence of the Methods of Funding employed.

One of the Honorary Secretaries of the Statistical Society.
London: Edinham Wilson, 11, Royal Exchange; and may be had of Harrison, 59, Pall Mall; and Nisken & Parker, 43, Mark-lane.

This day, in fcap. 8vo. cloth, 7s. 6d.
CAMBRIDGE in the SEVENTEENTH CENTURY. Part I. NICHOLAS FERRAR, Two Lives, edited from the MSS. by J. E. B. MAYOR, M.A., Fellow and Assistant Tutor of St. John's College, Cambridge.
Cambridge: Macmillan & Co. London: Bell & Daldy, 186, Fleet-street.

NÉOLOGIE; or, THE FRENCH OF OUR TIMES. By MADAME VE. D. G.; being a Collection of more than Eleven Hundred Words, either entirely new or modernized.
"Of the necessity for such a work there can be no doubt; and from our own experience we can vouch for its practical utility. This little work is the forced complement of all other dictionaries."
Morning Herald.
"This is a sort of supplement to the French Dictionary, explaining the most modern acceptance of certain words, with illustrative examples."
Athenæum.
P. Roland, 20, Berners-street, Oxford-street. Price 2s.

ROSE'S NEW GENERAL BIOGRAPHICAL DICTIONARY.
In 12 vols. 8vo. price 5l. 8s. cloth.

THE NEW GENERAL BIOGRAPHICAL DICTIONARY. Projected, and partly Arranged, by the late Rev. HUGH JAMES ROSE, B.D., Principal of King's College, London. The most complete Biographical Dictionary in any language, and has been most carefully edited and compiled by experienced writers, who have availed themselves of the vast body of materials which domestic and foreign literature has of late years supplied.
London: B. Fellowes; Rivingtons; E. Hodgson; J. M. Richardson; J. Bain; G. Greenland; Capes & Co.; T. Bosworth; H. Washburne; H. G. John; J. Southern & Co.; and G. W. Willis. Also for Deighton & Bell, Cambridge; and J. H. Parker, Oxford.

In the press,
THE ETHICS OF ARISTOTLE, with NOTES.
By W. E. JELF, Author of 'The Greek Grammar,' &c. &c.
John Henry Parker, Oxford and London.

London: Allman & Son, 42, Holborn-hill; of whom may be had,
PARKER'S PROGRESSIVE EXERCISES in ENGLISH COMPOSITION. Price 1s. 6d.

Just published, price 2s.; or by post pre-paid, 2s. 6d.
PAPER on the RE-ORGANISATION of the CIVIL SERVICE, more especially on the Results already obtained by competitive Examinations for Appointments, and on the necessity of further Securities to insure Promotion for Merit in the Public Service.
By EDWIN CHADWICK, Esq. C.E.
London: Knight & Co. 90, Fleet-street.

SIEGE OF SEBASTOPOL.—THE THIRD EDITION OF **STANFORD'S MAP OF SEBASTOPOL and COUNTRY ROUND;** including Balaklava, Kamara, Kadikoi, the Belbek and Cheremva Rivers; showing also the Positions of the Allied Camps, the Allied and Russian Batteries, Forts, &c., with number of Guns; the Forts of the Turkish and other Redoubts; the Head-Quarters of Lord Raglan, &c. is published this day. Price, in 1 sheet, coloured, 2s.; per post, 2s. 6d. Case, 4s. 6d.; per post, 5s.

JUST RECEIVED FROM PARIS,
THE MAP of the CRIMEA, prepared at the Depot de la Guerre, from the Map of the Russian Etat-Major. Price, in 1 large sheet, plain, 4s.; coloured, 5s. In case and coloured, 7s. 6d.; per post, 8d. additional.
London: Edward Stanford, Map-seller and Map-mounter to Her Majesty's Stationery Office, 6, Charing Cross.

Now ready, price 1s.
THE OMBROLOGICAL ALMANAC for 1855, in its 16th year: it had 722 facts right in 1,000 as to weather, with only 10 planets in 1854, and is now calculated with 26 planets, and, though unavoidably computed in haste, must show the advancement in this interesting science.
W. Walker, 196, Strand; Richardson & Co. 23, Cornhill.

Now ready, price 2s. 6d.
MY OWN GARDEN; or, the Young Gardener's YEAR BOOK.
By MRS. LOUDON,
Author of 'The Ladies' Companion to the Flower Garden,' &c.
London: Kerby & Son, 190, Oxford-street.

Sixth Edition, 640 pages, price 10s. 6d.
A SYSTEM of PRACTICAL MATHEMATICS: containing Elements of Algebra and Geometry: to which are annexed accurate Tables of Logarithms, with Explanations and Examples of their Construction and Use.

By JOHN DAVIDSON, A.M.
"To those who are in want of a carefully-prepared and cheap text-book on the subjects treated, we cordially recommend Mr. Davidson's volume."—*Edinburg Review*.
"It has been produced as a text-book for schools, and, as far as we have been able to observe, is admirably adapted for such a purpose."—*Educational Times*.
"We do not know any single work on the subject which contains, within the same compass, so large an amount of useful matter."—*Scottish Educational Journal*.
"Of works on practical mathematics it is the cheapest bulk for bulk, is very complete, and admirably simple and well arranged. In theory it is not meagre, but contains the principles of nearly all the rules demonstrated with such brevity as consists with clearness. For general purposes it is a complete mathematical library, containing Algebra, Geometry, Mensuration, Trigonometry, Gauging, Gunnery, Logarithms, and, in short, every branch short of the Calculus."—*Dundee Advertiser*.
Bell & Bradfute, Edinburgh. Longman & Co., Whitaker & Co., and Simpkin & Co., London.

This day, price 6d.; by post, 10d.
GOOD and BAD READING: A Lecture. By FRANCIS TRENCH, Minister of St. John's Church, Reading.

London: George Bell, 186, Fleet-street.

ARNOLD'S INTRODUCTION to FRENCH and GERMAN.
In 12mo. price 5s. 6d. the Third Edition of
THE FIRST FRENCH BOOK: on the Plan of 'Henry's First Latin Book.'
By the Rev. THOMAS KERCHER ARNOLD, M.A.
Late Rector of Lyndon, and formerly Fellow of Trinity College, Cambridge.

"Mr. Arnold has succeeded in preparing a work admirably adapted to meet the wants of English students of the French language far superior as a school-book to any other introduction, even from the pen of a native writer. The sound principles of imitation and repetition, which have secured for the author a reputation widely extended and well deserved, are here happily exemplified. His account of the differences of idiom is very satisfactory and complete. Whoever thoroughly masters this work will rarely want anything further on the subject."—*Athenæum*.

- Rivingtons, Waterloo-place.

Hookham & Sons, Old Bond-street.

Price 2l. 2s. in 2 handsome 8vo. volumes, appropriately bound, and illustrated by upwards of 1,200 Hieroglyphic and other Engravings, many of which are beautifully coloured.

THE MONUMENTAL HISTORY of EGYPT, as recorded on the Ruins of her Temples, Palaces, and Tombs.
By WILLIAM OSBURN, R.S.L.
Author of 'Ancient Egypt, her Testimony to the Truth,' &c.
Israel in Egypt, &c.

The number of hieroglyphics and other illustrations amounts to upwards of 1,200, not one of which has been copied from any existing English work, many being taken from sketches by the author's own hand; whilst assistance has also been sought from very elaborate and costly works issued by the Governments of France, Italy, and Germany, and which are almost unknown in England. The engravings employed have been engraved in the highest walks of Art, and are the same as were occupied in the illustration of Leyard's 'Niniveh,' 'The Abbotsford Edition of the Waverley Novels,' and Murray's 'Illuminated Book of Common Prayer.'
Great expense has been incurred in producing this admirable work in a style worthy of the contents. It is printed, with all the care which the nature of the book requires, and with every attention to artistic elegance and typographical beauty.
Tribner & Co. 12, Paternoster-row, London.

BOOKBINDING.—W. HOLMES, Practical
Bookbinder, 195, Oxford-street, London. Books bound in Morocco, Russia, or Calf, both plain and elegant, on the lowest terms. Gentlemen waited upon with patterns. Estimates given for large or small Libraries.—Address, 195, Oxford-street.

CHEMICAL and ASSAY BALANCES.
LUDWIG OERTLING begs to inform Chemists, Assayers, and the Scientific Public in general, that he keeps on hand a large assortment of Balances ready for immediate use: they are all constructed upon the same principle as those for which the Council Medal was awarded to L. O. at the Great Exhibition of 1851.
Grain and Gramme Weights accurately adjusted to the correct Mint standards.
12, STORE-STREET, BEDFORD-SQUARE, LONDON.

ROSS'S PHOTOGRAPHIC PORTRAIT and LANDSCAPE LENSES.—These Lenses give correct definition at the centre and margin of the picture, and have their visual and chemical acting force coincident.

Great Exhibition Jurors' Report, p. 274.
"Mr. Ross prepares lenses for Portraiture having the greatest intensity yet produced, by procuring the coincidence of the chemical, actinic and visual rays. The spherical aberration is also very carefully corrected, both in the central and oblique pencils."
"Mr. Ross has exhibited the best Camera in the Exhibition. It is furnished with a double achromatic object-lens, about 3 inches in aperture. There is no stop, the field is flat, and the image very perfect up to the edge."
Catalogues sent upon application.

A. Ross, 2, Featherstone-buildings, High Holborn.

THE NEW COLLODION, manufactured by **BLAND & LONG, 153, Fleet-street, London,** will bear comparison with any other preparation offered to Photographers. Price 9d. per oz. Can be had separate from the Iodizing Solution. Nitrate of Silver, 4s. 6d. per oz.; Pyrogallic Acid, 1s. 6d. per drachm; Glacial Acetic Acid, 6d. per oz.; Hyposulphite of Soda, 1s. per lb.

Instruction in all the processes.
Catalogues sent on application.

BLAND & LONG, Opticians, Photographical Instrument Makers and Operative Chemists, 153, Fleet-street, London.

X-YLO-IODIDE of SILVER, exclusively used at all the Photographic Establishments.—The superiority of this preparation is now universally acknowledged. Testimonials from the day, warrant the assertion, that hitherto no preparation has been discovered which produces uniformly such perfect pictures, combined with the greatest rapidity of action. In all cases where a quantity is required, the two solutions may be had at Wholesale price in separate Bottles, in which state it may be kept for years, and exported to any climate. Full instructions for use are given on each bottle. Each bottle is stamped with a Red Label bearing my name, **RICHARD W. THOMAS, Chemist, 10, Pall Mall,** to counterfeits which is felony.

CYANOGEN SOAP, for REMOVING all kinds of PHOTOGRAPHIC STAINS. The genuine is made only by the inventor, and is secured with a red label bearing this signature and address, **RICHARD W. THOMAS, CHEMIST, 10, PALL MALL,** Manufacturer of pure Photographic Chemicals; and may be procured of all respectable Chemists, in Pots, at 1s., 2s., and 3s. 6d. each, through Messrs. Edwards, 67, St. Paul's Church-yard; and Messrs. Barclay & Co. 35, Farringdon-street, Wholesale Agents.

PHOTOGRAPHIC CAMERAS of EVERY DESCRIPTION CAN BE HAD AT
OTTEWILL & MORGAN'S MANUFACTORY, 24 and 25, Charlotte-terrace, Calcedonian road, Islington.—**OTTEWILL'S REGISTERED DOUBLE-BODY FOLDING CAMERA,** adapted for Landscapes or Portraits, may be had of A. Ross, Featherstone-buildings, Holborn, Photographic Institution, Bond-street, and at the Manufactory as above; where every description of Cameras, Slides, and Tripods may be had.—The Trade supplied.

THE IODIZED COLLODION, manufactured by J. B. HOCKIN & CO. 25A, STRAND, LONDON, still remains unrivalled for *sensitiveness and density of Negatives—it excels all others in its keeping qualities and uniformity of constitution*.—Albumenized Paper, 1s. by the 100s. per quire; Wax, 1d. per 100s. of very superior quality.—Double Achromatic Lenses, equal in all points to those of any other manufacturer: Quarter Plate, 2s. 6d.; Half Plate, 5s.; Whole, 10s.—Apparatus and pure Chemicals of all descriptions.

Just published, 'PRACTICAL HINTS ON PHOTOGRAPHY,' by J. B. HOCKIN. 3rd edition, price 1s. 1d. per post, 1s. 4d.

BANK OF DEPOSIT,
NATIONAL ASSURANCE AND INVESTMENT ASSOCIATION,
No. 3, PALL MALL, LONDON.
Established A.D. 1844.

Empowered by Special Act of Parliament.
Parties desirous of INVESTING MONEY are requested to examine the plan of this Institution, by which a high rate of interest may be obtained with perfect security.

The interest is payable in January and July at the Head Office in London; and may also be received at the various Branches, or through country bankers, without delay or expense.

PETER MORRISON, Managing Director.
Prospectuses and Forms for opening Accounts sent free on application.

THE ASYLUM LIFE ASSURANCE
OFFICE, 72, Cornhill, London.
Established 1844.

Policies on Healthy and Disposed Lives, at Home and Abroad, for Civil, Military, and Naval Employments.
THE ONLY OFFICE OF PURELY PROPRIETARY PRINCIPLES, involving therefore NO PARTNERSHIP among Policyholders.
For Prospectuses, Proposal Papers, &c., apply to

MANLEY HOPKINS, Resident Director.

ST. GEORGE ASSURANCE COMPANY,
118, PALL MALL, LONDON.

Chairman—Viscount RANELAGH, Park-place, St. James's.
Deputy-Chairman—HENRY WYNALL, Esq., Lambrook-square, Notting Hill.

Indisputable Policies, Annuities, and Provision for Families and Children on the most favourable terms. Unmarketable titles assured.

Loans granted on a new and liberal principle.
For further particulars apply at the Office above.
W. C. URQUHART, Secretary.

SUN LIFE ASSURANCE SOCIETY,
LONDON.

SHARE OF PROFIT INCREASED FROM ONE-HALF TO FOUR-FIFTHS.

Policies effected with this Society now will participate in FOUR-FIFTHS of the Net Profit of the Society, according to the conditions contained in the Society's Prospectus.

The Premiums required by this Society for insuring young lives are lower than in many other old-established offices, and Insurers are fully protected from all risk by an ample guarantee fund in addition to the accumulated funds derived from the investments of Premiums.

Policy Stamps paid by the Office.
Prospectuses may be obtained at the Office in Threadneedle-street, London, or of any of the Agents of the Society.
CHARLES HENRY LIDDERDALE, Actuary.

ESTABLISHED 1841.

MEDICAL, INVALID, AND GENERAL
LIFE OFFICE, 23, Pall Mall.

At the Thirtieth Annual Meeting, held on the 30th November, 1854, it was shown that there had been issued, no less than 2,430 Policies, covering Assurances to the amount of 1,097,500*l.*, and yielding Annual Premiums amounting to 50,111*l.*

By the Annual Report for 1853, it appeared that the number of Policies then in force was 3,454, insuring 1,357,500*l.*, and yielding an Income of 53,257*l.*

The Number of Policies now in force is.....5,248
The Amount Insured is.....£2,298,027 8s. 2d.
The Income from Premiums is.....£100,510 9s. 1d.

Two Busses have been declared (in 1848 and 1853), adding nearly 2 per cent. per annum on the average to sums assured, and by which a Policy of 1,000*l.* issued in 1842 on a healthy life is now increased to 1,260*l.*

Profits divided every five years.
Assurances are effected at home or abroad on either healthy or diseased lives, at as moderate rates as the most recent data will allow.

Policies issued free of Stamp Duty, and every charge but the Premiums.

Agents wanted for vacant places.
Prospectuses, Terms of Proposal, and every other information, may be obtained of the Secretary at the Chief Office, or on application to any of the Society's Agents in the country.

F. G. P. NEISON, Actuary.
C. DOUGLAS SINGER, Secretary.

Henry Lancelot Holland, Esq.
J. Petty Muspratt, Esq.
C. Hampden Turner, Esq. F.R.S.
Matthew Whitton, Esq. (M.P.)
Marmaduke Wyvill, jun. Esq.

The Company offers—Complete Security—Moderate Rates of Premium with participation in Profits—Low Rates without Profits.

BONUS.

Four-fifths, or 1 per cent. of the Profits, are divided among the Policyholders.

LOANS

in connexion with Life Assurance on approved security.

ANNUAL PREMIUM

required for the Assurance of 100*l.* for the whole term of life:

Age.	Without Profits.	With Profits.	Age.	Without Profits.	With Profits.
15	£1 11 0	£1 15 0	45	£2 18 10	£3 6 5
20	1 13 10	1 19 0	50	4 0 0	4 10 7
25	2 4 0	2 10 4	60	6 1 0	6 7 4

For Prospectuses and Forms of Proposal apply at Offices as above, or to any of the Company's Agents.

ROBERT TUCKER, Secretary.

THE YORKSHIRE FIRE AND LIFE
INSURANCE COMPANY.

Established at York, 1821, and Empowered by Act of Parliament.

CAPITAL, 500,000*l.*
The attention of the Public is particularly called to the terms of this Company for

LIFE INSURANCES,

And to the distinction which is made between Male and Female Lives.

No Charge for Stamps on Life Policies.

FIRE INSURANCES

Are also effected by this Company on the most moderate terms.

LONDON AGENTS:

Mr. William Pitman, Solicitor, 34, Great James-street, Bedford-row.

William R. Turner, Solicitor, 1, Field-court, Gray's Inn.

Agencies are also established at the various Towns in the Country.

W. L. NEWMAN, Actuary and Secretary, York.

THE WESTMINSTER AND GENERAL LIFE
ASSURANCE ASSOCIATION.

At the Westminster Fire Office,

27, King-street, Covent-garden, London.

Established 1836.

Trustees.

George Dodd, Esq. | Colonel W. H. Meyrick.
Joseph William Thripp, Esq.

This Association offers to Assure the security of an ample Guaranteed Capital, besides a large Fund invested in the Public Stocks and on Mortgages, being the accumulation of premiums already received on Assurances.

The rates of premium hereunder stated have been re-calculated, and are precisely adjusted to the risk of the Assurance undertaken by the Office, and are as low as is consistent with security.
Eight-tenths of the profits of the Association are divided every Five Years among the holders of Policies in the participating class of assurances.

The conditions made to the sums assured by Policies which have participated in the three divisions of profit declared 1842, 1847, and 1852, have averaged one-half of the premiums paid on them.

The assured may proceed to and reside in any part of Europe, without giving notice to the Association, or paying any extra premium.

Every restrictive condition of assurance not absolutely necessary for the security of the Association has been withdrawn from the policies.

Loans advanced on the security of policies after two premiums have been paid on them.

Premiums may be paid Yearly, Half-yearly, or Quarterly.

Every information on the subject of Life Assurance can be obtained on application at the Office.

Annual Premiums for the Assurance of 100*l.*, for the whole term of Life:—

Age.	With Profits.	Age.	Without Profits.
20	£1 17 4	30	£1 14 7
25	2 8 10	35	2 5 4
30	3 5 0	40	3 0 4
35	4 10 6	45	4 4 0
40	7 4 8	50	6 14 2

W. M. BROWN, Actuary.

Agents required in the principal Country Towns.

NEW AND PECULIAR SYSTEM OF LIFE ASSURANCE.

THE DIRECTORS of the NATIONAL ASSURANCE AND INVESTMENT ASSOCIATION invite attention to the New System of Life Assurance exclusively adopted by this Association—viz. that of allowing interest at the rate of 4 per cent. per annum on all Premiums paid, instead of the remote and uncertain system of Busses usually adopted.

By this plan, the Policyholder will secure to himself a constantly increasing annual income during life as well as the payment of the sum assured to his representatives at his death.

Tables of Rates specially adapted to this system of Assurance may be obtained at the Office of the Company, 3, Pall Mall East, or forwarded free, on application.

March 1, 1855. PETER MORRISON, Managing Director.

GREAT WESTERN RAILWAY.—COALS.

—Orders for the best RUABON HOUSE COALS, equal to the finest Durhams, may be executed at 28s. 6d. per Ton (cash price), delivered within 4 miles of the Paddington Station.

RUPTURES.—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAN LEVER TRUSS is

allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of a steel spring, so often hurtful in its effects, is here avoided; a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAN PAD and PATENT LEVER fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to do) forwarded by post, on the recommendation of the body two inches below the hips, being sent to the Manufacturer, Mr. WHITE, 23, Piccadilly, London.

ELASTIC STOCKINGS, KNEE CAPS, &c.

FOR VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price, from 7s. 6d. to 10s. each; postage 6d. MANUFACTORY, 22, PICCADILLY, LONDON.

CONTINUOUS EMPLOYMENT GUARAN-

TEED.—A limited number of LADIES WANTED IMMEDIATELY, to pursue the Fashionable and Lucrative Arts of "ILLUMINATING ON VELLUM" and "LITHOGRAPHY," for objects at the Crystal Palace, intended for publication. Each Art is taught for One Guinea, either personally or by correspondence, and by which a handsome income can be realized weekly.—Continuous employment guaranteed at the pupil's residence and private instruction.—The elegant specimens are on view daily, at Mons. LAURENT'S residence, 11, Torrington-square, near Russell-square; Royal Polytechnic, &c.—References to families of distinction. No knowledge of drawing necessary.

F. DENT, 61, STRAND, and 34 and 35,

ROYAL EXCHANGE, Chronometer, Watch, and Clock Maker, by appointment, to the Queen and Prince Albert, sole Successor to the late E. Dent in all his patent rights and business at the above Shops, and at the Clock and Compass Factory, at Somerset Wharf, Maker of Chronometers, Watches, Astronomical, Turret, and other Clocks, Diploides, and Patent Ships' Compasses, used on board Her Majesty's Yacht, 'Ladies' Gold Watches, &c. gentlemen's, &c. Strong Silver Lever Watches, &c. 6s.

PAINLESS TOOTH EXTRACTION, with-

out Chloroform.—MR. WALTER BLUNDELL is at home daily, from 10 to 4, for Dental Operations under his new patent process.—29, New Broad-street, City.

A NEW DISCOVERY IN TEETH.

MR. HOWARD, SURGEON-DENTIST, 52,

FLEET-STREET, has introduced an ENTIRELY NEW DESCRIPTION OF ARTIFICIAL TEETH, fixed without wires, or ligatures. They so perfectly resemble the natural teeth as not to be distinguished from the originals by the closest observer; they will never change colour or decay, and will be found superior to any teeth ever before used. This method does not require the extraction of roots, or any painful operation, and will support and preserve the teeth in their natural position, without any artificial articulation and mastication. Decayed teeth rendered sound and useful in mastication.

52, FLEET-STREET.—At home from Ten till Five.

BERMUDA ARROWROOT, unremoved from the tin cases in which it is shipped, weight, case exclusive, 26½ lb. price 50s. Small quantities can be had at 2s. 6d. per lb.
JAMES EPPS, Homeopathic Chemist,
Egyptian Hall, Piccadilly;
112, Great Russell-street, Bloomsbury; and
82, Old Broad-street, City.

TRELOAR'S COCOA-NUT FIBRE MATTING, Mats, Rugs, Mattresses, Hassocks, Cushions, Brushes and Brooms, Sheep-netting, Cordage, Brush-dry, &c. &c., of which prices' Catalogues may be had free by post.
Warehouse, 42, LUDGATE-HILL, London.

ONE THOUSAND BEDSTEADS TO CHOOSE FROM.—HEAL & SON have just erected extensive Premises, which enable them to keep upwards of One Thousand Bedsteads in stock, One Hundred and Fifty of which are fixed for inspection, comprising every variety of Brass, Wood, and Iron, with Chintz and Damask Furnitures, complete. Their new Ware-rooms also contain an assortment of BED ROOM FURNITURE, which comprises every requisite, from the plainest Japanese Deal for Servants' Rooms, to the newest and most tasteful designs in Mahogany and other Woods. The whole warranted of the soundest and best manufacture.—HEAL & SON'S ILLUSTRATED CATALOGUE OF BED-STEADS, and PRICED LIST OF BEDDING, sent free by post.—HEAL & SON, 130, Tottenham Court-road.

CHUBB'S LOCKS, with all the RECENT IMPROVEMENTS; STRONG FIRE-PROOF SAFES, CASH and DEED BOXES.—Complete Lists of Sizes and Prices may be had on application.
CHUBB & SON, 37, St. Paul's Churchyard, London; 29, Lord-street, Liverpool; 16, Market-street, Manchester; and Horsley Fields, Wolverhampton.

FISHER'S DRESSING-CASES, FOR LADIES and GENTLEMEN. FISHER'S STOCK IS ONE OF THE LARGEST IN LONDON, AT PRICES TO SUIT ALL PURCHASERS. Catalogues post free.
189 and 189, STRAND, corner of Arundel-street.

THE PATENT PRIZE KITCHENER, with Buller to supply Bath, Scullery, Hot and Steam Closet, is Manufactured, with all its recent improvements, by THOMAS RABOLLYFFE, Leamington, Warwickshire, of whom plans, prices, and testimonials may be had on application. It is made from three feet to twenty, all worked by one small fire. A great saving in fuel is effected by having this Kitchen, and it effectually cures smoke chimneys, and is the best cooking-range extant.—Experienced and steady workmen sent out for fixing, &c. when required.

FENDERS, STOVES, and FIRE IRONS.—Buyers of the above are requested before finally deciding, to visit WILLIAM S. BURTON'S SHOW-ROOMS, 39, Oxford-street (corner of Newman-street), Nos. 1, 2, 3, Newman-street, and 4, 5, Perry-place. They are the largest in the world, and contain such an assortment of FENDERS, STOVES, RANGES, FIRE IRONS, and GENERAL IRONMONGERY as cannot be approached elsewhere, either for variety, novelty, beauty of design, or existences of workmanship. Bright stoves, with bronzed ornaments and two sets of bars, 2s. 7s. to 3s. 10s.; ditto with ornate ornaments and two sets of bars, 3s. 10s. to 12s. 12s.; ditto with complete, with standards, from 7s. to 3s.; Steel Fenders from 2s. 12s. to 6s.; ditto, with rich ornate ornaments from 2s. 12s. to 7s. 7s.; Fire-irons, from 1s. 9d. the set to 4s. 4s. Sylvester and all other Patent Stoves, with radiating hearth plates. All which he is enabled to sell at the very reduced charges—
Firstly—From the frequency and extent of his purchases; and
Secondly—From those purchases being made exclusively for cash.

THE PERFECT SUBSTITUTE FOR SILVER.—The NICKEL SILVER, introduced 20 years ago by WILLIAM S. BURTON, who PLATED by the patent process of Messrs. Elkington & Co., is beyond all comparison the very best article next to sterling silver that can be employed as such, either usefully or ornamentally, as by no possible test can it be distinguished from real silver.

39, OXFORD-STREET (corner of Newman-street); 1, 2, and 3, NEWMAN-STREET; and 4 and 5, PERRY-PLACE.

THE IMPROVED CHARCOAL RESPIRATOR, (sanctioned and approved by Dr. Stenhouse).
The only Respirator (excepting the original cumbersome one) in which the object sought by Dr. Stenhouse, viz. the purification of an impure or infected atmosphere, is entirely effected; the construction of this Respirator completely prevents the inhalation of any air that has not come in contact with the charcoal. As an instrument for simply warming the air it also surpasses the ordinary Respirator.
To meet the expressed Views of Dr. Stenhouse, "that inventions for the prevention of disease ought to be sold at the lowest possible price," we have offered it to the public at as low a cost as we believe a perfect instrument can be constructed.—Price 5s. 6d.; or post free on receipt of 6s. DABBY & GOSDEN, 140, Leadenhall-street, London.

METCALFE & CO'S NEW PATTERN TOOTH BRUSH and PENETRATING HAIR BRUSHES.—The Tooth Brush has the important advantage of searing thoroughly into the divisions of the Teeth, and is famous for the hairs not coming loose, &c. An improved Clothes Brush, incapable of injuring the finest nap. Penetrating Hair Brushes, with the durable unbleached Russian bristles. Flesh Brushes of improved graduated and powerful friction. Velvet Brushes, &c. By means of the most successful man, Smyrna Sponges, &c. By means of direct imports, Metcalfe & Co. are enabled to secure to their customers the luxury of a Genuine Smyrna Sponge. Only at METCALFE, BINGLEY & CO'S Sole Establishment, 130B, Oxford-street, one door from Holles-street.
Caution.—Beware of the words "From Metcalfe's," adopted by some dishonest imitators.
METCALFE'S ALKALINE TOOTH POWDER, 2s. per box.

"WHITE TEETH."—THE PEOPLE'S TOOTH-POWDER is the best for Whitening and Preserving the Teeth. Prepared by J. C. HUBB, 20, St. John-street, Clerkenwell. Sold in boxes at 3d. and 6d. each. Free to any address on receipt of 5 or 10 postage stamps. Can be ordered through any Chemist.

DO YOU WANT LUXURIANT HAIR, WHISKERS, &c.?—Twenty Thousand Testimonials prove the magical powers of NIOUKRENE. In all cases, even where the hair has been lost, it will be found efficacious in reproducing the hair when lost either by disease or decay, checking premature greyness, strengthening weak hair, and preventing its falling off. &c. For the production of Whiskers and Moustaches in two or three weeks, it is guaranteed. Price 2s. 6d. per box, or post free on receipt of 2 penny postage stamps, by MISS GRAHAM, 10, Clibstone-place, King's-cross, London. "It produced a fine pair of whiskers in less than a month." R. Lovell, Esq. "I have recommended it to many of my patients, who have found it successful." Dr. Simpson. "I was bald seventeen years, and it entirely reproduced my hair." Mr. W. Long. "It quite checked the greyness." Mrs. Smart.

DO YOU WANT LUXURIANT HAIR, WHISKERS, &c.?—No other compound for the Hair has maintained such an enduring celebrity as EMILY DEAN'S CRINELINE. It is guaranteed to produce Whiskers, Moustaches, Eyebrows, &c. in a few weeks, and restore the Hair in baldness, from whatever cause, strengthen it when weak, prevent its falling off, and effectually check greyness in all stages. Price 2s. 6d. per box (elegantly perfumed); sent post free on receipt of 2 penny postage stamps, by MISS DEAN, 37A, Manchester-street, Gray's Inn-road, London. Sold by every Chemist. "In one fortnight it produced a beautiful set of moustaches." H. Adams. "It has prevented my hair falling off." J. Hickson. "It has quite checked the greyness that was coming on." Mrs. Elder.
Beware of imitations under closely similar names.

BEAUTIFUL HAIR, WHISKERS, &c., are invariably produced in Two or Three Weeks by COUPELLE'S CELEBRATED CRINUTRIA, which is universally acknowledged as the only preparation to be really depended upon for the unfailing production of Hair, as also checking greyness, Baldness, &c. and rendering the Hair luxuriant, curly, and glossy.—Mr. Williams, 6, Louth-street, Liverpool. "I can now show as fine a head of hair as any person, solely from using your Crinutria."—Sergeant Caven, Longford Barracks, Ireland. "Through using your Crinutria, I have an excellent Moustache."—Mrs. Carter, Leamington, &c. &c. My head, which was quite bald, is now covered with new hair." Price 2s. per packet, through all Chemists, &c.; or sent free for 24 penny stamps, by ROSALIE COUPELLE, 69, Castle-st., Newmarket-st., Oxford-st., London.—Guard against imitations under closely similar names.—"FIVE MINUTES' ADVICE" on the Hair; with numerous startling and indisputable Testimonials; List of Country Agents, &c., post free for two stamps.

DECORATION OF THE HEAD.—The admirable taste displayed in the Head Dresses of some of our leading belles, who are no less indebted to art than to nature for their superiority, may be imitated, but never equalled, without the material to work upon. The indispensable requisite is a GOOD HEAD OF HAIR. This, the skillful artist may embellish; but the link, weak, and thinly-scattered locks he laboriously and vainly attempts to arrange in a manner befitting the requirements of the fashionable circles. For this, the Hair must be nourished and invigorated, and all relaxing tendencies overcome. Oldridge's Balm of Columbin is the only preparation, truly efficacious, without being in the slightest degree injurious.
By its frequent use the Hair is prevented from turning grey, is improved in appearance, strengthened, and receives, by frequent application, that beautiful gloss and luxuriance which so greatly adds to the grace and dignity of the human form.
Price 3s. 6d., 6s., and 11s. per Bottle; no other prices are genuine. Ask for OLDDRIDGE'S BALM, 13, Wellington-street North, Strand, London.
Sold by all respectable Chemists, Perfumers and Stationers.

DINNEFORD'S PURE FLUID MAGNESIA has been for many years sanctioned by the most eminent of the Medical Profession as an excellent remedy for Acidities, Heartburn, Headache, Gout, and Indigestion. As a mild Aperient it is especially adapted for the relief of Females, particularly during Pregnancy; and it prevents the Food of Infants from turning sour during digestion. Combined with the ACIDULATED LEMON SYRUP, it forms an Effervescent Aperient Draught, which is highly agreeable and efficacious.—Prepared by DINNEFORD & CO., Dispensing Chemists, and General Purveyors for the Improvement of Hair, Nails, and Skin, 172, New Bond-street, London; and sold by all respectable Chemists throughout the Empire.

RUPTURES EFFECTUALLY CURED WITHOUT A TRUSS!—All sufferers from this alarming complaint are earnestly invited to consult or write to Dr. LESLIE, as he guarantees them relief in every case. His remedy has been successful in curing thousands of persons during the last twelve years, and is applicable to every kind of single and double Rupture, however bad or long-standing, in male or female of any age, causing no confinement or inconvenience in its use whatever. Sent post free to any part of the world, with full instructions for use, on receipt of 7s. 6d. in postage stamps, cash, or post-office order, to Dr. Leslie, 37A, Manchester-street, Gray's Inn-road, London.—At home daily (except Sunday) from 11 till 4 o'clock. A Pamphlet of Testimonials sent post free on receipt of one postage stamp.

DEAFNESS and NOISES in the HEAD.—Institution for the Cure of Deafness, 9, Suffolk-place, Pall Mall, London. Instant and permanent restoration of hearing guaranteed, without the use of ear-trumpets, instruments, or causing one moment's inconvenience to the most aged or nervous sufferer. Dr. HOUGHTON'S new and extraordinary discovery, by one consultation enables deaf persons of either sex to hear immediately with perfect ease the lowest whisper, and magically removes all singing in the ears. Hospital and private testimonials and certificates from the most eminent Physicians and Surgeons in England, in whose presence deaf persons have been cured, and many hundreds of private patients cured can be seen or referred to. Hours of consultation, 11 till 4 every day. Francis Robert Houghton, Member of the London Royal College of Surgeons, May 2, 1845; Licentiate of the Apothecaries Company, April 30, 1846.

Just published, "SELF-CURE OF DEAFNESS," for country patients; a step to empiricism, quackery, and exorbitant fees, sent on receipt of seven stamps, free. Examination free. 9, Suffolk-place, Pall Mall.

FREEDOM FROM COUGHS is insured by taking Dr. LOCOCK'S PULMONIC WAFERS. From Mr. W. J. Dale, Chemist, 65, Queen-street, Portsea.—"From the immense sale I have had of Dr. Locock's Pulmonic Wafers throughout this populous locality, I must do you justice to say that I consider them invaluable for coughs, colds, asthma, &c." TO SMOKERS and PUBLIC SPEAKERS these are invaluable for clearing and strengthening the voice. THEY HAVE A PLEASANT TASTE. Price 1s. 13d., 2s. 9d., and 11s. per box. Sold by all Druggists.

DR. DE JONGH'S LIGHT BROWN COD LIVER OIL. Prepared for MEDICINAL USE in the LOFFODEN ISLES, NORWAY, and put to the test of Chemical Analysis.

Extracts from Medical Testimonials. The late JONATHAN PEREIRA, M.D. FR.S.E. F.L.S., Professor at the University of London, Author of "The Elements of Materia Medica and Therapeutics," &c. "I know that no one can be better, and few so well, acquainted with the physical and chemical properties of this medicine as yourself, which I regard as the highest authority on the subject. The oil which you gave me was of the very finest quality, whether considered with reference to its colour, flavour, or chemical properties; and I am satisfied that for medicinal purposes no finer oil can be procured."

ARTHUR H. HASSALL, M.D. F.L.S., Member of the Royal College of Physicians, Physician to the Royal Free Hospital, &c. Chief Analyst of the Sanitary Commission of the Lancet, Author of "Food and its Adulteration," &c. "I have more than once, at different times, subjected your Light Brown Oil to chemical analysis—and this unknown to yourself—and I have always found it to be free from all impurity, and rich in the constituents of bile. So great is my confidence in the article that I usually prescribe it in preference to any other, in order to make sure of obtaining the remedy in its purest and best condition."

Sold in bottles, labelled with Dr. de Jongh's Stamp and Signature, WITHOUT WHICH NONE ARE GENUINE, by ANSAR, HALLFORD & CO., 77, STRAND, LONDON. Dr. de Jongh's sole accredited Dispensers and Agents for the United Kingdom and the British Colonies.
May be obtained in the COUNTRY, from respectable Chemists and Vendors of Medicine. Should any difficulty be experienced in procuring the Oil, Messrs. ANSAR, HALLFORD & CO. will forward four half-pint bottles to any part of England, CARriage PAID, on receipt of a remittance of 10s.

Half-pints (10 ounces), 2s. 6d.; Pints (20 ounces), 4s. 9d.; Quarts (40 ounces), 8s. Imperial Measure.

DR. BARRY'S HEALTH RESTORING REVALENTA ARABICA FOOD counteracts Dyspepsia (Indigestion), Constipation, and their consequences.—Ailments of the Stomach and Liver, Complaints, Acidity, Heartburn, Flatulency, Sick Headaches and General Debility, Low Spirits, Cough, Asthma, Incipient Consumption, Nausea, &c. It is, moreover, the best food for infants and invalids generally, as it never purges or acts on the weakest stomach, nor interferes with a good liberal diet, but imparts a healthy relish for lunch and dinner, and restores the faculty of digestion and nervous and muscular energy to the most enfeebled. Highly approved of by Drs. Ure, Shorland, Harvey, Campbell, Gattacher, Warner, Lord Stuart de Decies, and 50,000 other respectable persons, whose health has been perfectly restored by it after all other means of cure had failed.

In canisters, 1lb. 2s. 9d.; 2lb. 4s. 6d.; 5lb. 11s.; 12lb. 22s.; 25lb. 45s.; 50lb. 85s.; 100lb. 155s. The 10lb. and 12lb. carriage free on receipt of Post-office order. Barry Du Barry & Co., 77, Regent-street, London; and all respectable Messrs. & Purveyors, 330 and 451, Strand; 4, Cheap-side; 68, Cornhill; 49, Bishopsgate-street; 55, Charing-cross; 54, Upper Baker-street; 63 and 150, Oxford-street.

COLE'S ALGA MARINA is the Concentrated Essence of the Sea-weed, containing in a highly condensed form all the virtues of the sea plants, to which medical authorities ascribe the principal benefits derivable from a residence by the Sea. It affords speedy relief and a certain cure in all cases of Acute or Chronic Rheumatism, Rheumatic Gout, Neuralgia, and other pains in the limbs and joints. It is now rapidly superseding all other external remedies in cases of Weakness, Relaxation, Contraction, Paralysis, Stiffness, Deformities, Swellings, Tumours, Scrofulous Diseases, and the Malformations of Kicked or Badly-nursed Children; and in all cases where friction is recommended, it will greatly increase its good effects. Sold in bottles, 2s. 9d., 4s. 6d., and 11s. each, by T. KEATING, 79, St. Paul's Churchyard, London, and all Chemists.
Ask All purchasers should read the Pamphlet, which may be had, gratis, on application, and by post on inclosing six postage stamps.

KAYE'S WORSDELL'S PILLS afford effectual relief from Indigestion, Stomach Diseases, Chest Affections, Coughs, and disorders arising from obstructed circulation of the fluids, and impurity of the blood.—Sold everywhere at 1s. 13d., 2s. 9d., and 4s. 6d. Wholesale Depot, 23, BREAD-STREET, London.

HOLLOWAY'S PILLS stand pre-eminent for the CURE OF ASTHMA.—Mr. Griffiths, Gardener, of Gellymann, Herefordshire, was afflicted for a number of years with a violent asthmatic cough, causing him many sleepless nights; in truth the attacks were so severe at times that he could scarcely keep any food on his stomach for days together, and notwithstanding he resorted to various remedies, he obtained no beneficial effect. At last he tried of Holloway's Pills, which he persevered in for about five weeks; the result of which was a perfect cure, and he now enjoys an excellent health.—Sold by all Vendors of Medicines; and at Professors Holloway's Establishments, 214, Strand, London, and 60, Maiden-lane, New York.

Dedicated, by permission, to Her Majesty.

THE ENGLISH CYCLOPÆDIA

(BASED UPON THE PENNY CYCLOPÆDIA),

ILLUSTRATED WITH MORE THAN FIVE THOUSAND WOOD ENGRAVINGS.

CONDUCTED BY CHARLES KNIGHT.

This day are published, Price 10s. each, handsomely and strongly bound in Cloth,

VOLUME THREE OF THE GEOGRAPHICAL DIVISION.

VOLUME THREE OF THE NATURAL HISTORY DIVISION.

THE "ENGLISH CYCLOPÆDIA" is based upon "The Penny Cyclopædia of the Society for the Diffusion of Useful Knowledge." The copyright of that great work being the property of Mr. KNIGHT, he alone has the power of remodelling it throughout, so as to adapt the original materials to the present state of knowledge. In many essential particulars these valuable materials have to be re-cast, so as to render the book as perfect as possible. The amount of literary labour which this remodelling has involved, will at once be seen by any one who will compare the articles of the volumes published with those of the original. That labour has not been confined to revision and correction. Many new articles have been introduced, and many of the old ones supplied by others wholly re-written.

Of the nature and extent of these additions and alterations we have an ample notice in "THE TIMES" of October 12th, 1854:—

"A cheap serviceable *Cyclopædia* in a small compass cannot fail to command purchasers, and the volumes which form the first instalment of this

interesting labour are worthy of all the commendation we can give them for intelligent care and diligence in working up the best available materials."

OF THE GEOGRAPHICAL DIVISION the same writer says:—

"We have taken the trouble to compare some of the articles in the *English Cyclopædia* with the corresponding articles in its predecessor, the *Penny Cyclopædia*, and are enabled to judge of the improvements that have

been made, and of the very great care with which fresh knowledge has been brought to bear upon the matter in hand."

THE NATURAL HISTORY DIVISION has the same commendation:—

"Few things have been more remarkable than the progress of natural history research during the last twenty years, particularly in the lower departments of organised life, in which the microscope has revealed so much to us. The advance of knowledge has been accurately noted in the *English Cyclopædia*. In its predecessor, as discovery succeeded discovery, the writers were compelled to notice new matters under the name of species rather than of genera. The scattered portions are now all brought together.

The bare mention of such names as Owen, Edward Forbes, Harvey, Huxley, Walkner, as authorities in natural science, shows how much has to be stated which was not in the original work. A reference to the names of Liebig, Lehmann, Dr. Carpenter, and Professor Ansted, suggests how much there is of new and curious to be found in chemistry, physiology, and geology."

"THE ENGLISH CYCLOPÆDIA" will be completed in Four Divisions; each having its own alphabetical arrangement, and each forming four distinct volumes:—

GEOGRAPHY 4 Vols.
NATURAL HISTORY 4 Vols.

BIOGRAPHY AND HISTORY 4 Vols.
SCIENCES AND ARTS 4 Vols.

The advantages of this plan are thus stated in "THE QUARTERLY REVIEW," of July, 1854:—

"Mr. Charles Knight, in a recently published little book, 'The Old Printer and Modern Press,' which abounds in curious facts upon the history of books, states that 'no work that occupied more than four or five years in its completion was ever successful in this country.' The sale of the 'Penny Cyclopædia,' of which the publication occupied eleven years, or two years less than the *Real-encyclopædie*, gradually fell from 50,000 to 20,000—more than half the original subscribers preferring to

sacrifice their previous outlay to waiting any longer for the final articles of the alphabet, which were as frequently required for reference as the earlier portion. Mr. Knight, in an IMPROVED EDITION of the work, which he is issuing under the title of the 'ENGLISH CYCLOPÆDIA,' has consequently found it expedient to break up the former single series into four divisions, for the purpose of bringing each to a speedier completion."

THE GEOGRAPHICAL AND NATURAL HISTORY DIVISIONS

WILL BE COMPLETED IN NOVEMBER 1855, BY THE PUBLICATION OF THE FOURTH VOLUME OF EACH OF THESE DIVISIONS.

A Number of the Cyclopædia is published every Saturday, price 6d.; one week a number of GEOGRAPHY—the next a number of NATURAL HISTORY—and a Part, price 2s., on the last day of every month. All back numbers, parts, and volumes, are constantly on sale.

PUBLISHED BY BRADBURY & EVANS, 11, BOUVERIE STREET.

THE ATHENÆUM

Journal of English and Foreign Literature, Science, and the Fine Arts.

No. 1430.

PRICE
FOURPENCE
Stamped Edition, 5d.

HORTICULTURAL SOCIETY OF LONDON.
The SECOND SPRING MEETING will take place at the Society's House, 21, Regent-street, on TUESDAY, April 3, from 12 to 5, P.M.

BOTANICAL SOCIETY OF LONDON.
DISTRIBUTION OF BRITISH PLANTS, 1855.—Members are requested to send their Lists of Desiderata forthwith marked on the 4th Edition of the London Catalogue of British Plants.
20, Bedford-street, Strand, G. E. DENNES, Secretary.
1st March, 1855. J. T. SYME, Curator.

N.B.—The Herbarium may be inspected every Monday, Wednesday, and Friday, from Ten until Five. The Library is open on the same days.

ROYAL ACADEMY OF ARTS, Trafalgar-square.—NOTICE TO ARTISTS.—All Works of Painting, Sculpture, Architecture, or Engraving, intended for the ensuing EXHIBITION at the ROYAL ACADEMY, must be sent in on Monday, the 9th, or Tuesday, the 10th of April next, after which time no Work can possibly be received, nor can any Works be received which have already been publicly exhibited.

FRAMES.—All Pictures and Drawings must be in gilt frames. Oil Paintings under glass and Drawings with wide margins are inadmissible. Excessive breadth in frames as well as projecting mouldings may prevent Pictures obtaining the situation they otherwise merit. The other Regulations necessary to be observed may be obtained at the Royal Academy.

JOHN PRESCOCK KNIGHT, R.A. Sec.
Every possible care will be taken of Works sent for exhibition, but the Royal Academy will not hold itself accountable in any case of injury or loss, nor can it undertake to pay the carriage of any package.

The prices of Works to be disposed of may be communicated to the Secretary.

ARUNDEL SOCIETY.—FIFTH YEAR'S ISSUE TO SUBSCRIBERS.

Six large Wood Engravings, by Messrs. DALZIEL, from Mr. W. OLIVER WILLIAMS'S series of Drawings, from the Frescoes by GIOTTO in the Arena Chapel, Padua.

(Being the Continuation of the Eight Engravings from the same Series issued for the Fourth Year.)

A Notice of GIOTTO and HIS WORKS IN PADUA, by JOHN RUSKIN, Part I.
Annual Subscription to the Arundel Society, 1l. 1s.
24, Old Bond-street. JOHN NORTON, Secretary.

Singing.—F. R. Cox, Esq., R.A. Music.

Spanish.—

Prospectuses to be obtained on application at the above address.

A JUNIOR CLASS is open at the College.

THERE IS A VACANCY FOR TWO BOARDERS.

Pupils are received at the Half Term.

HYDE PARK COLLEGE FOR YOUNG LADIES, 3, WESTBOURNE TERRACE.

Visitor.—The Right Hon. and Right Rev. the LORD BISHOP OF LONDON.

President.—The Right Hon. the EARL OF CARLISLE, K.G.

Pupils must be introduced by the President, Vice-Presidents, Committee, or Ladies' Visitors.

The next Quarter for the Junior Department will commence on MONDAY, the 26th March inst.

Terms, 16l. 16s. for the Year; or for First Quarter, 6l. 6s., Second, 5l. 5s., Third, 4l. 4s., Fourth, 3l. 3s.; or for the First Year after the First Year, either 16l. 16s. for the Year, or 4l. 4s. 6d. per Quarter.

Prospectuses, with every information, may be obtained on application at the College.

J. R. C. THOMSON, Secretary.

A SOUND CLASSICAL, MATHEMATICAL, SCIENTIFIC and GENERAL EDUCATION is afforded on moderate Terms at the LICHFIELD GRAMMAR SCHOOL.—For Prospectus apply to the Rev. J. G. CUMMING, M.A. P.C.S., Head Master.

PRIVATE TUITION.—A Married Clergyman,

with no Parochial Duty, who is preparing a few Pupils—two for Addiscombe and others for Woolwich and Eaton, will have a VACANCY after Easter for a Pupil, to whose health or Education great personal attention is required.—Address the Rev. E. R., Post-office, Tonbridge, Kent.

EDUCATION.—TO GUARDIANS, WIDOWERS,

and FAMILIES.—Two Ladies, residing in a West-end Suburb, desire to undertake the sole charge of three Young Ladies, sisters or otherwise, for whom may be required a House replete with elegant comfort and a first-rate EDUCATION. No objection to Pupils whose studies are considered finished, but who wish further proficiency in the Accomplishments.—Address, with particulars, to R. A., Blackburn's, 11, Park-terrace, Regent's Park.

BRIGHTON.—EDUCATION.—There are

VACANCIES in a first-class Establishment where only Twelve Young Ladies are received. A Parisian Governess resides in the house. Signor F. Lablache, Herr Kuhn, Messrs. E. de Paris, Michau, and other eminent Professors attend. References to Parents of Pupils.—For Terms &c. address Misses R., care of Mr. Rolandi, 20, Berners-street, Oxford-street, London, where Prospectuses can also be had.

STOCKWELL PROPRIETARY GRAMMAR SCHOOL. in union with King's College.—Established 1833.—The Rev. J. S. WATSON, M.A., Head Master, has VACANCIES for BOARDERS, to attend the School under his superintendence, and to receive instruction in his house. Prospectus on application.

BEDFORD GRAMMAR SCHOOL.—The

Office of MASTER of the above School will be VACANT on the 24th of June next, by the resignation of the Rev. Dr. Brereton. Applications and testimonials may be sent to the Rev. the Warden, New College, Oxford, on or before Saturday, March 24th.

Extracts from the Scheme, settled by order of Vice-Chancellor Sir W. P. Wood, dated the 12th of March, 1853:—

"The Master and Second Master of the said Grammar School for the time being shall always be Fellows of New College, or Clergymen of the Church of England, being Graduates of one of the Universities of Oxford, Cambridge, Dublin, London, or Durham, and qualified to teach the Latin and Greek Languages."

"There shall be allowed and paid to the future Master the yearly sum of 2000l., and so many additional sums of 50l. each as will be equal to the number of Boys up to and not exceeding 140, who shall have been bona fide educated at the said Grammar School for at least six months in each year."

The Master may, with the consent of the Warden and Scholars of New College and the Trustees respectively, take 30 Boarders.

There is a residence (rates and taxes free), kept in repair by the Trustees of the Bedford Charity.

ORIENTAL LANGUAGES.—The Rev. G.

SMALL (ten years in India) gives INSTRUCTIONS in HEBREW, ARABIC, SANSCRIT, HINDUSTANI, PERSIAN, and BENGALI, either at his own house, St. John's-grove, Croydon; at 80, Coleman-street, City; or at the Pupils' residences. Terms moderate.

A MARRIED MEDICAL MAN, retired from

practice, and residing in a healthy village in Surrey, within an hour's distance from Town by railway, and ten minutes' walk from a station, RECEIVES A SINGLE INVALID PATIENT.—For terms, address, and references apply to Mr. NEWBY, Publisher, 30, Welbeck-street, Cavendish-square.

SUPERIOR EDUCATION.—BATH-PLACE,

READING, Berks.—Mrs. WILLIAM BINFIELD (Miss Welch) continues to RECEIVE under her care a LIMITED

NUMBER OF YOUNG LADIES, whose religious instruction, intellectual improvement, and domestic comforts are objects of her unremitting attention. Terms, 70 guineas, including accomplishments by eminent masters. This establishment offers peculiar advantages for the general cultivation of Music, which is entrusted to Mr. William Binfield, a Paris and London Performer, who also gives Finishing Lessons in Singing and on the Pianoforte.

MILITARY TUTOR.—Lieutenant-Colonel

ANSTRUTHER RECEIVES a limited number of GENTLEMEN, candidates for Commissions in the Army, and, assisted by experienced Masters, prepares in the various branches of study required by Her Majesty's Regulations. References permitted to the parents of former Pupils.—4, Chepstow Villas, Bayswater.

LANSDOWNE-HOUSE SCHOOL, established

1828, corner of Park-road, Upper Holloway, London.—At the above establishment, YOUNG GENTLEMEN are liberally

BOARDED and prepared either for Professional or Mercantile pursuits. Prospectuses to be obtained of the Principal, M. T. HARRIS.

THE GOVERNESSES' INSTITUTION, 34,

Soho-square.—Mrs. WAGHORN, who has resided many years abroad, respectfully invites the attention of the Nobility, Gentry, and Principals of Schools to her Register of English and Foreign GOVERNESSES, TEACHERS, COMPANIONS, TUTORS, and PROFESSORS. School Property transferred, and Pupils introduced in England, France, and Germany. No charge to Principals.

CHEMICAL and METALLURGICAL LABORATORIES.

THE ROYAL COLLEGE OF CHEMISTRY

(now the Laboratory of the Metropolitan School of Science applied to Mining and the Arts) IS OPEN, under the direction of Dr. ROEMANN, M.B.S., and the Metallurgical Laboratory under the direction of Dr. PERCY, F.R.S.

At both of these Laboratories there are Three Terms annually, of twelve weeks each. The Fee for working every day in the week is 10l. per Term, but Pupils may enter for Half Terms at reduced fees.

The Third Term will commence on MONDAY, the 2nd of April, when Pupils may be entered.

For further particulars, apply at the Museum of Practical Geology, Jernyn-street; or at the Royal College of Chemistry, Oxford-street.

TRENHAM REEKS, Registrar.

MEDICAL PUPIL WANTED.—A General

Practitioner, residing at Islington, of some years' standing, and connected with a Public Institution, requires a well-educated Youth as AN APPRENTICE, who would be allowed attendance during the Term, on Hospital Lectures.—Address MEDICUS, care of Messrs. Preston, Druggists, Smithfield-bars.

BRIGHTON.—A HOME FOR INVALID and

ORPHAN CHILDREN of the Higher Classes, in a superior Mansion in the most delightful and healthy part of Brighton. Only a limited number taken, and from the age of one month to twelve years. A Governess, Nurses, and every suitable accommodation. References permitted to several eminent Medical Men and Clergymen.—Address A. C. L., care of Mr. Wallis, 5, Bartholomews, Brighton.

TRAVELLING or RESIDENT MEDICAL

ATTENDANT.—A Gentleman who has been travelling in Italy during the past Winter with an English Nobleman, wishes for a RE-ENGAGEMENT. He is 30 years of age, highly educated (generally as well as professionally), has been several times on the Continent, and speaks French fluently. Unexceptionable references as to character and ability.—Address M.R.C.S., Mr. C. H. May's, 33, Gracechurch-street, City.

A COMPANION TO AN INVALID who

requires assiduous care and delicate attention.—A Lady is recommended by one to whom her value is well known. Age about 30; has travelled on the Continent.—Address E. B., care of Dr. Rence Jones, 30, Grosvenor-street, Grosvenor-square.

GERMAN, ITALIAN, and FRENCH.—

DR. ALTSCHUL, Member Philological Society, London, Examiner Royal College of Preceptors, gives LESSONS in the above-mentioned LANGUAGES and LITERATURE. Pupils may study TWO Languages in the same Lesson, or alternately, without any addition to their terms.—Chandos-street, Cavendish-square.

Paris, March 15, 1855. Hôtel Brabant.

MR. CURT, of London, ANTIQUARY, &c., will

return to Town in a few days for the Loscombe Sale, with some rare and fine Ancient Medals and Antiquities obtained recently. The Raoul-Rochette, Greppo Coin Sales, and another, will take place during April and May: Mr. Curt will attend them all. Commisars executed, as usual, at ten per cent.—Address (post paid), 15, Lisle-street, Leicester-square, London.

ILLUSTRATIONS.—To AUTHORS, PUB-

LISHERS, &c.—An Artist, of experience in Figure Drawing (possessing originality of thought and capability of design and execution), having some leisure time, would be happy to illustrate Works, either Serious or Comic. Specimens taken to any part of town or in the most convenient manner.—Address W. J. Mr. Abrahams, Bookseller, London-street, Norfolk-square, Hyde Park.

"OUR OWN CORRESPONDENT IN THE CRIMEA."

J. A. CROWE, Esq., Correspondent of the *Illustrated London News*, will deliver a COURSE of THREE LECTURES, on the following Evenings, March 27, 29, and April 3, at the MARLBOROUGH LITERARY INSTITUTION, 17, Edwards-street, Portman-square; being a Narrative of Personal Observations and Adventures in the East and the Crimea, to commence at half-past 6 o'clock. Reserved Seats, 2s.; Area, 1s. To commence at half-past 6 o'clock.

JOHN R. WARREN, Secretary.

MAYALL'S PORTRAIT GALLERIES, 224,

REGENT-STREET, Corner of Argyl-place.

DAGERRETYPE and STEREOSCOPIC MINIATURES

of the highest style of Art, taken daily. Mr. Mayall has proved his mastery over the art by producing photographic portraits of the full size of life ** without the slightest sacrifice of definition, or the smallest approach to distortion;—indeed the errors and peculiarities of former impressions appear to be corrected. Mr. Mayall's portraits represent the high art of the daguerretype; they are as superior to the generality of such pictures as a delicate engraving is to a coarse woodcut.—*Art-Journal*, Nov. 1853. "More pleasing, and far more accurate than the generality of such pictures."—*Times*, July 17, 1854.

A COOK and HOUSEKEEPER to a SINGLE

W. P. Frith, R.A. W. E. Frost, R.A. Sir A. Calcott, R.A.
J. Sant. J. Phillip F. Danby, A.R.A.
G. F. Herring T. Webster, R.A. G. Lance.

May be publicly viewed, Saturday, 31st March, and the 2nd and 3rd of April, and Catalogues had of Messrs. Foster & Son, 57, Pall Mall.

Vulcan Wharf, Earl-street, Blackfriars.

BY MESSRS. FULLER & HORSEY, on TUESDAY, April 10, 1855, at 1 o'clock on the premises as above, without reserve, TWO APPLIETH'S PATENT VICTORIA PRINTING MACHINES, lying at Dartford, where they may be inspected.—The machines were constructed by Messrs. Hall, in a very superior manner on the principle of the patent granted to Mr. Applieath in 1851. The columns are each in a separate chase, and upon one Type Cylinder, half the matter, and they are united in register by the Paper Cylinder, the sheet receiving the impression as it revolves. 9,000 copies per hour may be obtained without any damage to the machines. The machines measure 37½ inches between the bearers, and are about 40 feet in length.

To be seen at Dartford at any time by order, which, with Catalogues, may be had of Messrs. Fuller & Horsey, Billiter-street, City.

Valuable Library, the Property of the late GEORGE FIELD, Esq.

MESSRS. M. ADAMS & SON respectfully give notice, that they will SELL by AUCTION, on the premises, Syon Hill Park Cottage, Isleworth, on TUESDAY, April 17th, and two following days, commencing at 1 o'clock precisely on each day, the VALUABLE LIBRARY, comprising nearly 5,000 Volumes, all in good condition, and embracing the highest authorities in History, Science, and Art, among which are many Reliques of great Interest and Antiquity, and the highest Artistic Works of Modern Times.

The beautiful COLLECTION of PICTURES and exquisite PRINTS, HOUSEHOLD FURNITURE, PLATE, TINKLETS, PHILOSOPHICAL INSTRUMENTS, and Effects, will be submitted on the several days specified in the general Catalogue. General Catalogues (1s. 6d. each), to admit two persons, but without which no person will be admitted, may be had of Messrs. Adams & Son, Auctioneers and Surveyors, Isleworth; or of Mr. Bernard, Artists' Colourman, 339, Oxford-street, London; or of James Adams, 104, Upper North-street, Brighton; or the same may be transmitted by post, on enclosing 24 postage stamps to Messrs. Adams & Son, Isleworth, near London.

The Public View will commence on THURSDAY, April 12, and continue the two following days, from 10 o'clock A.M. till 5 P.M., when it will finally close.

The beautiful Collection of Pictures, and the remaining Stock of Incomparable Colours, of the late GEORGE FIELD, Esq.

MESSRS. ADAMS & SON respectfully announce that they will SELL by AUCTION on the premises, Syon Hill Park Cottage, Isleworth, on TUESDAY, the 22nd day of April, commencing at 1 o'clock precisely, the BEAUTIFUL COLLECTION of PICTURES, by the most eminent and English Masters, the researches of half a century devoted to the Improvement and Encouragement of the Arts, by the late highly talented GEORGE FIELD, Esq., among which are the distinguished names of Correggio, Albano, Salvator Rosa, Wernier, Murillo, Teniers, Sir J. Reynolds, R. Wilson, Constable, Gainsborough, Morland, Sir D. Wilkie, Lane, Ety, Coe, and a Noble Composition, in a Dramatic Series, by Luca Giordano, (in a solid Michigan Cabinet), painted for the Convent of Ste-Marie, near Madrid, and worthy a place in the Collection of any Nobleman or Gentleman in the Kingdom.

The remaining Stock of INCOMPARABLE COLOURS, Ultramarines, Carmines, Rubies, &c., will be submitted on MONDAY, April 30th, commencing at 12 o'clock precisely; and THE LIBRARY, comprising almost 5,000 Volumes, and other Effects, will be submitted on the several days specified in the general Catalogue.

General Catalogues (1s. 6d. each), to admit two persons, but without which no person will be admitted, may be had of Messrs. Adams & Son, Auctioneers and Surveyors, Isleworth; or of Mr. Bernard, Artists' Colourman, 339, Oxford-street, London; or of James Adams, 104, Upper North-street, Brighton; and they will be transmitted by post, on enclosing 24 postage stamps to Messrs. Adams & Son, Isleworth, near London.

Separate Catalogues of the Pictures and Colours alone, to admit one person, for the accommodation of Artists and Artists' Colourmen, may be had at 6d. each, to be returned to purchasers. The Public View will commence on THURSDAY, April 12, and continue the two following days, from 10 o'clock A.M. till 5 P.M., when it will finally close.

A Consignment from Java of the Natural Productions of that Island.

MR. J. C. STEVENS will SELL by AUCTION, at his Great Room, 38, King-street, Covent-garden, on FRIDAY, March 30, at 12 for 1 o'clock precisely, A MUSEUM, comprising the Natural History of Java. It includes fine specimens of the Leopard, Tiger, Antelope, &c.—Heads of the Wild Bull, Rhinoceros, and many others—and a great variety of the Monkey Tribe and smaller Animals of the Country. Birds of various species, Reptiles, groups of Madrepore and Fungi for Grotto Work, Shells, Minerals, &c.—also, a Collection of Antiquities, Coins, Weapons, &c.

May be viewed the day prior and morning of Sale, and Catalogues had.

Library of elegantly bound Books of the late Mr. POLWARTH.

PUTTICK & SIMPSON, Auctioneers of Literary Property, will SELL by AUCTION, at their Great Room, 191, Piccadilly, on MONDAY, March 26, and three following days, the LIBRARY of the late Mr. POLWARTH, of Fimble, mostly consisting of Books in elegant and tasteful binding, including the separate and collected Works of the best English Authors—some choice Books of Prints, which have been carefully selected to obtain the best Impressions of the Plates—Picture and Portrait Galleries—Sceneries—Voyages and Travels—also a few choice Prints, Drawings and Autographs.

May be viewed, and Catalogues had.

Autograph Letters.

PUTTICK & SIMPSON, Auctioneers of Literary Property, will SELL by AUCTION, at their Great Room, 191, Piccadilly, on SATURDAY, March 31 (postponed from March 28), a COLLECTION of interesting AUTOGRAPH LETTERS, comprising those of Royal and Noble Personages, Literary Characters, &c.—several letters of James Boswell, his family and connexions.

MESSRS. LOW & SON have the pleasure of announcing

FOR IMMEDIATE PUBLICATION DURING THE MONTH,

THE RECENTLY-DISCOVERED ROMANCE AT PARIS.

MOREDUN: A TALE OF 1210. BY W. S.

3 vols. post 8vo. 31s. 6d.

*** The authorship of this tale is steadily maintained by the proprietor to be Sir Walter Scott's.

AND

TWO NEW BOOKS by Mrs. HARRIET BEECHER STOWE.

I.
Tales and Sketches of New England Life;

Including, with new Tales, a selection of her most favourite Sketches in the 'Mayflower' and other Miscellanies. Rewritten and revised.

*** Anticipating a large demand for this interesting volume, the two cheap editions will be published simultaneously with the American edition, in order to secure the market for the Author.

Fcap. limp cloth..... One Shilling.
Ditto, better paper, cloth extra, 2s. 6d.

THEY HAVE ALSO READY THIS DAY—

II.
THE HISTORY of the WAR, from its ORIGIN to the END of 1854.
By GEORGE FOWLER. Second Edition. 1 vol fcap. cloth, with Two authentic Maps, 2s.

III.
OUR WORLD; or, THE DEMOCRAT'S RULE. A NOVEL.
With Illustrations by the Author. 2 vols. post 8vo. cloth, 16s.

IV.
THE PHYSICAL GEOGRAPHY of the SEA.

By M. F. MAURY, Lieut. U.S. Navy. With illustrative Charts and Diagrams. 8vo. cloth, 8s. 6d.
"Under this title will be included a philosophical account of the winds and currents of the sea; of the circulation of the atmosphere and ocean; of the temperature and depth of the sea; of the wonders that are hidden in its depths; and of the phenomena that display themselves at its surface. In short, I shall treat of the economy of the sea and of its adaptations—of its salts, its waters, its climates, its inhabitants, and of whatever there may be of general interest in its commercial uses or industrial pursuits; for all such things pertain to its PHYSICAL GEOGRAPHY."—Extract from Preface.

V.
THE BRITISH CATALOGUE of BOOKS published during 1854; with the Size, Price, Author's and Publisher's Name, and Month of Publication. With an Index to the Titles, arranged on a new principle. 8vo. 3s. 6d.

BENTLEY'S MONTHLY VOLUMES.

JESSE'S MEMOIRS of the COURT of ENGLAND UNDER THE STUARTS, is now complete, in 3 vols. crown 8vo. with Illustrations, 12s.

Times.—"Without it no Library in the Kingdom can be called complete."

BENTLEY'S MONTHLY VOLUMES.—"The appearance of this graceful Work, Mr. Jesse's 'Court of England,' marks a new epoch in literary enterprise. It remained for Mr. Bentley to push the system of cheap literature a step further than it has been carried, and to give to the public month after month a series of high class works, the copyright works of living authors, many of which will live as long as the language, at a price which is now given for many a bulky periodical. We tender our best thanks to Mr. Bentley for the enterprising spirit in which he has commenced this series of Monthly Volumes, and we heartily wish him every success."—*Morning Chronicle*.

BENTLEY'S MONTHLY VOLUMES.—"Under the appellation of Bentley's Monthly Volumes, the enterprising publisher of New Burlington-street has commenced the issue, in a cheap form, of a collection of standard works. The volumes are handsomely printed, and sold at a price which will bring them within reach of a large class of readers. The undertaking is inaugurated by that clever piece of anecdotal history, 'The Court of England under the Stuarts,' by Mr. Jesse. Mr. Bentley could not have commenced his series more happily than with a work which is so rich in material not accessible to the ordinary student."—*Daily News*.

BENTLEY'S MONTHLY VOLUMES.—"Mr. Jesse's 'Memoirs of the Court of England' is the commencement of a new series, in which Mr. Bentley very liberally and wisely undertakes to present a selection of the best and most interesting of those works of which he holds the copyright, in the form that will be most acceptable to the main body of book buyers. The series will be a fair and popular presentation to the public of the most valuable part of Mr. Bentley's copyrights, and in one of those undertakings for which it is to the interest of the public to insure success by the heartiness of its support."—*Examiner*.

BENTLEY'S MONTHLY VOLUMES.—"A series well fitted to the wants of the day."—*Eclectic Review*.

BENTLEY'S MONTHLY VOLUMES.—"Can scarcely fail to command the approval of the public. It redeems the promise held forth in the Prospectus, that the volumes will be published in a portable and handsome form, with all the advantages of beautiful typography, superior paper, and elegant binding."—*Morning Post*.

*** 'The Court of England,' by Mr. Jesse, will be followed by Kaye's 'History of the War in Afghanistan,' in 3 vols.

NEW WORKS PUBLISHED THIS DAY.

London: RICHARD BENTLEY, New Burlington-street,

(Publisher in Ordinary to Her Majesty.)

13, GREAT MARLBOROUGH-STREET.
HURST & BLACKETT,
Successors to Mr. Colburn,
HAVE JUST PUBLISHED
THE FOLLOWING NEW WORKS.

SAM SLICK'S NEW WORK, 'NATURE and HUMAN NATURE.'

2 vols.

From the *Athenæum*.

"We enjoy our old friend's company with unabated relish. These two new volumes, like their predecessors, are a rattling, random miscellany of proverbs, sharp sayings, stories, and hard hits. They are full of fun and fancy."

From the *Examiner*.

"These volumes are full of merry stories, told in Mr. Slick's peculiar vein. Every page of the book is amusing."

From the *Observer*.

"Since Sam Slick's first work he has written nothing so fresh, racy, and genuinely humorous as this. Every line of it tells, some way or other—instructively, satirically, jocosely, or wittily. Admiration at Sam's mature talents, and laughter at his droll yarns, constantly alternate as with unhalting avidity we peruse these last volumes of his. They consist of twenty-five chapters, each containing a tale, a sketch, or an adventure. In every one of them the Clock-maker proves himself the fastest time-killer agoing."

The MOSLEM and the CHRIS-
TIAN; or, ADVENTURES in the EAST. By SADYK PASHA. Revised, with Original Notes, by COLONEL SZYRMA, Editor of 'Revelations of Siberia.' 3 vols.

"Sadyk Pasha, the author of this work, is a Pole of noble birth. He is now commander of the Turkish Cossacks—a corps organized by himself. The volumes on the 'Moslem and the Christian,' partly fact and partly fiction, written by him, and translated by Colonel Szyrma, display very well the literary spirit of the soldier. They are full of the adventures and emotions that belong to love and war; they treat of the present time; they introduce many existing people, and have the Danubian Principalities for scene of action. Here are sources of popularity which the book fairly claims. As a translation it is excellent."—*Examiner*.

"In every respect a remarkable book."—*Messenger*.

"The work possesses an unusual degree of interest."—*John Bull*.

TURKEY; its HISTORY and

PROGRESS: from the JOURNALS of SIR JAMES PORTER, Fifteen Years Ambassador at Constantinople; continued to the Present Time, by his Grandson, SIR GEORGE LARENT, Bart., &c. 2 vols. 8vo. with Illustrations, 30s.

"These volumes are of an authentic character and enduring interest."—*Athenæum*.

TROPICAL SKETCHES; or, Re-

MINISCENCES of an INDIAN JOURNALIST. By W. KNIGHTON, Author of 'Forest Life in Ceylon.' 2 vols. 21s.

THE ROMANCE of the FORUM;

or, Narratives, Scenes, and Anecdotes from Courts of Justice. SECOND SERIES. By PETER BURKE, Esq. 2 vols. 21s.

THE NEW NOVELS.

CONSTANCE HERBERT. By GERALDINE E. JEWSBURY, Author of 'Marian Withers,' 'Zoe,' &c. 3 vols.

MAMMON; or, the Hardships of
an HERESIS. By Mrs. GORE. 3 vols.

"We prefer 'Mammon' to either of the other novels which Mrs. Gore has given to the public since her re-appearance in print."—*Athenæum*.

THE WIFE'S TRIALS.

3 vols.

OAKLEIGH MASCOTT. By

L. HOWE. Dedicated to Prof. Aytoun. 2 vols. 21s.
"A very clever romance. The style throughout is fluent and forcible, and many of the scenes are sketched with considerable graphic power."—*Morning Post*.

THE CURATE of OVERTON.

3 vols.

"The startling secession of such men as Newman, Manning and Wilberforce, render the revelations which the author has made in these interesting and instructive volumes extremely well timed."—*Britannia*.

NEW WORKS.

London: LONGMAN, BROWN, GREEN, and LONGMAN'S.

LONDON, SATURDAY, MARCH 24, 1855.

REVIEWS

Autobiography of James Silk Buckingham; including his Voyages, Travels, Adventures, Speculations, Successes, and Failures, faithfully and frankly narrated: interspersed with Characteristic Sketches of Public Men with whom he has had intercourse, during a period of more than Fifty Years. Vols. I. and II. Longman & Co.

"I have just read Milton's *Paradise Lost*," said a poetical student to a mathematician. "Very well," rejoined the latter, "what does it prove?"—We do not know if this anecdote was in Mr. Buckingham's mind when he determined to deliver to the world his *Autobiography*, but he certainly determined that his book should *prove* something. The object of it appears to be, to convince the reader that the author has been throughout life blameless. He pleasantly defies censure as applicable to him. "Let the galled jade wince, my withers are unwrung," should have been the device on his title-page. His introductory chapter is so unaffectedly complacent upon his merits as to challenge nothing worse by way of reproof than a smile. It reminds us of the Irish Peer who declared, on his death-bed, that he had nothing to reproach himself with, as he had never in his life denied himself anything. Mr. Buckingham stands before the public tribunal like the Egyptian soul at the bar of judgment, beginning a long catalogue of justificatory pleas by the assertion of being guiltless of all wrong. Mr. Buckingham's pleas, however, are entered with so much amiability that no one can be offended at them. His book will, doubtless, as he says, "surprise many," while it may possibly "entertain, not a few."

Sixty-nine years ago, A.D. 1786, the autobiographer was born in the marine village of Flushing, near Falmouth. His father was a seafaring man, who left the merchant service to keep a farm; and of his ancestors, one was an officer who helped to destroy the Spanish Armada,—and another, undistinguished in any other way, went down in the Thunderer man-of-war.

A career of distinction Mr. Buckingham appears to have commenced early. He could hardly have been out of frocks when he quelled a desperate bread-riot by "giving out" one of Wesley's hymns, which the mob joined him in singing. Single figures still denoted the total of his years when he was appointed colonel of a juvenile militia regiment! He had not yet got beyond them when he nearly had his head blown off in a pious attempt to destroy the effigy of Tom Paine, or Robespierre, by gunpowder;—and at his godfather's funeral, the little man was the only individual who did not get drunk. At seven he "could handle a boat under sail without the assistance of any one"; and the model boy of Flushing performed wonderful nautical feats in his "fast yawl," to the "surprise and admiration" of veteran tars, every day, "except Sundays." He admits, however, having been once "capsized,"—not by his own fault, but by a heavy squall! The clever lad had his eyes about him as he went down. Had he been left a minute longer at the bottom this *Autobiography* had never been written. As it was, he was rescued in time to give us a very detailed account of how the water looked as he descended through it. He appears to have gone to the bottom with as much self-possession as the gentleman in the sack in 'Monte Christo.'

He had now lost his father; and by his re-

maining parent he was sent to school at Falmouth. Here his Book of Problems, containing also his sums worked out by logarithms, "was admired as the neatest and most perfect in the class." He had for schoolfellows Henry and Phillip Melvill,—the former the present "Golden Lecturer" in the City. Of these two, he says, "they were amongst the most devout and orderly of all the pupils." When we are subsequently told that Master Buckingham "saved up his pence for poor people, and felt intense pleasure in bestowing them,"—that he had "ever been a diligent reader of the Old and New Testament, but especially the latter,"—and further, that he had "very early manifestations of the devotional spirit,"—we learn of what other boy the "devout and orderly" portion of the class was made up.

His good mother,—of whom he gives a most charming portrait, and who must have been a truly "loveable woman,"—would fain have had him take a berth in the good ship *Church Establishment*; but Master James was determined (he had now arrived at the mature age of nine years) to have a sweetheart, and go to sea. Accordingly, he qualified himself for the former by writing love-letters for his mother's servants; he then procured an "object" of his own, and having almost broken his heart at her early death, he went forthwith to sea, where the young gentleman in certain arts of sharp seamanship—he "may say it without arrogance"—took his place as "senior wrangler."

On board the *Lady Harriett* the author made a voyage to Lisbon,—indeed, he made three voyages. He was roughly treated, on purpose to disgust him with the sea,—but all in vain. The lad "would be a sailor"; and among the results of his trip, he learned that at Lisbon the Court was highly immoral, and that the most disreputable of places were kept open under the most sacred of signs. Iniquity is censurable any and everywhere; but it appears to have struck this precocious little boy that iniquity in the "Alley of the Sacred Heart," or under the "Piazza of the Holy Sacrament," was iniquity with blasphemy at the end of it. Perhaps he was right;—but how came one not yet in his teens to know so much about it?

During his third voyage the ship was captured by the French, and he was taken on board their vessel. Water ran short, but in the following manner it was so distributed to the prisoners, that if they did not get all they wanted, they procured all they cared for, with the means and appliances with which they were provided.—

"For the prisoners, a water-butt was placed before the mainmast, on its bilge, or lying athwart the deck. Into the bung-hole of this cask was inserted a long musket-barrel, with its muzzle at the bottom resting in the muddy deposit, which is sure to accumulate in all ships' water-casks that are stationary or at rest. The touch-hole of the musket-barrel was about three inches above or outside the bung-hole; and over this was a metal cap, secured by a padlock. The key of the padlock was placed in a small but secure iron box at the maintop mast-head, attached to the cross-trees. Every prisoner, therefore, who wanted to drink, had first to go to the mast-head to get the key; then, after unlocking the cap over the gun-barrel, to suck as much moisture as he could, the first half-dozen mouthfuls being as much mud as water; and when he had slaked his thirst by the thin thread of water he could suck up through the touch-hole, he had to relock the cap, and take the key to the mast-head, there to be deposited for the next comer; and severe punishment was threatened to any one who passed the key on to another without taking it to the mast-head as ordered. The result of this ingenious arrangement was, that no one ever went aloft for the key till he was so parched with thirst as to find it unendurable, while the mud-diness of the deposit, and the extreme fatigue to the

lungs and mouth in drawing up water through such a tube as a gun-barrel, soon tired the drinker and obliged him to desist."

The prisoners were landed in Spain, where they were detained in captivity. The gaoler's daughter, of course, was seized with a "violent passion" for the English boy, and the couple, who could not reckon above a score of years between them, certainly made as much of their time as older people might have done. Ultimately, the captives were liberated, and sent to Portugal, on their way home. The journey, performed on foot, is graphically and touchingly narrated; it is one of the best passages in the book. The story which follows, of the savage impressment of the unhappy merchant sailors, includes a detail which is almost enough to make one ashamed of one's country.

The author contrived to escape the gang, to reach England, and to quietly locate himself for three or four years with a bookseller and nautical-instrument maker, at Devonport. The incidents of seaport life in war-time are admirably told,—but we must keep to the personal narrative. From this we learn, that young Buckingham, now in his teens, wrote a tragedy, called the 'Conquest of Circassia,' and soon after became so shocked at this sinful waste of his time, that he took to profound reflection, enveloped himself in religious horrors, became a professed Calvinist, and was publicly dipped as a Baptist, turned preacher, and at length became so perplexed with the doctrine of election, that he set off to sea again in a king's ship, in order to recover his senses.

But here he was so disgusted with the sanguinary brutalities and demoniacal conduct of all around him, that he incontinently *deserted*;—and he is not ashamed to say so. His friends persuaded him, on his return among them, to try the Law. He consented, but finding the lawyers nearer akin to the Devil than even the sailors, he abandoned that calling also. He became an idle man, and, of course, fell into mischief. "Love at first sight" was his doom before he was out of his teens; and he was fairly married before he was twenty.

His mother had lately died, and he now succeeded to his share of the paternal property. It was considerable, and was in the hands of trustees. In haste to "settle," young Buckingham opened a shop in the book and nautical-instrument line, on borrowed money,—his own inheritance not yet being available. Before that time arrived, one of his trustees had defrauded him of the money, and the young couple were totally destitute, and burdened with debts and a baby.

At the end of the chapter with this melancholy conclusion, Mr. Buckingham has six lines of most positive, absolute, and not-to-be-gained *Italics*,—wherein he maintains that this, the first of his great misfortunes, was brought about *entirely* by the misconduct of others, and without *any* fault of his own. Against this assertion we protest altogether. Had he been more constant to any one pursuit; had he settled down to the law, of which, of course, he would have been the only honest professor in England; and, *above all*, had he not begun life on borrowed money, the ruin would not have fallen upon him. It was the impatience that induced him to set up on credit which opened the way to his being defrauded by his trustee. We must decline to receive his plea to the contrary.

What may be called the heroic portion of Mr. Buckingham's life begins from this period. Resolved to go to sea again, and hoping to find an eligible situation under his wife's brother, captain of a West Indiaman, he came up to

London, where he endured misery and disappointment like a man. In the midst of it all, we smile to find him entering the "British Forum" (where the once famous Gale Jones was arguing in favour of celibacy), and carrying the debate against that practised and professional orator, in favour of married life. In the mean time, he waited for a ship, and when not very far from starvation, he obtained employment as a printer, was very ill paid, but out of his fourteen shillings a week he contrived to send five to his wife. His associates of the "chapel" were too dissolute to be to his taste, and he was comparatively happy when he exchanged employment in London for a post at the Clarendon Press, in Oxford. In connexion with this period he tells us the following story.—

"While working at the Clarendon Printing Office, a story was current among the men, and generally believed to be authentic, to the following effect. Some of the gay young students of the University who loved a practical joke, had made themselves sufficiently familiar with the manner in which the types are fixed in certain forms and laid on the press, and with the mode of opening such forms for corrections when required; and when the sheet containing the Marriage Service was about to be worked off, as finally corrected, they unlocked the form, took out a single letter, *v*, and substituted in its place the letter *k*,—thus converting the word *live* into *like*. The result was, that when the sheets were printed, that part of the service which rendered the bond irrevocable, was so changed as to make it easily dissolved—as the altered passage now read as follows:—the minister asking the bridegroom, 'Wilt thou have this woman to thy wedded wife, to live together after God's ordinance in the holy state of matrimony? Wilt thou love her, comfort her, honour, and keep her in sickness and in health; and, forsaking all other, keep thee only unto her, so long as ye both shall *like*?'—To which the man shall answer, 'I will.'" The same change was made in the question put to the bride."

In due time, the printer obtained an appointment on board the William Fenning, West Indian, as "Chief Officer,"—and before sailing he addressed some lines to Mrs. Buckingham, "written amidst the conflicting feelings of the present and painful apprehensions of the future," which state of mind may excuse his making "ocean" rhyme to "bosom." Indeed, we will take this opportunity of saying that all the poetry in these volumes, and there is more than enough, is execrable. The best, perhaps, is a song ('Starboard Watch, ahoy!') which the author wrote when he was fast asleep. He is the only lyricist who has written a song under similar circumstances; but we are surprised at nothing from a man who has read 'Telemachus' through three times and survived to tell it.

As chief officer, or captain, Mr. Buckingham made various voyages to the West Indies, and nothing can well be more agreeable than the way in which he narrates the incidents. The account, too, of the books he contrived to read amid his heavy and multifarious duties should be studied by those who read little because they fancy they have no time: Mr. Buckingham will show them how it may be made. Leaving this to whom it may concern, we turn to something more stirring, the "Devil in the Main-top,"—an incident which Tschudi cannot excel in any of his eagle stories in the 'Alpenwelt.'—

"One of the maintop-men of the watch on deck, who had stationed himself in the top, to be ready for whatever might be required there, and had rolled himself up in one of the top-gallant studding sails, called out with a lusty voice, 'On deck, there! the Devil's in the main-top. Send up some hands to seize him!' As I was still on deck myself, I at first thought that the man must be drunk; but he had never been addicted to drinking, and then I thought it must be a hoax; so I called out, 'Main-top, there! none of your jokes, if you please, but mind

your duty.' The man, recognising my voice, replied, 'It's no joke, Captain, I assure you; but the real Devil, as sure as this ship's the *Surrey*; so send the hands up, or I shall be carried off by him.' At the same time we heard in the top a flapping of wings, a hoarse screaming or screeching, and could see, through the dim light of a moonless atmosphere, the sail in which the man was enveloped rising and falling, and he stoutly combating what we thought must be a phantom, but which turned out to be a solid reality. In the mean time the boatswain's mate, without orders, had gone to the fore-hatchway, and shouted out, after piping with his call, 'All hands to catch the devil, ahoy! tumble up, there; tumble up, my hearties!' In a few minutes all hands were on deck; and on the main-shrouds on both sides, about a dozen men hastened to the rescue of their shipmate from the claws of Satan, and the capture of the Prince of Darkness himself if possible. On their reaching the main-top, one man was struck so forcibly by one of the wings of the unknown assailant, that he fell on deck, and was much hurt by the fall; another was almost blinded by a similar stroke on his face; and all that could be made out for some minutes was, that there was a great feathered monster, with claws, beak, and wings, combating with all his might the original occupant of the top, who, though bleeding at several points, stood his ground manfully. At length, by the aid of the studding-sail, in which they enveloped the monster, and the studding-sail sheets, with which they lashed his legs together, they secured him for the remainder of the night, and all again retired to rest. At daylight, intense curiosity was manifested to be present at the uncovering of the mysterious creature; so that all hands were again on deck, when he was lowered down from the top, enveloped in the canvas which had secured him, and turned out to be a magnificent osprey, or sea-eagle. It stood at least five feet high, and its extreme breadth from the tips of its expanded wings were at least eight feet. It had a noble head, beautiful eyes, with several rings of different bright colours encircling the pupil, a strong hooked beak, thick and strong legs, large talons or claws, a richly speckled brown back of feathers, and white breast and belly. Deeming it a prize worthy of preservation, and presentation to some ornithological collection, I wished to secure it for the remainder of the voyage, and while the carpenter was preparing a cage or house for it, it was fastened by the leg with a strong rattling-line to the ring-bolt of the spanker boom, just abaft the tiller, with a range of about three fathoms of line for the freedom of its movements. His first exploit was to pounce upon a stray duck who had wandered from her coop, into which he transfixed his talons, and devoured it alive, with apparent satisfaction. We subsequently fed it with the offal of poultry used for the table, and such supplies of fish and animal food as we could command, of which it ate voraciously. On the third day after its capture, and when we were near to New Providence, we were caught in a sudden squall, and it became necessary to take in the spanker, when one of the sailors approaching the bird too closely, as he was engaged in hauling in the boom sheet, the eagle plunged his strong beak into the naked calf of the man's leg, his trousers being turned up, as the deck was full of water from the heavy squall of rain, and drew out of it a solid mass of flesh of several ounces, so as to disable the man probably for life; and the sailor, naturally enraged at this attack, took out his knife, cut the lanyard by which the bird was secured, and it flew aloft into the air with exulting screams of triumph."

All his sea-story is well told;—the storms and sea-fights especially are well discussed. The author must have been an inimitable sailor, and he was a "genteel" one at a period when refinement, even among captains, was not much cultivated. Afloat, Mr. Buckingham was never vulgar, and at parties on shore, as he modestly remarks, "I found myself always a welcome addition to what was called the 'ladies' circle.'" The gentlemen's circle was assuredly not a tempting one. Here is a dinner-scene fifty years since.—

"Among other literary men present, was the Rev. Mr. Maurice, Assistant Librarian of the British

Museum, chiefly known to the world as the author of a splendid and elaborate work in quarto, on the Mythology of the Hindoos, which then enjoyed the highest reputation; but the subsequent researches of more learned and accurate Oriental scholars since his day have detected in it many errors and fallacies. As the party consisted wholly of gentlemen, there was no restraint in the use of wine, or the topics of conversation; and I was surprised to find, that in the depth of their potations, these literati, of whom I had ignorantly expected an exhibition of the temperance of Seneca and the wisdom of Socrates, exceeded the regimental mess of the West Indies, and thought three bottles of strong port wine per man a very moderate allowance.—quoting Pitt, Fox, and Sheridan as six-bottle men in their day and generation. The conversation was coarse and obscene to a degree that no naval or military man would tolerate; and I longed for the hour of rising to escape from such an atmosphere. The termination of the entertainment was in harmony with its general character. The reverend and learned Orientalist of the British Museum became insensibly drunk, by taking glasses of brandy at intervals between his port wine, and at length fell helpless and insensible underneath the table. His grey hairs, his literary reputation, and his reverend character made this one of the most painful scenes I had witnessed for some time; but the rest of the party regarded it with indifference. His servant was called, and by his aid the apparently lifeless body was carried down stairs, put into a hackney coach, and driven to his lodgings: this being, as I was afterwards assured, the almost uniform concluding scene, whenever the reverend and learned gentleman dined out. Such was life in London, in some circles at least, between forty and fifty years since."

Mr. Buckingham found that when questions came on between ship-owners and ship-insurers the captains had little chance of keeping their ground profitably, unless they lied for the benefit of the owners. Declining to do this, he shifted his ship, went to the Mediterranean, endured fortune and misfortune, sometimes with his wife and child, sometimes alone. He designed to settle at Malta, but the plague and other troubles overthrew his projects. He went to the East, saw something of its "havoc and its glory," encountered the thieves and terrors of the Desert, and finally found his way to India. This was at a time when no *Englishman* could reside there without a licence, and as Mr. Buckingham had none, and refused to adopt a suggestion which was made to him, he says, by Sir Evan Nepean, to call himself an American, he was sent out of the country. These Eastern details occupy the second volume, and they make of it rather a book of travels than a purely personal narrative, such as we expect an autobiography to be. In the latter we do not require extracts from Lemprière, ancient history, dissertations on not very interesting questions, and pages from Herodotus. Amid it all, however, there is a thread of personal narrative which is amusing, and from its details we will gather one or two extracts as sample of what remains behind.—

"Capt. Light accompanied me on another occasion into the heart of one of the villages in Egypt, somewhat removed from the banks of the Nile, and where probably no persons in European costume had ever before been seen, for it was quite out of the high road of travel and traffic. As the captain was short-sighted, he always wore spectacles; and at his appearance we observed, that instead of running away, which was the usual course of the women especially, when strange men appeared among them, they stood bolt upright with their legs as close together as they could put them; and with both arms extended downwards, holding fast their garments as if afraid they would fly upward. We did not at first comprehend the meaning of this: but on inquiring we found that some one in the village had once looked through an English night-glass or sea-telescope, which reverses the objects seen through it, or turns them upside down; and had proclaimed to the women that the

Frank had put on these spectacles for the express purpose of reversing their figures. Not supposing the possibility, therefore, of such a reversal as that of their being turned upside down could possibly happen without the inevitable consequence of their clothes falling over their heads * * they did their best to prevent this, by the attitude they assumed, and the fast hold they took of their garments."

Here is an incident which we recommend to the Propagation of the Gospel Society. It is rather suggestive.—

"On the subject of imperfect translation, we heard, while at Jedda, that Araby Jellany had received some copies of the Arabic translation of the Hebrew and Greek Scriptures from the agent of the Bible Society at Bombay, to have them put into circulation at Mecca; but the imperfection of the translation had produced the most unfavourable effects, as they were quoted in the coffee-houses as proofs of the ignorance of the authors or translators. One passage of the New Testament, I specially remember,—one of the sayings of Our Lord himself: 'Judge not, that ye be not judged,' was translated thus: 'Be not just to others, lest others should be just to you'; and many passages equally remote from their original meaning besides."

We very much fear that such errors are not so rare as they should be. If so, some of the wondering readers beyond the ocean must be inclined to exclaim, as Challcuchima did at the stake, when Father Valverde was most illogically boring and burning him, that "Incomprehensible is the religion of the white man!"

We have said that this Autobiography is confessedly written to show the faultlessness of the author,—to prove that he has merited all good fortune which has fallen to him, and that when he has been visited by adversity it has been through the fault of some one else. In this respect the volumes are divided into three parts. The first concludes with the ruin which followed hard upon Mr. Buckingham's marriage. We have noticed his plea on this occasion. The second ends with his ruin at Malta, for which he declares himself, in long italics, entirely irresponsible. We find here, however, as before, that the ruin would have been less in degree if the author had not taken out goods with him, *on credit*, for which he could not find a market. We, of course, know the customs of commerce; but of all its customs there is none so abused as this one of buying on credit with mere hope, and no degree of certainty whatever, of being able to pay out of certain possible profits that—may not be realized. The Spanish proverb says that a man should not bet upon the sun before sunrise. If he does, and a cloudy morning ushers in the dawn, he must not blame the clouds, but himself, for the loss of his money. We must, therefore, disallow the author's second plea, as we declined to entertain the first. The third plea we accept. The losses which accrued to the author on his first ejection from India, after refusing to remain there by power of a lie, declaring himself to be an American, were the consequences of a cruel oppression.

Selections from the Records of the Government of India.—No. VI. *General Report on the Administration of the Punjab Territories for the Years 1851 to 1853.* Calcutta, Gazette Office.

WE have here not only one of the most gratifying, but one of the most important, documents issued for many years from the Government press at Calcutta. It is a supplement to that able Report on the general administration of the Punjab which was noticed by the *Athenæum* last year [No. 1390]. But it now appears at a peculiarly fitting time. The question of the day is, where is the best school for public servants? That is an inquiry not likely to be

answered yet; but if we were asked to indicate a volume for every member of the civil service, in and out of India, to study, we would point to this sequel to the general Report on the Punjab. Here is a narrative of confusion reduced to order, of danger exchanged for security, of insolvency turned to riches,—of a conquered state, blazing with intestine feuds, and devoured by military brigands, consolidated into a happy province, inhabited by a people who exult in their regular laws and in their new-born peace. One "system" has given way to another, and the revolution has been effected, in spite of departments, despatches, and functionaries, by three well-educated civilians, trained to their task, with Mr. John Lawrence at their head. This excellent administrator has to report a condition of things in the Punjab which testifies to his extraordinary abilities as well as to his diligence and zeal. He explains the difference between the original and the supplementary Reports. The first was one of design, promise, and commencement; the second of performance, of progress, and of results. During the former period the country was still the Punjab of Runjeet Singh and his successors. It is now becoming the Punjab of British India. The feudal orders, on which the lion prince reposed as on the pillars of his throne, are decaying,—“their gaudy retinues have disappeared; their city residences are less gay with equipages and visitors; their country seats and villas are comparatively neglected.” Nevertheless, they still live in ease, the proudest figures in processions, the most pompous attendants of the Durbar; but their sons are receiving English culture and seeking Government employ. The generation of idlers connected with this emaciated aristocracy, the mace-bearers, soothsayers, physicians, musicians, and chamberlains, have all been liberally placed on the pension-roll; their splendours, bought with the first-fruits of the exhausted land, are gone, but their substantial comforts have not been taken away.

Nor has the priestly class been injured. Its holy places have been respected; it retains sufficiently large endowments; its friars and ascetics still possess their petty land tenures; it is kept in content while it passes away. As for the military order, which was as a thunder-cloud, ever ready to burst on the frontiers of India, it is being gradually absorbed into the mass of society. The fiercer soldiers bear arms on the Indus in the west, and on the Irawaddy in the east; but the majority have returned to agriculture, and await in Manjha or Malwa, the opening of the new canal. Both “the Sikh faith and ecclesiastical polity are going whither the Sikh political ascendancy has already gone.” The warlike party, the Khalsa, is dying out; the pacific creed of the Hindús regains its votaries; the power of the old order of extortionate collectors is on the wane, and the prosperity of the herdsmen, yeomen, and cultivators increases. No longer liable to tyranny and pillage from their landlords, the peasants apply their full energies to industry; and the curious class of village bankers feels a proportionate advantage. Through the progress of cantonments, and of gigantic public works, the artisans and labourers are flourishing beyond all precedent,—the miscellaneous population, the floating tide of life in all great Eastern cities, is less squalid than before,—native manufactures are in great demand,—trade extends, the political cities decay, the commercial cities regain their traditional importance; and, to sum up, while the nobles, by a slow and benevolent process, are becoming extinct, the body of the people attains every year to new fortunes and prospects. In civil and criminal justice, much progress is reported,—as well as in economical

schemes for the advancement of industry, the construction of roads, bridges, and viaducts, the excavation of canals, the erection of caravanserais, the founding of dispensaries and schools, the improvement of cattle-breeds, the planting of woods, and the supervision of finance. In some of these respects the Punjab excels Indian provinces that have been much longer under British sway. We point to these admirable results in order that the value of the Government Report, as an administrative study, may be appreciated.

Constance Herbert. By Geraldine E. Jewsbury. 3 vols. Hurst & Blackett.

DUTY is an old theme with the moralist and the preacher. At first thought, a sermon on an abstract merit—a story in illustration of a rule of life—may not seem very attractive to the worn reader or the idle man in search of an excitement. But all themes are alike to the true artist. Granted the wizard's gift—the power to stir emotion, to arouse the sense, to hold the blood in check,—and the barren waste shall be quickened into life, the shadiest spot shall flush like a rose-garden, as the spell works and the enchanter wills. “Constance Herbert,” the new homily on “Duty,” is a poem in its beauty and its lofty purpose—a romance in its variety and its fascination.

Miss Jewsbury began her career as romancer with ‘Zoe,’—an original and daring tale, through which a tide of passionate experience seemed to surge and roll, most curious to consider when its source was no other than the heart of a very young girl, to whom such emotions as filled it must have answered to the mere call of a creative instinct.

Ten years have gone since ‘Zoe’ startled the ardent and amazed the stern,—calling forth worship from one and anathema from another; and Time, we infer, has come to Miss Jewsbury, as he comes to all who seek to live an earnest life, with balm and healing on his wings. At least, we find that the romancer who once delighted in bold speech and deep analysis,—in questions which disturb the timid and unnerve the wavering,—has settled down into a sober frame, has grown more reconciled to the world and accepted a serene and chastened view of life. Constance Herbert, the heroine who gives her name to the new novel, is the daughter of parents tainted with mania. Like all heroines, she falls in love, to the great perplexity of her maiden aunt—a figure which moves most gracefully through the story—who feels the doom that lies upon her house, and the fate which denies to the affections of the young heiress the natural outlets. Aunt Margaret takes the enamoured girl to see her maniac mother, without telling her why, or explaining the sad story of her early years until their return to their own house. We shall let Miss Jewsbury give this explanation in her own way.—

“After the tea-things had been removed, and they were left alone, Margaret called Constance to come and sit beside the sofa. Constance brought a footstool, and leaned her head against the sofa cushion. ‘You have been crying, my Constance; what is the matter?’ ‘I don’t know, aunt. I felt so miserable. I suppose it was seeing that poor creature at the red house, for I felt very happy till then. Why did you take me there?’ ‘My Constance, that “poor creature” is your MOTHER,’ said Margaret, in a voice that was choked with agitation. ‘Then it was cruel and abominable to take me without telling me, and I do not believe it,’ cried Constance, vehemently, snatching her hand away from her aunt.—‘But it is indeed true, my child. I would not have taken you had there not been a cause. If, by keeping you in ignorance, I could have saved you from the reality, I would gladly have done so. If I could have taken your burden on myself, I would have

been thankful; but I think you have too noble a courage to shrink from suffering that comes to you direct from your Heavenly Father, and which is not embittered by any fault of your own.'—'You have said more than once that some time you would tell me about my mother, but that you wished to delay what you had to tell me as long as possible. I knew and felt there was some mystery, but I never dreamed of anything so dreadful as this. I wish it were yesterday, and that I knew nothing.'—'My darling! my darling! I hid it until you should have strength to bear, and I would not have told you now had I not been obliged.'—'No one ever had anything like this to bear, and cannot—I shall die.' Constance shuddered violently, and spoke in a sharp quick voice, that sounded strangely unlike her own. Margaret trembled; she knew that the worst part of her task was to come; she put up a mental prayer for strength, and said: 'Think of your father, Constance, and of all the sorrow he has had to bear since he was quite a young man. Your mother was a very lovely young woman; it had been a long attachment, with many obstacles, and on the first anniversary of their marriage he conveyed her to an asylum, hopelessly insane. Dare you complain when he has had to suffer thus? You say no one ever had so much to suffer as you; think of the grief of the friends of that poor young man whose suicide we heard about on the day we left Paris.'—'I wish I had never been born! and many others have cause to wish the same. That is all you mean, I suppose,' she rejoined, sullenly.—'Would you desire to bring such an affliction upon any child of yours, or give them cause to echo the wish you have uttered?'—'Shall I go insane or become an idiot?'—'I hope and pray that it may be kept far from you. I do not fear that for you.'—'For whom, then?'—'You may escape, I believe you will; but with that terrible malady rooted in your family on your father's side, and with this affliction to your mother, there would be no escape, humanly speaking, for any child of yours; it would be an almost certain doom. I appeal to you whether you will transmit this terrible heritage, or whether you will endure your own lot alone, to prevent another being made as wretched as you are at this moment?' Margaret spoke in a clear, solemn voice, that stirred the hearer like the note of a trumpet. Constance covered her face and covered down upon her seat.—'I will tell you a story that made a profound impression upon me. It was in the summer of 1665 (the year of the Great Plague), that a strange and mortal sickness broke out suddenly in the village of Eyam, in the heart of the Derbyshire hills. At first no one could tell what it was; it spread rapidly, and was like nothing that had been seen before. At last it was recollected that the sickness appeared after opening a box of old clothes and woollen goods, which had been sent down from London to the tailor of the village. Then all knew that it was the plague which had come amongst them. The people were mad with fright, and would have fled in all directions. The clergyman, whose name was Mompesson, and his wife, quite a young woman, called all the people together, and explained that they could not escape their own danger by flight, and that they would spread the Plague. He prevailed upon them each one to consent to stop in the village; he and his wife undertook to stay and die with them. Not one left the place; the village was almost entirely depopulated, but the plague was stayed. The clergyman's wife was the last of its victims.'—'All that was heroic. Is it true?'—'Quite so; I can find you the account, and many details of the occurrence. You are not called upon to stand still and die like these poor people.'—'That would be easy. I wish I might die; you would not hear me beg for mercy.'

Poor Constance, strong in her sense of right, and in her high resolutions, has to bear the shock of disappointed passion and cruel remonstrance. She writes to her lover a kindly farewell, stating why she must crush her heart and learn to live alone; but the lover, wayward and impetuous, hastens to her side, believing in the conquering energy of his words and looks. The scene is touching and dramatic.

"It was the tenth day after Constance had de-

spatched her letter that she was sitting in the Lime-tree Walk under one of the trees, like one turned to stone, when a shadow fell before her. A voice said, 'Constance! my Constance!' She looked up, and Phillip Marchmont was at her side! It is said that the pain of returning into life when death has been nearly reached by drowning is intense. The sudden rush of unexpected happiness upon the desolate misery of Constance was, for the moment, a sensation of physical pain. Phillip was as much agitated as herself; all he had thought or felt of a treasonable or disparaging nature came back to him like remorse. The blessed grace of youth asserted itself, and swept away all that was precocious or coxcombical. He felt humility now that he was actually in the presence of Constance; he did homage to her in his heart as his superior. For some moments they neither of them spoke again; Constance could only weep, but her head rested upon his breast, and she wept there. 'Constance! Constance!' said he at last, kissing her head where it lay, 'how could you write me such a letter? how could you give me up so easily?' Constance raised her head, and looked at him. 'Easily, do you say? God grant that you may never know my misery. Phillip, I thought you would have known all I felt. I never fancied that you could mistake me.'—'But, dearest, you refused me, and that did not look like loving me. I was made nearly mad myself. You refused to incur any risk for me. But that is all past now. You are mine, and I am not going to yield you for any scruple.'—'But, Phillip, the reason is not done away with,' said Constance, timidly, in a voice so low it was scarcely to be heard.—'Hush!' replied he, pressing her more closely to him, as though to stifle her words. 'I will hear nothing of all that; you are mine, and I will not let you go. My father says that the reason you gave is all nonsense; and if he does not accept the objection, you have no right to insist upon it. You know how wise my father is. He knows better than you about those things; so, if you persist, it can only be because you do not love me.'—'Oh, Phillip, do not say that!' For an instant a wild hope sprang up in her heart that she had indeed overstrained the obstacle, and that she might accept the dispensation thus offered from the dreadful misery which seemed to stretch like a sunless sky before her to her life's end; but it was only for a moment. She recollected her mother as she had seen her. She thought of the long life of thick darkness which had followed close upon the short happiness of her marriage; and the bitter thought flashed across her that she, Constance, her mother's daughter, was the price that had been paid,—her whole life mortgaged for those few months! The horrible injustice of the penalty entailed upon her revolted her whole soul; but it also caused a reaction from all softening emotions, and braced her up to a stern determination. She recognised the sacrifice as a necessity laid upon her. Just or unjust, she was none the less bound by it. There was no choice left for her; the matter was placed beyond either hope or doubt. At the instant this point was reached in her mind, there flashed across her, as though it were the whisper of a spirit, 'And the plague was stayed.'—'You do not speak, Constance,' said Phillip. 'Why are you so silent? Speak to me; you are not surely holding back?'—'Phillip, I would die to make you happy.'—'But that would just make me more miserable than anything else in the world,' said Phillip, tenderly, kissing her upon her hair and upon her eyes, as she spoke. For a moment longer Constance remained where she was, with her head upon his bosom and his arm clasped round her; then she disengaged herself, and said, in a voice, tremulous at first, but gathering steadiness as she proceeded:—'When I said I would die to make you happy, I meant that I loved you more than life. I love you; never doubt that. I have loved you, and my heart has been filled with the thought of you ever since I first saw you. Oh! Phillip, I must think that you believe I love you! Tell me that you do, because it will be too dreadful if you should think that what I have to say comes from not caring for you.'—'If you consent to marry me, I shall believe you love me, not otherwise. If you are going to bring up that foolish notion again, which I have told you is all nonsense, I shall think you have some concealment from me, and that your heart is quite cold towards

me.'—'Oh! Phillip, be good to me; do not you be cruel and unjust, like everything else in the world. Is it my fault that I was born? can I help what is laid upon me? do I look as though it made me very happy to tell you that I must not marry you? If I were to go mad, I should leave you as miserable as my father is, and perhaps a child to grow up like me. I should have the constant dread of such a doom upon me, and so would you. I should know that I had done a wrong thing, and the thought of that would be like poison in my life. Phillip, I must not marry you, so do not ask me again. It does not depend upon me to consent.'—'Upon whom then does it depend? upon that wise, cold aunt of yours, who hates me, and who has set you against me?' said Phillip, fiercely.—'On no person—on no one's consent; no human being can do away with the barrier that separates us, and I dare not overstep it.'—'If I am willing to run the risk, surely you need not urge the objection. Why not say at once that you do not love me enough to incur the chance of an uncertain danger?'—'Oh! Phillip, you do not see—you will not see,' cried Constance, passionately, 'that I should do wrong.'—'And did you never do wrong before?' said he, with a sneer.—'I will not do this,' replied Constance, standing erect. 'Torture me with your words as much as you will, they do not change the necessity that is laid upon me.' Constance had a look of determination and despair as she said this that frightened Phillip. He was nervously afraid of insane people, and Constance seemed to be certain that if she married him the doom would follow. She looked at this moment so different to what he had ever before seen her, that he began to think she was right, and that it would be better to take her at her word; still the hunter's instinct had been roused within him, and he could not let his prey escape. He felt that he must conquer her, that he must make her give up her judgment to his will. 'Constance, I do not wish to torture you; it is you who are needlessly torturing both yourself and me in this struggle to release yourself from my hold. You tell me that you love me; at any rate I love you, and have put all the happiness of my life in your power. Does it surprise you that I cannot see it destroyed through a mere fantastical piece of would-be heroism? It lowers you in my opinion, and is quite unworthy of a generous woman, such as I believed you to be. Either your love for me is in a most stinted measure, or you are afraid to incur for yourself a risk I am quite willing to brave.' There was that in this speech which jarred inexpressibly upon poor Constance. To be so thoroughly misunderstood—to meet with no response, no recognition, where she had so confidently relied on finding a friend to strengthen her heart against its own weakness, and give her courage to accomplish the sacrifice,—the disappointment gave her a strange pain for which she was not prepared, and she burst into tears. Phillip did not like tears—few men do; they are a material evidence of suffering which they cannot ignore, and they cause an emotion which is troublesome. 'For God's sake, do not break my heart, Constance; it is dreadful to me to see you cry. If you had any feeling for me, this need not be. Why will you devote both of us to misery?' Constance had passed the point where this appeal could touch her. It fell like a blow of physical pain upon her, but she only felt how impossible it was to appeal further to him, and that she must stand her own ground as she could. 'I can say no more, Phillip; you have heard my first word and my last. I cannot marry you. It is not I who make the separation, it is Fate, and you talk to me as if I could change it.' She spoke with a patient despair that was very touching, but Phillip was by this time in a rage. In his secret heart he rather dreaded lest she should yield, and yet he could not endure that she should be able to hold out against his pleading. If he could have brought her within the sight of the yielding point, the probability is that he would have allowed her to make good her retreat, and have acceded to her sacrifice; but that she should be strong enough to make it of herself, was too bad to be borne. 'I see how it is,' said he, 'you persist in sacrificing me to a piece of false heroism; and you prefer your own pride to my happiness. Well, I hope you will never repent of what you are doing. You are driving me out into darkness, and on you

be the consequences. Farewell!' He dropped her hand, and was going away. Constance uttered a low, sharp cry, and stretched out her arms after him. 'Phillip, Phillip, do not leave me thus. Tell me you are not angry.' Phillip half turned round; but the devil within him was now completely aroused. He felt hardened and angry at the face of pale despair that met his view. 'I leave you to your heroism, madam, which will easily console you!' He waved his hand, and in another moment had disappeared. Constance sprang up like one who has been shot through the heart, and fell heavily her whole length upon the ground."

We will not spoil the reader's pleasure by a premature disclosure of the plot. The tale, as a tale, is deeply interesting: full of quiet pathos and a calm and beautiful morality. But it is a prose poem rather than a picture of life. The characters are ideal,—the scenery is ideal,—and the moral is ideal. Were we to accept it as a picture of life, we should have to refuse our assent—not to the angelic virtues, the unfaltering constancy, the sublime devotion of the ladies, or to the unmitigated weakness, vanity and rascality of the gentlemen, so much as to the clear and absolute division of the human race into good and bad, worthy and unworthy, at the precise line which divides the two sexes. Trap's famous division of the human race into those born to be hanged and those born not to be hanged was not more absolute than Miss Jewsbury's classification. We will not quarrel with our author's old maids, however gloriously endowed with beauty, wit, and wealth. But why, to so much sugar, may there not be a little honest sack? Surely it is so in life. Art, however, is selective;—and having a poetic theme in hand, Miss Jewsbury had a perfect right to choose her dolls to suit it. On turning back the leaves of 'Constance Herbert,' we find some few slips of the pen—mechanical errors, typographical and other—which the writer will have been the first to see when the book was before her in print, and which will doubtless be corrected in a new edition. Our last word, however, ought not to be, and shall not be, a word involving any kind of censure. 'Constance Herbert' will be read with rare pleasure, and remembered with healthful interest.

Catalogue of the Museum of London Antiquities, collected by, and the Property of, Charles Roach Smith, &c. Printed for the Subscribers only.

Mr. Smith is a capable and industrious collector of mediæval relics; but we are not disposed to affix to such objects the value he puts upon them. It is natural that he should be a little misled by the peculiarity of his pursuits and acquisitions; and everybody must be willing to allow for the zeal which invests even matters of trifling moment with artificial excellence and interest. We have here before us an account of somewhat more than a thousand different articles, including coins, medals, and tokens, which he has accumulated during a series of years; and although not one of them may possess any extraordinary novelty, and may not illustrate any very important point either of history or of archæology, as a whole they deserve attention.

The compiler of the Catalogue is rather hard on the Corporation of London for not having itself formed a museum of antiquities relating to the City. Perhaps they ought to have done so; but it may be a question, how far it was possible for a public body to keep the necessary watch over workmen employed in making excavations, and how far, if they had been able to do so, it would have been charged against them that they interfered with private enterprise. For instance, Mr. Smith himself

censures the authorities of the City for "seizing upon" directly, ostensibly, and avowedly, "a large quantity of angels of Henry the Seventh and Henry the Eighth." Suppose they had "seized upon" most of the other objects in Mr. Smith's Museum in the same way, what would he not have said of the greedy and monopolizing spirit of the corporation, who would not allow competitors to enter the field against them?

Some of these remains belong to a period of perhaps two thousand years ago, and have been fortuitously preserved in sewers, drains, wells, and the bed of the Thames. They can never be made to bear a very inviting appearance; and it often requires the best of Mr. Smith's learning to explain in what way and to what extent they illustrate the habits and manners of our ancestors. We have gone through the whole list of them pretty patiently; and we own that we are unable to discover that they afford us a new view of any point of history. We have a few imperfect statuettes, such as that depicted on Plate II., which, if complete, might have attracted admiration; but such figures as we see in the woodcuts on pages 7, 8, 9, seem to prove little in themselves, and to possess not the slightest recommendation as works of Ancient Art. It happens, as must be expected, that the fictile vessels are chiefly fragments; and although great pains have been bestowed upon the descriptions of them, and although they are made to look well upon paper with the aid of the artist, they have comparatively little actual beauty of style or workmanship to recommend them. Among the personal ornaments, the "ouche in gold" if it be equal to the representation of it by Basire, is a fine exception. These articles and the implements and utensils form, in our opinion, the best portion of the contents of this Museum. The specimens of embossed and stamped leather, including shoes and sandals, are likewise interesting; but, of course, they are in most cases little more than fragments. On tradesmen's tokens (the substitute for small money about the middle of the seventeenth century), we have had various publications of late years; and we are not aware that the tokens in Mr. Smith's hands furnish any remarkable additional information.

History of my Life—[Histoire, &c.]. By George Sand. Feuilleton of La Presse.

THERE is no denying the fact, that Madame Dudevant becomes prosy in her recollections of childhood, in her rakings-up of the disadvantageous influences to which her heart affections, her moral sense, were subjected, and in her endeavours to prove how soon her genius began to assert itself, and to fascinate those about her. This prosiness, of itself, would not repel us, were it not accompanied by a certain unreal air—by a use of colouring matter—by an oppressive frankness of manner defeating itself,—our explanation of which has been already given. *Cleopatra's* phrase, "He words me!" is perpetually brought to the recollection by the elaborate pictures, explanations, and admissions set before us. We feel that, with much artistic calculation, there is no perspective. In place of real faces, we are shown the masks by which an unappreciated and gifted child could be bewildered on her outset in life and passion. Too much is recollected, considering how much is withheld;—the History, in short, as it proceeds, justifies our anticipation that it would prove "the romance of romances" among its author's works.

Yet, now and then, the professional delineator of character appears in the record so strongly as to make us forget the Woman with

her ever-present purpose of appeal and vindication. In some of Madame Dudevant's sketches of the tiresome, or violent, or libertine folk, among whom her young ideas were trained and her principles rent into pieces, we find evidences of a racy humour, which she has only sparingly put forth in her novels,—'Consuelo' always excepted. We will give an instance. Our historian has been speaking with a calous freedom of the theological and philosophical opinions held by her grandmother and mother. The former was one of those genteel deists who were common in France until high breeding, measured phrases, and epigrammatic definitions gave place to newer ideas and ruder parlance, pantheistic, communist, or ultra-republican, as might be. Old Madame Dupin used to criticize her daughter-in-law because the latter prayed long prayers. Young Madame Dupin owned that she expected to be no better for the same, though she still prayed on, from that devout superstitious habit which will be often found among the lower classes to outlast all other "faith and works." Betwixt grandmother and mother, the thoughtful and masculine girl had to grope her way into a sort of believing unbelief, which may have combined the peculiarities of both peculiar systems. Better teachers she had none. Her uncle the *Abbé* was an avowed sensualist. Deschartres, the tutor, taught her merely what his pedantic library could teach; and the ghostly counsellor of the family (towards whom we are making haste to arrive) was the *ne plus ultra* of pastors for a wilful and observant child to study and to see through. The following picture of him is almost as spirited as the *Adams* and the *Trulliber* portraits, by which "the village preacher" was so long known in the world of English fiction. Indulgence, however, must again be bespoken for the loss of style and spirit inevitable to a paraphrase.—

The old *curé* of St.-Chartier was an excellent man, utterly devoid, however, of the evangelic element. Though he had a "de" before his name, I think he must have been a peasant by birth, or else, by living with peasants he must have caught their manners and their language to such a degree, that when he preached they did not lose a word of his sermon,—which would have been a blessing had his sermons been more evangelic. But he only discoursed to the faithful about the homeliest matters; and it was with the utter ease of good fellowship that he would say from the pulpit—"My dear friends, here's an order I have got from the Archbishop, who has cut out another procession for us. My Lord can speak of it quite at his ease. He has a fine coach to carry about his greatness in, and plenty of people to take all trouble off his hands. But I am getting old, you see;—and it's not a little business to range you in procession order. Most of you understand neither a 'hue!' nor a 'dia!' You push one another, and tread on each other's toes, you stumble at the church-door going in and coming out,—and its fine talking, that I am to get into a passion and swear at you, when you won't listen to me, and only behave like a herd of calves going into a stable! I must be at every one's call in my parish, and in my church. I must be my own beadle; I must scold the children, and drive the dogs out. Now, I am tired of all these processions, which do you no good and me as little. The weather's bad, the roads are all dirt, and if my Lord was obliged to trudge, as we must, two good hours, through the mud, with the rain at our backs, he would not be so greedy of his ceremonies. Faith, I am not going to put myself out of the way for this one, and if you believe in me, stay at home, every one of you.—Aye, indeed, I hear Father *somebody*, yonder, blaming me; and here's my housekeeper thinks me all wrong. So listen, let those who are not satisfied go their own way. You do as you please—as for me, I have no notion of marching about in the fields. We will make a procession round the church, and enough quite. Go, go, that's settled,—and let's end this mass, which has been long enough in all conscience."

It will be owned that the *Holy Clerk of Copmanhurst* could not have spoken more to the purpose than the Priest of St.-Chartier. He seems to have had a congregation worthy of him. Madame Dudevant particularly commemorates an old fat female, who had been a camp-follower in her day, and who, though she could not keep away from church, was wont to beguile the time, when she got there, with yawning, barrack-fashion, and bidding the priest "get on" so loudly, that while turning with his general "*Dominus vobiscum*" to dismiss the audience, he would favour her with a particular formula adapted to her own case, loud enough to be overheard,—which formula was at the very rudest antipodes to "*Go in peace.*"

When Madame Dudevant's natural brother made his first communion, the philosophical old Madame Dupin,—who wished to "do the civil thing" by the Church, (to use the phrase employed by the English Dowager-Duchess on the occasion of her solitary act of church-going,) and to have the affair handsomely finished off,—bribed the Priest to overlook Hyppolite's imperfections in the Catechism by sending the holy man a dozen of Muscat wine. After the communion was over, his jolly Reverence asked the boy to breakfast,—and aided by the housekeeper and the sacristan, priest and communicant finished the entire contents of the basket:—unless Madame Dudevant has made the feast the present of some bottles, by way of enriching the story and heightening the tone of her portrait.—She seems to triumph, and to find not only nature, but grace, in the discrepancies betwixt the saintly frock and the tastes and habits of its wearer, and ascribes his unpopularity among the peasants as much to their fault as to his own.—He was well able, however, to take his own part, whether against his betters or his inferiors,—being, in no respect, averse to a pretty quarrel.—

War was his passion (continues his admirer). He delighted in all soldiers' stories, and declared that if he were not a priest, he would have been a military man. In truth, he had in some degree the habits of both,—for he swore like a dragoon, and drank like a Templar. "I am no humbug," he would say, under the Restoration; "I am not one of those hypocrites who have changed their behaviour since Government has taken us up. I am the same that I used to be; I don't want my parishioners to bow a bit lower to me than they used, or to give up their tavern and their dancing, as if that which was allowed yesterday was not to be permitted to-day. I am an ugly customer; and don't need new laws to take care of myself. If any one wants to pick a quarrel with me, I can give him a good answer; and I'd rather show him my fist, than threaten him with the *gendarmes* and the magistrate. I am a chip of the old block, and don't see that their law against sacrilege has made religion any better liked. I don't interfere with anybody, or allow anybody to interfere with me. I don't like water in my wine, and don't oblige any one else to put it in theirs. If the Archbishop is not satisfied, let him say so,—and I know what to answer him—don't I? I'll show him that a man of my age is not to be sent a packing like a youngster from college; and if he takes my parish from me, I'll go into none other. I've eight or ten thousand francs laid by. It's as much as I shall want for the time I have to live; and I mock at all the Archbishops in the world."

Mock at his own Archbishop this Jack-Priest of St.-Chartier did. When his superior arrived on a pastoral visit, Madame Dudevant's friend would by no means admit that eighty-two years entitled a man to be considered old, or in a condition to be displaced;—gave his diocesan a breakfast;—and, being stone-deaf, grumbled aloud at the cost and trouble of entertaining such great folks. Rough as the Curé was, however, there was good in him.—

Towards the end of his life, our Priest had a trouble which hastened it. He had the mania of

hiding his money, like many old men, who dare not invest it, and who make the savings laid by against their latter days a source of torment to themselves. His were hidden in a garret. A neighbour, to whom, it was said, he had been very beneficent, was tempted—one night got on the roof, in by the cock-loft, and carried off the Curé's treasure. When he came to know that his coins had vanished, the old man flew into such a passion that he almost lost his reason. He was in bed,—as nearly mad as possible,—when a magistrate came, at his instance, to take the necessary information, and to receive his depositions. The old man's distress and indignation were all the greater, because he guessed who was the thief; but, at the moment of denouncing him to justice, he was seized with compassion for the man he had been so fond of,—perhaps, too, with Christian remorse, for having let the love of money get too strong a hold on him. "Do your duty," said he, to the magistrate who questioned him. "I have been robbed, it is true; but if I have my suspicions, I'll give account of them only to God. It's not my business to punish the guilty." They pressed him to say more; but in vain. "I have nothing to tell you," he said, turning his back to them, angrily. "I may have deceived myself. It's for you, who are magistrates, to take it upon yourselves. 'Tis your business, not mine."—On the following night the money was put back in his garret; and Manette, who was rummaging there, in a sort of desperation, found it in the hiding-place from which it had been taken. The thief, seized with repentance, and touched with the Priest's generosity, had just replaced it. The Priest, to put an end to the investigations of justice and to the talk of the parish, gave it out that he must either have dreamed he had lost his money, or else that his housekeeper had changed its place, and forgot the day after that she had done so, owing to the failure of her memory from great age.

What follows completes this artistically-rude picture, with touches of greater mellowness.—

This old Priest, continues our historian, had a great friendship for me. When I was upwards of five-and-thirty years old, he would still say of me, "That Aurora is a child I have been always fond of." And he wrote to my husband, supposing, it appears, that offence would be given thereby, "Faith, sir, you may take it as you please, but I love your wife dearly." * * During twenty years he never missed dining with me on Sundays after vespers. Sometimes I used to walk to fetch him. One day I happened to hurt my foot while walking, and it was useless, in those days, to think of conveyances on the road to St.-Chartier, if the Priest had not offered to take me behind him on his horse. It would have been better if the Priest had been on the pillion behind me, for he was then so old that the motion of the animal put him to sleep. I was in a day-dream, looking over the country, when I perceived that the steed, after having progressively slackened his pace, had stopped to graze, and that the Priest was snoring with all his might. Luckily habit had rendered him a steady rider, even when he was sleeping. I used my heel, and the horse, familiar with the road, brought us safely into port, with the bridle on his neck.—After dinner, at which he ate and drank plentifully, he would go to sleep in the chimney-corner, making the windows shake with his snoring. Then he would wake up, and ask me for a little tune on the harpsichord or spinet: he never said "piano"—the word was too new a one for him. As he grew old, he ceased to hear the bass notes; but the high treble sounds still tickled his ears a little. One day he said to me, "I can hear nothing now. Well, I must be old." Poor man, he had long been so. Yet, at ten o'clock at night, he would mount on his horse to go home, and allow no one to accompany him.—Some hours before his death, he said to the servant whom I sent to inquire after him, "Tell Aurora that she need send me nothing more: I have need of nothing; and tell her, also, that I love her dearly, and her children too."

The reader, we think, will agree with us in finding this portrait full of life and character. We will not spoil the effect by placing other sketches beside it, and other subjects in the back or foreground of the provincial landscape in which it figures. Possibly we may not return

to Madame Dudevant's Memoirs until she shall come to speak of that more active public life, and those more notorious persons for whose intimacy she exchanged her girlish day-dreams at Nohant, and the society of such primitive folks as the Priest of St.-Chartier.

MINOR MINSTRELS.

Randolph: a Poem in Two Cantos. (Saunders & Otley.)—The author describes himself as a boy, and laments that his friends have prevented him boldly putting his name on his first title-page. We see no great trace of youth in this poem; but, on the contrary, shapeless and plotless as it is, much energy and picturesque force, and a capability to do better. It is difficult to predict the apple from the apple-bloom,—we can only see the flower is bright and pretty, and that is all. The imagery, not overloaded, is original,—as, for instance, waves which he compares to heralds laden with spoil announcing a victory, and dying at the monarch's chair; or white-crested messengers with "sweat-drops pouring from their brow." The feelings are a compound of 'Manfred,' 'Mazeppa,' 'The Golden Legend,' and Moore's 'Lalla Rookh'; and yet we find no plagiarism of thought, but only of style. The following lines on French prowess are, to say the least, condensed, nervous, and picturesque.—

We have seized the Alps by his hoary beard,
We have cut our way through his heart of snow,
And just when the coward world was cheered
That our grave was there, have our crests appeared
Like his avalanche, by the frightened Po!
Stunned Europe has rung with the brave hurra
That dashed o'er the bridge of Arcola!
We have laid us and closed our warrior lids
In the shade of old Egypt's pyramids;
And waking, have woke with our battle-din
The centured mummies that slept within.

The language of the volume throughout is daring, as, for instance.—

Her banners yet shall flap the morning—
Her trumpets yet call up the sun.

Lays of Love and Heroism, Legends, Lyrics, and other Poems. By Eleanor Darby. (Hope & Co.)—A volume dedicated to M. Lamartine by a lady whom, we have an impression, we once noticed favourably as the authoress of a book on Algiers. Miss Darby claims for her subjects originality, the greater part of them being as yet unknown to English poetry. She uses a cantering, Tom Moore sort of verse, capricious, varied, and quite Pindaric in the rapid transitions of its "longs and shorts." The tighter curb of severer metre would do her all the good in the world, and we should not object to see her ten thousand lines or so rolled down to one thousand. If she goes on at her present rate of two volumes of 240 pages a year, she will have written more than Homer in about six months time; and we need not tell her that no amount of quantity can compensate for quality. Keepsake marks of admiration do not change fervid young ladies' rhymes written on satin into lines fit for imperishable marble. The following verses of 'The Song of Eloise' are good

My soul is like a tossing sea!
A thousand wild emotions pour
Their waves impetuous on the shore,
This inundated heart!—but o'er
The surgy chaos thoughts of thee,
Sweet tender thoughts! like stars, shed trembling light,
Soft beauty o'er that sea of storm and night.

Fond recollections! how ye melt
My inmost spirit!—how ye run
Like lightning thro' my soul!—each one
Brings a fresh gush of tears!—Oh, none
Can know, who ne'er like us have felt,
How much more dear are even tears like these
Than all life's smiles, without such memories!

Frescoes and Sketches from Memory. By Theresa C. J. West. (Mitchell.)—These three hundred and twenty-seven solid pages of verse are dedicated to Mr. W. S. Landor. They are provokingly musical, monotonous, and equal:—never rising, seldom falling. The Lady is

highly educated,—has been in Italy,—translates Spanish and Portuguese,—writes epigrams and sonnets,—re-shapes German ballads,—and weaves verses in French and Italian: To our taste, the verses have a stale ball-room scent; as unlike the freshness of Nature as patchouli is unlike the breath of a May morning. There is a Byronic echo about the lines which is unpleasant; because only the worst part of Byron can be imitated. We have not much sympathy—knowing the vulgar every-day sorrows of our fever alleys—in small tears shed on the ivory keys of pianos, while resting between a waltz and a polka. We mean that sort of delicate tears which make blue eyes look, somebody says, like violets dipped in dew, and black ones resemble pansies after a shower. We extract a lament of this Penseroso school.—

Eyes that have looked their last!
Heart that has ached and that will ache for ever,
Pulses that beat so fast,
Bid thee adieu.
Tongue that is mute with grief!
Hand from thy palm beloved doomed to sever!
Tears that would bring relief
Flow, flow like dew!

The last line will suffice both the poet and the naturalist.

Epullia. By the Author of 'Poems by Melanther.' (Hope & Co.)—Of this; the most promising of our anonymous poets, we have already had the pleasure of speaking well. This new publication gives us no reason for retracting our favourable opinion; but, on the contrary, compels us to reiterate it. "Melanther" seems, if not a "salt" by profession, to have a strong partiality for the sea,—which he has the power of describing with feeling and with vigour. His fancy is rich and quaint, but sometimes strained, super-subtle, and affected. Success may teach him to rely more upon clearness of imagery and less upon that epileptic contortion and feverish violence which have attacked the body poetic. His compositions have shape and distinctness, and stand out boldly from one another; but although they are dramatic, and neither vapid, abstract, nor vaguely metaphysical, we must confess we do not see clearly what region of the imaginative world he aspires to conquer. His poems seem rather trials and intellectual *tours d'artifice* than bold oar-strokes towards a desired haven. The present volume, for instance, includes three poems on different phases of war,—'Lyril Mohun,' a tale of the Civil Wars,—'Lita,' an old Egyptian story,—'A November Dream' (a clever variation on 'The Bridge of Sighs'),—'Hero and Leander,' a serio-comic translation from Musæus, with marine recollections,—'A Harvest Song' (rather a failure), and 'A Cuckoo Song,' very fresh and fantastic. The Nile and London Bridge, Musæus and the Spithead fleet, the Cuckoo and Alma, never played masquerade together before but in a poet's fancy. In all of these poems, with some originality there is too much of word-puzzles. Too often, when we seem to have got hold of a new thought the slippery sentence leaves its tail between our fingers, and we find that after all it is a mere glittering scale of words. In the wish to be original, the author proves himself to have more wit than judgment, and uses words lamentably deficient in good taste. How can a man of Melanther's imagination entreat his gleaners to

"Crush beneath your cord'roy breeches," &c.?

The 'November Dream' is powerful in its quiet force, and carries on Hood's beautiful thought into a second act,—into a daylight scene following the chill terror of that sad March night, when the light shook in the dark water, and the loud wind howled through the arches. Melanther gives us a group of suicides: the famished man with the drunken wife,—the atheistic prodigal,—the sceptical crazed thinker,

—the beaten wife,—and the sad, stern, heart-frozen Magdalen.

The Life of Dr. John Fisher, Bishop of Rochester, in the Reign of Henry the Eighth. By the Rev. John Lewis. With an Introduction by T. Hudson Turner, Esq. Lilly.

St. John's College, Cambridge, has done scant justice to its worthies. From their foundress, Margaret, Countess of Richmond, down to Henry Kirke White, the tale is still the same. The life of the former was first related by Miss Halsted, in 1839, in a Prize Essay read at Crosby Hall; and over the grave of the latter—unhonoured and almost forgotten—a tablet, sculptured by Chantrey, was raised by the respect and liberality of an American. This life of Bishop Fisher brings before us another case of almost equal neglect. Bishop Fisher was the Countess of Richmond's confessor and adviser. It was he who directed her liberality towards Cambridge. He led her to endow her professorship in that University,—to complete the design of Henry the Sixth with reference to Christ's College—the college of Milton;—and partly as her executor and partly with his own means, Fisher carried out the noble intention to which he had been the Countess's first prompter—that of founding the great College of St. John's. Neglected by St. John's, Bishop Fisher's memory fell into the hands of the party which delights in those biographical romances called 'Lives of the Saints.' Under the false name of Thomas Bailey, D.D., full of untruths and crammed with shameless libels, there appeared, in 1655, a 'Life of Fisher,' which began thus:—"At the time when as the stars of heaven frowned upon the nation, to behold innocence swaying the sceptre of this land so misbecomingly, in the seven and thirtieth year of the reign of the most noble, though unfortunate, King Henry the Sixth, and in the year 1459 after the time that a virgin daughter had produced her Father, and a creature her Creator, when the blessed vine sprang from the same grape it bare, and the root of the grape shot from the spring," &c. &c. In spite of this unpromising beginning, and in spite, also, of many other passages just as foolish, the book had some degree of popularity,—and not altogether without cause, for parts of it are written so simply, and with such an air of apparent truth, that it is scarcely possible to doubt that there was some foundation of fact even for many of the strange things which are related in it. The book was reprinted in 1739, and again (as some people say) in 1740, and upon it, with such assistance as could be derived from the general histories of the period, the biography of Fisher in our biographical dictionaries, and the account of the legal proceedings against him in our State Trials, are mainly built. It is not creditable to our literature, any more than to St. John's College, Cambridge, that the biography of Fisher should rest upon such a life as that by the pretended Bailey. Many people have thought so. Dr. Fiddes, the author of 'The Life of Wolsey,' wrote a book, comprising lives of Fisher and More, but the manuscript was, unfortunately, lost. The Rev. Alban Butler also wrote a 'Life of Fisher'; but his MS. was destroyed by Mr. Charles Butler, of Lincoln's Inn, his executor. It has also been currently understood that the Rev. John Lewis,—best known as Incumbent of Margate during the first half of the last century, and author of lives of Caxton, Wicliffe, and Bishop Pecock, and many other books,—was another adventurer in the same field.—His manuscript Life of Fisher was said to have fallen into the hands of the Rev. Theodore Williams, of Hendon. As long ago as 1834, it

was announced that it was "in the press," and was about to be published, together with the Life of Lewis written by himself, under the editorship of Mr. Williams, in 2 vols. 8vo. The book before us is in 2 vols. 8vo., and professes to be the life of Fisher written by Lewis. It is also asserted on the title-page to be "now first printed from the original manuscript prepared by the author for the press,"—but there is no mention of Mr. Theodore Williams, no evidence of the genuineness of the manuscript, no explanation of the long delay, no allusion to the Life of Lewis which was to have been included in the 2 vols. 8vo.; and what is stranger than all, there is an introduction signed by the careful and accurate Mr. T. Hudson Turner, who has been dead three or four years, which is silent upon all these subjects. It gives no account of the manuscript,—contains no allusion to its past history,—no hint that it had ever been in the hands of a previous editor,—no reference to the autobiography of Lewis. It is another observable circumstance in connexion with the book, that it is published without the name of the printer.

All this is very strange. The book may have been written by Lewis—who died, be it remembered, in 1746,—the introduction may have been written by Mr. Hudson Turner,—the persons who have printed it may have in their possession Lewis's manuscript,—they may be about to give us Lewis's autobiography as a separate publication; the transaction may be very regular and accurate; but if so we should have been favoured with a prefatory statement of the evidence upon which the book is attributed to Lewis, and an explanation of the long delay and numerous acts of scene-shifting of which the publication has been the subject.

Lewis, as every body knows, was an active and accurate literary labourer, well read in our ecclesiastical history, a student of records and unpublished documents. His style of composition was very like that of his contemporary Strype; lifeless and sapless, without animation or grace of any kind. His books are valuable only on account of their honesty, for which his dullness was a decent pledge. This book may very well be his. It is written exactly in his style,—is heavy, verbose, and dull in the highest degree.

It is an unquestionable composition of Lewis's period. Archbishop Wake's 'State of the Church' is referred to in it,—a book which was published in 1703, and Gibson's 'Codex,' published in 1713. On the other hand, 'Rooper's Life of More' is frequently mentioned as in manuscript. This was first published in England by Hearne in 1716, and secondly, in 1729, by Lewis from a better manuscript lent him by a gentleman in Kent. We may, therefore, infer that the book was written either between 1713 and 1716, or at latest 1729.

Another evidence of the age of the book is to be found in its orthography. All the customary contractions of the period in which Lewis lived, with many affectedly antique spellings which he was a very likely man to adopt, have been carefully copied in the printing—why, it is difficult to guess, unless the Editor thought that doubt might be entertained of the genuineness of his manuscript, and desired to preserve whatever internal evidence could be found of its age.

The historical contents of the book are scarcely more satisfactory than the mode of its publication. If published a hundred years ago, it might have been useful to the inquirer into the early progress of the Reformation in England,—but now it is too late.

Bishop Fisher was the Mrs. Partington of his time. He dreamt that he could keep back the surging tide of innovation by writing Latin an-

swers to some of Luther's vehement publications, and burning others of them at Paul's Cross. Of Fisher's answers to Luther and the Lutherans, the writer of the book before us gives abstracts. All we can say about them is, that they are very heavy to read, and do not produce a favourable impression as to the character of mind of a dignified ecclesiastic of those days.

Another employment in which Fisher occasionally engaged was the examination of suspected Lutherans. He was one of the commissioners who interrogated poor Bilney, and several other cases of the same nature are mentioned in Fisher's 'Register,' whence the writer has given notes of them.

He was an adviser of Queen Katherine on the business of the divorce; and in that character drew upon himself the dislike of his tyrannical sovereign, which was increased by the credulous faith he put in the lying and treasonable exclamations of the hysterical nun, Elizabeth Barton. The qualities which made him hated by Henry the Eighth more closely attached to him the Pope and Papal Court. He placed himself in the front of their battle to regain the supremacy, and thus sacrificed his life. Whether the determination to put him to death was the result of his actual appointment as a Cardinal, which is a question discussed in his biography, seems a very small matter. Such an appointment was evidently a most dangerous act of kindness, and if known to the English Court before his execution may have hastened it.

Nothing in Fisher's life became him like the leaving of it. Joined in suffering with Sir Thomas More, he stands in our history as a bright example of conscientious adherence to opinions deliberately formed. He suffered indignities and persecution with the perfection of meekness, and laid down his head upon the block with calmness and fortitude never surpassed. In all this part of his book the present author relies too much upon the fictitious Bailey. Every now and then, both here and elsewhere, he finds Bailey's statements contradicted by respectable authorities, but the tale of Fisher's trial and execution, as Bailey tells it, is pitiable and interesting; and certainly the writer of the present book, finding anything of that kind applicable to his purpose, may be excused, if ever man were excusable, for adopting it.

If this book were really written by Lewis, which from its internal character we think extremely probable, it should have been placed in the hands of some editor who could have given us a proper account of it, and have added in notes the additional information respecting Fisher which has been published within the last hundred years. This was especially necessary with reference to the closing period of Fisher's life, which was made the subject of a paper by Mr. Bruce, published in the 25th volume of the 'Archæologia' (p. 61). In the Introduction by Mr. Hudson Turner there is frequent mention of this paper; but it would have been far better to have added or referred to the information it contains under those passages of the life which it specially illustrates. The truth is, that the Editor, whoever he was, had little idea of his duties. Blanks left in the manuscript, which the writer intended to fill up before printing, have been left without any attempt at completing the passages in which they occur; whilst the author's references have been occasionally mystified by absurd mistakes of the press,—as, for example, in vol. II., p. 201, Bishop Andrewes's well-known 'Tortura Torti' is described as an answer to 'Mat. Fortus'; and in the same volume, p. 13, we have a reference to an edition of Cavendish's 'Life of Wolsey' of 1708, there being no such edition. Nor does Mr. Turner's Introduction go far to supply the

deficiencies of the original Editor;—but it may be presumed from its abrupt and incomplete termination that it was left by him unfinished, and is not, therefore, a fit subject for criticism. It has not been thought necessary by those who have taken upon them to send forth Mr. Turner's work to add an original paper, which it is evident he intended to insert in his Appendix. They have merely printed its title.

The more important original documents printed in the book have been long forestalled; in fact, it is altogether behind the state of our historical information at the present day. The twenty pages of extracts from Wyatt's 'Life of Boleyn,' which look well in the Appendix (vol. II., pp. 359—380), were far better printed long ago in Mr. Singer's excellent edition of Cavendish's 'Life of Wolsey.'

In the hands of a competent critic and scholar, well read in the historical materials for Fisher's period, something might perhaps have been made of the book; but as now printed, we fear it will do little credit to our literature, and will mislead fully as much as it will instruct those who consult it for historical purposes.

OUR LIBRARY TABLE.

Landmarks of the History of England. By the Rev. J. White. (Routledge & Co.)—Mr. White reviews the salient incidents in our annals, from the Roman Conquest to the death of the Duke of Wellington. It is time that English history should be rewritten for the young,—in order that they may no longer have their minds perverted by solemn nonsense, conceived in the spirit of the anti-Jacobin. Nearly all the compilations of the "Georgian era" are mere tirades against one party and flatteries of another. With every respect for Mr. White's endeavours to improve on this class of books, we are not very confident of his success. The shade of Pinnock haunts him; he draws his epithets from Kenneth and his sympathies from Baker. Are we for ever to be told of the "majestic head" and "innocent blood" of Charles the First? The account of Cromwell's reign is extravagant, and little is said to teach a student to comprehend the unspeakable degradation of Great Britain under the Georges. Historical sketches of this character are useless. They are only pale impressions from a picture in which the lights and shadows are confused, and which, exhibiting the silly Court of the first James, the treacherous Court of the first Charles, the vulgar ferocity of the Georges, and the triumphant glories of Cromwell, points no moral, and leaves the youthful reader at a loss to understand why he has studied the history at all. The story of England is a lesson full of weighty precepts, or it is nothing.

Given; or, the Cousins. By A. M. Goodrich. 2 vols. (Parker & Son.)—This is a very excellent story, full of good counsel, marked by a spirit of gentle piety and good sense, which will make it a valuable gift book to young girls of fifteen or sixteen—the age of folly and fermentation. The work bears traces of talent, and, still more, of graceful feminine culture; but the story, though generally interesting, and, in some passages, deeply touching, has a want of vividness in the descriptions and details which will, in the first instance, run the risk of deterring young readers; but, if they once fairly embark in the venture, we do not think they will leave it before the conclusion; and we can assure them that it is a far pleasanter book to read through consecutively than they may imagine from merely dipping into it.

Woman's Educational Mission: being an Explanation of Frederick Fröbel's System of Infant Gardens. From the German of the Baroness von Marenholtz. By the Countess Krockow von Wickerode. (Darton.)—Fröbel's 'Games for the Occupation and Amusement of early Childhood,' which attracted some attention at the Exhibition of the Society of Arts at St. Martin's Hall last year, are now explained, and his system of teaching is pointed out by the Countess von Wickerode, who calls upon the Ladies of England to unite in

forming Infant Gardens on Fröbel's system, for the benefit of those children of the middle and poorer classes whose mothers, from want of time and often from want of knowledge, know not how to bring up their offspring. She also suggests the formation of a Society for the instruction of all women who lack that acquaintance with the moral and physical requirements of the young to which so much depravity is to be attributed. Fröbel's method of instruction is being carried out in various parts of Germany, and in several educational establishments of London his principles have been adopted and found successful. It is to be hoped that Fröbel's works will shortly be translated, in order that his method of treating the young may become generally known in England.

Dante's Divine Comedy: the Paradise. Translated by C. B. Cayley, B.A. (Longman & Co.)—We have already noticed Mr. Cayley's translation of Dante, while on his passage through the 'Hell' [Athen. 1245] and 'Purgatory' [Athen. 1365] of the great Florentine, pointing out the closeness of his rendering, his taste for archaisms, and his singular abhorrence of explanatory notes. The same remarks will apply to his 'Paradise,' which is now completed.

Dante's Divine Comedy: the First Part, 'Hell.' Translated by Thomas Brooksbank, M.A. (Parker & Son.)—Mr. Brooksbank is, like Mr. Cayley, an aspirant to metrical distinction, and presents the world with a translation, in *terza rima*, of the 'Inferno,'—to be followed (we infer from the title-page) by versions of the two other books. He has executed his task, as far as it goes, with laudable care. He has less predilection than Mr. Cayley for antiquated and out-of-the-way expressions; but, at the same time, he is far less vigorous, and he is sometimes driven into curious straits by the exigencies of his metre. Dante's language is difficult, but not nearly so difficult as it becomes when transferred into English by Mr. Brooksbank. Let us take as an example Mr. Brooksbank's rendering of the world-famous lines that open the third canto.—

Through me the way into the realm of dole;
Through me the way of endless anguish prove;
Through me the way to every damned soul.
Justice did first my lofty builder move.
I, by the might divine, was built of yore
By highest Wisdom, by primeval Love.
Nothing had been created theretofore,
If not eternal—I eternal too;
Ye who pass through leave hope for evermore.

—All this is very conscientiously done; but the translation abounds in obscurities, not to be found in the original passage, which is, perhaps, one of the clearest that ever issued from Dante's pen. If for the strange expression, "prove the way," we simply say, "you go," or "one goes" (*si va*),—if for "theretofore" we read "before me" (*dinanzi a me*), and if we furnish the very curt and Topsy-turving proposition "I eternal too," with its proper conjunction and copula, and make it, "And I endure eternally" (*ed io eterno*),—the whole thing becomes clear at once; and yet by these modifications we have done nothing that is not already done by Dante himself "in very choice Italian." The above passage is an average specimen of the book. A few lines down in the same canto, we come to a stranger place. Virgil is speaking of those timid souls who did neither good nor harm during their earthly career, and who are condemned to dwell on the hither side of Acheron:—

Mingled with whom, of their disgrace the proof,
Are the vile angels, who did not rebel
Nor kept their faith to God, but stood aloof.

—What is meant by the vile angels being the proof of the timid mob's disgrace? Dante's Virgil does not say a word on the subject, his lines being simply,—

Mischiate sono a quel cattivo coro
Degli angeli, che non furor ribelli,
Ne fur fedeli a Dio, ma per se foro.

Indeed, if Virgil had said anything of the kind, Dante would certainly have asked him for an explanation. Having ingenuously confessed with respect to the inscription over the infernal portal—"Maestro, il senso lor m'è duro" (cumbrously rendered by Mr. Brooksbank, "The sense is hard of that I view"), he could not be otherwise than staggered by a far greater difficulty. Alas! ob-

security is not always profundity,—and we greatly fear that the words “of their disgrace the proof” simply mean that rhymes to “aloof” are not abundant in the English language, and that when we write in *terza rima* we must not be too fastidious. “My chief, almost my sole object,” says Mr. Brooksbank in his Preface, “has been to make a translation which, preserving the form and pressure of the greatest *epic* (?) since the old classic days, may be intelligible and readable to an English reader unacquainted with the Italian.” His success in attaining this object is questionable. With the help of the original Italian, we find ourselves tolerably competent to master the difficulties of his translation; but whether any one could get on without such assistance we seriously doubt. For the insertion of brief historical notes, in explanation of the text, Mr. Brooksbank is to be commended. These notes do not contain nearly all that may be said with respect to the interpretation of the immortal work, but they are, nevertheless, sufficient for the general reader.

The Drama of Life. By Ferdinand Gasc. (J. Blackwood.)—It is unfortunate when a man reads good books for no other purpose than to write bad essays. Mr. Ferdinand Gasc has a facility of quotation which he applies to illustrate a series of remarks on the ills and follies of the world. Some of these observations are set forth in sketches professing to be studies in social anatomy. But caricature without comedy is not that salt which occasionally reconciles us to pertness and presumption. When will our minor satirists learn that every one who burlesques his fellow creatures is not a Juvenal or an Aristophanes? With certain of this class of writers it is the fashion to take “literary men” in a subjective sense, and to treat of them, in a scientific style, as though they were birds or lizards, whose “habits” are to be observed, and whose peccadilloes are to be brought under the loving care of every layman’s charity. Women, also, are dissected with similar flippancy. Mr. Gasc “boldly challenges” “the daily-growing delicacy of public taste” with respect to his effusions. We will not anticipate the trial.

The Relative Rights and Interests of the Employer and Employed Discussed; and a System Proposed by which the Conflicting Interests of all Classes of Society may be Reconciled. By M. Justitia. (Simpkin & Co.)—“Justitia” makes his proposal in a sincere and modest spirit. He has been a working engineer—has lately become a master—and deduces his ideas from twenty years of experience and reflection. The plan itself is not altogether new, but it evinces much intelligence in the inventor. The principle is that of association, by means of joint-stock companies to be formed by the industrious classes. Whatever novelty there is in the scheme is contained in the minor arrangements rather than in the proposition itself; but “Justitia” develops his theory in plain and readable language. He is an optimist—most philanthropists are,—yet his book is one among many encouraging symptoms we perceive of a rising sentiment on the part of the industrious orders to inquire rationally into their own condition, and to ameliorate it by independent endeavours. It is remarkable that all speculators of this class indulge in architectural visions, and think it important to settle whether their model villages shall be hexagonal or square.

The political miscellanies of the day are addressed chiefly to the war or the crisis. Under the vague title, *An Era in the Life of a Living Statesman*, some enthusiast—in embryo, we should think—lauds, in bombastic panegyric, the Earl of Derby, a cynosure among statesmen, as this pamphlet sets forth.—Equally inflated, though with a good intention, is Mr. Birchenall’s disquisition on the *Signs of the Times*. Those who sympathize with the writer will regret to find sensible opinions advocated in such a strain of weak and gaudy declamation.—From an economical and financial point of view the author of *Should the Money required to pay the Expenses of the War be raised by Loans or by Taxes?* argues against loans. Should the taxes fail, he recommends terminable annuities.—Taxing, however, has been “made easy” by the self-relying inventor of a new fiscal system, who now puts forward a plan of *Our Future Parliaments*

not likely to gain much attention at present. We think, too, that it suggests a sad misunderstanding of English constitutional history.—A chapter in our judicial annals is supplied in Mr. W. Maurer’s *Inquiry into Anglo-Saxon Mark Courts, and their Relation to Manorial and Municipal Institutions, and Trial by Jury*. This is a well-composed and instructive fragment.—What shall we say, however, of our next pamphleteer, who would abolish, not any concatenation of horse-hair and bombazine, such as Sydney Smith made merry about, but our last Court of Appeal, the Press? He intitles his discourse *Anonymous Journalism*, and after dealing pretty freely in sneers, innuendos, and vituperation, sets an example by remaining anonymous himself. In this pamphlet the whole subject is mistaken. What the writer proposes is, not to improve journalism, but to destroy it. He perceives neither the drift of his own argument nor the nature of the system he is assailing, but stumbles on in hopeless darkness from his starting proposition, that because the anonymous has been abolished (and journalism also) in France, so be it in England. He would discriminate between literary and political articles, between personal and general remarks; but of one thing he is satisfied, that the press ought no longer, like “the veiled Prophet of Khorassan,” to “issue its edicts to the people” as mysterious, as irresponsible, and as mighty.

LIST OF NEW BOOKS.

Ainsworth’s *Fletcher of Bacon*, 2nd edit. 8vo. 3s. 6d. cl.
 Arthur’s (Rev. T. S.) *Advice to Young Ladies*, 32mo. 1s. 6d. cl.
 British Eloquence, Nineteenth Century, Literary Addresses, 3s. 6d.
 Busk’s *Medieval Popes, Emperors, &c.*, Vol. 2, post 8vo. 10s. 6d. cl.
 Cecil’s Remains, 14th edit. with Memoir of his Life, 8vo. 5s. cl.
 Cooper’s *Red Rover*, 8vo. 12s. 6d. bds.
 Dudley’s *Metalum Martis*, 7to. 7s. 6d. cl.
 Elliot’s *Elementary Mathematics*, Part I, Algebra, 12mo. 2s. 6d. cl.
 Epps’s *Practical Observations on Health and Long Life*, 1s. 6d. swd.
 Goodwin’s (Rev. H.) *Christ in the Wilderness*, 12mo. 4s. cl.
 Guy’s Tutor’s Assistant, by Joseph Guy, 7th edit. 12mo. 2s. cl.
 Madden’s (Rev. J. B.) *Sermons on the Church*, 8vo. 2s. 6d. cl. swd.
 Matthiæ’s *Greek Grammar* Abridged, 7th edit. 12mo. 3s. cl.
 Maurice’s (Rev. F. D.) *Learning and Working*, 8vo. 7s. cl.
 North and South, 2 vols. post 8vo. 21s. cl.
 Papers for the Schoolmaster, Vol. 4, 12mo. 3s. cl.
 Parlour Library, “Sir Jasper Carew,” 8vo. 2s. bds.
 Ruff’s *Guide to the Turf*, spring edit. 12mo. 2s. 6d. cl. swd.
 Run and Read Library, “To Love and to be Loved,” 8vo. 1s. 6d.
 Syme (J.) *On Stricture of the Urethra*, 2nd edit. 8vo. 4s. 6d. cl.
 Tourrier’s Self-Teaching French Grammar, 7th edit. 8vo. 5s. cl.
 Tourrier’s *Familiar Dialogues in French*, reduced to 2s. 6d. swd.
 Tracts for Christian Seasons, new edit. Lent. 12mo. 2s. cl. limp.
 Vernon’s *Guide to Anglo-Saxon*, new edit. 12mo. 5s. cl.
 Virgil’s *Æneid*, Books VII.—XII, trans. by Osgan, 1s. 6d. cl. swd.
 Westward Ho! by C. Kingsley, 3 vols. post 8vo. 31s. 6d. cl.
 Willy Reilly, by Carleton, 3 vols. post 8vo. 31s. 6d. cl.
 Young (Rev. R.) *Southern World*, 2nd edit. 8vo. 6s. 6d. cl.

FOREIGN CORRESPONDENCE.

Paris, March 20.

THERE is one quality without which no applause can be won in France. *Virtuosi* and friends of Art require it; the *habitués* of *ateliers*, the Paul Prys of the artistic world, who revere for the benefit of the public the newer of the region in which they love to make their daily excursion; not only so, but the army of young students,—those *rapins*, who with untrimmed beard and hair struggling with the wind, go hither and thither, warning the world of their coming by the loudness of their voices, and influence by their number, their activity, and their imperturbable assurance, the general theories of the literary and purchasing public,—every one, from the amateur to the *flâneur*, insists on Originality. No artist is worthy of remark who is not original.

But what do they mean by originality? What is the nature of this touchstone which they go about applying? What do they really require? Whence does their approbation derive its sanction? Let us be bold and say, they do not know at all,—for even professional critics would be sadly at a loss if summoned to explain themselves. It may be that they withhold the true definition from fear of consequences. Is it so difficult to say that he is original, who in the exercise of an art exhibits a personal and distinct character, a demeanour, as it were, of his own, new thoughts, deeply-seated and conscientious views,—with their roots in his soul, not in his memory,—an unexpected choice of subjects and an unexpected way of presenting subjects already chosen? If this be a description of originality which, once given, must be admitted, it is worth while to examine why in France the public and its mouth-pieces have so obstinately refused at

the outset,—in the days of struggle and tribulation,—to ascribe this indispensable quality to men of the greatest power,—men whose reputations have risen to their true level after death, and who evidently comply with the conditions laid down. We are in a good position to discuss the question, being beyond the influence of coteries; and we may hope, by looking at it from every side, to say something pertinent to the history of that longest and most interesting episode of genius,—its neglect and consequent despair. Without attempting any poetical exaggeration, or borrowing phrases from the arsenal of rhetoric,—whatever economists may proclaim to intercept the tragic sensations which the tale of literary and artistic suffering excites, from reaching the public conscience,—it is certain that the world has brushed harshly by many whom it has endeavoured to console by posthumous honours. The story of French Art furnishes examples. Le Sueur has been denied the title of original, which has been given to Lebrun and Mignard. The same blind criticism may have stifled many a student, leaving him an artist only in the memory of his mother and his friends. What is the reason given for this judgment? Le Sueur is not original, we are told, because he painted like Simon Vouët, his master. That is all. A wretched question of mere handling—the result of the first careless impression—is substituted for the deep, special, and apt considerations on which alone a verdict should be given in such a cause. Mere surface execution,—mere “cookery,”—forms the sole element of decision. The instructed eye does not search,—the soul is not questioned; and yet, if Painting fails to speak to these, to what is it addressed? It is necessary to say, however ungracious it may seem, that to excite early applause, to force the attention of the French public, artists must submit to paint in a strange, unusual, and new manner,—a manner invented for the purpose. Each picture must contain its own advertisement.

It will scarcely be denied that this manner, adopted with a special, extraneous object, does not in itself constitute a master. Though an artist claim that title on some other ground, he remains tainted with mannerism, and goes to join a long list of predecessors. Decamps, for example, who ought to have succeeded by his own strength, really owed his early popularity to his method of laying on his colours,—which the critics, in the technical vocabulary of the *ateliers*, called “*sa manière d’empâter et de gratter*.” M. Théophile Gautier, and other great authorities in Art, made a tremendous outcry about the culinary operations of this wonderful practitioner,—teaching the public to admire not what they saw, but the supposed difficulty of execution. Our language can scarcely contain equivalents for the mysterious terms used by these acute critics to describe the merits of their favourite,—how “he painted with little trowels,” “baked,” “varnished after having shaved,”—and so forth. We do not pretend to translate, because no Frenchman even could attach more than a vague and arbitrary meaning to these phrases:—“*Il peint avec de petites truelles; il met au four; il glace après avoir rasé; il drague avec la couleur sèche; il émaille avec des pommades*.” Then comes the cry, “Inimitable execution,—inimitable and without precedent.”

Not quite so much without precedent as these gentlemen think. Many of the results of the same processes have been already rejected by the Old Schools,—tried and found wanting, put away in the rubbish-room. The judicious Rembrandt once said to a pupil, who was aiming at mastery by such deceptive or indifferent means, “Why so many tools, so many substances? The real painter paints with his eyes.” Where are the works of this would-be master? What is their estimation among the critics? We forget his name, but have seen some of his works,—and could point them out, if necessary,—in which all the practices of M. Decamps have been employed. They have no reputation; whilst it is unnecessary to say anything of the simple, powerful, and naïve productions of Rembrandt, whose chief means of excellence was the calm study of Nature. *He painted with his eyes!*

We may proceed and say without fear of contradiction that the strangely managed execution—so strange and so audaciously careless—of M. Delacroix, was as effective, at least, in earning him a reputation, as his incontestable dramatic and romantic style of composition. The systematic absence of colour and the peculiar method of M. Ingres were as useful to him with the French public—so apt to flutter over the surface of things—as his great antiquarian knowledge and his fervid devotion to Raphael. If M. Ingres had drawn better than Raphael, and coloured as simply and naturally as that master—who, nevertheless, laid not much stress on colour—he would never have attained his present glory. But who at Paris is not ready to admire a man who paints in colours absolutely insignificant, absolutely detestable? Let any simpleton object to this systematic mannerism, the answer of a knot of fanatical admirers is ready, and given in a tone of disdain:—"Nobody but M. Ingres despises colour so profoundly!"

Messrs. Dupré and Rousseau paint by means of a singular sprinkling of little spots, as if they were workers in mosaic. They, of course, achieve a wonderful success. M. Diaz, if we may use a vulgar expression, "chucks" his pallet against his canvas, and adroitly takes advantage of the stains thus produced. Up goes the shout again. A new style of painting! Brilliant popularity—"mirobolant, archicoquantieux!" again to adopt the untranslatable language of unprinted criticism. No one ever painted like that. Verily, 'tis ravishing! New comers, not very inventive of new modes of execution, and well knowing that there is nothing to hope without that delightful originality of which the public is so greedy—which it devours as cannibals would devour a man of a new species—strain every nerve to "originalize" themselves. "I can't be original in *cooking* (*en cuisine*," the expression is classical), I will be so in carpentry," soliloquizes M. Meissonier, who has founded what may be called the Infinitesimal School,—"I will make the smallest pannels that ever were made. I will paint the Days of June—the whole of that sombre and terrible scene—soldiers and insurgents—streets blocked up—barricades stormed and bloody—all on a surface not larger than my hand." Is not this original, very original? Down comes the amateur with his money: up goes the *Io Pœan* of criticism!

The success of M. Meissonier in microscopic painting suggested that equal success was to be obtained by going to the opposite extreme. M. Biard resolved to produce gigantic roses, tulips, poppies, such as have never been seen,—flowers five feet in height. The story of Gulliver hiding in the fields of Brobdignag furnished him with his subject. A colossal hand advances towards a miniature man, athwart a nosegay so vast that all sentiment of form disappears. Many spectators actually passed by without being able to discover the slightest meaning in this prodigious daub; yet everybody talked of it, and M. Biard's celebrity increased.

Another and a new candidate. He also speaks a language difficult to understand. "*Moi, je veux les épâtes*,"—as if he said, "I will choke and stifle them (the public). I will show them what they have never seen before. I am a peasant of Franche-Comté. I will give them one of my sort going to his last dwelling-place—thirty feet in height; and I will stick a signature in the corner—Courbet—in red letters a cubit long with a flourish like a scimitar." There never was anything seen to equal that. Original again! Courbet was on the high road to glory; and all budding beards and meteor locks began to say, "This individual is not a painter: he is the painter!" But he was in too great a hurry, and went too far too soon. He offended public opinion before his empire was quite established, before he had quite conquered the coteries. His *Baigneuse*—indecent even from the vastness of its proportions—was received almost as a defiance; yet it sold for ten thousand francs, a handsome price in a country where the *Suzanne* of Santerre fetched only five hundred. But the Franche-Comtois is not put down: He will try again, probably with success; for many are his disciples and accomplices.

By these examples I have endeavoured to explain what is the kind of originality that ensures

success in France. It is an originality that is affected, and I may almost say mercenary, existing on the surface not in the real forms of talent. Men of taste and feeling, who expect to find more simplicity of means and a less impatient ambition, are necessarily shocked. They know, indeed, that whilst the really meritorious artists whose names I have mentioned—precisely because they are meritorious—have not lost their genius by employing unworthy means; yet just in proportion to present success will be future condemnation. Posterity will see their works through the false medium which they have themselves created.

Many clever members of contemporary schools, observing that all possible experiments had been tried to reach "originality" by a particular mode of execution, or the adoption of tiny or gigantic proportions, discovered that still something might be done to create an extrinsic interest in their performances. They laid their trap in the Exhibition Catalogue—speculating on the title of their picture, on a written commentary, on sentiments evoked by the memory, on the passions of parties—professional tricks not exclusively confined to France. To develop this particular subject—greater in importance than at first appears—would perhaps lead me too far at present. But it is certain that various painters styled "illustrious" have used the names of their pictures as puffs.

The subject of a picture is as the fable of an epic poem. We must neither forget nor exaggerate its importance. It should be chosen not by the speculator, the mere man of business, but by the conscience and the temperament of the artist. Otherwise, it is absurd to expect a powerful production,—one of those works which if they be not placed quite beyond the reach of Time's hand are, at any rate, surrounded by a barrier of respect, preserved beyond the natural limits of duration and admired even when almost concealed by dust and deformed by decay.

Whilst it was the fashion to declaim violently against the corruption of the reign of Louis Philippe, to produce pictures entitled 'The Thirst of Gold' and 'The Decline of Rome' was certainly clever. M. Couture did not fail to seize the opportunity; nor did he forget, immediately after the Revolution of February, to advertise tremendously his 'Voluntary Enlistments.' As a matter of diplomacy, nothing could be better; but a sincere disciple of Art is generally less learned in the world's ways. The pencil should not be the parasite either of the power or the party of the day. At a period recently passed and nearly forgotten, when the upper classes of France, traditionally timid, were beginning to revive and to look around, astonished at finding themselves neither murdered nor spoliated, yet desirous that the terror necessary for the purposes of re-action should not die away, the spirit of speculation suggested to M. Muller a clap-net painting, much admired by wandering cockneys, representing the victims in prison preparing for the last departure of the *Revolutionary Cart*, with all possible circumstances of horror grouped. Here evidently was an appeal to large orders and honorary crosses; but Art has certainly a right to complain of desertion. What was this successful young artist about until then? What was he doing some ten years ago? His pencil—equally fortunate in its choice of subjects—was busy in producing provoking little portraits of Lorettes, delicately decked-out dames, Bacchantes crowned with ivy, nymphs nestling amidst roses, white Odaliskes touched with the vermillion tints of life, like snowbeds in the setting sun—all things, in fact, that in placid times appeal to the public of the Boulevards and the Quartier Breda. This, it seems, was his true vocation: for, the terrible scene once painted and patronized, he fell into the old rut again. But he has acquired aristocratic tastes, and bestows his meretricious colours only upon ladies of high degree. Meanwhile, another artist, M. Verrier, witnessing his triumph, entered the lists and endeavoured to surpass him. He claims the doubtful honour of producing that prodigious libel representing on the public Place of Clamecy massacres that never took place and crimes committed on victims who never existed. But, as a speculation, this went beyond the mark. Six months previously M. Verrier

would have become illustrious and the Great Cross would have shone upon his breast. He had speculated on the rise of stock, which was going out of favour in the market. He had well understood what kind of originality is prized by the French public; but whilst he was laying on his colours new "dodges" were becoming necessary.

B.

OUR WEEKLY GOSSIP.

Chancellors of the Exchequer are supposed to be great arithmeticians;—but they are liable to err, even when dealing with figures. During the debate on the Stamp Law on Monday night, Sir G. C. Lewis entertained the House of Commons with some of that pleasant gossip about journals and their circulation, which the Elder D'Israeli would have called their "secret history." How the Minister obtained his information we do not know. As regards the circulation of the *Athenæum*, his figures were not derived from us. According to the report of the *Morning Herald* he credited us with a circulation of 45,000 copies; according to the *Times* he gave us no more than 7,200. Both are wide of the fact; one being far above, the other far below, our circulation. The error, however, is not the thing of which we complain: the Chancellor of the Exchequer has the same right to guess at such a subject as any other man. We complain that his statement was so made as to leave his hearer and his reader to infer that he had our authority for his figures. Had it been made clear to us that public profit could arise from the exhibition of our ledgers,—we might have been induced to open up our private business to the Chancellor; but we had no desire to boast of our influence, and have no disposition to gratify idle curiosity. Those whom it most concerns, the great publishing houses, have some means of estimating the extent of our several impressions,—the Unstamped Weekly edition, the Stamped Weekly edition, and the Unstamped Monthly Parts. They know that the proportion between stamped and unstamped editions is pretty well maintained in all cases;—this proportion, they also know, is only varied in our own case by the addition of our Unstamped Monthly Parts; and as the extent of our stamped circulation is made known by the Government Returns—as 161,000 for the past year, or about 3,100 per week—they can calculate, more or less closely, without the misleading light of the Chancellor of the Exchequer, the extent of our several impressions.

The anniversary dinner of the Literary Fund is announced for May the 22nd, with the Bishop of Oxford in the chair.—Grass will not grow under the feet of the Literary Committee. They held their first meeting on Tuesday at the Society's rooms,—and will meet again, we understand, on Tuesday next.

A more striking argument in favour of a new and effective organization of Literary interests could scarcely be adduced than the fact—hitherto unsuspected in literary circles—of a law in the Colonies to legalize piracy in books. Such a law is infamous. We will not affect an unworthy moderation in face of such a wrong. A regulation, which permits the Queen by an Order in Council to confiscate intellectual property, is at once impolitic and preposterous. Why should brain-work—the most subtle and ideal of all possessions—be alone subject to a jurisdiction so anomalous! But our wise legislators have provided, as they say, for "the protection of the rights of British authors"! They allow American pirated editions to enter Canada; but only after paying a duty of 12½ per cent. Thus, on a pirated copy of 'In Memoriam,' of which the trade price is 8d., a toll of one penny is—in theory—levied for the benefit of Mr. Tennyson. But we should like to hear that the Laureate has received a single farthing from the Canadian custom-house as toll on 'In Memoriam.' We never yet heard of a literary remittance from such a quarter. The wrong, however, does not begin or end with Canada:—it is in America that the evil shows itself in the most hurtful shape; in creating a public feeling against a copyright law with England. The New York reprinter, in op-

posing copyright, is fighting not merely for an exclusive home market, but also for a market abroad. As far as regards literature and literary interests, England is without dependencies, and our Colonial empire is already "annexed" to the Great Republic. Is this the beginning of the end? Must we continue to suffer this injustice? Has literature no voice—honour no champion—policy no advocate?

We are glad to see that a post on the *London Gazette* has been given to a son of Mr. Charles Knight.

Wolff's theory of the Homeric poems, we hear, is about to be applied to Shakspeare by an ingenious American lady, one Miss Bacon. This iconoclast starts with the theory that no man of Shakspeare's birth and training could have written the plays which bear his name. Such a series of plays, from such a man, would be, she says, a series of miracles, and would have made their author the best known man of his time. She attributes most of the plays to Bacon and Sir Walter Raleigh; and has contrived, we understand, an ingenious scheme for reconciling such a supposition with the well-known facts in these men's lives. Miss Bacon's book will be a literary curiosity, if nothing more.

On the question of the Protectorate of Richard, Duke of Gloucester, afterwards Richard the Third, Mr. Gairdner writes to supply an omission in Mr. Nichols's recent work:—

"Mr. Nichols says, he has discovered, from the Patent Roll of Edward the Fifth, that the Duke of Gloucester, afterwards Richard the Third, was Protector as early as the 14th of May. I am surprised that he did not discover documents proving the Duke to have been Protector at an earlier date. One of these is in the manuscript volume, Harl. 433 (f. 226), and is dated the 2nd of May. But there is an entry on the Patent Roll (Membrane (2) on the dorso.—See 'Calendar of Patent Rolls' in Report IX. of Deputy-Keeper of Public Records,) of a Commission of the Peace for the county of Somerset, dated the twenty-first day of April, in which the Duke of Gloucester is mentioned as Protector of England. These dates would be of comparatively little importance did they not point to this conclusion:—whatever view may be taken on the debated subject of Richard's character, he must have come honestly by the title of Protector. There was no juggling or usurpation in his assumption of that office at all. On the 2nd of May neither he nor the King had yet arrived in London; on the 21st of April the King was at Ludlow and the Duke, most probably, in Yorkshire. The title of Protector, therefore, must have been conferred on Richard, in his absence, by the Council, probably in conformity with the known desire of Edward the Fourth, who, it is stated by Polydore Virgil, bequeathed the care of his children to his brother Richard.

"I am, &c., JAMES GAIRDNER."

"5, Cumberland Terrace, Lloyd Square, March 17."

Mr. George Scharf will commence in April a course of Lectures at the Royal Institution on Christian Art, with illustrations, from the earliest times to Raphael and Michael Angelo.

Our attention is drawn to the circumstance, that the ordinary postage-stamps are so ill made as to rub off letters very easily, and thus cause much annoyance and expense. Why not use the Post-Office envelopes? These latter are cheap and beautiful, and the stamp cannot be removed.

The following note tells its own story.—

"Dr. Madden has inserted in his 'Literary Life and Correspondence of Lady Blessington' a letter—vol. ii. p. 363,—mentioning my kinsman, Godwin Swift; and, *a propos* thereof, appended—vol. iii. p. 490 *et seq.*—five pages of our family history, in almost every point erroneous. His mistakes being important to us, (and, for correctness sake, to the public,) I am desirous to set them right, without waiting for his next edition.—1. The Swifts of Yorkshire (Swyfte, Swyfte, Swift) are not of Belgic origin. Neither 'Swift,' nor 'Suift,' nor any such greasy patronymic, prevailed among our Norman progenitors. My kinsman and myself have adopted one of our early orthographies, that we may escape from the publicans and prize-fighters who illustrate the Trades' Directory.—2. Our common ancestor, Godwin—the Palatine Attorney-General—had (not two only, but) four wives; the third of these ladies, *Hannah Deane*, being the ancestress of my branch. She was a daughter of the Regicide Admiral, and therefore eminently obnoxious to her husband's family, whose '*entente*' toward regal decapitations and revolutionary standards was not more '*cordiale*' than is mine own. His fourth (and last) wife was *Eleanor Meade*, a daughter of Col. Meade, the ancestor of the Clanwilliams. But Dr. Madden has let himself be strangely misled in abridging the old Tetragrammist's bead-roll of wives, and in chronicling a *Miss Delgarno* among them.—3. Neither my father nor my lamented son were named 'Godwin.' My father was not born in Hereford; neither, though he pleased himself with composition in prose and in verse, was he a professed 'pamphleteer.' In all his long life, he was not a bookmaker; and certain I am that he never wrote a line for money. His '*Gamblers*' was

not a 'pamphlet,' but a *poem*; satirical, of course,—as its subject denoted and deserved. His '*Letter to the King*' was a *poetical* homage to George the Third on His Majesty's visit to Worcester in 1788, without a syllable about Col. Lenox, 'slandrous' or otherwise. His affair of honour with that noble antagonist in the following year ought to have suggested to Dr. Madden that my father, however needlessly he might provoke a challenge, was not the man to 'decline' one.—4. My brother, Deane Swift, (so named, as his uncle, his grandfather, and his great-grandfather had been, after the Regicide Admiral) did not quit Ireland in '98 without returning thither. On the contrary, he 'returned' in 1799, remained there several years, revisited it several times, and is now to be 'heard of' at his residence in Dublin. It may be, that his '98 politics were not unlike those which have since that period helped many an Irish patriot into place and preferment; but, whatever they were, they did not 'compromise' me either with the Protestant Government or with my comrades in 'The Lawyers' Corps. Neither did he ever in my hearing own to the authorship of '*Marcus*,' and therefore I could not have corroborated General Arthur O'Connor's ascription thereof to my brother's pen.—5. Finally, I was not educated at Oxford; and I can confidently assure Dr. Madden, not only that I did not 'die in my great trust about seven years ago,' but that I am at this moment *inter vivos*, his and your very humble servant,
EDMUND LENTHAL SWIFTE."

"70, Lansdowne Place, Brighton, March 12."

Lieut. Vetscher, of the Dutch Grenadiers, writes to protest against an assertion in the *Athenæum* that some of his countrymen are a little vain-glorious in the right of their historical heroes. We admit his retort courteous, and abandon the Wellington statues—especially the one at Hyde Park Corner—to his anger. Indeed, we will offer no opposition to any new Tromp or De Ruyter who may undertake to storm Constitution Hill and carry off that spoil of war. It could not find a more appropriate resting-place than Holland. Yet, if we needed an authority for our innocent allusion to the Dutchman's pride, we could not find a readier than Lieut. Vetscher himself: "We acknowledge very freely," he writes, "that it was formerly the fashion, and still remains so in many of our modern school-books, to exalt the virtues of our ancestors in a preposterous manner, to exaggerate our victories and screen our defeats from the public view, and to set ourselves up for the chosen nation *par excellence*. But a more serious and profound study of history has taught us to see that our heroes and great men had their weak sides and failings, like our own selves."—Will Lieut. Vetscher suffer us to add, that this is what *we* said of his countrymen. For the rest, we have too deep a respect for the race of Tromp, Erasmus, and De Witt, to allow a much more angry correspondent than Lieut. Vetscher to hurry us into any expression likely to wound an honourable susceptibility.

The Treasurer of the Assyrian Excavation Fund has just received a letter from Mr. Loftus, dated Kouyunjik, February 12, from which the following is an extract.—"The S.E. Palace at Nimroud has just yielded a large collection of beautiful ivories, relics of a throne or furniture, &c. They have been fitted together by means of rivets, slides, and grooves,—a complete Assyrian puzzle, and somewhat dangerous to sit on! Many exhibit traces of gilding and enamel, and were probably broken up for the inlaid gold and jewels with which they were once adorned. There is a decided Egyptian-Assyrian character about the whole collection, perfect Egyptian heads being mixed with Assyrian Bulls and Lions. The heads were very fine indeed. Some of the articles were maces, dagger-handles, or portions of chairs and tables (for we have undoubted evidence of the Assyrians using such). Figures back to back form a shaft, and support a flower-headed capital. There are also boxes, and a vase,—all elaborately carved. The Assyrians were adepts in veneering, the layers being highly ornamented with sacred emblems and lion-hunts. Phœnician inscriptions are found on two or three articles. They were found strewed at the bottom of a chamber among wood ashes. They had escaped the flames, but are blackened from lying among smouldering wood. I have got up a horse-load of objects, and am fitting them together as fast as possible, preparatory to boiling them in gelatine. The whole room is not yet explored, as the earth must first be removed from above. I propose going down to-morrow."

In a collection of autographs, dispersed by Messrs. Puttick & Simpson during the week, the following lots realized the prices affixed:—a letter of Joseph Addison, 2*l.* 8*s.*—a letter of Lord

Bacon, enlarging on the happiness of having a good wife, 15*l.*—a letter of James Boswell, 3*l.*—a letter of Robert Burns, 4*l.* 15*s.*—a letter of Calvin, 9*l.* 9*s.*—a letter of the great Lord Chat-ham, inclosing verses, addressed to David Garrick, 13*l.* 10*s.*—two letters of Oliver Goldsmith, 15*l.* 12*s.*—two letters of Mary, Queen of William the Third, 7*l.* 18*s.*—a short letter of Sir Isaac Newton, as Master of the Mint, declining to recommend to mercy a convicted counterfeiter of the coin, then under sentence of death, 4*l.*—three letters of Sir Richard Steele, 8*l.* 1*s.*—a letter of George Washington, 5*l.*

A project is entertained in Paris for supplying that city with pure spring water, instead of that taken from the Seine. It is contemplated to divert the waters in the valleys of the Marne between Chalons and Épernay, and conduct them by means of a gigantic aqueduct into the city. By this means, a supply of 21,600,000 gallons per day of twenty-four hours could be delivered throughout Paris at a height of about 250 feet. The scheme is under the consideration of the Municipal Commission.

A Berlin Correspondent writes to the *Leader* a piece of startling news:—"Rauch, the sculptor," says the letter-writer, "has just shown me a letter from Athens, in which it is stated that the Temple of Juno has been excavated at Argos, and as many as three hundred fragments of statues have already been recovered. Remember that this temple was, in the life of Polycletes, what the Parthenon was in the life of Phidias—that it contained the masterpieces of his art, at a time when Art was at its apex of glory—and you can form some idea of the thrill which this announcement will give every lover of sculpture. The Greek Government will not, it is supposed, sell the treasures, but it has no money to devote to their restoration. Casts are to be taken of them; and ere long we may hope to feast our eyes on works worthy to be placed beside the Elgin marbles!"—We trust the intelligence is true: but we fear the enthusiasm of the writer leads him to exaggerate the value of the recovered treasures.

The Registrar-General's Quarterly Return of Births, Deaths, and Marriages in England, during the autumn quarter terminating December 31, discloses features relative to the population, and the manner in which it is affected by the War and the high price of provisions. The general aspect of the returns is unfavourable. The marriages, though above the average, were proportionally fewer than the numbers in the corresponding seasons of the four previous years. The births are below, the deaths above, the average. Cholera, which prevailed epidemically in the summer, when it subsided left the population unhealthy; and while the country suffered, the towns have experienced an unusually high rate of mortality. 146,459 births were registered in the quarter. This number slightly exceeds the numbers in the corresponding quarter of 1853; but the rate is less than the average, in the proportion of 3:111 to 3:143 births per cent. per annum on the population. 38,150 marriages were celebrated in the three months that ended on September 30, 1854; or 76,300 persons were married; which is at the annual rate of 812 marriages to every 100,000 persons in the population. The average of the quarter for the preceding ten years was 804. The marriages declined in every division except the northern, and in Wales and Monmouthshire; in Lancashire and the West Riding of Yorkshire the decrease was considerable. It is remarkable how small a proportion of our troops die in battle during a campaign. The Registrar-General observes:—The army at the census of 1851 consisted of 142,870 officers and men; of whom 66,424 were stationed in the United Kingdom, 2,948 on passage out or home, and 73,498 abroad in the colonies and in the East Indies. The annual mortality of men in civil life at home, of the corresponding ages, is at the rate of 9 in 1,000, but the mortality of the troops at home probably exceeds 15 per 1,000; and the mortality of the troops abroad, and chiefly in the tropical climates, is such that the mortality of the whole army is said to be at the rate of 30 in 1,000 in time of peace. At these rates, 3,290 officers and soldiers die abroad annually, of whom

about 2,193 belong to England; whose names, whatever their connexion with property may be, never appear on the English registers. In the time of war, the deaths in the army abroad are raised in two ways: by the augmentation of the forces, and the increased rate of mortality from wounds, and from the diseases that have hitherto been incidental to warfare in the field. Thus, the mean strength of the British force—officers and men—in the Peninsula was 66,372; the deaths during the 41 months that ended May 25th, 1814, were 35,525, of which only 9,948 happened in battle or as the consequences of wounds. 225 per 1,000 of the 61,511 men were, on an average, upon the sick list; and their annual mortality was at the rate of 161 per 1,000.

BRITISH INSTITUTION, Pall Mall.—The GALLERY for the EXHIBITION and SALE of the WORKS of BRITISH ARTISTS, is OPEN DAILY, from Ten till Five. Admission 1s.; Catalogue 6d. GEORGE NICOL, Secretary.

The PORTLAND GALLERY, 316, Regent Street (opposite the Royal Polytechnic Institution). The EIGHTH ANNUAL EXHIBITION of the NATIONAL INSTITUTION of FINE ARTS is NOW OPEN from Nine till dusk. Admission One Shilling. Catalogue Sixpence. BELL SMITH, Secretary.

ADAM and EVE.—This great Original Work, by JOSEPH VAN LERIS, is NOW ON VIEW at 57, PALL MALL (opposite Marlborough House), from 11 to 6 daily.—Admission, 1s.

ROYAL GALLERY OF ILLUSTRATION, 14, Regent Street.—Additional Pictures. The Battle of Invermarnock, and Great Storm in the Black Sea.—The Cavalry Charge at Balaklava, Battle of the Alma, Pictorial Map of Sebastopol, &c., are also exhibited in the Diorama, illustrating Events of the War.—The lecture by Mr. Stoecker, daily at 3 and 8.—Admission, 1s., 2s., and 3s.

PATRON: H.R.H. PRINCE ALBERT.

ROYAL POLYTECHNIC INSTITUTION.—MONDAY EVENING, the 20th inst. LECTURE by J. H. PLEPPER, Esq., on the CHEMISTRY of the NON-METALLIC ELEMENTS. Tuesday Evening, important LECTURE on SIEGE OPERATIONS in connexion with SEBASTOPOL, by E. JERVELL, Esq., late Captain Grenadier Guards.—TELEPHONIC CONCERT by INVISIBLE PERFORMERS.—Thursday, DRAMATIC READING, by Mr. HUGH LESLIE, RICHARD the THIRD.—Wednesday and Friday, ASTRONOMY, by Dr. BACHOFNER, with appropriate music.—The last three performances of the TYROLESE MINSTRELS, Monday, Tuesday and Friday Evenings.

SCIENTIFIC

SOCIETIES.

ROYAL.—March 15.—The Lord Wrottesley, President, in the chair.—‘On Zinc-Ethyl,’ by Dr. Frankland.—‘On the Magnetic Medium,’ by Prof. Williamson.

ASTRONOMICAL.—Feb. 9.—Annual General Meeting.—G. B. Airy, Esq., President, in the chair.—Messrs. F. Brodie, H. S. Ellis, W. Lethbridge, H. W. Buxton, J. T. Owen, and C. H. Wild were elected Fellows.—The Report of the Council was read, and the accounts were passed. Notices of the deceased Members were read, and the following officers were elected for the year:—President, M. J. Johnson, Esq., Radcliffe Observer; Vice-Presidents, G. B. Airy, Esq., Astronomer Royal, Augustus De Morgan, Esq., John Lee, Esq., LL.D., Admiral W. H. Smyth; Treasurer, George Bishop, Esq.; Secretaries, Warren De la Rue, Esq., and Capt. R. H. Manners, R.N.; Foreign Secretary, J. R. Hind, Esq., Superintendent of the Nautical Almanac; Council, Messrs. A. K. Barclay, R. C. Carrington, Rev. G. Fisher, J. Glaisher, R. Grant, Rev. R. Main, Rev. Baden Powell, W. Rutherford, Rev. R. Sheepshanks, and W. Simms.

ROYAL SOCIETY OF LITERATURE.—March 14.—Sir John Dorant, V.P., in the chair.—Mr. Vaux read a paper by the Marchese Gargallo-Grimaldi, ‘On a Painting which occurs on an unedited Greek Vase,’ representing an altar between two Doric columns surmounted by a mystical figure, probably intended for a Siren. The Marchese considered that the columns have a sepulchral meaning, and that the whole picture indicates a cemetery in some rural site. The Marchese pointed out the direct analogy which exists between the Siren, as shown in this painting, and the Harpy-Figure on the Monument discovered by Sir Charles Fellows at Xanthus. Both figures are, indeed, formed of the bust of a young woman with the wings, legs, and claws of a bird. It is from the funeral and infernal character, which the ancient legends attributed in common to the

Sirens and Harpies, that their sculptured images become so appropriate as the ornaments of Cenotaphs and Tombs.

STATISTICAL.—March 15.—Anniversary Meeting.—Thomas Tooke, Esq., V.P., in the chair.—Dr. Guy, one of the Honorary Secretaries, read the Report of the Council on the progress of the Society during the past year. The Report was a satisfactory one, and entered with some detail into the finances of the Society. It called attention to the increasing circulation of the Society’s Journal, as evidenced by an increase of sixty-five per cent. in the sales of the last year as compared with those of the previous year; and alluded to the success which had attended the publication of a General Index to the Society’s Journal. The expense of compiling and printing an Index,—which had analyzed every paragraph of the Journal from its commencement, giving abstracts of every paper it contained,—had been considerable; nevertheless, it had not only defrayed the expense of its publication, but had created a new source of income to the Society. The Council attributed much of the success which attended this financial experiment to the active and zealous services of Mr. Cheshire, the Acting Secretary of the Society.—Encouraged by the satisfactory state of the Society’s finances, the Council had sanctioned a considerable expenditure for the compilation of an Alphabetical-Classified Catalogue of the Library,—which work had been entrusted to the able and experienced hands of Mr. Wheatley, by whom the Index had been prepared. It had just been completed, and was submitted to the Meeting. The Report briefly explained the principles upon which the Catalogue had been compiled, which were similar to those of the ‘Catalogue of the Library of the Institute of Actuaries,’ recently described in the *Athenæum* [No. 1415]. The library contained 2,000 distinct works, exclusive of Blue Books, and 2,600 volumes. During the progress of the work much attention had been given to the completion of defective sets. The evening meetings of the Society since the last Anniversary Meeting had been well attended, and many communications having a direct bearing on public questions of the day had been read and discussed. The Council adverted to the Meeting of the British Association for the Advancement of Science at Liverpool in September, 1854, under the Presidency of the Earl of Harrowby; and drew attention to the success which had attended the meetings of the Statistical Section. The great prominence given to statistical knowledge in the inaugural address of the noble chairman had given a new impulse to that science. The Report concluded by reverting to the loss which the Society had sustained by the decease of Léon Faucher, one of its Foreign Honorary Members, and the still more severe loss by death of one of its original Fellows, Mr. Joseph Hume, M.P., a Member of the Council; who during a long life of sustained industry did much to demonstrate the value of accurate statistical information, and to apply it to the purposes of good government. Lord Harrowby moved, and Col. Sykes seconded, that the Report be adopted; and a ballot having been taken for the President, Council, and officers for the year ensuing, the following was declared to be the list, the names in italics being those of the new Members of Council.—President, the Right Hon. the Earl of Harrowby; Council, Dr. J. Bird, Sir J. P. Boileau, Bart., the Right Hon. Lord Viscount Ebrington, W. Farr, the Right Hon. Charles William Earl Fitzwilliam, J. W. Gilbert, the Right Hon. W. E. Gladstone, W. A. Guy, the Right Hon. the Earl of Harrowby, J. Heywood, Dr. T. Hodgkin, J. G. Hubbard, C. Jellicoe, W. G. Lumley, the Right Hon. H. Mackenzie, H. Merivale, H. Mann, W. Newmarch, the Right Hon. Lord Overstone, the Right Rev. the Lord Bishop of Oxford, the Right Hon. Sir J. S. Pakington, R. A. Slaney, T. H. S. Sotherton, the Right Hon. Lord Stanley, Col. W. H. Sykes, T. Tooke, Lord H. G. Vane, J. Walter, Lord Wharndcliffe, the Right Hon. the Lord Wodehouse, the Rev. E. Wyatt-Edgell; Treasurer, W. Farr; Honorary Secretaries, W. A. Guy, W. Newmarch, and W. G. Lumley.

ENTOMOLOGICAL.—March 5.—J. Curtis, Esq., President, in the chair.—Mr. Stevens exhibited a quantity of insects of all orders, forming part of the collection made by Madame Pfeiffer at Amboyna and Seram, and containing many fine new species.—Mr. Edwin Sheppard exhibited a remarkable variety of *Arctia Caja*, and a variety of *Triphaena Orbona* differing greatly in form and colour from the normal type.—Mr. Edward Sheppard exhibited one of the flossy silken bags imported from China as a covering to the ends of the hanks of silk in bales. Dr. Gray said he was informed each of these bags was formed by beating out a single cocoon.—The President announced that the subject proposed for the Society’s Prize Essay this year was the species of *Coccus* producing the lac-dye of commerce, and that Dr. Royle had offered to place at the disposal of any one who would take up the subject, the whole of the information thereon possessed, or possible to be obtained, by the East India Company.—It was also announced that the Council had favourably considered a proposition that the Society should publish a concise Catalogue of British Coleoptera, and, wishing to ascertain what support such an undertaking was likely to receive, invited communications on the subject from Coleopterists generally.—Mr. Newman read ‘A Note on the Habits of Eastern Butterflies,’—‘A Note on a South African Honey-Bee,’—and ‘A Note on a new Enemy to the Honey-Bee,’ in which he stated that a woodpecker (*Picus viridis*) had been seen at the entrance of a hive devouring the bees as they made their appearance. Mr. Westwood said it had come under his own observation that the house-sparrows, at a certain season of the year, when they had young and there was a lack of their usual food, ate bees with avidity.—Mr. Douglas read ‘A Note on Greasiness in Insects,’ to which several members added observations.—Mr. Janson read two notes, by Dr. Schaum, of Berlin, ‘On the *Heterorrhina bicostata* of Westwood,’—and ‘On the recent Descriptions and Figures of British Elateridae by Mr. Curtis.’ He also read some elaborations by himself on the latter subject.—Mr. Waterhouse read a note, by M. Henri Jekel, ‘On *Ornias sulcifrons*, Schönherr.’

INSTITUTION OF CIVIL ENGINEERS.—March 20.—J. Simpson, Esq., President, in the chair.—The discussion was renewed on Mr. Allen’s paper ‘On Steam and Sailing Colliers.’—‘On the Application of the Screw Propeller to the larger Class of Sailing Ships, for Long Voyages,’ by Mr. R. A. Robinson. The introduction of screw propulsion in 1839 by Mr. F. P. Smith, and the success he attained with the Archimedes, directed attention to that system for commercial vessels;—the Great Britain was an early instance of the application, and then followed the fleet of screw steamers established by Mr. Laming, for the trade between London and the ports of Holland. Thence the progress was so rapid, that at the beginning of 1854 above two hundred commercial screw ships were registered in the United Kingdom. Meanwhile, many attempts have been made for using large powerful screw ships on the long sea routes to India and Australia, but uniformly without success. The author’s object was to investigate the causes of this failure, and to suggest the means of attaining success.

SOCIETY OF ARTS.—March 14.—Prof. Donaldson in the chair.—‘On a New Method of teaching Drawing, involving the Principle of a New System of Architecture,’ by Herr Joseph Kumpa, of Dresden. By this proposition, as soon as a student could accomplish the drawing of a line tolerably straight, he was told to copy a square. When this was done, the square was divided into quarters, diagonals were drawn across it, and various mathematical figures were made, rapidly advancing into figures of some complication, curiosity, and beauty. From straight lines the pupil proceeded to arcs and curves, and eventually into some practice in the use and combination of the elementary colours. During the time he was carefully practising the drawing of the lines in every position, the mathematical nature of his copies was continually urging him to delineate correctly,—his appreciation of angles, power of measurement, and sense of form

and beauty were also at the same time fostered and developed. More or less attention would, of course, be paid to these elements according as the ultimate direction of the pupil's studies were mechanical, architectural, or artistic. Indeed, the system was principally intended for the education of those engaged in manufactures and the arts of design connected with them.—After the reading of the paper, the Secretary stated that he had received three communications,—from Mr. R. Redgrave, Mr. G. Wallis, and Mr. D. R. Hay. Mr. R. Redgrave entertained a favourable opinion of Herr Kump's method, provided it was not used to the exclusion of other means. The method was not, however, new in this country, having been largely practised by many teachers, although not perhaps so systematically as advocated in the paper.—Mr. G. Wallis illustrated the truth of the proposition by drawings executed chiefly by students of three months' standing in the Branch Elementary School of the Birmingham School of Art, where the system had been in operation twelve months,—but his own practice as a teacher had been based upon an analogous principle for fourteen years past.—Mr. D. R. Hay thought the method of teaching drawing a very good one for very young people, but he did not see any principle of a new style of architecture involved in it.

SYRO-EGYPTIAN.—*March 13.*—Dr. J. Lee in the chair.—Dr. Lee exhibited and made some remarks upon a small collection of ancient Maltese coins in his possession, upon which were certain well-known Egyptian subjects,—as the Egyptian Trinity—Isis, Osiris, and Nepth—Isis crowned by Victory—Osiris with two crowns, the lotus, &c.; also figures with extended wings, as in the objects in coloured glass from Egypt exhibited by Dr. Lee on a former occasion.—Mr. Marsden exhibited and read some remarks upon certain engraved plates illustrative of Egyptian archæology.—Mr. Ainsworth (in the absence of Mr. Bonomi) gave some account of Col. Rawlinson's discoveries at Birs-i-Nimrûd, illustrated by drawings by Mr. Bonomi. The terraced character of the Temple of the Seven Spheres was further illustrated by reference to the Tomb of Cyrus and the mounds of Mokamur, Abu Khamira, Tel Ermah, and others, described by Mr. Layard. The colours of the separate terraces, after the Chaldean planetary system, were illustrated by the description given by Herodotus of the seven walls of Ecbatana and the seven-bodied palace of Bahram Gur described by Nizami in his poem of the Heft Peiker.—Mr. Sharpe gave an account which he had received from Dr. Lepsius of the Inscriptions discovered in the tombs of the Sacred Bulls near Memphis; those which contain dates begin in the reign of Darius, and continue through the reigns of most of the Ptolemies. It seems that the funerals of the Bulls followed one another at intervals of about twenty-three years each, more or less. As many of them mention the number of years between the two funerals, they would be of use in settling the chronology of the Ptolemies, if it were not already more certainly known from the short work of Porphyry. The inscriptions which mention the funerals of the Bulls in the earlier reigns where such help to the chronology would be useful, unfortunately contained no dates.—Mr. Sharpe gave an account of the progress made by Mr. Horner in determining the rate of accumulation of the alluvia of the Nile by excavations made at Heliopolis for that express purpose.

MEETINGS FOR THE ENSUING WEEK.

- MON.** Geographical, 8½.—Extract of a Letter received by Admiral Smyth from Admiral Mathieu, on the Progress of the Survey in the Straits of Gibraltar.—Despatch from London respecting Dr. Livingston's Exploration in Central Africa.—On the Ruins of Tich, near the Lake of Peten, in Central America, by Don Vicente Castellanos.
- TUES.** Institution of Civil Engineers, 8.—Discussion on Mr. Robinson's paper, 'On the Application of the Screw Propeller to the larger Class of Sailing Vessels.'—On the Construction of Railway Crossings and Switches, by Mr. Burleigh.
- WED.** Society of Arts, 8.—'On the Utilisation of the Molten Mineral Products of Smelting Furnaces,' by Dr. Smith.
- THURS.** Society of Antiquaries, 8.
- FRI.** Royal Institution, 8½.—'On the Application of Chemistry to the Preservation of Food,' by the Rev. J. Barlow.
- SAT.** Royal Institution, 3.—'On the Principles of Chemistry,' by Dr. Gladstone.

FINE ARTS

Hints on Village Architecture: being a Selection of Designs for Schools, Cottages, and Parsonage-Houses, adapted for Rural Districts. With Plans, Elevations, and Estimates. By Henry Weaver. Bath, Holloway.

Mr. Weaver has furnished the plans not of impracticable castles in the air, but of tasteful cottages, adapted for earth, and capable of being built at a moderate cost. Nearly all the designs have already been executed, and are adapted for the use of the country builder who may not have had much experience in erections of an ambitious character. The plans rise from the simple gate-lodge to the larger and more ornamental school-house,—from the quiet manse to the elaborate rectory. A pair of labourer's cottages are also given, copied from the old timbered houses of the seventeenth century. The work will, we think, be useful; but we cannot say much for either the originality or beauty of the designs. The English porch should not be slighted, and the airy Swiss balcony might be easily grafted on the Gothic feeling of thoughtful detail and sheltered snugness.

Views in Norway. By James Randall, Esq. From Original Pictures, drawn on Stone by E. Ciceri. Paris, Colnaghi & Co.

THE unlettered Englishman's impression of Norway is represented in two words—*firs, snow*. The chartist,—that is to say, the chart-man, the geographer,—on the other hand, sees a country of more water than land,—a coast line jagged like a worn-out saw,—a series of headlands and promontories,—or, to speak by the card, fiords and fells. The poet, purposely keeping his impressions vague, and fonder of the balmy East than the chilling North, pictures snow-covered untrod mountains, miles of silver-pillared birch-trees and rock-strewn valleys, where the ermine burrows and the glutton hides. He sees torrents frozen into icy columns, and sheltered bays where the black Norse galleys once harboured. The sportsman, ruddy and not troubled by that carking meditation that drains the blood and bleaches the cheek, dreams only of endless salmon fishing—"Salmon, sir, upon my word, as long as this"—and of brawling mountain streams tenanted by huge artificial flies, bright as a tulip and hatched in Fleet Street. Lowest vision of all, is your poulterer's:—he, good man, beholds in Norway only a country that breeds grouse and ptarmigan—12s. a couple, trussed ready for roasting—"Nice side dish, sir". To correct these errors and widen this knowledge, comes Mr. Randall to our rescue, with some dozen drawings, and a few pages of guide-book "letter-press" bound up in one goodly broad folio, too big to carry, but not too big to lift. These sketches seem to be the result of a summer's salmon-fishing among the Fiords,—the consummation, in fact, of an angling and artistic tour through Norway in company with the Earl of Leicester, in 1853. The artist, apparently an amateur, claims to be a novice, and begs forbearance from the critics on that ground—(strange, that men who have walked through fire and beheld death in every one of its ghastly changes, should dread so much the mere prick of a pen!). For ourselves, we have no wish to put our pen to such an office, but rather to stroke the writer with the feather,—for the book is well done, and needs no extenuation. We really see no reason why Mr. Randall should stand at the bar *in formâ pauperis*, or meekly jostle with the tipstiffs, when he has every right to a seat upon the Bench. The drawings are, it may be, somewhat of the old stamp—the dark, heavy pencilling school,—and sometimes want breadth of light and delicacy of outline; but they

are still creditable to the artist, and interesting as early gleanings of a land not yet overmuch visited by the pencil or the brush. If the views are not brilliant, they are at least broad,—if not vigorous, yet characteristic,—if not full enough of atmosphere, at least grand, substantial and firmly worked out.

The chief features of Norwegian scenery are its rocks and fiords. Its lesser characteristics are, its valleys, passes, streams and torrents. Perpetual snow and unfading forest,—ceaseless rushings of water, pouring from height to depth,—cliffs, towering thousands of feet from the bright level of the dales, and everywhere rising into the unchanging blue of the sky and the untarnished whiteness of perpetual snow. The Tyrol, Wales, Switzerland and the Highlands unite to form Norway,—and from these materials springs a fifth something unlike all its four ingredients. Sombre, and not laughing, are its lakes, flashing like glimpses of heaven through granite bars of purgatorial mountains, swept fiercely and ceaselessly by snowy sheets of waterfalls. Its snowy heights are not sharp, angular, crystal peaks, like the Schrecken Horn, the Wetter Horn, or the Finster Horn,—but loom in broad, round bluffs and shoulders, as if smoothed by levelling storms; and on these lie great dark tombs contrasting the wide shrouds of eternal snow, like grave-sheets never to be lifted till they melt and shrivel at the sound of the doom trumpet.

In opposition to these solitudes, the fiords run like bypaths of the sea,—120 miles inland; so that the ocean moans among the forests, and pine-trees rise as if from the sea-sand. Beaconed headlands, iron-bound coasts, rocky islets, and looping bays in which the North Sea chafes, diversify the Norwegian shore as far as the Baltic. Norway is a land of free yeomen and hardy fishermen, rude hunters, rough woodmen and swart miners,—men who live on sawdust bread and salmon of their own hooking, who wrestle with bears and buffet the waves of the Baltic, snatching their precarious food from the waves and tides.

The whole west coast of the Scandinavian peninsula Mr. Randall describes as scooped into small rocky headlands, very dangerous to the boats of Christiansand and Bergen Stavanger and Vardol, had not Nature, when she left these rocky piers projecting into the waves, surrounded them with bays and harbours of refuge. 1,328,721 inhabitants people this country, covering four times the area of Scotland, and live amid these high tablelands, rocky gorges, deep lakes and magnificent cascades that group round the great Skagastöls-rind mountain, that rises 8,390 feet above the sea level,—perpetual snow in this latitude commencing at 4,000 feet. Winter dies here in a day, and spring leaps to life like Minerva, having already reached its full maturity.

Norway is little cultivated, and the husbandmen adhere to old customs, and, therefore, also to old abuses. But the unsown pine grows on the mountain slopes and the birch in the valleys, and below spread the sandy fields of barley, hemp, and flax. The reindeer and the goat mingle with the herds that the wolf and the bear devastate. Such are the changes in these northern seasons. In the winter the bear sleeps and the wolf prowls round the folds. In May, all is life and freshness, and the peasants drive the rejoicing cattle into the flowery meadows, and in the June heats up to the shady and grassy heights; but all night long, when the farmer is quaffing his birch wine, the fishermen of Cape Stadt and Luffoden are following the cod and the herring, and piling up the black lobsters that will ripen into scarlet before they reach our London tables; when day dawns the peasant, who now rests by the fire, will be guiding the heavy timber-floats from the forest river down to Drammen or Christiania (coffins for England, and floorings for houses not yet contemplated). Below the river glitter the fisherman's brothers, the miners, dusted with silver or, goblin-like, azure with cobalt. We must not pause to describe beautiful Christiania,—busy Bergen, bristling with masts,—or regal Drontheim, where Saint Olaf sleeps. We must not stop to talk of Harold Harpaauger or Bernadotte,—nor to speculate on the possible re-

union of Norway with Denmark. Sheriffs and Vikings—tidal law and storthing—we must pass inexorably by.

The scenes chosen for illustration by the author are—the Gousta Fjeld, the Rinckan Fos, Kroglevan, the Hardanger Fjord, the Skjarven Fos, Vossevangen, the Sör-Fjord, Oifjord-Vand, Borgund Church, the River Lierdal, the Voring Fos, and the Valley of Torresdal. These views are grand mountain-passes, threaded by rock-encumbered, foaming streams, chafing, fretful, or furious. In some instances the foregrounds seem strewn with the building materials for another world, or are cleft in two by the crystal blade of a clear, keen, swift river. The scenery is a little Dantesque; but on the whole has more of a Harold the Dauntless character;—pine logs span the streams, but no ruins crown the rocks. No wonder the Norwegian Norsemen sought the warmer lands of the South, where sweeter-voiced birds than the eagle sang and richer fruit than the cranberry grew.

The Elements of Aerial Perspective; or, Light, Shade, and Colour. By Wyke Bayliss, Teacher of Perspective. Reeves & Son.

This seems a useful little handbook for the young artist. The author announces that his object is not to teach mere technical details, but to point out in a few pages the higher principles of Art, and by a few clear illustrations of the laws of light and shade, to prepare the student for works of greater length and more scientific research. We are glad to see that the author acknowledges himself frankly to be a mere elementary teacher, as we have a strong aversion to those intellectual empirics, who profess to cure the most inveterate ignorance by a few simple pages of a universal instructor.

FINE-ART GOSSIP.—The Annual General Meeting of the Artists' Benevolent Fund for the Relief of Widows and Orphans was held at the Freemasons' Tavern on the 20th inst.,—Mr. Henry Twining in the chair; and it appeared, by the Report of the Committee of 1854, that during the past year 53 widows have been relieved to the amount of 796*l.*, and 32 orphans to the amount of 135*l.* 17*s.*

At a late sale at Messrs. Puttick & Simpson's, a book of pen sketches by Sir C. Wren was put up for auction. They were plans for an English Walhalla or monument to the memory of Charles the First, intended for erection in the neighbourhood of Windsor. The Parliament voted 70,000*l.* for the object; but the Second Charles, with his usual respect for his father's memory, embezzled the money, and spent it upon wine, women, dice, and fiddlers.

Among the suggestions offered to our notice on the question of how to prevent the sale of copies as originals, the following is worth consideration:—

"I have carefully read your remarks in reference to the practice now becoming so general, that of copying modern pictures and palming them off upon collectors as original productions. I think the fraud might be readily detected, if not entirely prevented, by the establishment of some office in London for the registration of pictures; and this might be made a self-supporting scheme by the adoption of a regular scale of fees. In the absence of any better constituted body, I would suggest that it might be placed under the control or superintendence of the members of the Royal Academy. The objects would be twofold:—first, the due and effectual registration of all pictures, giving the subject, exact size, &c., and also the address of the purchaser;—and in this case it would soon appear to be the interest of all picture-holders to have their property duly registered, and when any sale took place a transfer might be made out, the expense of which would be covered by a small fee; second, the authentication of any painting that may be sent to the office, and which may be certified by a clear and legible stamp at the back, and this stamp might be repeated whenever parties felt any doubt and wished to have their pictures again subjected to the test of a searching scrutiny. I have no faith in legislative enactments, but believe that a voluntary registration and stamping such as I propose would amply protect the public; and if artists and purchasers joined heartily, none but pictures which had been authenticated and vouched for would be offered for sale by our really respectable auctioneers and dealers (except, indeed, as avowed copies)."

Sir W. R. Gilbert's monument is to be a beacon erected on the rocks near Bodmin, 515 feet above the sea level, and to be seen from the neighbouring towns of Fowey and Padstow.

A high-art picture, by Van Lerius (D. Lirious

the wits call him), an eminent artist of the Belgian school, is now on view in Pall Mall, and will repay a visit. The scene represents Adam asleep under the forbidden tree (or a fruit-tree typical of it) and Eve lying beside him, watching him with a beautiful Guido-like, upturned face of unapproachable sorrow and tenderness. Behind looms Satan, clutching up in his arms the serpent whose form he assumed for the nonce, and clawing the air with livid talons as if already rending the pair in his loathsome and hateful grasp. His face is, perhaps, the least powerful part of the picture, in spite of his red eye-balls; and the artist has evidently more sympathy with Greek loveliness than Gothic vigour and expression. His vampyre wings are unnaturally heavy and awkwardly composed. In the background fire is breaking from the clouds, and the first storm devastates the trembling earth. The painting, as to touch, is thin and timid, and of the Scheffer character;—the flesh, as far as we could discern by the artificial light, brown and colourless, but with much want of power and *impasto*. There is still great beauty and much talent in a picture which aims at the highest aspirations of human and Christian Art.

France—or rather the Emperor of the French—seems resolved to keep all home-festivals as joyously as if there was no such thing as Crimea or Conference. For the 8th of May, a holiday is proclaimed in Orleans; when, and where, the new equestrian statue of *La Pucelle* is to be disclosed; and the *Hôtel de Ville*, with its restorations, to be inaugurated.

Great expectations are entertained at Berlin of Heide's group of ('Edipus led by Antigone.' The heads, it is said, are full of high tragic feeling; and Antigone's, in particular, is the very embodiment of the tenderness of a child for a disowned father. We know the feeling of the tragedian, for it is that which Shakspeare has thrown into Cordelia's love of Lear; but in her love, heightened by the forgetfulness of injury, the poet, however, had a thousand groupings in which to express his thought,—the sculptor has but one. Words are ductile as wax and changeable as colours; but stone is flinty, and a sculptor's error is irremediable.

The following, from the Author of 'The Island Empire,' tells its own tale:—"A Correspondent, at Pisa, has casually mentioned to me a discovery in glass painting recently made, by a common working mechanic, at that place. It professes to be a resuscitation of the ancient method of painting on glass, and may, perhaps, whatever its value, be interesting to yourself and to some of your readers. The designs are produced by the union of small pieces of coloured glass. These are joined by a species of cement, composed principally of glass in powder, which, in a short time, becoming hard and transparent, enables the artist to paint on it and hide all vestige of a seam. The discovery, however, on which the inventor prides himself the most is, that of an acid which completely removes the colour from the glass already painted, and leaves it free for the substitution of any other tint. I am told that the general effect of works produced in this manner is very beautiful."

MUSIC AND THE DRAMA

MUSICAL WINTER EVENINGS.—THURSDAY, March 29, Willis's Rooms.—Quartett, Op. 44, *Mohique*; Trio, Op. 99, Schubert; Quartett, No. 6, Beethoven; Solo, Violoncello; Duet for two Pianos, from 'Preciosa,' Mendelssohn and Moscheles. Artists: *Mohique* (first), Ernst (second) and Goffine, Hill, Piatti, Pauer, and Lindsay Sloper.—Tickets, 1*l.* 1*s.* 6*d.* (Guinea); to be had of Cramer & Co., Chappell & Co., and Olivier. J. ELLA, Director.

EXETER HALL.—SIR HENRY BISHOP.—AN EVENING CONCERT, upon an extended scale, of Sir Henry Bishop's Vocal Music, will take place at Exeter Hall, on TUESDAY EVENING NEXT, March 27, commencing at 8 o'clock. Conducted by Sir Henry Bishop. Programmes and Books of several Compositions now ready, price 6*d.*—Stalls (Numbered and Reserved), 7*s.* 6*d.*; Reserved Seats, 5*s.*; West Gallery, 3*s.*; Western Area, 2*s.* To be obtained at Mr. Mitchell's Royal Library, 33, Old Bond Street; at all the principal Music-sellers; and at the Office, 6, Exeter Hall.

'IMMANUEL'—Under the immediate Patronage of HER MOST GRACIOUS MAJESTY THE QUEEN, and the rest of the Royal Family, this Oratorio will be performed at ST. MARTIN'S HALL, on THURSDAY EVENING, March 29, for the benefit of the Home for Gentlewomen. Principal singers: Madame Clara Novello, Miss Amy Dolby, Miss Dolby, Mr. Sims Reeves, and Mr. Weiss. Conductor, Mr. HENRY LESLIE.—Tickets, 2*s.* 6*d.* 5*s.* and 10*s.* 6*d.*, are to be had at Jullien & Co.'s, 214, Regent Street.

NEW PHILHARMONIC SOCIETY, Exeter Hall.—The SECOND GRAND PERFORMANCE will take place on WEDNESDAY, March 28, under the special patronage of Her Most Gracious Majesty the Queen and His Royal Highness Prince Albert. The proceeds to be given in aid of the Funds of St. Mary's Hospital, Paddington. Programme: Beethoven's Symphony in C minor; Mendelssohn's Concerto in D; Weber's Overtures, *Oberon* and *Ruler of the Spirits*; Selections from *Comma*, C. E. Horsley; Part-Song, Reissiger; Chorus and 300 voices, Vocalists: Madame Anna Thillon, Miss Stabach, and Mr. Hamilton Braham; V.I. in Herr Ernst; Pianoforte, Mr. Lindsay Sloper. Conductor, Dr. WYLLIE.—Stall Tickets, One Guinea; Reserved Seats, West Gallery, 10*s.* 6*d.*; may be had at Messrs. Cramer, Beale & Co.'s; Messrs. Keith, Prosser & Co.'s; and at St. Mary's Hospital. Subscriptions to the Society, 2*l.* 2*s.*; West Gallery, 1*l.* 1*s.* Subscribers now joining will receive Two Tickets, to make up the number of Six Admissions, to which they are entitled for their subscription.

Mr. ALFRED MELLON respectfully announces, that on MONDAY EVENING, April 2, his FIRST GRAND VOCAL and INSTRUMENTAL CONCERT will take place at ST. MARTIN'S HALL, on a similar plan, but with an enlarged Orchestra, to the Performances given in the years 1853-4 by the Orchestral Union. Vocalists, Madame Clara Novello and Herr Forster, Soloists, M. Sauton and Mr. W. G. Cousins; Violin and Organist to Her Majesty. Conductor, Mr. Mellon. Stalls, 7*l.* 6*s.*; Reserved Seats, 3*s.*; Galleries, 2*s.* 6*d.*; Area, 1*s.* Tickets to be had of Messrs. Cramer & Beale, 201, Regent Street, and at St. Martin's Hall.

LYCEUM.—An original piece called 'A Cozy Couple' was produced on Thursday week. The scene is a comfortable parlour; its occupants, Mr. and Mrs. Dormouse (Mr. and Mrs. F. Matthews), have enjoyed the domestic comfort thus exhibited for twenty years. Tom Russellton (Mr. C. Matthews), however, appears, after a long absence, and introduces discontent. Acquaintance with the world and long travel in foreign parts have made him exceedingly fastidious, and by degrees he contrives to excite Mr. Dormouse to a strong desire to see life also. Things proceed so far that Mrs. Dormouse's consent is gained to a separation, that the two friends may go abroad together. But, of course, such consent is not a willing one, though the poor woman strives to make it seem so. It is in depicting this moral struggle that Mrs. F. Matthews wins an artistic triumph. The breaking heart and the compliant mien afford a contrast which was as naturally as it was effectively exhibited. Tom, rattling and roving as he is, cannot help being touched by the patient sorrow of the loving and submissive wife, and sets about the task of undoing all he had done. He loses no time in describing the inconveniences of travelling, and so exaggerates its distresses that Dormouse repents his hasty resolution. Tom, moreover, is converted to a sense of the happiness of having a home, and makes an arrangement to partake that of the "cozy couple." This little drama is both well written and well acted. It is, however, understood that the attraction of these *vaudeville* pieces is not equal to the expenses of the theatre, and that Mr. Matthews is about to retire from the management.

SADLER'S WELLS.—This house closed on Saturday its legitimate season. On Monday, Mr. Wright appeared in 'The Spitalfields Weaver,' and other pieces, and will represent for a week or two the characters with which the Islington public were pleased during last year's interregnum. It is expected, however, that the theatre will re-open under Mr. Phelps's management at an earlier period than usual, provided the political aspects of the time should undergo a favourable change. The theatrical world since Christmas has suffered as much from the war as from the weather.

MUSICAL AND DRAMATIC GOSSIP.—A note from Mr. Herbert in reference to our strictures on the reported *Royal Academy Concert*, assures us that, as we supposed, his appearance there was merely as an assistant. By such extraneous engagements at performances which are in no respect obligatory, the *Academy* announces itself a choral and orchestral school, deficient in presentable *solo* singers. What a contrast, we must for the hundredth time repeat, to the *Conservatoire* of Paris!

Mr. Ella laid down the law in the programme, to which we last week referred, to his own confusion; since (in *Irish* comment on the passage quoted and protested against by us) his third *Winter Evening* was enlivened by a *solo* Quartett by Dr. Spohr, with which the majority of Mr. Ella's guests were unacquainted, and by the *Adagio* in Mendelssohn's early Pianoforte Quartett in F minor, which was new, we believe, to everybody. Both compositions were eagerly welcomed, because they were interesting; and not the less eagerly, because they were novelties. If

caterers would exercise a more vigorous discretion, pure of extraneous influence, in judging for their audiences, and in accepting or rejecting, without fear of great names or favour to great potentates, whether the latter be patrons or critics—we think this novelty question would prove no such Sevastopol, hard to settle for “good and all,” as timid, indolent, or incapable managers have been in the habit of describing it.

The prospectus of a new musical undertaking, which M. Benedict and Mr. Henry Smart combine in endeavouring to establish, is before us. It is to bear the name of “The Vocal Association,” its nature is defined in the following extract.—

“It is almost unnecessary to point out the great store of music expressly composed for this style of performance by the older Italian, and the older and modern German writers. From these sources may be gathered an almost unlimited supply of compositions, both sacred and secular, in every variety of style, and possessing a very high degree of beauty and attractiveness. From the English school, also, a large number of works of this nature may be cited, as distinguished for a remarkable, and indeed, in their particular style, unsurpassed amount of merit. It is as needless also to do more than refer to the exquisite effects producible with this species of music when sung by large choral bands, which have been trained in intonation and all the varieties of light and shade, with the skill and patience necessary for the task. Every one has heard, at least, of the almost fabulous marvels of this kind of perfection attributed to the choir of the Sistine Chapel of Rome. As a more familiar example may be mentioned, the band of vocalists who, with the title of ‘The Cologne Union,’ so lately delighted the London public during two successive seasons, by a style of singing which, though sufficiently common in Germany, was as entirely new as charming in this country. Associations of the same kind, indeed, under the name of ‘Gesang Verein,’ abound throughout Germany. In Berlin, in Dresden, in Vienna, in Leipzig, they are found in the highest perfection. Scarcely any town, even of minor importance, is without its Song Association; while in the larger cities, such is the rank these Societies occupy in public estimation, that the greatest musicians of the place and time have often been proud to enrol themselves among their number, to produce compositions for them and to direct their rehearsals.”

—We need not analyze too closely the provisions and pretensions here stated. We wish the new institution all good fortune; one element for success is already insured to it, in the singular modesty and cheapness of the terms of subscription.

The lessee of Drury Lane has advertised that “it is literally, physically, vocally impossible that Mdle. Jenny Baur can longer continue to sustain the arduous part of *Catharine* every successive evening,” and withdrawing ‘*L’Etoile*,’ has fallen back on ‘*Guy Mannering*,’ with Mrs. Selby as *Meg Merrilies*. Had Mr. Smith taken any musical counsel in regard to his operatic speculation, he might have been prepared for this “literal, physical, vocal impossibility,”—one great difficulty and expense of operatic management being the necessity of a double company, if musical performances are to be given nightly. We point to the extinction of ‘*L’Etoile*’ in justification of past remarks on the impossibility of successfully improvising a special entertainment, in a theatre, where special preparation has not already been made. The Egyptian tragedy, which has so long been in the Drury Lane bills, will possibly fare better, when it comes. Meanwhile, there is something to be learned from the pertinacity with which Scott and Terry’s melo-drama, with Joanna Baillie’s lyrics and Sir Henry Bishop’s glee-choruses, is fallen back upon, after ambitious attempts have failed and bad travesties of ambitious foreign masterpieces have been found too “profitable” to be continued. For better, for worse, ‘*Guy Mannering*’ keeps the stage, and the secret of its keeping there is in the local colour of the story, the picturesque charm of the lyrics, and the propriety and grace of Sir H. R. Bishop’s music. The last, we repeat, has entered into the library of classical English composition. There are reasons just now why the composer’s claims can be hardly too often insisted on,—and for which, by way of appendix to our lecture on musical management and mismanagement, we earnestly call attention to the coming *Bishop Concert*, which will be given during next week at Exeter Hall.

Madame Viardot has just signed an engagement to appear at the *Royal Italian Opera* this year.—Madame Alboni, according to the *Morning Post*, will also pass “the season” in England.

We learn from good authority that M. Meyerbeer is again at work for the *Opéra Comique*; and

on a subject which admits of no elaborate combinations, includes few characters, and demands no extravagant means of execution. Does this welcome report, like the success of ‘*L’Enfance de Christ*,’ by M. Berlioz, foreshow re-action, and indicate that the accumulators have done their utmost, and now attempt to charm by fineness of touch, as they have lately astonished the world by their assemblage of multitudes and prodigality in colour? Meanwhile, ‘*L’Africaine*’ seems to be put to sleep in M. Meyerbeer’s portfolio. He will hardly, we fancy, commit that opera to the caprices of Mdle. Cruvelli; which are now so numerous and notorious as to make it evident that the Lady is relying on them for the maintenance of such popularity as is left her.

Fire, it seems, must go the round of the Continental theatres. It has just visited Dessau, where the theatre was burnt a few days ago.

We have more than once alluded to Mr. C. C. Perkins as an American musical amateur, who has devoted himself to the study of Art with a steadiness not common among amateurs. This is the gentleman, whose gift of Mr. Crawford’s bronze statue of Beethoven will shortly adorn the new music hall at Boston, U.S. The local journals announce that a new *Cantata* by him, on the subject of the “Landing of the Pilgrims,” written for *soli*, orchestra, and chorus, has been recently twice performed in Boston. Our relatives across the Atlantic can do little save in extremes, and the abuse and praise lavished by their press on the composition give distant recorders small possibility of “keeping the balance true,” by any record, save a statement that the *Cantata* has been warmly praised and hotly vituperated.

‘The Duchess of Malfi’ is underlined as the next experiment at the Standard Theatre. The manager states that he was convinced by one special circumstance, that “the people of that ilk” were susceptible of poetic impulse. During the engagement of Mr. Anderson as a star, his company performed Sir T. Talfourd’s ‘*Glencoe*’ for five successive weeks;—a play, as he justly remarks, without a situation, almost exclusively indeed composed of poetic dialogue. If a Shoreditch audience could show this sympathy for language without action, Mr. Douglas thought that he might safely venture such a tragedy as the ‘*Antony and Cleopatra*,’ in which there was a fairer proportion of both, with opportunities of spectacle besides; and he adds, that “though he has found his management up-hill work hitherto, he has now every reason to hope that he shall be able soon to raise his theatre to the level of Sadler’s Wells.” We trust that this result will be obtained by both the City theatres; and thus testify to the wholesome progress of popular influence.

We, some weeks ago, mentioned the amateur performance which is about to be given at the *Olympic Theatre*. The evening fixed is Saturday next, and the “bill of fare,” we learn, will consist of two little comedies and a pantomime.

‘*Les Noces Vénitienes*,’ by M. Séjour,—an Italian drama, violent enough, according to all accounts, but exhibiting, M. Janin assures us, a feverish strength and promise of better things,—has been produced with great success at the *Théâtre Porte St.-Martin*. M. Séjour is characterized by M. Théophile Gautier, in his *feuilleton*, as the Tintoretto of melo-drama, exhibiting an exuberant fancy, violent contrasts of colour, and a touch forcible, if not always correct. M. Gautier commends, with choice epithets, Mdle. Meunier-Fleury, who has been appearing, in grand French tragedy, at the *Théâtre Français*.—The Félix family appear as unable to manage their theatrical affairs without recourse to law as Miss Edgeworth’s *Catty*, in the drama founded on the feud between *Ballinavogue* and *Ballinascraw*. M. Raphaël Félix, Mdle. Rachel’s brother, has been at odds with the treasurer of the Italian Opera in Paris about some portion of the receipt of a benefit which he lately took there with the Lady’s aid. Never did Princess disappear more ignobly from her kingdom than Mdle. Rachel seems bent on doing.

TO CORRESPONDENTS.—H. H.—The Author of A. W.—M. L.—A. B. T.—M. W.—received.

A TREATISE on the SCIENCE of MUSIC.

By DANIEL M. G. S. REEVES. Demy 8vo. cloth. This work contains not only a practical view of the laws of harmony, but a philosophical account of the musical system, possessing interest for men of a scientific turn, whether themselves musical artists or not; and comprising (*inter alia*) explanations on the constitution of the scale, on the musical ratios, on temperament, and on the causes of the pleasure which the ear derives from music.

Alfred Novello, 69, Dean-street, Soho, and 24, Poultry. Also in New York, at 39, Broadway.

Just published, 8vo. price 6d.

London: Longman, Brown, Green, and Longmans.

In 2 vols. post 8vo. with Illustrations, price 21s.

MEMOIRS of SIR ROBERT STRANGE, Knt. Engraver, Member of several Foreign Academies of Design; and of his Brother-in-Law, ANDREW LUMSDEN, Private Secretary to the Stuart Princes, and Author of ‘*The Antiquities of Rome*.’ By JAMES DENNSTON, of Dennistoun.

“It is impossible for us to do justice within our limits to the vast fund of anecdote and personal history scattered up and down through Mr. Lumsden’s letters; much less can we make room for an adequate notice of that portion of the work which, in the form of the biography of an eminent artist, constitutes a valuable contribution to the history of the art of engraving. The indications which we have given of its contents will, however, suffice to direct the attention of our readers to a work unrivalled for variety of information.”

John Bull.

London: Longman, Brown, Green, and Longmans.

On the 31st of March will be published, price 2s. Parts XXIV. and XXV. of the

ENGLISH CYCLOPEDIA, extending the NATURAL HISTORY DIVISION from MOROCCO to OCEANIA; and the GEOGRAPHICAL DIVISION from NARAK to the PAPEL STATES, including articles on Nankin, Naples, Nassau, Navarra, Nebraska, Netherlands, New Brunswick, New Granada, New Mexico, New Orleans, New York, Nicaragua, Nice, Niger, Nile, Nineveh, Nischni Novorod, Norriska Fiellen, North Sea, North-West Passage, North-Western Territory, Northern Sovereignty, Norway, Nova Zembla, Novara, Novgorod, Nubia, Numidia, Nürnberg, Ohio, Oldenburg, Olonetz, Oporto, Oregon, Orel, Orenburg, Orinoco, Ostend, Terra di Otranto, Pacific Ocean, Padova, Pæstum, Palermo, Palestine, Palmyra, Isthmus of Panama, Pannonia, Papal States, &c. &c.

* * * These parts will complete the Third Volume of each Division.

Bradbury & Evans, D. Bouvier street.

THE HOMILIST.—Edited by the Rev. DAVID THOMAS. New Editions of Vols. I. II. and III. Vol. I. price 4s. 6d. Vols. II. and III. each price 3s. 6d. cloth. From the Rev. Samuel Davidson, D.D., LL.D., *Lanarkshire Independent College*: "Most heartily and conscientiously do I recommend the 'Homilist' to all classes of readers. Young preachers should study it. It will greatly benefit them. Laymen (improperly so called) should read it. It will create in them a thirst for something better than what they commonly hear from our pulpits, and stir up in their souls feelings and aspirations of the noblest sort. 'Such a periodical as Arnold would have loved, and Coleridge promised to contribute to.' ... Altogether, I never had more pleasure in reading or recommending any religious periodical. *O! si sic omnia.*"—George Gilfillan.

Ward & Co. 27, Paternoster-row.

THE LONDON QUARTERLY REVIEW, No. VII. price 6s. for APRIL, contains—

Royal 4to. price 21s.

THE POETICAL WORKS of the LATE CATHERINE GRACE GODWIN. Edited, with a Memoir, by A. C. WIGAN. With 49 Illustrations by BIRKET FOSTER, JOHN GIBBERT, &c.

From the *Literary Gazette*.—"There are many striking and pleasing pieces in Mrs. Godwin's collection of poetry, and we think that Mr. Wordsworth expressed a fair and candid opinion of the writer's general merit, when he said,—'I have read your volume ('The Wardens' Legacy,' &c.) through with much pleasure. Whenever it is read such poetry cannot but do you honour. It is neither wanting in feeling, nor in that much rarer gift which is the soul of poetry—imagination. There is a great command of language and fine versification.'"

A NEW VOLUME of POEMS.

Fcap. 8vo. price 7s. 6d.

CLYTEMNESTRA, THE EARL'S RETURN, THE ARTIST, and OTHER POEMS.

By OWEN J. CREDITH.

"If one may prophesy with safety of the day by watching the tokens that accompany the dawn, we may predict satisfactory issue for the rich poetical promise which in this volume breaks over the flat waste of contemporary verse."—*Examiner*.

Invasion of Julius Cæsar to the Accession of Queen Victoria. By HUME, SMOLLETT, and HUGHES.

With copious Notes, the Authors’ last Corrections, Improvements, and Enlargements.

To be published in Eighteen Monthly Volumes, and in Parts, in order to place within the reach of all classes a more complete History of England than any extant.

Now ready, in 10 vols. with Sixty Steel Plates and Autographs, HUME and SMOLLETT complete, price 40s. cloth.

London: George Bell, 186, Fleet-street.

A DICTIONARY of TERMS in ART. Edited

and Illustrated by F. W. FAIRHOLT, F.S.A. Author of ‘Costume in England,’ &c. Illustrated by 500 Engravings. The plan embraced in the present work includes all such terms as are generally employed in Painting, Sculpture, and Engraving, whether descriptive of real objects or principles of action.

Virtue, Hall & Virtue, 25, Paternoster-row.

TO TEACHERS OF DRAWING, &c. &c.

NEEDHAM’S LANDSCAPE ALBUM.

A Series of STUDIES of LANDSCAPES and TREES, printed with Tints and High Lights.

On paper, 15 in. by 22 in. Price each Study, 1s. 6d.—Twelve Plates already published.

Messrs. Day & Son recommend these Studies to Teachers and Pupils. There does not exist a series of English Landscape Studies to compare with these for artistic ability, and the minuteness with which the distinguishing characteristics of every kind of wooded scenery is treated.

London: Day & Son, Lithographers to the Queen, 17, Gate-street, Lincoln’s Inn-fields.

Just published.

PRACTICAL PHOTOGRAPHY, on GLASS

and PAPER: a Manual containing simple Directions for the Production of Portraits and Views by the Agency of Light, including the Collodion, Albumen, Calotype, Vaxed Paper, and Positive Paper Processes. By CHARLES A. LONG. Price 1s., per post, 1s. 6d.

PHILOSOPHICAL INSTRUMENTS.

GENERAL and DESCRIPTIVE CATA-

LOGUE of Philosophical Apparatus and chemical Preparations Manufactured and Sold by BLAND & LONG, Opticians, &c., 186, Fleet-street, London: comprising Twenty-one Sections on various branches of Natural Philosophy.

Price 1s.; per post, 1s. 6d.

Published by Bland & Long, Opticians, Philosophical and Photographical Instrument Makers, and Operative Chemists, 186, Fleet-street, London.

street, Liverpool; 16, Market-street, Manchester; and Horsley
Fields, Wolverhampton.

TURKEY CARPETS AND PERSIAN RUGS.
The public are invited to inspect a large importation of these
world-famed CARPETS and RUGS, which are consigned, by an
eminent firm at Smyrna, to Messrs. DRUCE & CO., the Fashion-
able Upholsterers and Carpet Warehousemen, 68, 69, and 70,
Baker-street, Portman-square, for IMMEDIATE SALE, at one-
third under the usual price.

ELKINGTON and CO.,
PATENTERS OF THE ELECTRO PLATE.
MANUFACTURING SILVERSMITHS, BRONZISTS, &c.
Respectfully urge upon Purchasers to observe that each article
bears their Patent Mark, "E. & Co. under a crown," as no others
are warranted by them.
The fact frequently set forth of articles being plated by "Elkington's
process," affords no guarantee of the quality. These pro-
ductions were honoured at the late Great Exhibition by an award
of the "Council Medal," and may be obtained at either Establish-
ment.
22, REGENT-STREET, } LONDON;
43, MOORGATE-STREET, }
NEW HALL-STREET, BIRMINGHAM.
Estimates, Drawings, and Prices sent free by post.
Replating and Gilding as usual.

for credit. Materials, Workmanship, and Style not to be surpassed.
A detailed List will be sent free by post, or may be had on applica-
tion at CAISTOR'S, 7, Baker-street, Portman-square, where the
Great Exhibition Saddles and Harness may be seen.

HARVEY'S SAUCE.—The admirers of this
celebrated Fish-Sauce are particularly requested to observe,
that none is genuine but that which bears the name of WILLIAM
LAZENBY on the back of each bottle, in addition to the front
label used so many years, and signed ELIZABETH LAZENBY,
6, Edwards-street, Portman-square, London.

MORGAN'S PURE LLANGOLLEN ALE.
—This nutritious beverage, recommended for invalids by
the highest medical authorities of England and Scotland, brewed
from the choicest malt and hops and the mountain streams, in 18-
gallon casks, quart and pint bottles.—Sole consignee, SAMUEL
MORGAN, 16, Old Change, City, London.

DO YOU BRUISE YOUR OATS YET? or,
HOW TO KEEP A HORSE FOR ONE SHILLING
PER DAY.—One bushel of Oats when crushed will make two.

JAMES EPPS, Homoeopathic Chemist,
Egyptian Hall, Piccadilly;
112, Great Russell-street, Bloomsbury; and
82, Old Broad-street, City.

DR. ARNOTT'S SMOKE-CONSUMING
FIRE-GRATE is manufactured by F. EDWARDS, SON &
Co., 42, Poland-street, Oxford-street; where one may be seen in
daily use. The advantages of this Grate consist in the smoke
being perfectly consumed, no chimney sweeping being required,
and the saving of 40 to 50 per cent. being effected in the cost of
fuel. Prospectuses, with Testimonials, sent on application.

FLOWER-POTS AND GARDEN SEATS.—
JOHN MORTLOCK, 250, Oxford-street, respectfully an-
nounces that he has a very large assortment of the above articles
in various colours, and solicits an early inspection. Every de-
scription of useful CHINA, GLASS, and FURNITURE, at the
lowest possible price, for Cash.—250, Oxford-street, near Hyde
Park.

Warehouse, 42, LUDGATE-HILL, London.

ONE THOUSAND BEDSTEADS TO CHOOSE
FROM.—HEAL & SON have just erected extensive Premises,
which enable them to keep upwards of One Thousand Bed-
steads in stock, One Hundred and Fifty of which are fixed for
inspection, comprising every variety of Brass, Wood, and Iron,
with Chairs and Sofas, and every description of their new Ware-
rooms also contain an assortment of BED-ROOM FURNITURE,
which comprises every requisite, from the plainest Japanese
Deal for Servants' Rooms, to the newest and most tasteful designs
in Mahogany and other Woods. The whole warranted of the
soundest and best manufacture.—HEAL & SON'S ILLU-
STRATED CATALOGUE OF BEDSTEADS, AND PRICED LIST
OF BEDDING, sent free by post.—HEAL & SON, 196, Tottenham
Court-road.

KEATING'S COUGH LOZENGES.—
Upwards of Forty Years' experience has fully confirmed
the superior reputation of these Lozenges, in the cure of Asthma,
Winter Cough, Hoarseness, Shortness of Breath, and other Pul-
monary Maladies.
Prepared and sold in boxes, 1s. 1½d., and tins, 2s. 9d., 4s. 6d., and
10s. 6d. each, by Thomas Keating, Chemist, &c., No. 79, St. Paul's
Churchyard, London.
The Testimonials of their efficacy are too numerous for publica-
tion.

KEATING'S COD LIVER OIL, imported
direct from Newfoundland, of the finest quality, pale, purified,
and nearly tasteless. Imperial Measure, half-pints, 2s.; pints,
3s. 6d.; quarts, 5s. 6d.; five-pint bottles, 25s.
Orders from the country should expressly state "KEAT-
ING'S COD LIVER OIL."

**MORGAN'S PATENT PAPER AND MILL-
BOARD CUTTING MACHINES**—SHARP, STEWART
& CO. (sole Manufacturers) are now prepared to execute orders
for the above Machines, in all sizes.—ATLAS WORKS, MAN-
CHESTER.

LOCKWOOD'S celebrated NUGGET PENS,
being electro-gilt, are not liable to rust or corrode; with
FINE, Medium, or Broad Points, 1s. per box of one dozen. Whole-
sale and retail at LOCKWOOD'S Stationery and Dressing-Case
Warehouse, 75, New Broad-street.
N.B. A box of one dozen post free for 13 stamps.

THE IMPROVED CHARCOAL RESPIRATOR,
(sanctioned and approved by Dr. Stenhouse.)
The only Respirator (excepting the original cumbrous one) in
which the object sought by Dr. Stenhouse, viz. the purification of
an impure or infected atmosphere, is entirely effected; the con-
struction of this Respirator completely prevents the inhalation of
any air that has not come in contact with the charcoal. As an
instrument for simply warming the air it also surpasses the or-
dinary Respirator.

To meet the expressed views of Dr. Stenhouse, that inventions
for the prevention of disease ought to be sold at the lowest possible
price, we have offered it to the public at as low a cost as we be-
lieve a perfect instrument can be constructed.—Price 3s. 6d.; or
post free on receipt of 6s. DAKY & GOSDEN, 140, Lendenhall-
street, London.

METCALFE & CO.'S NEW PATTERN
TOOTH BRUSH & PENETRATING HAIR BRUSHES.
—The Tooth Brush has the important advantage of searching
thoroughly into the divisions of the Teeth, and is famous for the
hairs not coming loose. 1s. An improved Cloth Brush, incapable
of injuring the finest skin. Penetrating Hair Brushes, with the
double unbeached Russian bristles. Flesh Brushes of improved
graduated and powerful friction. Velvet Brushes, which act in
the most successful manner. Smyrna Sponges.—By means of
direct importations, Metcalfe & Co. are enabled to secure to their
customers the luxury of a genuine Smyrna Sponge. Only at
METCALFE, BITTLEY & CO.'S Sole Establishment, 130, B,
Oxford-street, one door from Holles-street.
Caution.—Beware of the words "From Metcalfe's," adopted by
some houses.
METCALFE'S ALKALINE TOOTH POWDER, 2s. per box.

DINNEFORD'S PURE FLUID MAGNESIA
has been for many years sanctioned by the most eminent
of the Medical Profession as an excellent remedy for Acidities,
Heburn, Headache, Gout, and Indigestion. As a Mild Aperient
it is admirably adapted for delicate Females, particularly during
Pregnancy; and it prevents the Food of Infants from turning sour
during digestion. Combined with the ACIDULATED LEMON
SYRUP, it forms an Effervescent and Aromatic Draught, which is
highly agreeable and efficacious.—Prepared by DINNEFORD &
CO., Dispensing Chemists, (and General Agents for the improved
Horse Hair Gloves and Belts), 172, New Broad-street, London; and
sold by all respectable Chemists throughout the Empire.

DR. DE JONGH'S
LIGHT BROWN COD LIVER OIL.
Prepared for MEDICINAL USE in the LOFFODEN ISLES,
NORWAY, and put to the test of Chemical Analysis.

Extracts from Medical Testimonials.
The late JONATHAN PEREIRA, M.D. F.R.S.E. F.L.S., Pro-
fessor at the University of London, Author of 'The Elements
of Materia Medica and Therapeutics,' &c.
"I know that no one can be better, and few so well, acquainted
with the physical and chemical properties of this medium as
yourself, which I regard as the highest authority on the subject.
The oil which you gave me was of the very finest quality, whether
considered with reference to its colour, flavour, or chemical pro-
perties; and I am satisfied that for medicinal purposes no finer oil
can be procured."

ARTHUR H. HASSALL, M.D. F.L.S., Member of the Royal
College of Physicians, Physician to the Royal Free Hospital,
Chief Analyst of the Sanitary Commission of the London,
Author of 'Food and its Adulteration,' &c. &c.
"I have more than once, at different times, subjected your
Light Brown Oil to chemical analysis—and this unknown to your-
self—and I have always found it to be free from all impurity, and
rich in the constituents of bile. So great is my confidence in the
article, that I usually prescribe it in preference to any other, in
order to make sure of obtaining the remedy in its purest and best
condition."

Sold in bottles, labelled with Dr. de Jongh's Stamp and Signa-
ture, WITHOUT WHICH NONE ARE GENUINE, by ANSAR, HAR-
FORD & CO., 77, STRAND, LONDON. Dr. de Jongh's sole
accredited Possessiones and Agents for the United Kingdom and
the British Colonies.
May be obtained in the Country, from respectable Chemists and
Vendors of Medicine. Should any difficulty be experienced in
procuring the Oil, Messrs. ANSAR, HARFORD & CO. will forward four
half-pint bottles to any part of England, CARRIAGE PAID, on receipt
of a remittance of 10s.
Half-pint (16 ounces), 2s. 6d.; Pints (32 ounces), 4s. 9d.;
Quarts (64 ounces), 9s. Imperial Measure.

COLE'S ALGA MARINA is the Concentrated
Essence of the Sea-weed, containing in a highly condensed
form all the virtues of those plants, to which medical authorities
ascribe the principal benefits derivable from a residence by the
Sea. It affords speedy relief and a certain cure in all cases of
Acute or Chronic Rheumatism, Rheumatic Gout, Neuralgia, and
other pains in the limbs and joints. It is now rapidly super-
seding all other external remedies in cases of Weakness, Relax-
ation, Contraction, Paralysis, Stiffness, Deformities, Swellings,
Tumours, Scrofulous Diseases, and the Malformations of Rickets
or Badly-nursed Children; and the lower extremities, when
paralysed, will greatly increase its good effects. Sold in
bottles, 2s. 9d., 4s. 6d., and 11s. each, by T. KEATING, 79, St.
Paul's Churchyard, London, and all Chemists.

*** All sufferers should read the Pamphlet, which may be had,
gratis, on application, and by post on enclosing six postage stamps.

DEAFNESS AND NOISES IN THE HEAD.—
Insistation for the Cure of Deafness, 9, Suffolk-place, Pall
Mall, London. Instant and permanent restoration of hearing
guaranteed, without the use of ear-trumpets, instruments, or
causing one moment's inconvenience to the most aged or nervous
sufferer. Dr. HOGHTON'S new and extraordinary discovery, by
one consultation enables deaf persons of either sex to hear im-
mediately with perfect ease the lowest whisper, and magically
removes all ringing in the ears. Hospital and private testimonials
and certificates from the most eminent Physicians and Surgeons
in England, in whose presence deaf persons have been cured, and
many hundreds of private patients cured can be seen or referred to.
Hours of consultation, 11 till 4 every day. Francis Robert
Hoghton, Member of the London Royal College of Surgeons, May
3, 1846; Licentiate of the Apothecaries Company, April 30, 1846.

Just published,
"SELF-CURE OF DEAFNESS," for country patients; a step to
empiricism, quackery, and exorbitant fee, sent on receipt of seven
pennies, free. Examination free. 9, Suffolk-place, Pall Mall.

BREIDENBACH'S PERFUME BOUQUETS
for 1855.—Napoleon the Third, Bouquet, Empress Eugénie
Bouquet, Alhambra Bouquet, Bosphorus Bouquet, Wood Violet
Bouquet, Wood Violet Sachet, Wood Violet Bouquet, and many
other exquisite Perfumes, that do not stain the handkerchief.
H. BREIDENBACH, Perfumer and Distiller of Flowers to the
Queen, 157 B, New Broad-street, facing Redmayne's.

DO YOU WANT LUXURIANT HAIR,
WHISKERS, &c.?—No other compound for the Hair has
maintained such an enduring celebrity as EMILY DEAN'S
CRINIUM. It is guaranteed to produce Whiskers, Mous-
tachios, Eyebrows, &c. in a few weeks, and restore the Hair in
baldness, from whatever cause, strengthen it when weak, prevent
its falling off, and effectually check greyness in all its stages. Price
2s. per Package (elegantly perfumed); sent post free on receipt of
24 penny postage stamps, by MISS DEAN, 97, Manchester-street,
Gray's Inn-road, London. Sold by every Chemist.—"In one fort-
night it produced a beautiful set of moustachios," H. Adams.
"It has prevented my hair falling off," J. Hickson. "It has quite
checked the greyness that was coming on," Mrs. Elder.
Beware of imitations under closely similar names.

BEAUTIFUL HAIR, WHISKERS, &c., are
invariably produced in Two or Three Weeks by COUPELLE'S
CELEBRATED CRINIUM, which is universally acknow-
ledged as the only preparation to be really depended upon for the un-
failing production of Hair, as also checking Greyness, Baldness, &c.,
and rendering the Hair luxuriant, curly, and glossy.—Mr. Williams,
3, Lower-street, Liverpool. "I can now show as fine a head of hair
as any person, solely from using your Criniur."—Sergeant Craven,
Longford Barracks, Ireland. "Through using your Criniur, I
have an excellent Moustache."—Mrs. Carter, Painswick, Berks.
"My head, which was quite bald, is now covered with new hair."—
Price 2s. per packet, through all Chemists, &c.; or sent free for 24
penny stamps, by ROSALIE COUPELLE, 69, Fleet-st., Newmarket-
street, London.—Guard against imitations under closely
similar names—"FIVE MINUTES' ADVICE" on the Hair;
with numerous startling and indisputable Testimonials; list of
Country Agents, &c., post free for two stamps.

PAINLESS TOOTH EXTRACTION, with-
out Chloroform.—Mr. WALTER BLUNDELL is at home
daily, from Ten till Four, for Dental Operations under his new
patent process.—22, New Broad-street, City.

"WHITE TEETH."—THE PEOPLE'S
TOOTH-POWDER is the best for Whitening and Pre-
serving the Teeth.—Prepared by J. C. CHUBB, 59, St. John-street,
Clerkenwell. Sold in boxes at 3d. and 6d. each. Free to any
address on receipt of 5 or 10 postage stamps. Can be ordered
through any Chemist.

YOURSELF! WHAT YOU ARE! AND
WHAT FIT FOR!—The secret Art of DISCOVERING
the CHARACTER of INDIVIDUALS from the peculiarities of
their HANDWRITING, has long been practised by Miss GRAHAM
with astonishing success. Her startling delineations are full and
detailed, differing from anything hitherto attempted. All persons
wishing to "know themselves," or any friend in whom they are
interested, must send a specimen of their writing, stating sex and
age, including 13 penny post stamps to Miss Graham, 10, CHIL-
CHESTER-PLACE, KINGS-CROSS, LONDON, and they will
receive a minute detail of the mental and moral qualities,
talents, tastes, affections, virtues, failings, &c. of the writer, with
many other things hitherto unsuspected.—A copy of Clairvoyant
revelations sent post free for six penny stamps.

KNOW THYSELF!—Professor BENKINSOP
continues to receive from individuals of every rank the
most flattering testimonials of his success in describing the CHA-
RACTERS of Persons from their HANDWRITING, pointing out
their mental and moral qualities, whether good or bad.—Ad-
dressed by letter, stating sex and profession, and enclosing 13 penny
postage stamps, to Dr. Benkingsop, 344, Strand, London.

WONDERFUL POWER OF THE STOMACH.
—Mr. Hunter justly regarded the stomach as the seat and
centre of universal sympathy with respect to the other organs of
the human frame: KAYE'S WORMS' PILLS so promote
and sustain that sympathy, as to produce perfect health. Sold
everywhere, at 1s. 6d., 2s. 6d., and 4s. 6d. Wholesale Depot, 22,
BROAD-STREET, London.

DR. BARRY'S HEALTH RESTORING
REVALENTA ARABICA FOOD counteracts Dyspepsia
(Indigestion), Constipation and their consequences.—Andrew Ure,
M.D. F.R.S., London. These consequences are Nervous, Bilious
and Headache, Acidity, Heartburn, Flatulency, Stomach
Headaches and General Debility, Low Spirits, Cough, Asthma,
Incipient Consumption, Nausea, &c. It is, moreover, the best
food for infants and invalids generally, as it never purges or
turns acid on the weakest stomach, nor interferes with a good
liberal diet, but imparts a healthy relish for lunch and dinner,
and restores the faculty of digestion and nervous and muscular
energy to the most enfeebled. Highly approved of by Drs.
Ure, Shorland, Harvey, Campbell, Gattickier, Wurzer, Lord
Stuart de Decies, and 50,000 other respectable persons, whose
health has been perfectly restored by it after all other means
of cure had failed.

In quisters, 1 lb. 2s. 6d.; 2½ lb. 4s. 6d.; 5 lb. 11s.; 12½ lb. 22s.; super-
fine, 1 lb. 3s. 6d.; 2½ lb. 5s. 6d.; 5 lb. 12s.; 10 lb. 22s. The 10 lb. and 12½
carriage free on receipt of Post-office order. Barry Du Barry
& Co., 77, Regent-street, London; Fortnum, Mason & Co. Pur-
veyors to Her Majesty, Piccadilly; also, at 60, Gracechurch-street;
330 and 431, Strand; 4, Chancery; 68, Cannon; 49, Bishopsgate-
street; 55, Clarendon-street; 54, Upper Baker-street; 63 and 150,
Oxford-street.

HOLLOWAY'S OINTMENT AND PILLS
Effective REMEDIES for SCURVY and other Skin Diseases.
—Mr. Thomas Holloway, of 24, Curlew-street, Manchester, states
in a letter to Professor Holloway, confirmed by Mr. R. Burton,
Chemist, of the same city, that he (Thomson) was grievously
afflicted for upwards of sixteen years with that disagreeable
disease, the scurvy, for which he had been under the treatment of
medical men both at home and abroad, but deriving no benefit
from their treatment. He despaired of ever being cured.—How-
ever, by persevering in the use of Holloway's Ointment and Pills,
these excellent remedies effected a most satisfactory cure.—Sold
by all Vendors of Medicine; and at Professor Holloway's Estab-
lishments, 24, Strand, London, and 80, Maiden-lane, New York.

RUPTURES EFFECTUALLY CURED
WITHOUT A TRUSS!—All sufferers from this alarming
complaint are earnestly invited to consult or write to Dr. LESLIE,
as he guarantees them relief in every case. His remedy has been
successful in curing thousands of persons during the last twelve
years, and is applicable to every kind of single and double rup-
ture, however bad or long-standing, in male or female of any age,
causing no confinement or inconvenience in its use whatever. Sent
post free to any part of the world, with full instructions for use,
on receipt of 7s. 6d. in postage stamps, cash, or post-office order,
payable at the London Post-office to Dr. Leslie, 11, Manchester-
street, Gray's Inn-road, London.—At home daily (except
Sunday) from 11 till 4 o'clock. A Pamphlet of Testimonials
sent post free on receipt of one postage stamp.

SIEGE OF SEBASTOPOL.—THE THIRD EDITION OF **STANFORD'S MAP OF SEBASTOPOL** and **COUNTRY ROUND**, including Balaklava, Kamara, Kadikoi, the Belbek and Cherueva Rivers; showing also the Positions of the Allied Camps, the Allied and Russian Batteries, Forts, &c., with number of Guns; the Position of the Turkish and other Redoubts; the Head-Quarters of Lord Raglan, &c. is republished this day. Price, in 1 sheet, coloured, 2s.; per post, 2s. 6d. Case, 4s. 6d.; per post, 5s.

JUST RECEIVED FROM PARIS,
THE MAP OF THE CRIMEA, prepared at the Dépôt de la Guerre, from the Map of the Russian État-Major. Price, in 1 large sheet, plain, 4s.; coloured, 5s. In case and coloured, 7s. 6d.; per post, 8d. additional.
London: Edward Stanford, Map-seller and Map-mounter to Her Majesty's Stationery Office, 6, Charing Cross.

Now ready, price 1s.
THE OMBROLOGICAL ALMANAC for 1855, in its 16th year: it had 732 facts right in 1,000 as to weather, with only 16 planets in 1854, and is now calculated with 26 planets, and, though unavoidably computed in haste, must show the advancement in this interesting science.
W. Walker, 196, Strand; Richardson & Co. 23, Cornhill.

Now ready, small 5s.

Just published, price 7s. 6d., Illustrated,

LAYS of LOVE and HEROISM,

LEGENDS, LYRICS, and other POEMS. By **ELEANOR DARBY**, Author of 'The Sweet South.'

"The authoress is already well and favourably known to the British public by her previous publication, under the title of 'The Sweet South.' The appearance of the present volume will but call forth a repetition of those high eulogiums which were so plentifully bestowed upon her former effort. The 'Lily of Dundee' is itself sufficient to show the distinguished abilities of the authoress, displaying as it does, in a very high degree, her power, pathos, and poetic skill. The volume, as a whole, cannot fail to contribute very materially to the popularity of the accomplished authoress; and it deserves a very extensive circulation."

London: Hope & Co., Courier and Church Reform Gazette Office, 16, Great Marlborough-street.

NOTICE to AUTHORS

OF

NAVAL and MILITARY NARRATIVES,

VOYAGES and TRAVELS,

NOVELS and ROMANCES,

HISTORICAL and BIOGRAPHICAL WORKS,

POEMS, &c.

In order to insure the Publication of their Works with the greatest ACCURACY and DESPATCH, Mr. SKEET has secured the ABLEST LITERARY ASSISTANCE. He also enjoys peculiar facilities for bringing their productions before the Public, not only under every possible advantage in THIS COUNTRY, but also in NEGOTIATING the SALE of an EARLY EDITION for the AMERICAN MARKET.

CHARLES J. SKEET, Publisher,

10, KING WILLIAM-STREET, CHARING-CROSS.

Printed by JAMES HOLMES, of No. 4, New Ormond-street, in the county of Middlesex, at his printing-office No. 4, Took's-court, Chancery-lane, in the parish of St. Andrew, in the said county; and published by JOHN FRANKS, of No. 14, Wellington-street North, in the said county, Publisher, No. 14, in Wellington-street; and sold by all Booksellers and Newsmen—Agents for SCOTLAND, Messrs. Bell & Bradburn, Edinburgh; for IRELAND, Mr. Jo in Robertson, Dublin.—Saturday, March 24, 1855.

UNIVERSITY OF LONDON.—MATRICULATION.—A CLASS, for the purpose of Reading the Subjects required for the Matriculation Examination at the London University, will be opened in University College, by permission of the Council, on the 10th of April. It will meet on five days of the week, for two hours each day, and will continue until the 1st of July. The hours of meeting will be so arranged as not to interfere with the usual College Lectures. Fee, for the Course, £1. For further particulars, apply to Mr. ERNEST ADAMS, at the College, University College, February, 1855.

ROYAL BOTANIC SOCIETY, Regent's Park.—The EXHIBITIONS OF PLANTS, FLOWERS, and FRUIT this Season will take place on WEDNESDAYS, May 20, June 13th, and July 4th; and of AMERICAN PLANTS, MONDAY, June 18th. Tickets of admission are now being issued; and may be obtained at the Gardens only, by orders from Fellows, or Members of the Society. Price, on or before May 5th, 4s.; after that day, 5s. each.

BOTANICAL SOCIETY OF LONDON.—DISTRIBUTION OF BRITISH PLANTS, 1855.—Members are requested to send their Lists of Desiderata forthwith marked on the 4th Edition of the London Catalogue of British Plants. G. E. DUNN, Secretary. 20, Bedford-street, Strand. T. SYME, Curator. N.B.—The Herbarium may be inspected every Monday, Wednesday, and Friday, from Ten until Five. The Library is open on the same days.

HORTICULTURAL SOCIETY OF LONDON.—The SECOND SPRING MEETING will take place at the Society's House, 21, Regent-street, on TUESDAY, April 3, from 12 to 5 P.M.

HORTICULTURAL SOCIETY OF LONDON.—GARDEN EXHIBITIONS. Notice is hereby given, that the FIRST EXHIBITION of the Season will take place, by permission of Her Majesty's Commissioners for the Great Exhibition of 1851, in the GROUNDS of GORE HOUSE, on WEDNESDAY, May 16. The Garden will be opened to the Public at two o'clock, under the following regulations:—All Fellows of the Society will be admitted without tickets, from half-past 12 till 6 o'clock, on signing their names in a book at the entrance. Visitors can be admitted only by tickets, to be obtained by the personal or written orders of Fellows of the Society.

All Fellows who shall apply, on or before Monday, the 30th of April, may obtain at the PRIVILEGED RATE of Three Shillings and Sixpence each, any number of tickets not exceeding twenty-six; but no application for such tickets will be received after that day. Fellows of the Society subscribing for tickets at this price will be allowed a clear week from the 30th of April during which they may claim them. AFTER THAT PERIOD ALL THE 3s. 6d. tickets subscribed for, BUT NOT ISSUED, MAY BE CANCELLED. After the 30th of April, any further number of tickets will be delivered to Fellows on their personal application or written order, at the price of Five Shillings each ticket.

All applications for tickets must be made at the Society's Office, 21, Regent-street.

NO TICKETS WILL BE ISSUED IN REGENT-STREET ON THE DAYS OF EXHIBITION. On those days Offices, near the Garden Entrance, will be opened at half-past 12 o'clock for the issue of tickets at 7s. 6d. each; but still under the regulations above stated.

SPECIAL PRIVILEGE OF FELLOWS.—Fellows of the Society not only enter free at half-past 12, but can also introduce two friends, with tickets, at Gore House, Kensington Gore, May 16; at Chiswick, June 20, and July 11. Or the Fellow's power may be transferred to a brother, sister, son, daughter, father, mother, or friend, residing in the Fellow's house, provided the person to whom the transfer is made be furnished with a ticket signed by that Fellow. That is to say, the power of entering early may be transferred, but not the right to FREE admission.

ARUNDEL SOCIETY.—FIFTH YEAR'S ISSUE TO SUBSCRIBERS.

Six large Wood Engravings, by Messrs. DALZIEL, from Mr. W. OLIVER WILLIAMS'S series of Drawings, from the Frescoes by GIOTTO in the Arena Chapel, Padua. (Being the Continuation of the Eight Engravings from the same Series issued for the Fourth Year), Together with

A Notice of GIOTTO and HIS WORKS IN PADUA, by JOHN RUSKIN, Part I. Annual Subscription to the Arundel Society, 11, 1s. 2d. Old Bond-street. JOHN NORTON, Secretary.

ROYAL ACADEMY OF ARTS, Trafalgar-square.—NOTICE TO ARTISTS.—All Works of Painting, Sculpture, Architecture, or Engraving, intended for the ensuing EXHIBITION at the ROYAL ACADEMY, must be sent in on Monday, the 9th, or Tuesday, the 10th of April next, after which time no Work can possibly be received, nor can any Works be received which have already been publicly exhibited. FRAMES.—All Pictures and Drawings must be in gilt frames. Oil Paintings under glass and Drawings with wide margins are inadmissible. Excessive breadth in frames as well as projecting mouldings may prevent Pictures obtaining the situation they otherwise merit. The other Regulations necessary to be observed may be obtained at the Royal Academy.

JOHN PRESCOTT KNIGHT, R.A. Sec. Every possible care will be taken of Works sent for exhibition, but the Royal Academy will not hold itself accountable in any case of injury or loss, nor can it undertake to pay the carriage of any package. The prices of Works to be disposed of may be communicated to the Secretary.

ART-UNION OF LONDON.—By ROYAL CHARTER.—Prize-holders select for themselves from the Public Exhibitions. Every Subscriber of One Guinea will have, besides the chance of a Prize, an Impression of a Plate of "A WATER PARTY," by J. T. WILLIAMS, R.A., after J. J. CALON, R.A., and a Quarto Volume of Thirty Illustrations of Byron's "Childe Harold." The Prize is ready for delivery, and the Volume may be seen at the Office.—Subscription closes this day (31st inst.). The Office will be open till 9 P.M. GEORGE GODWIN, Honorary Secretary. 444, West Strand. LEWIS POOCK, Secretaries.

THE MANCHESTER ART-UNION.—The Committee are in WANT of a suitable unpublished PRINT for distribution amongst the Subscribers of the present year. Specimens and terms may be addressed to the Secretary, 92, Mosley-street, Manchester. RICHARD ASPDEN, Sec.

ROYAL INSTITUTE OF BRITISH ARCHITECTS.—Incorporated 7th William IV.

16, Grosvenor-street, London. Her Majesty having been pleased to grant her gracious permission for the ROYAL MEDAL to be conferred on such distinguished Architect or Man of Science, of any country, as may have designed or executed any building of high merit, or produced a work tending to promote or facilitate the knowledge of Architecture, or the various branches of Science connected therewith,—the Council will proceed, in January, 1856, to take into consideration the appropriation of the Royal Medal.

The SILVER MEDALS of the Institute will be awarded to the Authors of the best Essays on any subjects tending to promote or facilitate the knowledge of Architecture, or the various branches connected therewith.

The SOANE MEDALLION will be awarded for the best Design for any of the following subjects:—A Town Mansion; Drawings of the Remains and a Restoration of the Church and Conventual Buildings of the Priory of St. Bartholomew the Great, Smithfield, London; A Building to contain Six Courts of Law; Or any other like subject of equal importance, at the option of the Candidate.

The successful competitor, if he go abroad within three years after receiving the Medallion, will be entitled to the sum of 50*l.* at the end of one year's absence, on sending satisfactory evidence of his progress and his studies. The competition is open to all Members of the Profession under the age of thirty years. Full particulars may be had on application to the Honorary Secretaries, by letter, pre-paid.

DEPARTMENT OF SCIENCE and ART.—DIVISION OF ART, Marlborough House, Pall Mall.

7. Byzantine, Romanesque, and Saracenic Art.—21st and 22nd of May.
8. The Sienese, Florentine, and Early Pointed Style.—28th and 29th of May.
9. Gothic Ornament, Decorated Pointed.—4th and 5th of June.
10. The Renaissance Trecento.—11th and 12th of June.
11. The Cinquecento.—18th and 19th of June.
12. The Elizabethan, the Louis-Quatorze.—25th and 26th of June.

Tickets, for the Course of 12 Lectures, at 6*d.* each, or 1*s.* for a single Lecture, to be had at the Museum, Marlborough House.

THE GOVERNESSES' INSTITUTION, 34, Soho-square.—Mrs. WAGHORN, who has resided many years abroad, respectfully invites the attention of the Nobility, Gentry, and Principals of Schools to her Register of English and Foreign GOVERNESSES, TEACHERS, COMPANIONS, TUTORS, and PROFESSORS. School Property transferred, and Pupils introduced in England, France, and Germany. No charge to Principals.

ST. JOHN'S-WOOD LITERARY AND SCIENTIFIC SOCIETY.—Professor GREASY will deliver a LECTURE ON THE HISTORY OF THE CRIMEA, at the Concert Room of the Eyre Arms, on THURSDAY EVENING NEXT, April 5, at 8 o'clock.—Members' and Transferable Tickets Free; Non-Subscribers, 1*s.* each.

DR. ALTSCHUL, EXAMINER Royal College of Preceptors, Member of the Philological Society, London, gives LESSONS in the GERMAN, ITALIAN, and FRENCH LANGUAGES and LITERATURE. Pupils may study TWO Languages in the same Lesson, or alternately, without any addition to their terms.—CHANDOS-STREET, CAVENDISH-SQUARE.

PRIVATE TUITION.—A Married Clergyman, with no Parochial Duty, who is preparing a few Pupils—two for Addiscombe and others for Woolwich and Eaton, will have a VACANCY after Easter for a Pupil, to whose health or Education great personal attention is required.—Address the Rev. E. R., Post-office, Tonbridge, Kent.

A SOUND CLASSICAL, MATHEMATICAL, SCIENTIFIC and GENERAL EDUCATION is afforded on moderate Terms at the LICHFIELD GRAMMAR SCHOOL.—For Prospectus apply to the Rev. J. G. CUMMING, M.A. F.G.S., Head Master.

BRIGHTON.—EDUCATION.—There are VACANCIES in a first-class Establishment where only Twelve Young Ladies are received. A Parisian Governess resides in the house. Signor F. Lablache, Herr Kube, Messrs. E. de Paris, Michau, and other eminent Professors attend. References to Parents of Pupils.—For Terms, &c. address Misses B., care of Mr. Roland, 20, Berners-street, Oxford-street, London, where Prospectuses can also be had.

EDUCATION.—TO GUARDIANS, WIDOWERS, and FAMILIES.—Two Ladies, residing in a West-end Suburb, desire to undertake the sole charge of three Young Ladies, sisters or otherwise, for whom may be required a Home replete with elegant comfort and a first-rate EDUCATION. No objection to Pupils whose studies are considered finished, but who wish further proficiency in the Accomplishments.—Address, with particulars, to R. A., Blackburn's, 11, Park-terrace, Regent's Park.

GERMAN EDUCATION.—CANNSTATT ON THE NECKAR.—Mr. HIRSCH, who formerly resided in England and who has now a FEW VACANCIES in his Establishment, will be in London from the 6th of April to the 1st of May. References can be given to Gentlemen in London, whose sons are still under Mr. Hirsch's care. For Prospectuses.—Messrs. Walton & Maberly, 27, Ivy-lane, Newgate-street, or Mr. Cotes, 129, Chancery-lane. For interviews with Mr. Hirsch, apply to Mr. Cotes, by letter.

A MARRIED CLERGYMAN, a Graduate of Cambridge, wishes to RECEIVE into his house TWO OR THREE LADS ONLY, whose education would have his best attention. Situation, 100 miles south-west of London, in a healthy village. Terms, 80*l.*—Address Rev. A., care of William Dawson & Sons, Booksellers, &c., 74, Cannon-street, City.

DENMARK-HILL GRAMMAR SCHOOL, Near London. Principal—Mr. C. P. MASON, B.A., Fellow of University College, London.

The aim of the system pursued at the above-named School is to combine the mental discipline of a sound course of Classical and Mathematical study with the acquisition of a substantial knowledge of Modern Languages and of the Physical Sciences. Pupils are prepared either for the Universities or for commercial pursuits.

There is a separate Preparatory Department for Pupils of from Seven to Ten or Eleven years of age.

Prospectuses may be obtained at the School; and of Messrs. Lindsay & Mason, 84, Basinghall-street; and Messrs. Hefle Brothers, School Booksellers, 150, Aldersgate-street.

KENSINGTON HALL COLLEGIATE INSTITUTION FOR LADIES. Lady Superintendent.—Mrs. Johnson. Director of Education.—Mr. Johnson.

The object of this Institution is to provide Resident Pupils with a complete and systematic course of education and instruction, upon a plan that combines the advantages of a School and a College, with more than usual attention to individual peculiarities, and to the useful as well as elegant requirements of after-life.—Terms, List of Lectures, &c., will be forwarded by the Lady Superintendent, Kensington Hall, North-End Fulham.

NORTHUMBERLAND COLLEGE FOR LADIES, 43, CRAVEN-STREET, STRAND. Superintended by MRS. LOUIS WATSON. Visitor.—The Rev. HENRY MACKENZIE, M.A., Vicar of St. Martin's-in-the-Fields.

EASTER TERM will commence on MONDAY, APRIL 16th, 1855, under the following Professors:—

- Algebra, Geometry, and Arithmetic.—A. D. Sprague, Esq. M.A.
- Biblical Literature.—Rev. Sydney Clarke, M.A., St. John's Coll. Cambridge.
- Botany.—
- Dancing and Exercises.—Mons. Coulon.
- Drawing.—Figural Perspective and Perspective.—H. Wichelow, Esq.; and A. Peletier, Esq.
- Elocution.—Alexander Bell, Esq.
- English Grammar and Composition and English Language and Literature.—Alfred D. Sprague, Esq. M.A.
- French.—Mons. Tourner.
- Geography.—Charles Gubraith, Esq.
- German.—Rev. A. Lowy.
- Harmony and Composition.—H. C. Lunn, Esq. R.A. Music.
- History (Ancient and Modern).—Rev. A. G. Edouart, M.A., St. John's College, Cambridge.
- Italian.—Signor Maggioni, R.A. Music.
- Latin and Natural Philosophy.—Rev. J. K. Jennings, M.A., Queen's College, Cambridge.
- Pianoforte.—Cipriani Potter, Esq., Principal R.A. Music, and F. H. Lunn, Esq. R.A. Music.
- Singing.—F. H. Cox, Esq. R.A. Music.
- Writing.—W. McCulloch, Esq.

Prospectuses to be obtained on application at the above address. A JUNIOR CLASS is open at the College. THERE IS A VACANCY FOR TWO BOARDERS. Pupils are received at the Half Term.

BEDFORD GRAMMAR SCHOOL.—The Office of MASTER of the above School will be VACANT on the 24th of June next, by the resignation of the Rev. Dr. Brereton. Applications and testimonials may be sent to the Rev. the Warden, New College, Oxford, on or before Saturday, March the 24th.

Extracts from the Scheme, settled by order of Vice-Chancellor Sir W. F. Wood, dated the 12th of March, 1853:—
"The Master and Second Master of the said Grammar School for the time being shall always be Fellows of New College, or Clergymen of the Church of England, being Graduates of one of the Universities of Oxford, Cambridge, Dublin, London, or Durham, properly qualified to teach the Latin and Greek Languages."
"There shall be allowed and paid to the future Master the yearly sum of 300*l.*, and so many additional sums of 5*l.* each as will be equal to the number of Boys up to and not exceeding 140, who shall have been bona fide educated at the said Grammar School for at least six months in each year."

The Master may, with the consent of the Warden and Scholars of New College and the Trustees respectively, take 30 Boarders. There is a residence (rates and taxes free), kept in repair by the Trustees of the Bedford Charity.

MR. CURT, of London, ANTIQUARY, &c., now in Town for the Loscombe Sale of Valuable Coins and Medals, will return to Paris on the 14th of April, to attend the Raoul-Rochette Sale of Coins and Antiquities, the Catalogue of which is just published. Commissions, as usual, executed at 10 per cent.—Address, post paid, 35, Leicester-street, Leicester-square; or Hotel Brabant, Paris. Mr. Curt will be again in London about the 24th of April.

MR. F. EDWARD BACHE begs to acquaint his Friends that he has RETURNED to TOWN from the Continent; and will be happy to resume his Instructions in Pianoforte Playing and Composition.—For further particulars, address Mr. BACHE, at his Publishers, Messrs. Addison & Co., 210, Regent-street.

BRIGHTON.—Herr OBERTHÜR, Harpist to H.R.H. the Duchess Pauline of Nassau, begs to announce that he VISITS BRIGHTON EVERY WEEK.—Terms and particulars to be obtained at Herr Oberthür's Town Residence, 14, Cottage-road, Westbourne Park-terrace.

MR. FRANCIS OROSZ, PIANIST, begs to inform the Nobility and Gentry that he has RETURNED from Edinburgh, and continues to give, as formerly, higher INSTRUCTIONS in PIANO to male and female PUPILS.—Address 18, Albert-terrace, Bishop's-road, Paddington.

Works of Art by Amateurs and others, are now being exhibited at
121, Pall Mall.—Admission, One Shilling. Catalogue, 5pence.
Open from Ten till dusk.

PATRIOTIC FUND.—THE FIELD OF BATTLE.
MR. HOGARTH, Haymarket, London, has
the honour to announce that he is, by special permission,
preparing for publication a facsimile Print in Chromo-Litho-
graphy, by Vincent Brooks, "THE FIELD OF BATTLE," from
the Original Drawing by H. H. the Princess Royal, now exhibit-
ing at 121, Pall Mall, in aid of the Funds for the Relief of Widows
and Orphans of British Officers engaged in the War with Russia.
The entire profits of the publication will be devoted to the Fund.
PRINTS, 12. 1s.

Subscribers' Names received by all Print and Booksellers in
Town and Country, and by the Publisher, J. Hogarth, Haymarket,
London; Aubrey Paul, Esq., Treasurer, 217, Strand; Mr. Ellis
Vaughan Smith, Hon. Secretary, 9, Portugal-street, Grosvenor-
square.

LAW LIFE ASSURANCE OFFICE, Fleet-
street, next St. Dunstan's Church, London, March 12, 1855.
NOTICE IS HEREBY GIVEN, that the BOOKS for the
TRANSFER of SHARES in this Society will be CLOSED on
THURSDAY, the 22nd instant, and will be RE-OPENED on
WEDNESDAY, the 11th day of APRIL next. The Dividends for
the year 1854 will be payable on Thursday, the 12th day of April
next, and on any subsequent day between the hours of Ten and
Three o'clock.

By order of the Directors,
WILLIAM SAMUEL DOWNS, Actuary.

HYDROPATHY.—MOOR PARK MEDI-
CAL and HYDROPATHIC ESTABLISHMENT, near
Farnham, Surrey, within three miles of the Camp at Aldershot.
This Institution is now open for the reception of Patients under
the Superintendence of Dr. EDWARD W. LANE, A.M. M.D.
Edin.—Dr. Lane may be consulted in London every Tuesday
between half-past 12 and 2, at 61, Conduit-street, Regent-street.

NEWSPAPER STAMP.—A Powerful Article-
Writer and Popular Author is OPEN TO AN ENGAGE-
MENT on, or to manage, a Newspaper. The highest Testimonials
given. He is well acquainted with the Literary and Artistic
World, and to Gentlemen desirous of establishing a Political Organ
would be of great service.—Address A. M., care of A. Smith, 19,
Cursitor-street, Chancery-lane.

MILD SEA-AIR.—THE WIDOW of a SUR-
GEON and her Daughter RECEIVE DELICATE
CHILDREN or YOUNG LADIES requiring Sea-Air and
Bathing. They have had much experience in the care of invalids,
and devote as much attention to education as the health of the
Pupils will permit. References given and required.—For all
particulars, address W., Messrs. Groombridge, Paternoster-row.

BRIGHTON.—A HOME for INVALID and
ORPHAN CHILDREN of the Higher Classes, in a superior
Mansion in the most delightful and healthy part of Brighton.
Only a limited number taken, and from the age of one month to
thirteen years. A Governess, Nurses, and every suitable accommo-
dation. References permitted to several eminent Medical Men
and Clergymen.—Address A. C. L., care of Mr. Wallis, 5, Bartho-
lomew's, Brighton.

A YOUNG LADY is wishing for a HOME in
a CLERGYMAN'S, or other Protestant private family, in
the country, commanding the best society. The lady would wish
to be considered, in every respect, as one of the family.—Address,
stating terms and full particulars, to Z. X. Y. Post-office, Carlisle.

A DESIRABLE OPPORTUNITY offers
to a placing a Youth (of about Fourteen) as OUT-DOOR
APPRENTICE with a Bookseller and Publisher in Paternoster-
row. A small Premium would be accepted with a Youth of
intelligence.—Apply to W. A., 31, Hunter-street, Brunswick-
square.

TO NEWSPAPER PROPRIETORS and
Others.—The term of the Advertiser's present engagement
being nearly completed, he would respectfully offer his services
to such as are in want of an Employee in the capacity of BOOK-
KEEPER, or to take the charge of the PUBLISHED DEPART-
MENT, both being positions in which he has considerable expe-
rience, either in England, Scotland, or Ireland.—References and
all information to be had from W. O., care of Messrs. Robertson &
Scott, News-Agents, Edinburgh.

PARTNERSHIP.—Wanted by a BOOK-
SELLER and PUBLISHER, in London, a Gentleman of
Energy and Capital to join him as PARTNER. The business is
an increasing one and capable of further extension, it will bear
the strictest investigation and will form an eligible opening to an in-
coming partner. About 2,500*l.* required.—Address in the first
place, by letter only, to Messrs. Richardson & Sadler, Golden-
square.

THE PRESS.—WANTED, about Whitsunday
next, a situation as Editor, or Sub-Editor and Reporter, for
a Provincial Journal. The advertiser (a Scotchman, presently
conducting a weekly paper in Scotland) had considerable expe-
rience as a Journalist, is a practical reviewer, and selector, and
an expeditious reporter. Besides being well acquainted with the
conduct of a printing office and the details of newspaper manage-
ment. References as to literary ability and general character.—
Address, B. A. Y. Post-office, Perth.

PATERNOSTER - ROW — OFFICES TO
LET, on First, Second, and Third Floors, together or sepa-
rately. Convenient access. Suitable for an Agent, Wood En-
graver, Map Colourer, &c. &c.—Apply at No. 21, Warwick-square.

MESSRS. CHAMBERS'S PUBLICATIONS.
MESSRS. W. & R. CHAMBERS beg to in-
form that they have REMOVED from their temporary
premises in Bride-passage, Fleet-street, to No. 47, PATER-
NOSTER-ROW, being the premises formerly occupied by Messrs.
Baldwin, where all their Publications are now issued.
The Edinburgh branch of Messrs. Chambers's business is carried
on as usual.
London, March 26, 1855.

ENGRAVINGS BROUGHT WITHIN THE
REACH OF ALL.—Immense quantities of first-class Sub-
jects (chiefly from Sale at auction) of price 1*l.* 1*s.* 6*d.* per pair. Such an
instance has never before been able to adorn the Wall and enrich
the Folio.—J. MABLEY, 9, Wellington-street North, Strand.

"Mr. Mayall has proved his mastery over the art by producing
photographic portraits of the full size of life * * without the
slightest sacrifice of definition, or the smallest approach to distor-
tion.—Indeed the errors and peculiarities of former impressions
appear to be corrected."—*Illustration*, July 22, 1854.
"Mr. Mayall's portraits represent the high art of the daguerre-
type; they are superior to the generality of such pictures as a
delicate engraving is to a coarse woodcut."—*Art-Journal*, Nov. 1853.
"More pleasing, and far more accurate than the generality of
such pictures."—*Times*, July 17, 1854.

TO CAPITALISTS.
ELIGIBLE INVESTMENT.
DUNCAN SINCLAIR & SONS' LETTER FOUNDRY,
EDINBURGH, which obtained the Great Exhibition
Prize Medal in 1851.

To be SOLD by PRIVATE CONTRACT (Family arrangements
having rendered it necessary).

THE Entire PLANT and GOOD-WILL of the
above Old-Established FOUNDRY, consisting of a numerous
and complete series of Funches, Matrices, Moulds, Strikes, and
every implement and utensil necessary to carry on the Business of
a Typefounder on a large scale. The Plant includes the Funches,
Matrices, &c. of the celebrated Music Faces, considered to be the
most complete and elegant in the Trade. And a series of numerous
Strikes can be adapted to branches of the parent establishment.
There is also a large and well-assorted Stock of Book and News-
paper Founts of those Faces most admired and run upon.
Every department is in excellent working condition, and the expe-
rienced staff of management, with the commodious premises of
Whitefriars, capable of employing upwards of fifty Casters,
will be available to a purchaser.

The present is a most favourable opportunity for an investment
of this kind. The contemplated immediate abolition of the New-
spaper Stamp Duty must also give a great impetus to the Trade.
For particulars apply to Messrs. Douglas & A. G.
Moulhous, W.S. 23, Young-street, Edinburgh; and Ellis, Phillips
& Co., Solicitors, Clements-lane, City, London.

TO STATIONERS, BOOKSELLERS, and
Others. PARTNERSHIP on most eligible terms, whereby
a present sum of about 250*l.* will be put in a Business of
1,400*l.* in value. The concern is that of a Bookseller and Stationer.
The returns are upwards of 1,500*l.*, and can be much extended.
The situation is undecidable.—Apply to Mr. PAGE, Valuer and
Auctioneer, 8, Coleman-street.

TO BOOKSELLERS, STATIONERS, and
Others.—Near the Great Western.—No Premium.—TO BE
DISPOSED OF, the TRADE of a BOOKSELLER and STA-
TIONER, eligibly situate as above. The returns are increasing,
the Shop handsomely fitted up, and may be entered upon for 300*l.*
—Apply to Mr. PAGE, Auctioneer and Valuer, 8, Coleman-street.

TO FANCY STATIONERS and Others.—In
a desirable situation, two miles from the City.—TO BE DIS-
POSED OF, the TRADE of a FANCY STATIONER and
DEALER in BERLIN WOOLLS. The business is well estab-
lished, the returns are now 1,000*l.* and may be entered upon for 150*l.*
—Apply to Mr. PAGE, Auctioneer and Valuer, 8, Coleman-street.

Sales by Auction.
Valuable Library, the Property of the late GEORGE
FIELD, Esq.

MESSRS. M. ADAMS & SON respectfully give
notice, that they will SELL by AUCTION, on the pre-
mises, Syon Hill Park Cottage, Isleworth, on TUESDAY, April
17th, and two following days, commencing at 1 o'clock precisely
on each day, the VALUABLE LIBRARY, comprising nearly
5,000 Volumes in elegant and modern bindings, and embracing the
highest authorities in History, Science, and Art, among which are
many Reliques of great Interest and Antiquity, and the highest
Artistic Works of Modern Times.
The beautiful COLLECTION of PICTURES and exquisite
PRINTS, HOUSEHOLD FURNITURE, PLATE, TRINKETS,
PHILOSOPHICAL INSTRUMENTS, and other Effects, will be
submitted on the several days specified in the general Catalogue.
General Catalogues (18. 6*d.* each), to admit two persons, but with-
out which no person will be admitted, may be had of Messrs.
Adams & Son, Auctioneers and Surveyors, Isleworth; or of Mr.
Barnard, Artists' Colourman, 339, Oxford-street, London; or of
James Adams, 104, Upper North-street, Brighton; or they will be
transmitted by post, on inclosing 2*d.* postage stamps to Messrs.
Adams & Son, Isleworth.
The Public View will commence on THURSDAY, April 19, and
continue the two following days, from 10 o'clock A.M. till 5 P.M.,
when it will finally close.

The beautiful Collection of Pictures, and the remaining Stock
of Incomparable Colours, of the late GEORGE FIELD,
Esq.

MESSRS. ADAMS & SON respectfully an-
nounce, that they will SELL by AUCTION on the pre-
mises, Syon Hill Park Cottage, Isleworth, on TUESDAY, the
24th day of April, commencing at 1 o'clock precisely, the BEAU-
TIFUL COLLECTION of PICTURES, by Ancient and English
Masters, the researches of half a century devoted to the Improve-
ment and Encouragement of the Arts, by the late highly-talented
GEORGE FIELD, Esq., among which are the distinguished
names of Correggio, Albano, Salvator Rosa, Wernier, Murillo,
Teniers, Sir J. Reynolds, R. Wilson, Constable, Gainsborough,
Morland, Sir D. Wilkie, Lance, Etry, Bone, and a Noble Composition,
a Dramatic Series, by Luca Giordano, in a solid and elegant
Gilt Cabinet, painted for the Convent of Ste. Marie, near Madrid,
and worthy a place in the Collection of any Nobleman or Gentle-
man in the Kingdom.
The remaining Stock of INCOMPARABLE COLOURS, Ultra-
marines, Carmine, Rubies, &c. will be submitted on MON-
DAY, April 30th, commencing at 12 o'clock precisely; and THE
LIBRARY, comprising almost 5,000 Volumes, and other Effects,
will be submitted on the several days specified in the general
Catalogue.

General Catalogues (18. 6*d.* each), to admit two persons, but with-
out which no person will be admitted, may be had of Messrs.
Adams & Son, Auctioneers and Surveyors, Isleworth; or of Mr.
Barnard, Artists' Colourman, 339, Oxford-street, London; or of
James Adams, 104, Upper North-street, Brighton; and they will
be transmitted by post, on inclosing 2*d.* postage stamps to Messrs.
Adams & Son, Isleworth, near London.
Separate Catalogues of the Pictures and Colours alone, to admit
one person, for the accommodation of Artists and Artists' Colour-
men, may be had at a reduced rate, to be returned to purchasers.
The Public View will commence on THURSDAY, April 19, and
continue the two following days, from 10 o'clock A.M. till 5 P.M.,
when it will finally close.

Sale of the Splendid and Richly-chased Service of Silver Plate, Silver-Plated Articles, Rare Antique Services, Dresden, and Oriental China Vases, Dishes, and other Decorative Objects, of the highest quality and most recherché description; Beautifully-sculptured Busts in Statuary Marble, by Theed, Fine Bronzes, Exquisite Buhl, Sevres, and Bronze-mounted Clocks, Valuable Achromatic Telescopes, Pictures, by Ancient and Modern Masters, and numerous Articles of Virtù, of the late Right Hon. To be viewed, and Catalogues had.

Vulcan Wharf, Earl-street, Blackfriars.

BY MESSRS. FULLER & HORSEY, on TUESDAY, April 10, 1855, at 11 o'clock, on the premises as above, without reserve, TWO APPEGATH'S PATENT VICTORIA PRINTING MACHINES, lying at Dartford, where they may be inspected.—The machines were constructed by Messrs. Hall, in a very superior manner on the principle of the patent granted to Mr. Appegath in 1851. The columns are each in a separate chase, half upon one type cylinder, half upon the other, and they are united in register by the Paper Cylinder, the sheet receiving the impression as it revolves. 9,000 copies per hour may be obtained without any damage to the machines. The machines measure 37½ inches between the bearers, and are about 40 feet in length.

To be seen at Dartford at any time by order, which, with Catalogues, may be had of Messrs. Fuller & Horsey, Billiter-street, City.

ESSAY on the POLITICAL SYSTEM of EUROPE, and its Connexion with the Government of Great Britain. By the Rev. T. S. HUGHES, late Canon of Peterborough, and Author of 'The History of England from the Death of George II. to the Accession of Queen Victoria,' with a Memoir of the Author, and Portrait.
 London: George Bell, 186, Fleet-street.

Price 2l. 2s. in 2 handsome 8vo. volumes, appropriately bound, and illustrated by upwards of 1,300 Hieroglyphic and other Engravings, many of which are beautifully coloured.

THE MONUMENTAL HISTORY of EGYPT, as recorded on the Ruins of her Temples, Palaces, and Tombs. By WILLIAM OSBURN, R.S.L.
 Author of 'Ancient Egypt, her Testimony to the Truth,' 'Israel in Egypt,' &c.

The number of hieroglyphics and other illustrations amounts to upwards of 1,300, not one of which has been copied from any existing English work, many being taken from sketches by the author's own hand; whilst assistance has also been sought from very elaborate and costly works issued by the Governments of France, Italy, and Germany, and which are almost unknown in England. The engravers employed have been engaged in the highest walks of Art, and are the same as were employed in the illustration of Layard's 'Nineveh,' 'The Abbotsford Edition of the Waverley Novels,' and Murray's 'Illuminated Book of Common Prayer.'

Great expense has been incurred in producing this admirable work in a style worthy of the contents. It is printed with all the care which the nature of the book requires, and with every attention to artistic elegance and typographical beauty.

Trübner & Co. 12, Paternoster-row, London.

Now ready, Ninth and Cheaper Edition, in 8vo. with 60 Illustrations, 12s.

CURIOSITIES OF LONDON.

Now ready, in a closely-printed volume of 800 pages, price 14s., with a Portrait of the Author, from a painting by T. J. Gullick.
CURIOSITIES OF LONDON; exhibiting the most Rare and Remarkable Objects of Interest in the Metropolis; with nearly Fifty Years' personal Recollections.
By JOHN TIMBS, F.S.A.

"Life-long observation, books, conversation, and tradition have each contributed to swell the facts that find a place in the 'Curiosities of London.' These facts are numerous, and well brought together; nor do we know where so much information respecting the metropolis can be found in a single volume, or even in many volumes."—*Spectator*, Feb. 1, 1855.

"The plan of the work is excellent, and every page bears proof of the research and industry of the author. We have been surprised at the amount and variety as well as the accuracy of the information. The book is sure to be a standard work in the literature of the metropolis."—*Literary Gazette*, Feb. 17, 1855.

"The execution is creditable to Mr. Timbs' great industry and research, and is remarkable for careful compilation and judicious observations. Juvenile readers, men of business, and antiquaries, may all profit by the 'Curiosities of London.'"
Economist, Feb. 10, 1855.

"Here is a clever book on a subject always interesting, and always new; a happy title, happily carried out; in a few words, a volume on London that will live."
Illustrated London News, Feb. 10, 1855.

David Bogue, 56, Fleet-street.

Now ready, post 8vo. price 10s. 6d. cloth.

CYCLOPÆDIA OF UNIVERSAL HISTORY:

Comprising Tabular Views of Contemporaneous Events in all Ages, from the Earliest Records to the Present Time, arranged Chronologically and Alphabetically.

Edited by ISAIAH M'BURNEY, B.A. and SAMUEL NEIL.

The work consists of Two Parts: in the first of which are exhibited, in Synchronistic order, the principal events that occurred in the several countries of the world; in the second is given an alphabetical arrangement of all the curious or important facts of history, so classified that, with a very small expenditure of time and care, the work may be used as a comprehensive guide to universal history.

London and Glasgow: RICHARD GRIFFIN & Co.

Mr. S. W. FULLOM'S NEW WORK.

Now ready, in 2 vols. post 8vo. dedicated, by permission, to Her Majesty the Queen of Hanover, a SECOND and REVISED EDITION of

THE HISTORY OF WOMAN,

AND HER CONNEXION WITH RELIGION, CIVILIZATION, AND DOMESTIC MANNERS, FROM THE EARLIEST PERIOD.

By S. W. FULLOM,

Author of 'THE MARVELS OF SCIENCE,' 'THE GREAT HIGHWAY.'

"The history of woman is the history of the spirit of human life; and it is in this sense that the author of this work has conceived and executed his task. Commencing with the antediluvian ages, he follows up the traces which the Sacred Narrative affords us of the position occupied by woman, and passes on through the patriarchal period to the aspect of society, determined by the condition of woman, and her position among the Egyptians, the Hebrews, the Assyrians and Babylonians, the Persians, the Mongolian races, and, above all, the Greeks and Romans. The remarkable contrast between Chinese and Tartar women is fully brought out. The social position of the sex in Greece furnishes the author with abundant opportunities of displaying his extensive research; nor is he less erudite in depicting the character and position of the Roman ladies. We have next an account of woman in the Christian and Byzantine Empire, among barbarous nations, in the Middle Ages, and among the nations of America at its discovery. The part which woman played in the rise and progress of Mohammedanism is not overlooked; and we are also introduced to the Amazons. It is a most entertaining and highly interesting book."—*John Bull*.

London: LONGMAN & Co.

CARLETON'S NEW WORK.

WILLY REILLY, AND HIS DEAR COLEEN BAWN.

A TALE FOUNDED ON FACT.

By WILLIAM CARLETON,

Author of 'The Black Prophet,' 'The Miser,' 'Traits and Stories of the Irish Peasantry,' 'Valentine M'Clutchy,' &c.

In 3 vols. Ready this day at all the Libraries.

Just published, price 7s. 6d. Illustrated,

LAYS OF LOVE AND HEROISM,

LEGENDS, LYRICS, and OTHER POEMS.

By ELEANOR DARBY,

Author of 'The Sweet South.'

"The authoress is already well and favourably known to the British public by her previous publication, under the title of 'The Sweet South.' The appearance of the present volume will but call forth a repetition of those high encomiums which were so plentifully bestowed upon her former effort. The 'Lily o' Dundee' is of itself sufficient to show the distinguished abilities of the authoress—displaying as it does, in a very high degree, her power, pathos, and poetic skill. The volume, as a whole, cannot fail to contribute very materially to the popularity of the accomplished authoress; and it deserves a very extensive circulation."—*Morning Advertiser*.

IMPORTANT TO AUTHORS.

JOHN MABLEY, 9, Wellington-street North, Strand, London.

GEORGE ROUTLEDGE & Co.'s

New Publications for April.

NEW BOY'S BOOK, splendidly illustrated. In 1 thick vol. price 8s. 6d. cloth gilt.

EVERY BOY'S BOOK: a Complete Encyclopædia of Sports and Amusements, intended to afford Recreation and Instruction to Boys in their Play or Leisure Hours. By GEORGE FOREST, Esq. With upwards of 600 Illustrations, executed expressly for this Work from Designs by WM. HARVEY and HARRISON WEIR.

"This work has been in progress upwards of three years; and whilst the complete book has been under the control of one editor, each separate article has been written by a competent author; by which means, it is hoped, this 'Every Boy's Book' will comprise the fullest and most recent information that could be obtained on every subject of which it treats, and be at once the most complete and best work of its kind published."

Price 1s. 6d. boards, or 2s. cloth.

LANDMARKS of the HISTORY of ENGLAND. By the Rev. JAMES WHITE, Author of 'King of the Commons.'

"We hold this to be a pattern volume of cheap literature. It is so written that it cannot fail to amuse and enlighten the most ignorant; yet it is also a book which may be read with pleasure, and surely profit, too, by the most polished scholar."—*Examiner*.

Railway Library for April.

Price 1s. 6d. in boards.

DEVEREUX, by Sir E. BULWER LYTTON.

The Volumes lately published are—

ELECTRA. By the Author of 'Rockingham.'

DISOWNED. By BULWER.

TOWER of LONDON.

HEIR of SELWOOD. By Mrs. GORE.

GODOLPHIN. By BULWER.

FORTUNES of TORLOUGH O'BRIEN.

NIGHT and MORNING.

SINGLETON FONTENOY.

Complete Lists gratis on application.

CARDINAL WISEMAN on the WAR.

Price 3d. sewed.

THE FUTURE HISTORIAN'S VIEW of the PRESENT WAR: a Lecture delivered by CARDINAL WISEMAN, at St. Martin's Hall.

Routledge's Original Novels.

Price 1s. fancy boards.

THE SERF SISTERS. By JOHN HAR-

WOOD, Author of 'Stamboul, the Sea of Gems.'

"In this work are many scenes of passionate utterance, and Mr Harwood shows himself a master of situation. This book is interesting for its realities of Russian life at the present time. They are doubtless as real as anything in the pages of the English woman, whose pen has been a most damaging weapon to the holiness of 'holy Russia.'—*Douglas Jerrold's Newspaper*.

Price 2s. fancy boards.

THE FAMILY FEUD. By ADAM

HORNBOOK.

"Is for freshness, vigour, and variety, worth any half-dozen novels.... There are such life-like descriptions, and the incidents are so romantic, that the reader is carried on without delaying to criticize."—*Athenæum*.
"The cheap novels will beat the dear ones, if such writers as Adam Hornbook can be induced to write such novels as 'The Family Feud' for 2s. instead of 11s. 6d. It is written with workman-like skill, and occasionally of the deepest and most passionate interest. It differs from the ordinary run of three-volume novels only by being superior to most of them in power and originality."—*Guardian*.

Price 1s. fancy boards.

THE CURSE of GOLD. By R. W.

JAMESON.

"It is written with considerable skill and graphic power. Many of the incidents are highly dramatic."—*Morning Post*.
"The chord of interest is early and cleverly struck, and it vibrates unceasingly, with more or less intensity, throughout every page of the volume."—*Scotsman*.

London: 2, Farringdon-street.

LONDON, SATURDAY, MARCH 31, 1855.

REVIEWS

Miscellaneous Works—[*Vermischte Schriften*].
By Heinrich Heine. 3 vols. Hamburgh,
Hoffman & Campe; London, Williams &
Norgate.

THE last notice that we received of the existence of Herr Heinrich Heine, prior to the appearance of the volumes named above, was partly of a pictorial character. A portrait of the poet, with all the appurtenances of a bed-ridden invalid, stood as the ghastly frontispiece to a German poetical annual, published about twelve months ago, and by way of comment to the representation of the attenuated form, was a lyrical poem, by Herr Heine himself, remarkable alike for ingenuity and indecency. It was evident enough that long confinement to a bed of sickness had not checked the native levity of the sufferer; but that he was vaunting the union of bodily emaciation with intellectual audacity. Never was the pen of Herr Heine more licentious than when his own shattered condition, depicted in the engraving with terrible accuracy, was the subject of the sepulchral joke. Strange to say, the book that contained the picture and the poem was one of those smart little volumes that seem framed by the binder, as birthday gifts for sentimental young ladies, or as rewards of merit for proficient schoolboys. The book was a drawing-room book, intended to fill up the dull intervals of a *soirée*,—but the poem, if it had been translated aloud in an English party, would have come upon respectable matrons and maids as one of those thunder-claps of impropriety that are remembered for a lifetime.

This notification that the veteran scoffer was still scoffing, though apparently on his death-bed, was soon followed by a sort of vague report that Herr Heine had repented of his evil ways and had even become "pious." Nay, even by his own account, his conversion to—something,—was such a received fact that Catholics and Protestants showed their rivalry in claiming the convert. On account of this rumour of the poet's penitence and piety, the last volumes, now before us, have been sought with a degree of interest. The comprehensive title, '*Vermischte Schriften*,' is, indeed, somewhat indefinite; but then, of the three volumes, two, which bear the special name of '*Lutetia*,' can be set aside,—and volume the first has a section which with its title of '*Confessions*' (*Geständnisse*) looks tempting enough. In this the reader might fairly hope to find a full, true and particular account of the reform that has taken place in the views of the lyrical bard of old "young Germany."

The very circumstance which rendered the '*Confessions*' such an object of curiosity to many minds seemed likely to exclude them altogether from our columns. When theological controversy was, by the law we have imposed upon ourselves, banished from our pages, how could we venture to trace the steps by which the very *left-hand* Hegelian advanced from a state of infidel Pantheism to a condition of orthodox belief? How could we state his doubts and his difficulties, and the solution thereof, without violating one of the fundamental clauses of our constitution?

We opened the book of '*Confessions*,'—and lo!—the perplexity was gone. The conversion of Herr Heine, such as it is, is certainly here set down; but the case is by no means one that takes us beyond specially prescribed bounds. We say "*specially* prescribed" with significance, for there is abundance of matter which, on the mere score of decency, is totally inad-

missible into any English periodical. Herr Heine was always a ticklish genius to notice, and he remains so still,—not from any theological peculiarities, but from his old sins of profanity and licentiousness, which, in spite of the moral change that has taken place, still flourish in his pages with their wonted luxuriance.

The "serious" portion of the British public will, doubtless, congratulate themselves but little on the repentance of the sinner, when they learn, by his own confession, that he dropped infidelity because it was growing—vulgar:—

As long as these doctrines remained the private property of an aristocracy of wits, and were discussed in the language of genteel *coteries*, totally incomprehensible to the lackeys who waited behind us—while we blasphemed at our philosophical *petits-soupers*,—so long did I too belong to those light-hearted *esprits forts*, most of whom resembled the liberal *Grands Seigneurs*, who, shortly before the first Revolution, sought to dissipate the tedium of their weary court-life with their new destructive ideas. But when I observed that the rude *plebs*—the tag-rag and bobtail (*Jan Hagel*)—likewise began to discuss the same themes in their dirty *symposia*, where, instead of wax-tapers and *girandoles*, there were only tallow-candles and oil-lamps,—when I saw that ragamuffin cobblers and tailors, in their stupid pot-house talk, dared to vaunt forth their infidelity,—when Atheism began to smell very strong of cheese, brandy and tobacco,—then my eyes were suddenly opened; and what I had not understood by my intellect I now apprehended through my nose,—through a feeling of disgust; and so, thank heaven, there was an end to my atheism. However, to say the truth, it was not mere disgust which rendered infidel principles so distasteful to me, and caused me to draw back. A certain worldly anxiety, which I could not overcome, had also something to do with the matter:—I saw that Atheism had concluded a treaty, more or less secret, with the most horrible, wickedest, commonest Communism. My dread of the latter has nothing in common with the terror of the upstart, who trembles for his fortune, or with the uneasiness of the opulent tradesman, who dreads an interruption to his business;—no, I rather feel the private anxiety of the artist and the *savant*, inasmuch as we see our whole modern civilization—the toilsome acquisition of so many ages,—the fruit of the noblest toils of our predecessors,—threatened by the victory of Communism. Carried along by the torrent of magnanimous ideas, we are ready enough to sacrifice the interests of art and science, nay, every private interest, to the general interest of the suffering and oppressed people; but all the time we know well enough what we have to expect if that great rough mass,—which some call the People, others the Rabble, and whose legitimate sovereignty has been proclaimed long ago,—once gets the upper-hand. The poet especially feels an uncomfortable shudder at the thought of this brutish sovereign. We would readily sacrifice ourselves for the people; for self-sacrifice is one of our most refined enjoyments. The emancipation of the people was the great problem of our life, and we have striven for it, enduring unspeakable misery, both at home and in exile; but the pure sensitive nature of the poet rises against all personal contact with the people, and still more do we shudder at the thought of its caresses,—from which heaven preserve us! A great democrat once said, that if a King had pressed his hand, he would at once thrust that hand into the fire to purify it. I would say, in the same manner, I would wash my hand if the sovereign People had honoured it with a squeeze.

This looks aristocratic enough; but "don't be too sure he is a beef-eater." Though the old scoffer thus luxuriates in his terror of the *Spectre Rouge*, he comes out a very fair liberal after all. He loves the people, though he has a strange way of showing it:—

Oh, the people,—that poor king in rags has found flatterers, who, more shameless than the courtiers of Byzantium or Versailles, fling the censures at its head. These Court lackeys of the people are ever praising

its perfections and its virtues, and cry out, with admiration, "How beautiful is the people!—How good is the people!—How intelligent is the people!"—Ye lie. The poor people is not beautiful; on the contrary, it is very ugly. But this ugliness arose from dirt, and will vanish with the same, as soon as we build public baths, wherein Its Majesty the People can bathe for nothing. The addition of a bit of soap will do no harm; and we shall then see a people that is nice and clean,—a people that has washed itself. The people, whose goodness is so highly extolled, is not good at all; it is often as bad as certain other potentates. But its badness proceeds from hunger; we must take care that the sovereign people always has something to eat; as soon as its High Mightiness is properly fed, it will smile upon you even graciously and benignantly, just like the rest. Its Majesty the People is, moreover, not very intelligent; it is, perhaps, stupider than other Majesties,—almost as bestially stupid as its own favourites. It bestows its love and confidence on those only who talk or howl the language of its passions, while it hates every honest man who talks the language of reason to ennobel and enlighten it. * * The ground of this perverseness is ignorance; we must seek to obliterate this natural defect by means of public schools for the people, in which instruction is given gratis, together with a due share of bread and butter and other articles of nutrition. When every son of the people is in a position to acquire as much knowledge as he pleases, you will soon see an intelligent people. Perhaps, at least, it will be as cultivated, as intelligent, as witty, as we are,—I mean, as you and I are, beloved reader.

Now that Herr Heine is converted, the question naturally arises, what has he become after all?—The answer that we gather from the '*Confessions*' is simply this, that instead of the Atheism, which was current among the extreme *left* of Hegel's disciples, he has adopted a broad Theism, which will include both Judaism and Christianity. He confesses that, by nature, he was made rather for a poet than for a philosopher, and that, though the self-deification with which he was inspired by Hegelism flattered his vanity, he was never greatly in love with the system of the Berlin Professor. While on the subject of Hegel, he lets fall an anecdote, which is too characteristic to be passed over unnoticed. Once, it seems, when two-and-twenty years of age,—he is now, by his own "confession," five-and-fifty,—having eaten a good dinner and taken his coffee, he stood by the side of Hegel, at a window, and spake with enthusiasm of the stars. "Humph!" murmured the philosopher, "the stars are only a shining leprosy in the sky."—This anecdote will not appear incredible to those who remember that Hegel, on his travels, felt but small respect for the Alps, because they were immovable, but sympathized with a torrent, on account of its "go-a-head" propensities.

Herr Heine is such an unwearied joker that it is hard to tell when he is in earnest and when he is not; and on that account he may be compared to those ironical persons whom we all meet in society, and who, though amusing at first, become at last tiresome and perplexing. Through all the ribaldry and wantonness of Herr Heine, there is ever apparent a vein of sterling common sense, which shows that, wherever the heart may be, the head is in the right place; and in this case, while he is describing his desertion of the modern German philosophy, he touches with such felicity on the attractiveness and on the weak points of Hegel's teaching, that we are willing to believe he is making a serious confession. There is no doubt that to a youthful mind the schemes of Hegel may seem to promise something little short of omniscience as a reward for the mastery of certain strange *formulæ*, which can be learnt by heart and hawked about at pleasure, without any necessary accompaniment of ideas. There is likewise no doubt

that the same youthful mind, when it has become mature, will occasionally find out that the universe is not to be exorcized with a few hard words. These are the stages through which Herr Heine has passed, and he now settles down in the faith of his Jewish forefathers,—or rather, as we have said, in a sort of Theism, which excludes no positive sect,—and reads the Hebrew Scriptures with as much reverence as is in his nature.

To the ordinary religious world of this country, the adoption of a liberal Judaism would seem but a small step in the road to orthodoxy; but in Germany it is much more significant than it would be here. There the fight is not so much between Deism and positive religion, as between an ultra-Pantheism or Atheism, that has never gained ground in England, and the belief in a personal Deity. One of the chief characteristics of the infidel party has been a constant exaltation of the Greeks above the Jews among the nations of the Old World; and modern Pantheism has here been found to show its sympathy with the Polytheism of Pagan antiquity. An English or a French Freethinker generally stops at Deism; but the German mind, by its very constitution, has an innate tendency towards the doctrines of Spinoza; while, as for a German Freethinker, he will regard Voltaire himself as a religious bigot. Herr Heine's respect for Judaism—granted that it is in earnest—is therefore a declaration of adhesion to the conservative side.

The following remarks on the institutions of his fathers are worthy a place in a more serious book.—

Judæa has always seemed to me like a piece of the West that has lost itself in the East. Indeed, with its spiritual creed, its rigid, chaste, ascetic morals—in a word, with its abstract *innerlichkeit* (*Innerlichkeit*)—this land and its people always formed the strangest contrast to neighbouring lands and neighbouring people; who, practising the most wanton and fervid worship of nature, wasted their existence in sensual Bacchanalian festivities. Israel sat piously under the shade of her own fig-tree, sang the praise of the invisible Deity, and practised virtue and righteousness; while in the temples of Babylon, Nineveh, Tyre and Sidon, those bloody and licentious orgies were celebrated, the very description of which now makes one's hair stand on end. Think of those surrounding nations,—and you cannot sufficiently admire the early greatness of Israel. Of Israel's love of liberty, while slavery flourished and was justified, not only in the neighbouring countries, but even among all the nations of antiquity, not excluding the philosophical Greeks, I will not speak, lest I should compromise her Scriptures in the eyes of the powers that be. * * Even Moses was a sort of socialist; though as a practical man he merely sought to modify existing usages, especially those that relate to property. Instead of contending with the impossible—instead of madly decreeing the abolition of property—Moses only sought to give it a moral character—to bring property into harmony with morality and reason; and he accomplished his purpose by the establishment of the Jubilee Year, when all alienated land returned to the original owner, in whatever manner it had been alienated. This institution stands in most striking contrast to the "Usucapio" (*Verjährung*) of the Romans, with whom, after the lapse of a certain time, the actual possessor of a property could not be compelled to give it back to the original owner, unless the latter could prove that he had claimed a restitution in due form within the appointed period. This last-named condition opened a wide field to chicanery, particularly in a state where despotism and jurisprudence flourished, and all means of intimidation were at the disposal of the unlawful owner, especially when he had for his adversary a poor man who could not pay costs. The Roman was, at once, a soldier and a lawyer,—and when he had gained another's property with his sword, he could defend it with his tongue. Only a nation of robbers and casuists could have invented the proscription—the *Usucapio*,—and have

consecrated the same in that abominable book, which might be called the devil's Bible,—in the Codex of the Roman Civil Law, which is, alas! still in force. I have already spoken of the affinity between the Jews and the Germans, whom I once called "the two nations of morality,"—and, to give a remarkable trait by way of illustration, I will now mention the ethical indignation with which the old German law stigmatizes the *Usucapio*. In the mouth of the peasant of Lower Saxony has descended to this day the touchingly beautiful maxim:—"An hundred years' wrong will not make one year's right." The laws of Moses protest still more strongly by the institution of the Jubilee. Moses did not wish to abolish property:—on the contrary, he rather wished that every one should possess it, that no one should be reduced through poverty to a serf with a serf-like mind. Freedom was always the leading thought of the great emancipator, and this breathes and flames forth in all the laws that have reference to poverty. Slavery he hated above all measure—nay, ferociously,—but even this inhumanity he could not wholly extirpate. It was too deeply rooted in the life of that early period, and he could do no more than alleviate the fate of the slave, facilitate his redemption, and limit the time of service by virtue of his laws. If a slave, whom the law had ultimately freed, absolutely refused to quit his master's home, Moses ordered that the incorrigible servile rascal should be nailed by the ear to the door-post of the house of bondage, and, after this ignominious exposure, he was condemned to servitude for the remainder of his life. Oh Moses, our teacher, *Mosche Rabenu*, thou sublime antagonist of servitude, give me a hammer and nail that I may nail to the Brandenburg gate the long ears of our easy slaves in their liveries of black, red and gold!

The last place in which one would look for a confession of faith would be the *scenario* of a ballet; but, nevertheless, the ballet of 'Faust,' which Herr Heine composed for Mr. Lumley about eight years ago, and which has since been published, gave signs of the coming change. It was prefaced by much introductory matter, in which Goethe's mode of perverting the old story-book was severely censured, and the advantage of sending the *blasé* Doctor to the lower regions instead of wafting him in an opposite direction, was clearly pointed out. In the course of the work itself Hellenism appeared as the evil principle, the groups of antique beauty being just as unholy and answering the same purpose as the nuns whom "Robert the Devil" finds in a certain well-known convent. The ballet was never produced, nor can the most desperate enemies of Mr. Lumley blame him for its non-production. In the first place, it would have acted as long as one of those huge plays by M. Alexandre Dumas, which shut up the *Théâtre Historique*; in the second place, though its general tendency was unexceptionable, and even edifying, there were certain details which would have rendered a passage through the Chamberlain's Office simply impossible. Herr Heine evidently loves ballet-making, and among his present 'Miscellanies' we find another work of the kind, likewise written for Mr. Lumley, and entitled 'Die Göttin Diana.' One of the stage directions in this must have looked not a little comical to a practical manager:—the Bacchantes are ordered to put themselves into—*impossible* positions—"unmögliche Positüren."

The manner of Herr Heine remains what it always was:—we do not find the slightest diminution of his petulance and his vivacity. Whether he talks about himself in the 'Confessions,' or whether he reviews the celebrities of Paris in the book entitled 'Lutetia'—which occupies the second and third volumes of the 'Miscellanies'—he still distinguishes himself by a happy perception of characteristics,—by a faculty of reproducing them with a few bold touches,—and by a marvellous command of fanciful illustration. Nothing, for instance, can be more truly characteristic than this account of his entrance into Paris in the year 1831,

with its mixture of men and manners, old jokes and new conceits, puerility and sarcasm.—

On the 1st of May, 1831, I crossed the Rhine. I did not see the old river-god, Father Rhine, but contented myself with throwing my visiting-card into his waters. He was, I was informed, sitting at the bottom, and was again studying Meidinger's French Grammar, because, during the Prussian rule, he had gone back a great deal in his French, and now wished to get once more into practice that he might be prepared for contingencies. I fancied that I could hear him below, conjugating, "J'aime, tu aimes, il aime, nous aimons." But what does he love after all? Certainly not the Prussians. I only saw the Strasbourg Minster at a distance, he was wagging his head, like Trusty Eckart of old, when he saw some young sprig going towards the Venusberg. At St. Denis I woke out of a sweet morning sleep and heard for the first time the cry of the *cocoo*-driver, "Paris! Paris!" as well as the cocoa-seller's bell. Here one could breathe the air of the metropolis, which was already visible in the horizon. An old *commissionnaire* tried to persuade me to visit the royal tombs, but as I had not come to France to see dead kings, I was satisfied with letting the same cicerone tell me the legend of the place,—namely, how the wicked heathen king had ordered St. Denis to be beheaded, and how the Saint, with his head in his hand, ran from Paris to the spot in which he wished to be buried, and which he wished to be called "St. Denis," after his own name. "If we think of the distance," said my instructor, "we must be astonished to think that any one could go so far without a head. Nevertheless," he added, with a strange smile, "*Dans ces cas pareils, c'est le premier pas qui coûte.*" That was worth a couple of francs, and I gave them to him, *pour l'amour de Voltaire*. In twenty minutes I was in Paris, entering by the triumphal gate of the Boulevard St. Denis, which was originally erected to the honour of Louis the Fourteenth, but now served for the glorification of my own entrance. I was truly astonished at the number of well-dressed persons, all as tastefully decked out as the pictures in a *Journal des Modes*. Moreover, the circumstance that they all spoke French made a great impression on me, for with us Germans that is a sign of gentility. Here, therefore, the whole population was as genteel as the nobility at home. The men were all so polite and the lovely women so smiling. If any one by accident knocked against me without begging my pardon at once, I could wager that it was one of my own countrymen; and if any fair one looked too sour, I was certain she had either eaten *sauerkraut* or could read Klopstock in the original. I found all so amusing, and the sky was so blue, and the air was so agreeable, so generous, and here and there the remains of the July sun were still twinkling; the cheeks of the fair Lutetia were still red with the kisses of that sun, and the bridal nose-gay had not yet faded on her bosom, though, to say the truth, the words *Liberté, Égalité, Fraternité*, had been rubbed out at some of the street-corners. I visited at once the *restaurant* to which I had been recommended,—and there the proprietors assured me that, even without an introduction they would gladly have received me, since I had an honest *distingué* exterior, which was of itself recommendation enough. Never did the keeper of a German cook-shop say anything of the kind, even if he thought so. Those churls are of opinion that they must keep everything pleasant to themselves, and that they are bound, by virtue of their German frankness, to say to one's face nothing but what is disagreeable. In the manners and in the language of the French there is so much delicious flattery that costs so little and yet is so beneficial and refreshing! My soul—that poor sensitive plant—which a shrinking timidity in the presence of its own nation's roughness had caused so violently to contract itself, now once more expanded to the flattering tones of French urbanity. Heaven endowed us with a tongue that we might say pleasant things to our fellow-creatures.

That the 'Miscellanies' may be miscellaneous enough, we have a new set of poems, of that kind of which Herr Heine is not only the type, but the inventor. Other bards have passed from grave to gay within the compass of one work; but the art of constantly showing

two natures, within the small limit of perhaps three ballad verses, was reserved for Herr Heine. No one like him understands how to build up a little edifice of the tenderest and most refined sentiment for the mere pleasure of knocking it down with a last line. No one like him approaches his reader with doleful countenance,—pours into the ear a tale of secret sorrow,—and when the sympathies are enlisted, surprises his confidant with a horse-laugh. It seems as though nature had endowed him with a most delicate sensibility and a keen perception of the ridiculous, that his own feelings may afford him a perpetual subject for banter. Most of the poems in the present 'Miscellanies' refer to his state of confinement in the sick-room,—and the amount of tragical mirth is increased above the usual average by the reality of the suffering. His present pains—his reminiscences—the petty annoyances of the invalid, such as the noise of cats upon his roof—his delirious dreams,—all pass fantastically before us, like a funeral procession, in which every mourner wears a grinning mask.

* In the following poem, entitled 'Die Libelle' (the dragon-fly), the foundation is of the most trite and trivial kind, being no more than the almost antediluvian notion of deducing a moral from the fate of the headless moth, that rushes into a candle; but what new turn is given when the poet reflects on the condition of the wingless insect and himself, an exile, forcibly illustrates a peculiar horror of the exile's life! Suddenly the earnest tone changes, and the whole ends with the undignified ejaculation "*Die schöne, falsche Canaille*" (the lovely, faithless slut):—

The dragon-fly is dancing,—
Is on the water glancing,
She flits about with nimble wing,
The flickering, fluttering, restless thing.

Besotted chafers all admire
Her light-blue, gauze-like, neat attire;
They laud her blue complexion,
And think her shape perfection.

While not a few lose every bit
Of their own native chafer-wit;
Each blockhead of his passion sings,
And promises all sorts of things.

Then loudly laughs the charming fair;
"For vows like these I do not care,—
If you my heart desire,
Go, fetch a spark of fire.

My cook is just confin'd,
And I my soup must mind;
My kitchen-fire is clean gone out;
I want a spark,—so look about."

These words she had no sooner utter'd,
Than off the gallant chafers flutter'd;
Leaving their native wood behind,
Away they went, the spark to find.

Soon in a bow'r discerning
A taper brightly burning,
The lovers rush upon it madly,
And seek their own destruction gladly.

The chafers, and their hearts of passion,
Are soon consum'd in dismal fashion;
Some lose their little lives—poor things!—
The others only lose their wings.

How does the wingless wretch deplore
His exile on a foreign shore,
Forc'd, worm-like, on the ground to dwell
With noisome things, that foully smell.

"Bad company," he thus complains,
"Is one of exile's bitterest pains,—
Here am I doomed, by ruthless fate,
With vermin to associate,

Whose loathsome friendship I must swallow,
Because in the same filth I wallow.—
So mourn'd old Dante long ago,
The bard of Hell's and Exile's woe.

I think upon a better time,
When, on my wings, I rose sublime,
And through the light-blue ether sported,
And many a flow'r of summer courted;

And dared the roses' sweets to steal,
And—blest condition!—felt gentleel,—
Kept company with moths refin'd,
And grasshoppers of cultur'd mind.

My wings are gone—and I must mourn,
For home I never shall return;
I am a worm, and must expire,
And rot, and rot, in foreign mire.

Ah, woe is me, that with the sight
Of that blue charmer, false as bright,
I dar'd my eyes to glut—
The lovely, faithless slut!"

The following lines, on the other hand, are in Herr Heine's rarer manner. The melancholy tone is sustained, and the poet's eccentricity, though it produces a bizarre image, never deviates into the comic:—

How wearily time crawls along,—
That hideous snail that hastens not,—
While I, without the power to move,
Am ever fix'd to one dull spot.

Upon my dreary chamber-wall
No gleam of sunshine can I trace;
I know that only for the grave,
Shall I exchange this hopeless place.

Perhaps already I am dead,
And these perhaps are phantoms vain;—
These motley phantasies that pass
At night through my disordered brain.

Perhaps with ancient heathen shapes,
Old faded gods, this brain is full;
Who, for their most unholy rites,
Have chosen a dead poet's skull;—

And charming, frightful orgies hold—
The mad-cap phantoms!—all the night,
That in the morning this dead hand
About their revelries may write.

This gloomy picture of Herr Heine's present state—completely illustrated throughout the 'Miscellanies'—forms a fit epilogue to our review of his latest production.

The Angler and his Friend; or, Piscatory Colloquies and Fishing Excursions. By John Davy, M.D. Longman & Co.

THE cynical saying which described Piscator and his sport as "a stick and a string, with a worm at one end, a fool at the other," is no longer applicable,—if, indeed, it ever were. Angling is not sport for a fool. It is an occupation begetting meditation and reflection,—matters which your fool cannot work with,—and requiring the patience which is not agreeable to folly. The number of pleasant and clever books written by anglers is another proof of the want of applicability in the ancient "saw." A good angler is generally a good talker, taking his bright share of conversation simply because he has acquired the habit of thinking,—without which there is no profitable talking. An angler is the brother not only of a gentle but of a hearty race. It was an angler, Dean Nowell, who invented bottle-ale. The post-prandial hour of anglers is of a better quality than that of the mere fox-hunters. They are usually temperate men; and, despite their favourite recreation exposing them to many ills, they are said to be remarkably exempt alike from podagra and pechyagra: though strangers to the stream might think they were exposed to both. The physical strength of an angler is not so severely tried as that of the followers of lustier sports; and his animal spirits are for ever cheerily buoyant. The once greatest of English barytones, and still great master of his art, is the very type of such a race. No man can throw a fly with more skill before dinner, or more melodiously intone 'Jolly Dick the Lamplighter' after it.

Of the community here mentioned, Dr. Davy is a worthy member. Young anglers will read his volume with profit, and old anglers with pleasure. It is just the quaint, chatty, calm, yet cheerful book, which a work on Angling should be. A line or two spun off his reel will show that our commendation is not made without warrant.—

"England is specially favourable for angling; its many rivers and lakes abounding, or once abounding, in the beautiful trout and its congeners; its temperate climate equally suitable to fish of cool waters, such as all the Salmonidæ are, and to the active exercise which the use of the fly-rod requires. These circumstances may account for the sport being so much an English one,—I should rather say a British and Irish, as it is no less followed in the sister countries under

the like advantageous circumstances. But even in regions nowise like our own favourable, we may witness traces of the same taste. Thus in the Ionian Islands, where there are no streams suitable to the angler, the natives of one of them, those of Paxo, practise an aerial kind of angling, not indeed for fish, but for birds. Sitting on the edge of a lofty cliff, with all the appliances of the art,—rod, line, and baited hook,—a natural fly the bait,—they make their casts, and effect the capture of many a deluded swallow. In the neighbourhood of Ravenna, in the marshes of La Classe, where frogs abound, the natives, in want of nobler sport, seek amusement in taking these reptiles, using, we are told, a portion of the frog for a lure, and placing it so as to make it act the part of a hook. In the West Indies there is a more exciting kind practised; in Barbadoes, for the shark; and at Trinidad, in the Gulf of Paria, for the whale. Both these are fierce struggles, the one carried on, the performer standing on a rock or cliff washed by deep water; the other in boats. Neither of these kinds of sport have I myself witnessed, but I have been where they were practised, and I have heard accounts of them from those who engaged in them, narrated with an animation strongly betokening the zest with which they were followed."

With regard to frog angling, we may remark, that we ourselves, in our "salad days," have followed the sport, but not with such a bait as that named in the above extract. The locality was the pool near the then existing "Ranelagh," in the Bois de Boulogne, and the common bait was yellow soap, at which the frogs snapped greedily. How their hind-quarters tasted after they were cooked we are not enabled to say, but they certainly agreed with the human stomach of the devourer better than the trout of Loch Drin with the stomachs of those who dine upon them. It is said, at least, that the trout of this Irish lake cannot be eaten without violent sickness following. We have heard this accounted for by the fact of the fish being confined in the lake, and no way left them to or from a river. Dr. Davy says so much upon trout and salmon fishing in Ireland that we should have liked to hear his opinion upon this singular circumstance.

The subject of fish as food is daily becoming of more importance in this our thickly populated home. Dr. Davy has some remarks on the matter that deserve to be remembered.—

"There is much nourishment in fish, little less than in butcher's meat, weight for weight;—and in effect it may be more nourishing, considering how, from its softer fibre, fish is more easily digested. Moreover, there is, I find in fish, in sea fish, a substance which does not exist in the flesh of land animals, viz. iodine: a substance which may have a beneficial effect on the health, and tend to prevent the production of scrofulous and tubercular disease, the latter, in the form of pulmonary consumption, one of the most cruel and fatal with which civilized society, and the highly educated and refined, are afflicted. Comparative trials prove that in the majority of fish the proportion of solid matter, that is, the matter which remains after perfect desiccation, or the expulsion of the aqueous part, is little inferior to that of the several kinds of butcher's meat, game or poultry. And, if we give our attention to classes of people—classed as to quality of food they principally subsist on,—we find that the ichthyophagous class are especially strong, healthy and prolific. In no class than that of fishers do we see larger families, handsomer women, or more robust and active men, or a greater exemption from the maladies just alluded to."

Owing to the absence of iodine in fresh-water fish and its presence in sea fish, there is no doubt that the latter are more nutritious. It is the iodine in cod-liver oil which renders the oil so efficacious in arresting the progress of consumption. Dr. Davy expresses an opinion that "in Eastern nations, in warm climates, most of the coarse-feeding animals, especially swine, were prohibited, and as much so by the Mo-

hammed as the Mosaic law, on the idea probably that their flesh is unwholesome." With respect to swine, we believe that the prohibition rests upon the ascertained fact that such food, in hot countries, renders the eater extremely liable to leprosy as well as other cutaneous diseases. But fish in many parts of Arabia cannot be procured as a substitute. Indeed, the article is so scarce that the proverb which says that "the Arab of the desert turns up his nose at a fish diet," is equivalent to our own proverb—"The grapes are sour." We have said that fishing does not make any serious calls upon the physical strength, but there is an exception to this rule as to all others.—

"How laborious is this salmon fishing! The play of that runaway fish an hour has tired me; my left arm is sore.—Such fishing is a trial of strength and activity, and beyond a certain age one ought not to attempt it. It is not only too wearing to the muscles, especially of the left arm, those being kept in full and the same action for so long a time, but also too exciting. A friend of mine somewhat older than you,—a physiologist, after a contention with a heavy fish in the same spot and with a like result, immediately after counted his pulse. He found it a hundred and twenty; commonly it was only fifty. It was well for him that his heart was sound."

With these extracts we commend Dr. Davy to the public favour, and take our leave of him in the words of old Stoddart's merrie rhyme.—

Sing, sweet thrushes, up and sing!
Wile him with a merry glee,
To the flowery haunts of spring,—
To the angler's trysting tree.

The Golden Colony; or, Victoria in 1854. With Remarks on the Geology of the Australian Gold Fields. By George Henry Wathen. Longman & Co.

AMONG Australian travellers, Mr. Wathen enjoys this distinction,—that he is enabled to compare the first-fruits of civilization with the last traces of its decay. He has explored a land which was not even named in the first edition of the *Encyclopædia Britannica*; and he has explored Egypt, which had grown old before the Sacred Scriptures were written. This opportunity for a philosophical parallel he has not wholly neglected; but, in general, the enticements of real life, and of practical inquiries, withdraw him from meditations on the moral picture, on the contrast between the oldest country of the Old World, and the youngest of the New. Every summer revives the freshness of the Nile and of its valley; but the Egyptian race has worn itself away. A century will be only as an hour in the existence of the huge continuity of land that lies round the Antarctic Pole; but there a nation is in its youth, and to the colonist, a hundred years must be as an illimitable future.

Yet the story of a prosperous colony is poetical in itself. After streams have been formed, and grass and plants have multiplied, and the lesser living creatures have been propagated, the bloom of human life appears on the desert earth. In Victoria this process has been marvellously spontaneous and swift. A community which was never aided by the mother State, and which even gave from its scanty resources to encourage its sister colonies, has risen to social and political dignity within the space of a single life. But its natural advantages are unsurpassed. Geographically, it occupies a favourable position. It abounds in pastures, in cultivable land, and in woods; it has a great navigable river, and extraordinary facilities for railroads; it has ill distributed, yet plentiful, supplies of water; it has a variable yet happy climate; and it yields that product which Columbus sought in vain,—which was the *ignis fatuus* of Raleigh's fancy,—which

allured the old voyagers in quest of fabulous isles,—and which tempted many a thirsty spirit to toil in search of a Lydian river, until it found a Libyan waste, and perished there.

Mr. Wathen ascends an imaginary tower, that he may survey the area of "the Golden Colony." His delineation is lengthy, but picturesque. It represents a territory enclosed between the sea and a frame of mountain ridges, intersected by streams, and varied by many alternations of aspect. In one direction, vast swamps and forests extend, bounded by volcanic plains, which lie, in arid zones, outside a sweep of pastures. Blocks of lava, gigantic mounds, called among the shepherds "Dead Men's Graves," and black volcanic ashes, known as "buckshot," are sprinkled over the country, which now exhibits, also, a social growth of villages and towns. In the capital, a respectable style of architecture has been adopted, which combines the characteristics of England and of the Continent. French and German *restaurants* have done what they failed to do in London, and beaten "dining-rooms" out of the field, while the American hotel system is creeping in. For a house and shop 1,000*l.* a year is an ordinary rent; while in a good situation double that amount is sometimes given. Yet Melbourne, opulent as it is, is sewerless, and sleeps in the dark, or, at least, with the pale flicker of oil-lamps to show marauders their way. Gas, however, has got as far as a "Company," and drainage is promised,—while to secure the city against drought an entire valley is to be dammed up and formed into a reservoir. This indicates spirit; but spirit is indicated in all respects by the youthful colony. Sandridge, in 1852, was a township consisting of an hotel, a jetty, and two wooden cottages. Next year it had a port and a main street,—and now a plot on the beach is worth some thousands sterling. The first Australian railway has been carried from this locality to the capital. As to material progress, therefore, what may not be expected in Victoria? But the colonists have a feeling for literature also,—which they expressed, in their direct way, by a clause in their suffrage law, enacting that every authorized schoolmaster should enjoy a vote.

Of course, in the gold district, the arts and graces of life are habitually forgotten, and the diggers exhaust their imagination in giving names to the different "workings,"—as Murdering Flat, Chok'em Flat, Dead Man's Gully, Poverty Gully, and Eureka, which was maintained to be an indigenous Australian word. Nevertheless, until newspapers reached them, they were deplorably in need of a "medium," and, like love-smitten youths in Arcady, wrote on the barks of trees. Mr. Wathen says:—

"From whatever cause, the South Australian strangers complained that their letters never reached them. And many, after long suspense, returned to their homes to bring back their wives to the gold-fields. But, in the mean time, many of the latter, equally anxious and equally unable to account for the silence of their lords, had started to Victoria to seek them. It can readily be understood what confusion, embarrassment, and distress this often led to. The husband would perhaps be sailing out of the harbour while the wife was entering it. At the diggings, it is much more difficult to find any particular individual than even in London; for the tents are ranged without order over a vast area; there is no register of names, and the occupants of one tent can never tell the name even of their next neighbour. Failing some better mode of intercommunication, trees of the forest were now converted into advertising stands. Every conspicuous trunk was covered with notices, often ill-spelt, in which friends informed friends how they might discover their abode; and wives notified to their distressed husbands that they had arrived, and were in anxious search of them. In a walk through the diggings you might see a hundred

of these notices, beginning with the formula, 'If this should meet the eye of,' &c."

The social development of Melbourne, in its external manifestation, is thus indicated.—

"The crowd that moves up and down the streets of Melbourne offers no marked difference to that seen in the streets of any large town in England. There are, indeed, none of the fashionable loungers of Regent Street here; neither are there such close-packed living masses as jam up Cheapside. Formerly, the broad 'cabbage-tree' hats and bushy beards of the settlers 'in from the Bush' might attract the notice of the newly arrived. A few years ago, parties of 'blackfellows,' wrapped in loose blankets or greasy opossum rugs, might now and then be seen moving along the main streets, accompanied perhaps by their squalid 'loubas' (wives), dressed in old dirty faded gowns and cast-off battered bonnets. But these sights are passed. The free and easy shooting-coat and 'cabbage-tree' have been superseded by the more elaborate costume of European cities. As to the Aborigines, no one knows what has become of them. They melt away before the white man even when subjected to no ill-treatment, retire further and further from the central seats of the intruders, visit them less and less frequently, and at length disappear."

And the actual appearance of the gold-fields:

"Imagine extensive districts of hill and dale,—the hills rocky, sterile, abounding with deep slopes, and entirely covered with a dense, monotonous forest; the valleys, wide as they descend into the lowlands, but contracting to rocky gullies as they wind up into the heart of the mountains. Swelling, rounded hills sometimes flank one side of the valley, in advance of the rocky acclivities of the higher ranges behind; and not unfrequently these lower hills are covered or crested with quartz-gravel, glistening white like chalk. The forest clothes the hills down to the open grassy flats of meadow-land which form the bottoms; and through these flats winds the creek or stream, in a sunken channel, now expanding into a broad pool or 'water-hole,' and now contracting into a mere brook. Here and there rocky headlands or spurs advance from the flanking hills into the flats, force the creek to sweep off towards the opposite hills, and perhaps cross its channel as rocky bars."

Mr. Wathen is an artist, as well as a geologist, and illustrates his volume with some graceful and suggestive sketches. In these, however, still life predominates, to the exclusion of "colonial" scenes. The narrative is distributed into two classes of observation:—on the nature of the country, and on its actual condition. There is, perhaps, more value in the former than in the latter, though Mr. Wathen depicts some living realities with ease and truth.

The scenes of "Black Thursday," so named from one of the terrible visitations to which the colony is liable, from the careless kindling of fires in the bush, are vividly described by Mr. Wathen. We quote a passage.—

"The hot wind blew a hurricane. The flames swept far and wide, leaping over all ordinary barriers. Every forest was on fire at once. Firebrands were blown over wide rivers and kindled new conflagrations on the opposite shores. During that day many hundred square leagues were devastated by flames which travelled with incredible speed and resistless fury. The progress of such fires is exactly described by the vivid imagery of the Hebrew Prophet:—'The land is as the garden of Eden before them, and behind them a desolate wilderness.' Houses, homesteads, fences, implements,—all were destroyed. Where carts had stood, now were only seen two iron tires lying on the ground. Crops and ricks were consumed, and the whole country left a mere blackened waste. Many persons were burnt to death; others saved themselves by standing in the 'water-holes,' or in the sea, and even there were scorched; for the fires burnt down to the water's edge."

Afterwards, at the deserted missionary station:—

"We found a mother with her six children, huddled together in a tent, near the black ruins of her former home, which had been destroyed on the ter-

rible Thursday. They were alone on the spot when surrounded by the fire, and were compelled to fly for their lives before and through the flames. Her scorched hands still bore evident marks of the fire; everything was destroyed, and the apples roasted upon the trees. Energy, however, had not been crushed by misfortune: a new slab hut, erected since the fires, was already well nigh ready for the family."

The value of Mr. Wathen's book is attributable to the perfect mastery which the writer has over his subject. Numerous journeys, and a continued residence at the mines, enabled him to collect his information for himself, so that he states little upon report, and nothing on mere supposition. The various topics of interest connected with the progress, natural resources, and government of Victoria are discussed in systematic order. It is a lucid and satisfactory account of "the Golden Colony."

Velazquez and his Works. By William Stirling. Parker & Son.

THIS little model of Art-biography is founded on the life of Velazquez, as narrated in 'The Annals of the Artists of Spain.' In attempting to weave in additions from later travel and reading, Mr. Stirling, fortunately for the reading public, has enlarged and nearly re-written the whole. He has also appended a useful list of the engravings from the Spaniard, — which, although still probably incomplete, is the completest catalogue yet published.

When we remember that, except from the works of Pacheco, Palomino, and Cean Bermudez nothing is known of this great painter, it must be confessed that Mr. Stirling's work is no superfluity. Of the learning, exactness, and local knowledge which he brings to bear upon his subject we need say nothing. In his own region of literature he has no rival and scarcely a competitor.

The wars of the Moors seem to have kept Spanish Art in a stunted condition till long after Spanish poetry and history had begun to strike root and even to bear fruit. The union of Arragon and Castille brought peace, and with peace Art broke into bud. The conquest of the New World flooded Spain with a golden deluge, and when artists could find patrons artists appeared. The persecution of the Moors and the establishment of Christianity in America raised the natural stern bigotry of the Spaniards (fostered by perpetual wars with the Infidels) to a fever heat, and this religious fervour falling on creative minds produced a crowd of painters who perpetuated the zeal of the day on the walls of monasteries. In the fifteenth century the three great schools of Andalusia, Castille, and Valencia began to flourish. Isabella, the Elizabeth of Spain, had a Castilian for a court painter; although Charles the Fifth, a Fleming in feeling, lavished his favours upon Titian, just as his chivalric rival delighted to honour Leonardo da Vinci.

In 1599 Velazquez was born at Seville—the same year that Vandyke saw the light in Antwerp. He was of good "blue blood," and traced his pedigree up to a race of fabulous kings. His father was a lawyer, who left Portugal, and crossed the Guadiana to settle in Seville. As in the case of Nicholas Poussin, the illustrations he appended as marginal notes to his school-books decided his parents to make him a painter. His master was Herrera, a bold thinker, who had thrown aside the hard monastic conventionalities and all the lifeless finish of the dull illuminators. His fits of violence soon drove the young artist from his studio. His next instructor was Pacheco, an imitator of Raphael, a familiar of the Inquisition, and a tribunal inspector of pictures. He began Art by resolving never to sketch or colour any

object that he had not before him; he kept a peasant lad as a servant, whom he drew in every variety of expression; to acquire facility and brilliancy of colour, he devoted time to the study of animals and of still life. Wandering out into the streets and market-places of Andalusia, he drew the water-carrier and the melon-seller, beggars stirring their jars of broth, ragged urchins watching a chafing-dish, boys playing with oranges, and ragged costermongers paying down a maravedi for a glass of water with all the dignity of a Kaiser settling his ransom. He began with beggars and ended with kings. He became soon unrivalled in the painting of heads, attempted Scriptural subjects, imitating Ribera and Tristan of Toledo, and married his master's daughter.

Preferring to be the first of vulgar rather than the second of refined painters, he painted the common and actual, and disregarded the elevated and ideal, true to the materialistic Art-tendencies of a people who in literature have displayed an imagination wild even to extravagance and subtle to the limits of fantasy. In the house of Pacheco, Velazquez studied perspective and anatomy, dabbled in poetry, and learnt a little of architecture. At twenty-three the young, swarthy, fervent student visited Madrid and copied in the royal galleries the treasures of Italian Art.

Recalled to the capital by the great minister Olivares, the young Sevillean returned, attended by his mulatto servant, who afterwards himself became a painter. Philip the Fourth had not long come to the throne, and already found the sceptre weigh down his unnerved arm. He divided his time between his State papers and the last beauty of the stage. Velazquez was now in a capital where Calderon and Lope de Vega were busy at interminable plays,—Gongora was penning his conceits,—Quevedo was a royal secretary. Philip himself was a musician, a poet, a dramatist, and a painter,—and he endeavoured to establish an Academy. Of this monarch Mr. Stirling gives us a masterly picture:—

"Philip IV. is one of those potentates who was more fortunate in his painters than his biographers, and whose face is, therefore, better known than his history. His pale Flemish complexion, fair hair, heavy lip, and sleepy, grey eyes—his long curled mustachios, dark dress, and collar of the Golden Fleece—have been made familiar to all the world by the pencils of Rubens and Velazquez. Charles I., with his melancholy brow, pointed beard, and jewelled star, as painted by Vandyck, is not better known to the frequenters of galleries; nor the pompous benign countenance of Louis XIV., shining forth from a wilderness of wig, amongst the silken braveries which delighted Mignard, or Rigaud, or on his prancing pied charger, like a holiday soldier as he was, in the foreground of some pageant battle, by Vandermeulen. Fond as were these sovereigns of perpetuating themselves on canvas, they have not been so frequently or so variously portrayed as their Spanish contemporary. Armed and mounted on his sprightly Andalusian, glittering in crimson and gold, gala clad in black velvet for the council, or in russet and buff for the boar-hunt—under all these different aspects did Philip submit himself to the quick eye and cunning hand of Velazquez. And not content with multiplications of his own likeness in these ordinary attitudes and employments, he caused the same great artist to paint him at prayers,—

To take him in the purging of his soul,—as he knelt among the embroidered cushions of his oratory. In all these various portraits we find the same cold phlegmatic expression, which gives his face the appearance of a mask, and agrees so well with the pen-and-ink sketches of contemporary writers, who celebrate his talents for dead silence and marble immobility, talents hereditary indeed in his house, but, in his case, so highly improved, that he could sit out a comedy without stirring hand or foot, and conduct an audience without movement of

a muscle, except those in his lips and tongue. He rode his horse, handled his gun, quaffed his sober cups of cinnamon-water, and performed his devotions with an unchangeable solemnity of mien, that might have become him in pronouncing, or receiving, sentence of death."

—Add to this his imperturbable courage, for he shot, with his own hand in the Plaza, a bull which had conquered a lion, a tiger, and a bear.

Velazquez was taken into the royal service, not long before the visit of Prince Charles to Madrid. His first portrait of the King proclaimed him at once the first painter of Spain. In this picture the King exults in crimson scarf and black plumes. About the same time he painted his famous picture of 'The Topers,' a group of drunken peasants, drinking and jesting; one putting on a vine-leaf crown, and another eyeing a bell-mouthed beaker. The picture is full of coarse humour, and is remarkable for force of character and strength of colouring. It has a fresh interest as being the peculiar favourite of Wilkie.

Fresh honours were heaped on the man whom the King delighted to honour. His picture of the 'Expulsion of the Moriscos,' probably, procured Velazquez the appointment of Gentleman of the Chamber, and his father a government situation. In 1628, Rubens came to Madrid as Ambassador from the Low Countries, and the Spaniard and the Fleming became friends. Rubens painted the King as he discussed the object of his embassy, and Lope de Vega wrote a poem in his praise. Arm in arm with Velazquez, he wandered through the Escorial, admiring together the 'Pearl' of Raphael and 'The Last Supper' of Titian.

Velazquez set sail for Italy in 1629, befriended by the great Spinola. At Venice he copied Tintoret, and at Rome met many of the masters of "the silver age" of Art. Domenicheno and Guercino were engaged on their best works; Guido was alternately gambling and painting virgins; Albani, "the Anacreon of painting," and Poussin and Claude were there; and Bernini was whispering in the Pope's ear. At Rome, Velazquez painted his 'Forge of Vulcan' and 'Joseph's Coat,'—both works displaying great skill in copying vulgar and unrefined forms. At Naples, he painted the portrait of the Infanta, who had rejected the Prince of Wales.

On his return, the King renewed his previous favours, and came every day to visit his studio, letting himself in by a private key. In 1639, the Sevillean produced his noble picture of the 'Crucifixion,'—a picture, says Cumberland, sufficient alone to secure him immortality. The same year he painted the portrait of Don Pareja, the admiral of the royal fleet,—and of this picture the following anecdote is narrated.—

"The admiral's portrait being finished and set aside in an obscure corner of the artist's painting room, was taken by Philip IV., in one of his morning lounges there, for the bold officer himself. 'Still here!' cried the king—in some displeasure, at finding the admiral, who ought to have been ploughing the main, still lurking about the palace—'having received your orders, why are you not gone?' No excuse being offered for the delay, the royal disciplinarian discovered his mistake, and turning to Velazquez, said, 'I assure you, I was taken in.'"

His portraits of the court dwarfs increased his fame; and in 1642, when Catalonia revolted, Velazquez, now as necessary to the royal pleasure as the court comedians or the court barber, followed Philip to Aranjuez. When Olivares fell, Velazquez had the generosity and courage to visit his heart-broken patron at his farm at Loeches, where the ex-minister was trying to play the Cincinnatus, and mismanage a farm as he had mismanaged a nation. The very year of his dismissal Velazquez was made a gentleman of the royal chamber. A few years after,

he painted his well-known picture of 'The Surrender of Breda,' the event that broke the heart of his old fellow-traveller, Spinola. His Dutchmen in this picture are all boors, and the Spaniards knights and heroes.

In 1648 the veteran painter set out again for Italy, to collect works of Art for the royal galleries. Naples he found recovering from the sedition of Masaniello; and rather weak from the frequent bleedings considered necessary by the Spanish physicians. At Rome he painted the Pope,—the spiritual master of the world, and the spiritual master's unspiritual mistress. Philip grew impatient for his plaything's return; growing tired of staring at vacancy, and visiting the Escorial vaults and other such lively *délassements*. On his return, he was appointed "Aposentador-mayor," or Quartermaster-General of the Royal Household, carrying at his girdle a key which opened every lock in the palace. Philip's Austrian Queen, with her full Austrian lip, he frequently painted; but the happy girl, whose merry laugh vexed her lugubrious lord, he has represented dull and solemn.

In court ceremonies, Velasquez now bore a prominent part, conspicuous by the diamond cross of Santiago that hung from his neck, and the key of office that depended at his girdle. He looked on at the bull feasts at the royal Plaza, when noblemen turned butchers, and butchers applauded the noblemen. He arranged the pictures from Whitehall. He was, too, among the groups in blue and gold, scarlet and yellow, who followed Philip to the Pheasants' Isle on the Bidassoa, and stood side by side with Mazarin and Turenne. He perhaps laughed, as his countrymen did, at the gay dresses of the French, and the short tails of their horses; and was sneered at in return for his sombre dress and silent gravity. In 1656, Velasquez painted his masterpiece, 'The Maids of Honour' ('Las Meninas'). In 1660, he died, after a very short illness.

The only fault we have to find with Mr. Stirling is, that, with the usual partiality of biographers, he is inclined to award too much praise to his hero. Velasquez was a great portrait painter. His mind seldom rose from the earth; and in the shortest flights, his wings melted like the waxen ones of Icarus. He was not creative,—he only grouped models, and then painted them. He could throw a solemnity, a chivalry, and a religious feeling over his faces,—but not a poetry. With this proviso, we warmly concur in the following summary.—

"No artist ever followed nature with more Catholic fidelity; his cavaliers are as natural as his boors; he neither refined the vulgar, nor vulgarized the refined. 'In painting an intelligent portrait,' remarks Wilkie, 'he is nearly unrivalled.'—'His portraits,' says another excellent English critic, 'baffle description and praise; he drew the minds of men; they live, breathe, and are ready to walk out of their frames.' Such pictures as these are real history. We know the persons of Philip IV. and Olivares as familiarly as if we had paced the avenues of the Prado with Digby and Howell, and perhaps we think more favourably of their characters. In the portraits of the monarch and the minister,

The bounding steeds they pompously bestride,
Share with their lords the pleasure and the pride,
and enable us to judge of the Cordobese horse of that day, as accurately as if we had lived with the horse-breeding Carthusians of the Betis. And this painter of kings and horses has been compared as a painter of landscapes to Claude; as a painter of low life to Teniers; his fruit pieces equal those of Sanchez Cotan or Van Kessel; his poultry might contest the prize with the fowls of Hondeloeter on their own dunghill; and his dogs might do battle with the dogs of Sneyders."

Of the picture in the National Gallery, Mr. Stirling now gives the true account; having

been a member of the Committee that sat to inquire into the management of the collection. The story is so curious that we append it, particularly as it has never before been correctly given in print.—

"In the *Catalogue* of 1828, where it appears as No. 29, it is attributed to Velasquez himself. This picture was, in 1853, the subject of a minute and amusing investigation before a Committee of the House of Commons, sitting to inquire into the management of the National Gallery. The President of the Royal Academy mentioned in evidence, as an illustration of the tricks of picture-cleaners, that this picture had been so much injured in the hands of one of the fraternity, that Mr. George Lance, the eminent painter of still life, had been called in to repair, or in reality to repaint it. Mr. Lance, being summoned before the Committee, frankly confirmed the statement. About twenty years ago, he said, the Boar-hunt was in the care of one Thane, a picture-cleaner, who sent it to be lined, and received it back so much injured in that process that the blistered paint fell off in large flakes from many parts of the canvas. The poor man was in despair; in visions of the night the maltreated picture passed across his bed in the form of a skeleton; and he was in danger of losing his wits, had Mr. Lance not promised his assistance. For six weeks the English artist laboured on the Castilian ruin, healing a wound here, filling up a blank there, working upon trees, grass, sky, and figures, supplying horses with riders, and riders with horses, and actually painting, out of his own head, a group of mules in the foreground, which occupied a space, as near as he could guess, of the size of a sheet of foolscap paper. The work achieved, he had, some time afterwards, the satisfaction of being rebuked by two of the most eminent picture-cleaners in London, for venturing to hint that a portion of the picture, then exhibiting at the British Institution, seemed to have been somewhat retouched. The cross-examination which followed did not shake Mr. Lance's adherence to this surprising story, but only elicited fresh tales of picture-restoring even more wonderful. The Committee, therefore, agreed to meet him on a future day at the National Gallery, in presence of his own Velasquez. There, happily for the credit of the purchasers, he very candidly admitted that the lapse of time had led him to exaggerate his own share of the work, and that a good deal of the original painting still survived. The chasm, which he had filled with mules, was less in area by three-fourths than he had stated; and in these mules themselves, he had been guided by the backs, necks, and ears, which had remained with tolerable distinctness, and enabled him to follow the design of the master. So ended a story, which had amused the town for a day or two, that the picture, which the Trustees had purchased as an important work of the Castilian Vandyck had really been executed by the English Van Huysum. No notice of this meeting at the National Gallery, at which I was present as a member of the Committee, occurs in the record of its proceedings. Mr. Lance's printed evidence (*Report and Minutes*, pp. 346—353), being most incomplete without it, the present note may serve, I hope, to supply the deficiency."

Were Vasari composed of such biographies as this by Mr. Stirling, the world would not hold another such a book.

A Catalogue of the Arabic, Persian and Hindustani MSS. of the Libraries of the King of Oudh. Compiled under the Orders of the Government of India, by A. Sprenger, M.D. Vol. I. Calcutta.

In the Palace at Lucknow there is a library of Oriental works, containing more valuable Persian and Hindustani manuscripts than are to be found in, perhaps, any other part of the East. Whatever opinion some may entertain as to the intrinsic merits of these works, none will doubt that their preservation is a matter of importance in a philological and historical point of view. It was a wise step, therefore,—though taken, it is to be feared, at the eleventh hour,—to

depute the learned Orientalist, Dr. Sprenger, to examine and catalogue this library. Dr. Sprenger reached the capital of Oude on the 3rd of March, 1848; and his description of the state in which he found the greater number of the books is so curious, that it deserves to be quoted in his own words. After speaking of 4,000 select volumes, which at the time of his visit were "kept on shelves, in tolerably good order, but which have been subsequently given up to pillage," he says of the remaining and larger portion:—

"The third collection is in the Tóphkánah or arsenal, which is close to the house of the British Resident. The arsenal is an extensive building, including a large square which is filled with guns. Three sides of the building are devoted to military stores, and in the northern wing up-stairs is the library. The books are kept in about forty dilapidated boxes—camel trunks—which are at the same time tenanted by prolific families of rats; and any admirer of oriental lore, who may have an opportunity to visit this collection, will do well to poke with a stick into the boxes, before he puts his hand into them, unless he be a zoologist as well as an orientalist. At the end of the hall, there are bags full of books completely destroyed by white ants. Even new books have not been spared by these destructive insects; nearly the whole edition of the 'Táj allohát' has been destroyed, and most of the remaining copies of the 'Haft Qulzum' have had the same fate. The number of volumes in this collection is very great, and among them are some Pashtú works, written with great care for the brave and learned Rohilla chief. It is unfortunately the habit of the king's people merely to count the volumes, and to make the librarian responsible for the numbers not diminishing. The consequence is, that many good books have been abstracted, and bad ones put in their place. There are at least one hundred copies of the 'Gulistán,' and as many of 'Yúsof ú Zalykhá,' in the Tóphkánah, which apparently fill the places of more valuable works. I have heard that a late librarian sold, in one week, eleven hundred rupees' worth of books, to provide funds for the marriage of his daughter."

Dr. Sprenger remained eighteen months at Lucknow, and during that time examined about 18,000 volumes. His *Catalogue*, to judge from the volume now published, which runs to 645 pages, and contains notices of 732 manuscripts, will probably extend to seven or eight volumes. Of course, it would be premature even to hazard a conjecture of the worth of what is to follow, but we may, at least, predict that it will equal or exceed in interest what we have now before us,—as all the prose works are yet in reserve, and all the Arabic writings, whether in prose or verse. The present volume is divided into three chapters, in the first of which "Tazkirahs," or Biographical Memoirs of Poets, are noticed; in the second, Persian, and, in the third, Hindustani Poets. It may surprise those who think they have sounded all the depths and shoals of Oriental literature to learn that there are lists here given of more than three thousand poets, the majority of whose names are altogether unknown in Europe, except to Baron Hammer-Purgstall and Mr. Bland. Among the works thus brought to light are some which cannot fail to prove of value; as, for example, the 'Diwán' of Ghazzáli, a poet of Akbar's reign, whose talents, we are told, were of the highest order, and whose writings throw much light on the philosophy of that age. There is also the 'Tazkirah' of Iláhi, which furnishes the biography of about 400 Persian poets of the fifteenth and sixteenth centuries, and which till now was entirely unknown. Some compositions, too, would seem to be of interest, as diverging, if we may judge by their titles, from the hackneyed and monotonous path of the Eastern Muse. Such we can imagine to be the Thug story by Khushdil, called 'The Soldier's Child.'

We have had occasion, in a former review [*ante*, p. 166], to notice the new and repulsive method of spelling Oriental names introduced by Dr. Sprenger. We must now add, that our gratitude to him for his present labours is considerably diminished by his heterodoxy in this respect. Think of such names as Kátzim of Qomm, Myr Qodsy, Wazyr Myr Alyy Shyr, Byby Pycha, Qotobshahians, the Qádhîy of Qazwyn, and last, not least, the Khalyfah Khwyshaky Chisty of Qocur!

It is with some apprehension, too, that we observe Dr. Sprenger has now three unfinished works in the press,—the ‘Life of Mohammad,’ the present Catalogue, and the ‘Khirad Námah,’—any one of which, it might be imagined, would demand its undivided attention. We fear lest in attempting too much at once, he may, in the end, leave all incomplete.

THE WAR.

THE first crop of war literature is pretty well exhausted—the real harvest is not yet ripe. Speculation and discussion have all but disappeared in the face of stern facts. Even the few voices that were heard in protest while the war rolled grandly and victoriously, have been almost silenced by those dread calamities against which courage is vain and honesty no safeguard. Here and there a writer, like “An English Landowner,” proposes *Inquiry into the alleged Justice and Necessity of the War with Russia* (Hamilton & Co.), and arrives at the conclusion that war in the Crimea is a greater evil than the Cossacks at Constantinople; but such infrequent exceptions to the grand sentiment that sways the nation, only proves how deep and universal is the passion of the hour. To people possessed by such a passion, dry debate and abstract reasoning are distasteful—of poor compilation they have had enough.

Books of use are now in demand,—such as vocabularies, guide-books, and the like. *An English, French, Turkish, and Russian Vocabulary* (Thimm) has been issued, at a low price, and in a form convenient for the pocket; of course it is chiefly concerned with camp idioms. —*The Crimea: its Towns, Inhabitants, and Social Customs*, by a Lady, resident near the Alma (Partridge & Co.), is an interesting book, plainly and pleasantly written by an English lady long familiar with the peninsula, and who speaks by the card. This is a genuine little book, worth a hundred abstracts and compilations from Clarke, Oliphant, &c. We subjoin a few extracts.—

“Night and day scarcely stand in more distinct antagonism to each other, than do the northern and southern parts of the Crimea;—the northern consisting of a series of plains and steppes; while, as if to balance this continuity of flatness and desolation, Nature seems to have lavished all her grandeur and beauty on the southern part.”

The lower part of the Crimea towards the south is popularly known as Russian Italy.—

“The general features of this range are bold crags and ravines, covered with never-ending forests of pine and oak, and which form a striking contrast to the splendid walnut, chestnut, mulberry, and cypress trees, which vie with one another in beauty, lower down towards the sea. As this chain of mountains forms a screen against the biting winds from the north, the climate is much milder here than on the other side; and although an occasional winter’s frost destroys many of the plants which have remained unharmed for years, yet the rhododendron, the magnolia, and many delicate plants, may be seen of large size in the open air.”

It is in these nooks and corners by the sea-side, and under the stupendous crags, that the traveller finds the luxurious villas of the Russian nobles. The climate and the fertility of the land resemble those of the South of France.—

“The soil here is particularly suited to the cultivation of the vine, and from its warm, sunny exposure, the wine is equal in strength and quality to that of the South of France.” * * The fig-tree, the pomegranate with its showy scarlet blossoms, and the lively little caper bush, are everywhere to be seen. Olive groves also are here and there to be met with; but they are not widely cultivated, as the ground is more profitably laid out in vineyards.”

The lady tells us something of the serf in the Crimea, without exaggeration and without passion.—

“The condition of serfs in the Crimea, as in other parts of Russia, differs, of course, according to the character and disposition of their masters. Many are ruled with an iron hand; harsh words, threats, and even blows, being of no uncommon occurrence. Others, again, seem to be perfectly happy in their servitude; and having no ideas beyond their own homes, are quite contented with their lot. As soon as children attain the age of eight or nine years, the master decides what trade they are to follow. Some of the smallest boys are fixed upon as lacqueys, coachmen, or postillions; and the rest are brought up to be stable-boys, cooks, carpenters, gardeners, or any useful employment about the property. In many large establishments, where the families of the household servants are too numerous for these occupations, some of them learn shoemaking; and many are allowed to hire themselves out to others, upon paying a certain sum annually to their master. With the exception of some of the superior household servants, whose ideas are a little more refined, the style of living of the Russian peasant is little removed from that of the brute beasts. Men, women, and children occupy one room, and eat out of one dish; they never take off their clothes, from one week’s end to the other, except when they go to the bath; and they sleep on the top of their stoves, on the floor, or in the open air, according to the season, or as chance may require.”

We will find room for a note on the appearance of the Crimea steppe in summer,—this being the next phase of popular interest in the campaign.—

“As we go northward, the steppe assumes its grand characteristic, presenting a huge circle of flatness, where nothing is seen but the over-arching sky and the conical-shaped tumuli, which rise every here and there, like monster mole-hills, on the surface of the plain. These steppes are very beautiful in spring, when the wide-spread green of the young grass becomes converted into a sea of wild flowers, yielding to the wind, which sways backwards and forwards their masses of varied colour, like waves on the shore. Fancy whole miles of purple larkspur gleaming in the sunshine, intersected with patches of bright scarlet poppy; and the pink-coloured wild peach shrub, with gaudy tulips and crocuses, contributing also their fine contrasting hues. But, alas! these beauties soon vanish at the approach of summer, and are succeeded by a tall, feathery grass, such as I have often seen grown in gardens in England. Fortunately, this grass is confined to certain districts, for sheep cannot pasture where it grows, in consequence of the subtle art which its seed possesses of working its way into their skin. In summer the Crimea becomes literally baked with heat; and by the end of June the grass on the steppe is yellow and parched. It is at this season that the mirage is most frequent, and it really helps to beguile the way by presenting a temporary excitement to the traveller. Driving along the steppe, suddenly something seems to arise like a city, glittering through a mist in the distance; gradually an appearance of towers and trees comes out more clearly; as you advance, new spires arise, and trees, bridges, and rivers appear,—a picturesque combination. By-and-by they sink into confusion; and when you arrive at where stood the city of enchantment, all has vanished away, and you find but the waving of the parched grass as before. From the tear and wear of the clayey soil during the long droughts, which often last for months during summer, there is a great accumulation of dust. This gives rise to another phenomenon, of frequent occurrence on the steppe, reminding one of waterspouts on the sea, but filled with dust instead of water. Suppose the great flat steppe

stretched out beneath the blue sky—nothing visible—no breath of air apparently stirring—the whole plain an embodiment of sultriness, silence and calmness—when gradually rise in the distance six or eight columns of dust, like inverted cones, two or three hundred feet high, gliding and gliding along the plain in solemn company; they approach, they pass, and vanish again in the distance, like huge genii on some preternatural errand.”

The steppe has its touch of romance in the shape of brigands, as well as the Scotch hills of a past time and the Apennines of our own.—

“About six years ago, a chivalrous Tartar robber, called Alime, struck terror into all the inhabitants of the country, and caused the government authorities to make many a fruitless excursion in search of him. He was armed with a dagger and pistols; and, as he invariably appeared at the place where he was least expected, his victims were so paralysed with astonishment, that they offered no resistance. Many were the wonderful tales told of Alime; how he faced alone the ten or twelve occupants of a diligence; how he made them all tumble out, one after the other, and give up their all; and how, instead of taking it all himself, he took from those who had plenty, and gave to those who had none, reserving to himself a per-centage, as it were, on the transaction. He was not known to have wounded or killed any one; but every one felt afraid to leave the shelter of his own roof while he was abroad. He always rode on horseback; and on one occasion his horse was killed by a shot from a traveller he was going to rob, and he himself wounded. After this his health began to give way, and he could no longer pursue his avocation; so he wandered about from sheepfold to sheepfold, till at last a shepherd, with whom he had taken refuge, betrayed him to the authorities. He was taken into custody, punished with the *knaout*, and sent to Siberia.”

This lady’s little volume will assuredly be added to the select library of the war.

A Short Historical Account of the Crimea, by W. B. Baker (Trübner & Co.) professes to be no more than a popular compilation from authorities easily accessible to European readers. The tale is well told, and the writer achieves his object.—*The Encroachments of Russia* (Gratton) is a stern impeachment of the Russian Government—an impeachment of facts—being “a summary history of the forcible seizures of territory by Russia since the reign of Peter the Great,—of its insidious progress in Persia, Turkey, and the East,—of its ruin of the Polish nation and partition of their territory,—and generally of the fraudulent, ambitious and blasphemous pretensions of the Russian Czar.” —*The Warlings of the War*, by a British Commoner (Bosworth), is a letter to Lord Palmerston on the great reform expected at his hands in the reconstruction of our national forces.

Mr. A. A. Paton, whose opinions on Continental politics are known to our readers, has uttered his oracles once more under the title of *The Bulgarian, the Turk, and the German*. (Longman & Co.)—The substance and spirit of this new contribution to a confused view of European affairs are both visible in a brief extract.—

“I regard Austria and Turkey as the two local counterpoises to Russian ambition, and that the rest of the substitutes in vogue with various parties, such as Byzantine Empires, Debreczin Republics, German democracy of the Frankfort school, re-establishment of Poland by the efforts of the Polish emigration, &c. &c., to be bubble schemes, nay more, pro-Russian, because they are anti-Turkish and anti-Austrian. This is as clear as daylight.” Such is the text, prominently set forth in the preface; the sermon is of course to match.

Balablava, a Poem.—[*Balablava, ein Gedicht*] (Williams & Norgate) is a little German lament, not very original, though it is musically and elegantly written, and interesting as a proof of the German’s sympathy with his Saxon brother. The best thoughts are those of the setting sun

kissing the lips of the dead. — *Inkermann, a Poem*, by George Small (Hope & Co.), is a sign of the times, — being good English, good metre, and good sense, written by a gunner in the Royal Artillery, who fought in the battle he still lives to sing. We are willing to pardon the enthusiasm that drags the rough name of "Metternich" into blank verse, and the taste that speaks of Lord Raglan "riding the whirlwind." The following, though noisy, is full of strong patriotism. —

Immortal spirits of the mighty dead!
Reviving from the dust of Time's decay,
Your gallant deeds shall animate the few
Who trace above each comrade's bloody grave
The acorn-seed for Britain's future hope;
While, grafted on the deadly cypress-stocks,
We rear the bitter fruit of grief for loss,
That die, and, when we weep their loss, lament
Those virtues scatter'd in the blast and glare
Of the hot battle-field. Yet let this be
Our consolation, — they have fought and bled
For the great Charter of the World, whose cry,
Deep as its heart, was — Liberty for Man!

War Lyrics, dedicated to the Friends of the Dead, by A. and L. (Saunders & Otley). — These are rather newspaper rhymes than poems, but are still worth reading. They are not wanting in energy, but are licentious and lawless, both in rhythm and metre simple as the ballad is which the writers have chosen.

NEW NOVELS.

Westward Ho! or, the Voyages and Adventures of Sir Amyas Leigh, Knight, of Burrough, in the County of Devon, in the Reign of Her Most Glorious Majesty Queen Elizabeth. Rendered into Modern English by Charles Kingsley. 3 vols. Cambridge, Macmillan & Co.; London, Bell & Daldy.

GREAT pains have been taken to get up this book, — and there are many fine things in it, — scenes which will make the pulse beat, and passages that will make the reader feel choked and miserable, and force tears from him in spite of himself. The amount of reading and research that have been gone through to mount the piece, and put it on the stage before the reader, must have been considerable. — The pictures of out-door and in-door life, — the descriptions of people and scenery, — are vividly and graphically executed, and with an appearance of ease as well as minuteness that could not have been exceeded had they been descriptions of the every-day life of this year of grace in the nineteenth century. "*Westward Ho!*" is intended to give a panoramic view of the state of England at the time when the physical and moral activity of men had found "fresh fields and pastures new," and all Europe had entered upon a new inheritance of material and intellectual wealth. It was a noble period, and one rife with events that excite the sympathies of Englishmen; but the very extent of the canvas renders the plan of the story more like a lengthened procession of brilliant phantasms than the development of a finely-woven plot of individual interest; this, however, being the evident intention of Mr. Kingsley, must as such be accepted, no one having the right to complain that he should have followed out his own idea in preference to that of another. The result is all we have to deal with; and the book, as a whole, is not so satisfactory as might have been expected from the excellence of many of its parts. The story is straggling, tumultuous and incoherent; the individual characters are elaborately drawn; but the general intention is confused. The capital error in the book — the error that swallows up its success — is, that Mr. Kingsley never, for a single page, forgets himself, nor keeps himself out of sight; he is all along in a pulpit preaching at his readers, expounding the

meaning of his mystery, and making the virtues of his different characters the themes for so much scolding and comparison betwixt what men were in those days and what they are now. He turns the noble qualities he has set forth in his heroes into so many "St. Stephen's loaves," and pelts his readers with them without mercy, so that, if they do not pretty well hate Sir Amyas, and his brother, and Salvation Yeo, and Mrs. Leigh herself, it is only because a sense of justice turns their anger against the author instead, and Mr. Kingsley must lay his account to inspiring as little love as Timon himself could desire. The spirit in which the book is written is neither good nor pleasant. The generality of men are neither heroes nor angels; and Mr. Kingsley has not taken the way to make them either. Mr. Kingsley uses his power over the feelings and the sympathies to excite a hatred of Catholicism. He may intend nothing but Christian love and charity; but the actual effect is to rouse a spirit of religious hatred and bitter intolerance, against which the reader may protest, if he pleases; but he is none the less carried away. There is an occasional attempt to make exceptions in favour of the Catholic laity, — and even, now and then, a mitigating phrase on behalf of individual priests, which may serve to persuade Mr. Kingsley himself that he is impartial; but it is none the less true that the whole spirit and tendency of this book is, to excite that bitter and most relentless of hatreds, — theological sensibility, which, when once wounded, can never heal — once offended, can never forget.

The Catholic priesthood is held up as a race inimical to humanity. Mr. Kingsley does not seem to see that inasmuch as the Catholic priesthood is the most compact and best organized hierarchy that any church ever possessed, it has so far had more power; but the sacerdotal spirit is the same in every sect and every form of worship, no matter what their points of theology may be, — and the clergy of one church is as little to be trusted with irresponsible power as that of another. We regret that Mr. Kingsley should have taken this opportunity to stir up strife. The incidents connected with the Inquisition are horrible in themselves, and forced and unnatural as regards the story. Rose Salterne has given no sort of indication of being either a saint or a martyr; she has been represented only as a beautiful and somewhat coquettish young woman, with no end of admirers; but she fixes her affections on precisely the one man whom it is highly undesirable she should marry, he being at once a Catholic and a Spaniard. Refused permission by her father, she abandons her home and flies with her lover, — leaving all her friends in the most painful uncertainty as to whether she is married to him or has brought disgrace upon her father's name. She has never given the smallest indication of any ardent attachment to the Reformed faith, or, indeed, to faith of any kind; yet she is represented as enduring tortures and martyrdom for no other purpose apparently than to give an opportunity for identifying Catholicism with the Holy Inquisition. The concluding scenes of the book have a look of coming out of one of the melo-dramas at Astley's; red fire and a storm of thunder and lightning make the catastrophe highly effective as a spectacle and piece of stage effect. There has been a chase of many days by Sir Amyas Leigh after one of the vessels of the Spanish Armada, on board which is the Spanish husband of Rose Salterne, against whom he has sworn deadly vengeance. —

"On the way swept, gaining fast on the Spaniard. 'Call the men up, and to quarters; the rain will be over in ten minutes.' Yeo ran forward to the gang-

way: and sprang back again, with a face white and wild — 'Land right a-head! Port your helm, Sir! For the love of God, port your helm!' Amyas, with the strength of a bull, jammed the helm down, while Yeo shouted to the men below. She swung round. The masts bent like whips; crack went the foresail like a cannon. What matter? Within two hundred yards of them was the Spaniard; in front of her, and above her, a huge dark bank rose through the dense hail, and mingled with the clouds; and at its foot, plainer every moment, pillars and spouts of leaping foam. 'What is it, Morte? Hartland?' It might be anything for thirty miles. — 'Lundy!' said Yeo. 'The south end! I see the head of the Shutter in the breakers! Hard a-port yet, and get her close-hauled as you can, and the Lord may have mercy on us still! Look at the Spaniard!' Yes, look at the Spaniard! On their left hand, as they broached-to, the wall of granite sloped down from the clouds toward an isolated peak of rock, some two hundred feet in height. Then a hundred yards of roaring breaker upon a sunken shelf, across which the race of the tide poured like a cataract; then, amid a column of salt smoke, the Shutter, like a huge black fang, rose waiting for its prey; and between the Shutter and the land, the great galleon loomed dimly through the storm. He too, had seen his danger, and tried to broach-to. But his clumsy mass refused to obey the helm; he struggled a moment, half hid in foam; fell away again, and rushed upon his doom. 'Lost! lost! lost!' cried Amyas madly, and throwing up his hands, let go the tiller. Yeo caught it just in time. — 'Sir! Sir! What are you at? We shall clear the rock yet.' — 'Yes!' shouted Amyas in his frenzy; 'but he will not!' — Another minute. The galleon gave a sudden jar, and stopped. Then one long heave and bound, as if to free herself. And then her bows lighted clean upon the Shutter. An awful silence fell on every English soul. They heard not the roaring of wind and surge; they saw not the blinding flashes of the lightning: but they heard one long ear-piercing wail to every saint in heaven rise from five hundred human throats; they saw the mighty ship heel over from the wind, and sweep headlong down the cataract of the race, plunging her yards into the foam, and showing her whole black side even to her keel, till she rolled clean over, and vanished for ever and ever. 'Shame!' cried Amyas, hurling his sword far into the sea, 'to lose my right, my right! when it was in my very grasp! Unmerciful!' A crack which rent the sky, and made the granite ring and quiver; a bright world of flame, and then a blank of utter darkness, against which stood out, glowing red-hot, every mast, and sail, and rock, and Salvation Yeo as he stood just in front of Amyas, the tiller in his hand. All red-hot, transfigured into fire; and behind, the black, black night."

We doubt whether Mr. Astley's magicians can beat such a picture of a ship going down. Exhibitions of force like these are ghastly and unwholesome. Mr. Kingsley has yet to learn the right use of his gifts.

Our World; or, the Democrat's Rule. By Justia, a Know-Nothing. 2 vols. Sampson Low & Co.

THERE was a time when English gentlemen arranged parties of pleasure to see the young girls whipped at Bridewell. To their descendants, if any there be, of the present generation, "Our World," and all novels like it, are addressed. It is a story of strippings and floggings, described in an exaggerated and disgusting style. "Justia," who calls himself a Know-Nothing without showing why, pauses to surround the nude figures in his picture with such accessories as please his own fancy, and, as he thinks, will pique that of the reader. The Lupercalian treatise of Boileau, and the notes on private flagellations appended by his Editor, have a salt of humour mixed with a gravity which conceals the repulsive nature of the subject; but the scenes in "The Democrat's Rule" are mere elaborations of coarseness. Allegorically speaking, Youthful Beauty is the heroine of the tale, of which Brutality is the hero. Bru-

tality whips, and Beauty is whipped. This is the essence of the narrative, and "How shocking!" is the moral,—though something in the tone suggests that other feelings than those of sympathy had a place in the author's mind when he touched up his revolting tableaux. It is unfit that such productions should be tolerated. We are threatened with a whole class of them, to succeed the 'Moaning Maniac,' 'Jack Sheppard,' and Cholera-Morbus schools. They who formerly read Mr. Harrison Ainsworth on Burglary, or Mr. Samuel Warren on Fits, seek a stronger stimulant in the agonies of women flogged with the catwhip, or bruised to mortification with the paddle. These are the same persons who go to witness executions, — or at least they are of a cognate order. The question arises, however, is this the legitimate object of fiction? Is it suggested by good motives, or justified by good results? Let us take the latest, and one of the worst examples—'Our World.' It professes to have a social bearing, to aim at the reformation of manners, to supply information to those who will not read essays, reports or orations. What are the materials? Sarcasms, intended to be bitter, against the author's countrymen, and accounts of slave punishments which are unctuous and unchaste where they are not loathsome and vile. Such readers as are inclined to amuse themselves with "Justia's" story, must be able to endure sketches of women with their "flesh hanging in quivering shreds," of men with "crusts of sores," with "bleared optics," and with the horrible symptoms of the "black vomit." The companion groups are composed of young girls standing naked in the marketplace, of masters stripping their female slaves to admire them, and of "fair and beauteous" creatures undergoing the processes of the whipping-house. The style is compatible with the subject. A trio of intoxicated brawlers "pay their penance to the floor in an indescribable catacomb," and "Justia" himself explodes in this wolfish fashion:—"See the monster seeking only for the things that can serve him on earth, see him stripping man of his best birthright, see him the raving fiend, unconscious of his hell-born practices, dis severing the hope that by a fibre hangs over the ruins of those beings who will stand in judgment against him. His soul, like their faces, will be black, when theirs has been whitened for judgment in the world to come!"

But there is a sentimental side to the romance. There is a Franconia, whose mind "burns with joy and buoyancy," who has "a ravishing simplicity more than earthly," who indulges in a love that "tells its tale in nervous vibrations," who is ultimately drowned,—though the author pursues her into eternity, and describes her fortunes even beyond the grave. There are other beings,—some immaculate, sweet and lovely; others transcendently pious; others impossibly wicked, and all subjected to influences which never did, and never could, exist among mortals. The maudlin virtue of "Justia's" good people is even more tiresome than the monotonous ferocity of his demons. Add to all this, that there are chapters of satire, and pages of ejaculation, and it is superfluous to characterize 'Our World' as a dismal book, written in a bad spirit, and insufferably tedious, in spite of the licence which its author permits to himself.

Memoirs of a Bourgeois of Paris—[*Mémoires*, &c.]. By Dr. Véron. Vols. V. and VI. Paris, De Gonet.

THESE two concluding volumes remind us of a cheap Parisian dinner. After having in one of these apparently gone through every course, *plat*, and delicacy required by persons desirous

of dining conscientiously in France, the little satisfied tourist (we speak from hungry recollection) may be found, two hours later, in some corner at Broggi's, the *Café Foy*, the *Café de Paris*, or the *Café Véron*, solacing himself for the pretences of the former meagre meal with some feast less Barmecide and more costly.—The bill of fare of our *Bourgeois* is magnificent, but its separate "portions" come under the denomination of "short allowance"; and the parallel is still further borne out by the fact, that Dr. Véron's materials have been obtained in a questionable manner.

The fifth volume treats of the downfall of H.M. Louis Philippe, and of "the distress without dignity" which attended his flight from France and his arrival in England. A small amount of subject-matter is derived from Dr. Véron's own experiences. Some details of the period anterior to the royal departure, with letters and diplomatic notes, have fallen into the hands of our *Bourgeois* in an odd way. Who has not heard of the sack of the Tuileries, when the crowds of Paris broke into the Palace, — when *gamins* tapped the ex-King's claret, while the companions of *gamins*, decked out in the satins and laces of the expelled royal Ladies, danced their *Carmagnole* to the pianoforte accompaniment of a Polignac? Dr. Véron's share of the spoil was neither liquor nor finery,—but private papers. With regard to the incidents of Mr. Smith's flight from the French coast, our *Bourgeois* (truly Parisian in his disdain of English names) owns himself in debt to an article in the *Revue Britannique*—the translation of an article contributed to our *Quarterly Review* by M. "Kroker." This gentleman, it is affirmed, was primed with the facts of his narrative by the *Roi Citoyen* himself during the residence of the latter at Claremont.

Other illustrations of the habits, proceedings, and modes of intercourse of the Royal Family now in eclipse, exhibited by Dr. Véron, can only be characterized as the smallest of small gossip, collected with a bad taste, which is not always clear of malice or of desire to wound. Madame de Mirbel writes to beg a spare *toupet*, in order that she may complete a portrait of His Majesty. The King complains to *Général Athalin*, in 1834, that too many of the guests who were invited to the ball of the Queen of the Belgians got drunk,—and ordains that among the refreshments for a coming festivity neither wines nor *liqueurs* shall be served, but that the musicians and attendants shall receive a gratuity instead. What a treat is here for M. Jules Lecomte and other such charitable neighbours as have been given to accuse the English of a monopoly of love for "strong drinks"! The Queen of the French writes how much "our Sovereign Lady" was diverted, on her visit to the *Château d'Eu*, "by the French postillions"; and recognizes that the English Ministers have made "every effort to live on good terms with France,"—this at no distant period from that strange piece of diplomacy, "the Spanish match."—An epistle is printed, purporting to have been received by one of the Princes when in England; which Dr. Véron remarks, in the true spirit of a *Tartuffe*, it was scandalous to have kept—and prints accordingly. In short, both the contents of this fifth volume and the taste of their cookery—vapid, though pretending to spice and savour—remind us of the dinner at a *restaurant à deux francs* appealed to by way of simile in our opening paragraph.

Volume the sixth is more showy, slighter, and more suspicious in its contents than its predecessor. How such events as marked the short-lived days of the Republic,—the experiment at Socialism,—the Presidency,—and the *coup-d'état* could be treated with fullness, fair-

ness, life or vigour, under the censure of such a censorship as now constrains French literature, amounts to a puzzle which it would baffle the wit of M. Robert Houdin or "the Wizard of the North" to solve. Dr. Véron has not, at all events, the requisite amount of *legerdemain*. On one point, however, he has made a sensation, namely, in an accusation levelled against M. Thiers and General Changarnier, of a desire to use violence with General Cavaignac and the republican chiefs, in 1849. M. Thiers flatly denied the imputation as soon as the book appeared: whereupon Dr. Véron appealed to the recollections of M. de Morny, half-brother of the Emperor, and this political celebrity confirmed it in the most formal manner. M. Thiers then gave a more explicit denial. General Changarnier, more impetuous and impatient, wrote to the Paris and Brussels papers: "I give the lie most completely to" MM. de Morny and Véron. General Lamoricière is said to have also written a stinging letter to M. de Morny:—"However degraded you may be," writes the famous republican General to the President of the Legislative Assembly, "if you are not a coward (*si vous n'êtes pas un lâche*), I will still do you the honour of crossing swords with you, if you will come here. I cannot enter France; but you are at liberty to go abroad!" Here, consequently, is a very pretty quarrel, which may render Dr. Véron the hero—if not the principal—in a duel or two, and help to sell his book. Had it not been for this fruitful paragraph, the book would have fallen from the press a literary and social failure. Even when Dr. Véron was on the ground where free speech was possible, and ample confession might have been made amusing—the stage of the *Grand Opéra* of Paris—he was singularly scanty in his anecdotes and reminiscences. In his sixth volume he is yet scantier; treating the readers of his *Memoirs* to a few disconnected outlines, which are not so much coloured as suffused "in the purple light of love" for everything Imperial, obtained, we suspect, by looking through a pane of glass blown and annealed in the State manufactory.

OUR LIBRARY TABLE.

Treatise on Clock and Watch Work; with an Appendix on the Dipleidoscope. By F. Dent. (Edinburgh, Black.)—The illustration which the subject of clock and watch work receives from Mr. Dent is partly scientific and partly historical. It touches on a variety of clocks, ancient and modern:—the old clock of Halifax Church, with a pendulum fifty-six feet in length, and the new clock of the Houses of Parliament, with a pendulum six hundred pounds in weight. In the opinion of the writer, the Americans are far ahead of us in the matter of clocks for popular use, as they are, generally, in the making of machines by machinery. The common English time-piece for kitchens and cottages, though revered as a sacred institution by the lovers of old things, is worse than it was fifty years ago; while the Americans, though they apply little finish to their work, though they stamp all their wheels out of plates of metal, and though in many of their clocks "there is probably not two shillings' worth of mere manual labour," are rivalling in every market the more tasteful productions of France. It is a singular fact, that there is no *manufactory* in England devoted to this branch of industry; but Mr. Dent supplies a hint for a capitalist. His treatise is likely to be useful, containing as it does a review of late improvements, and a discrimination between the fantastic novelties that abound and the really useful inventions applied to watch-work. The Americans, it would appear, have returned to some discarded methods of ingenuity superseded among us, though not by superior devices. For instance, they have revived the oldest form of pinion—and the best—which has been universally disused in England

and France. It is creditable to Mr. Dent that he points out circumstances of this nature, and that he assigns merit in the proper quarters. His own observations exhibit a thorough knowledge of clock-mechanism, and leads us to expect that a restoration may take place in such branches of horology as may have been neglected by the English.

Christian Politics: an Essay on the Text of Paley. In Three Books. By the Rev. Henry Christmas. (Hope & Co.)—The authorship of this book is so divided between Mr. Christmas and Paley, that the text, in many chapters, is confused. We think, however, that it is a somewhat unnecessary publication. As a new edition of Paley's treatise, it is incomplete, for Mr. Christmas omits some parts of the original, and corrects others. Paley, he informs us, left an essay on political science, which is the foundation of nearly all the books that have since appeared on the subject. But, from the premises he laid down, he often deduced inadequate, startling, or inconsistent conclusions. Mr. Christmas, therefore, adopting Paley's basis, builds up a superstructure which is partly original—he puts his own straw into Paley's bricks. And yet we cannot discover much superiority in the inductive method which has been substituted for that pursued by the Author of 'The Principles of Political Philosophy'; nor do we see how, if all political theories are to be tried by an ancient and immutable standard, the experience of recent developments can be made available. Mr. Christmas partially eludes this difficulty, by abstaining from a precise definition of the meaning we are to attach to his phrase, "Christian Politics." Without such definition, however, the title has no purpose. Why early marriages, indirect taxation, the various kinds of food, commercial exchanges, the use of machinery, and nameless items in the criminal code, should be discussed in a book so named is a question to which Mr. Christmas, we suspect, could offer us no reasonable reply. Of all theories that of politics requires the largest scope and the most logical order of treatment,—but, though the present volume is earnestly written, we are not very confident of its utility.

Mengotti's Prize Essay on the Commercial Enterprise of the Ancient Romans. Translated, from the Italian, by S. Korner, Ph.D. (Edinburgh, Johnstone & Hunter.)—Charles James Fox said that, in the administration of justice, he preferred the old word Law to the new word Discretion. We, too, when we find on a title-page that 'Mengotti's Prize Essay' has been "translated from the Italian," are disposed to apply a similar rule. We prefer the old word Translation to the new word Selection; and are, therefore, disappointed when we discover that "only the most interesting and important portions of the original Essay" are included in Dr. Korner's English version. As it is, Mengotti's treatise will appear to the reader to be a loose and fragmentary composition. In itself, it is a rapid, eloquent and masterly summary of Roman commercial enterprise. The author has a philosophical appreciation of the value of arts and industry as penetrating and pervading a nation's social life; but his judgment on the Roman people savours of fierceness rather than of equity. If we received their character from him, we should regard them,—lawgivers, soldiers and populace,—as little better than gladiators, gluttons and thieves. It is true, no doubt, that oratory, history and philosophy, as well as trade, slowly progressed in the Empire, and that their culture was owing to the benign and diffusive influences of Grecian civilization; but an historical critic has no right to warm his style with passion, even for the sake of rendering it more persuasive. Mengotti declaims,—and here is the fault of his production. With its general opinions, as to the part taken by Rome in the commerce of the world, every student will agree. The Roman Empire was unpropitious to trade. The caravans of the East were encouraged chiefly for the luxuries they brought to the capital;—the wheat of Sicily and Egypt was paid, rather than sold, to the masters of the earth;—the energies of the conquering race were exhausted in military works, monuments of pride and sumptuous fabrications. In all this Mengotti is unquestionably

right; but his Essay, learned and brilliant as it is, is not calm enough to serve as an historical "class-book."

Slave Life in Georgia: a Narrative of the Life, Sufferings, and Escape of John Brown, a Fugitive Slave. Edited by L. A. Chamerovzou.—There is too little variety in these Slave-narratives to render their multiplication necessary. The severities of masters, incarcerations, escapes, captures, floggings, and excessive task-work, occur in one as in another, and we scarcely see how the public is to be instructed by repetitions of accounts so piteous and so harrowing. Of course, if the fugitives find a market for their stories they have a right to deal in them; but we can promise our readers nothing more than the stereotyped account of horrors, and nothing less than sickening amplifications on the effect of the bull-whip and the cobbing-ladle. Mr. John Brown, however, writes in no bitter spirit, and is evidently solicitous to keep within the limits of truth. He seems to be of an enterprising character,—and while planning and accomplishing his escape, to have exercised patience, vigilance, and caution.

O'Byrne's Naval Annual for 1855. (Piper & Co.)—The first year of war gives a more general interest to Mr. O'Byrne's Naval Annual, which contains, not only a chronological narrative of maritime proceedings in 1854, but all the gazetted naval despatches in full. Various memoirs of admirals and other officers, and particular notices of "gallant exploits," are added. Mr. O'Byrne remarks, in an article on the Russian army, that Russia possesses the best materials for ship-building, and that her oaks are as fine as the oaks of Canada. This magnificent timber, however, having been wasted by the improvident prodigality of her officials, the woodlands in the central districts are unequal to the supply of the navy, which has lately been built partly from the north. But Russian captains, says Mr. O'Byrne, who knows something of that class, are not of the tough and bluff quality of Drake and Blake, of Tromp or Ruyter. "Slipped they are, and wrapped up in morning gowns, and got up in the most splendid style of ease; they loll on soft sofas of purple velvet, reading French novels, or they sit at the piano by the hour, playing *Etudes par Chopin*." In a contest with a naval power at sea, the Russians, Mr. O'Byrne thinks, would not have a chance of success. The 'Naval Annual' contains much useful information, and is a neat, portable volume.

The Year-Book of Facts in Science and Art, exhibiting the most Important Discoveries and Improvements of the Past Year. By John Timbs. (Bogue.)—As Mr. Timbs proceeds with his annual volumes, the 'Year-Book' will grow into a current cyclopædia of inventions and improvements in science and art. We can see one important use to which his record may be applied; that of enabling working men and others of inventive minds to know what has really been done towards the accomplishment of a particular object, and what actually remains to be attempted. Many an ingenious person, after exhausting his efforts to improve a rude process into an easy one, comes to a patent-office and finds that he has been anticipated—perhaps long ago; but if Mr. Timbs is careful to render his 'Year-Book' complete, its facts will gradually accumulate and form a consulting dictionary, that may spare much disappointment to inventors, and lead them to safer ground. In many other respects it is a serviceable and meritorious publication,—as a manual for such readers as are interested in the advance of science, as a summary of our annual progress in discovery, and as a register of names deserving to be noted and remembered in the scientific and artistic world. Mr. Timbs arranges his matter carefully, quotes authorities where necessary, and gives his information in such a condensed shape as to render each statement clear, precise and practical. In truth, the "facts" announced from time to time in public journals, and afterwards vaguely recalled, and vainly searched for by interested amateurs are here collected, classified, and furnished with an index; so that the 'Year-Book,' as we have said, is to science, what the 'Annual Register' once was to

politics—a volume for reference, necessary to such readers as it addresses.

Music and Musicians (especially English), the Days of Henry Purcell: a Brief Historical Sketch. By the Rev. Richard Hooper, M.A. (Willis.)—We know not how better to characterize this Lecture, originally delivered at a "Literary and Scientific Institution," than as "good-natured,"—not calculated to offend the prejudices of any one,—to afford a single new idea to those who have read the cheap manuals lately published (we especially refer to the little book given out by Messrs. Cradock & Co. in 1846),—or to add one new fact to the amateur's store. Thus, we cannot admit the Rev. R. Hooper as having added a word to the library of musical literature, though we find nothing to object to in his manner of treating a favourite art.

The Book of Psalms and Sacred Harmonies; the Text alone printed by Authority. (Edinburgh, Johnstone & Hunter.)—This book has a double meaning—containing words and music so arranged by a division of the pages across, that the full vocal score of any psalm tune given out may be brought under the eye of the singer, together with the words of any sacred lyric in the appropriate metre. What the value of the collection of tunes may be, let congregational singers decide;—enough to say, that they seem plainly (which, to our thinking, is also devotionally) harmonized. As a combination of typography and book-binding, ingenious without unworldliness, the volume claims praise, and may be referred to comparatively with those old pieces of printing in which the separate parts of the vocal quartet were arranged quadrangle-wise on the same page,—in order that *Cantus, Tenor, Baritonans* and *Contratenor* might take part in the service, "with one consent," and from one page of the Mass-book or Psalter.

Blue Beard; or, Fatal Curiosity. Semi-Burlesqued by Peter the Friar. With Illustrations by Hubert the Monk. (Chapman & Hall.)—'Blue Beard' is here dramatized for drawing-room theatricals. Whether the language is suited to the locality will be seen from one or two extracts, which we subjoin.—

Blue Beard. Let not my Fatima denounce me cruel,—
The rascal put no sugar in my gruel,
Or spice, or brandy in his watery swizzle.
Now for the present cut your lucky—mizzle.
Busta (Fatima's Mother). If she don't funk, why need you
be afeard?
Cheer up, my gals!
—And in another speech, the same delicate lady
tells us:—

His coming back
That is, may be expected in a crack.

We hope the "Friar" is not given to the good things of this world, and that he does not indulge in heavy suppers, or he may expect to be roughly treated some night by a ghost denouncing robbery and murder.—

Be it your care that future ages tell
I loved not rashly—you will use me well.
It is evident from the examples we have quoted that this "drawing-room play" could not be put into the hands of children, and yet the author ventures to hope it may share some of the favour which has been bestowed upon 'Little Plays for Little People.'

Seven Fairy Tales. (J. H. Parker.)—These are precisely the Fairy Tales we have long been wanting for the young. Here are seven sweet sisters,—the fairies Contento, Early Rising, Conscienza, Helpful, Devoirgilla, Soigneuse, and Bon-natura,—all of whom teach such loving and useful lessons that youthful readers will not fail to treasure up and profit by their teachings.

What Auntie saw in Scotland. By Mrs. Sonna. (Nisbet & Co.)—This desirable addition to the Nursery Library consists of an account of a journey into the Highlands, and is written so easily as to lead a child to become unconsciously interested in history and geography. "Auntie" tells her little auditor to be careful in finding out the places on the map as the story proceeds, and she describes the wanderings of Bruce and Wallace in so instructive and simple a manner that we doubt not young people will be highly interested in her account of Scotland.

A School History of Modern Europe, from the Reformation to the Fall of Napoleon. By J. Lord, A.M. (Simpkin & Co.)—Notwithstanding the great number of school-histories already published, there was room for Mr. Lord's, which treats of a portion of history too much neglected in schools. The author is fully justified in claiming for it a more lively style of narration, and a greater amount of useful reflection than are to be found in most historical compendiums. His is not a mere abridgment of a larger work, made by a simple reduction of the scale, and consequently consisting for the most part of a barren list of names and states, with no fullness of detail, no characteristic incident, and no attempt at style. It is not a map or plan exhibiting the bare outlines of European history; but a picture, or rather a series of pictures, representing in vivid colours the principal scenes in the drama. The sketches of character are excellent portraits, drawn with a free bold touch. We have been sorry to observe one or two inaccuracies in matters of fact, and occasional omissions which detract from the completeness of the work. Facts are presumed to have been stated, though they have never been mentioned. Thus we are told of Wilkie being "a second time expelled," without any hint having been given of his first expulsion; and we hear of the blood flowing from Robespierre's broken jaw as he was led to execution, but nothing is said of his attempt at suicide which caused this circumstance.

Hellas; or, the Home, History, Literature, and Art of the Greeks. Translated from the German of Friedrich Jacobs, by John Oxenford. (Parker & Son.)—Having recently [No. 1411] dealt pretty fully with the original work from which the present translation was made, we need only express our satisfaction that a production which well deserved to be introduced to English readers has fallen into the hands of so competent a translator. Mr. Oxenford's version has the rare merit of combining fidelity to the German, with such a purity and freedom of style as to read like an original English work. A few explanatory notes have been subjoined, for the benefit of less informed readers, and occasional references to original sources of information. We think Mr. Oxenford has acted wisely in adhering to the ordinary mode of spelling Greek names, not merely because, as he says, it is more intelligible to general readers, but because the new method, sanctioned by the authority of Mr. Grote, cannot be consistently carried out, as appears from that historian's own practice. On the other hand, the translator is equally right in giving Greek names to Greek deities, instead of the names of Latin deities supposed to occupy a similar place in the Roman mythology. Those who wish to become acquainted with the Hellenic race in all its varied manifestations, cannot consult a better authority than Prof. Jacobs as here represented.

Dr. Bernays's *Introductory Lecture* delivered at Queen's College at the commencement of the academical year, has been printed separately, and also an *Introductory Discourse* on the objects and advantages of educational lectures, delivered at the London Institution by Mr. Alfred Bruce.—Educational pamphlets cease here for the present; but we find on our table a variety of miscellanies, more or less of a didactic character, *The Alluvial Formation and Local Changes of the South Coast of England*, by Captain Manby, exemplifying some remarkable phenomena in the natural history of this "tight little isle in the ocean;" *Agriculture, Past and Present*, being two introductory lectures delivered in the University of Edinburgh, by Mr. John Wilson; and a *Lecture on Respiration*, by T. Hopley.—On other subjects related to science we have Dr. Lauder Lindsay's interesting account of his *Experiments on the Dyeing Properties of Lichens*, of which the results promise to be of some importance; and Prof. Low's *Treatise on the Chemical Equivalents of Certain Bodies, and on the Relation between Oxygen and Azote*. A curious description has been published by Mr. J. Henderson, of the *Chinese Potatoes*; or, *The Dioscorea Batatas*, and *Holcus Saccharatus*, with *Directions for Cultivation*. The plant referred to is a particular kind of yam, believed by many horticulturists to be nutritious, safe from disease, easily reared and propagated,

and likely to prove a substantial article of food. In China it is extensively grown, and in the native treatises on agriculture notices of it frequently occur. Mr. Henderson's pamphlet is at least worth perusal, especially as it is obviously free from exaggeration. *Every Man his own Printer* professes to make lithography an easy acquisition; but, as is customary with such volumes, it contains little more than recommendations of a particular process.

Of a personal, rather than of a general nature, are the following:—Mr. S. L. Sotheby's *Postscript to the Letter addressed to the Directors of the Crystal Palace Company*,—a *Civilian's Review of the Evidence before the Second Court-Martial on Lieut. Perry*,—and *Our Consuls in the East: a Parliamentary Enquiry into their Proceedings Imperative*, by an Anglo-Levantine. Mr. Sotheby adopts a very reasonable tone; the "Civilian" is temperate, though positive; but the Anglo-Levantine does no more than make charges of cruelty, treachery, and tyranny against persons whom he only designates by initials. We presume that he has sojourned so long in the Levant that he has forgotten the English idiom, for there is a modern Greek tinge in his diction.

LIST OF NEW BOOKS.

Account of Mrs. C. Singletart, by Author of "Mary Powell," 7s. 6d. Alison's History of Europe, People's Edition, Vol. 9, cr. 8vo. 4s. 6d. Anderson's (Rev. J.) [ADVERTISEMENT.]

THE AUTHORITY FOR THE OBSERVANCE OF GOOD FRIDAY.

It is so universally admitted, as to render the production of proof unnecessary, that our Blessed Lord was raised from the dead on the First Day of the week; and it is as universally admitted, that while on earth he himself declared, Matt. xiii. 40, "For as the sons of men will be three days and three nights in the belly; so shall the Son of man be three days and three nights in the heart of the earth." The entire authenticity and correctness of these words are not questioned by any one; their Literal Sense is clear, and determines, that if our Saviour was raised from the dead on the First Day of the week, he must have suffered, and been buried, on the preceding day.

The record of the duration of an event, admits of two distinct forms of description. The event may be described, in relation to the actual amount of time that it occupied; or, in relation to the number of the appointed divisions of time on which it occurred. Thus, as regards the Roman year, it may be described as a day, or ten days, or, on the eleventh day; either is equally correct: the one specifies the actual amount of time it occupied, the estimate of which commences with the journey; the other the number of the days, the appointed divisions of time, on which the journey was being performed. In Greek as in English, the one form is distinguished from the other, by the Expression and Omission of the Proposition On. In the specification of the actual amount of time an event occupied, the Proposition is not expressed; in the speci-

fication of the number of the appointed divisions of time on which it occurred, the Proposition must be expressed. Supposing our Blessed Lord to have suffered on Friday, all the following statements are just:—He suffered on the first day—He rested in the grave on the second day—He was raised from the dead on the third day—He laid in the grave two days—He was two days and two nights in the heart of the earth—He was raised from the dead the second day; certainly not. He was raised from the dead the third day. He was three days and three nights in the heart of the earth; for then, from Friday to Saturday must be, Two days and two nights, and, One day and one night can have no existence. Who says to his gardener, in relation to such time, Here is three days' hire? Who computes the creation of the world, from Sunday to Tuesday three days, then to Thursday three days, then to Saturday three days, then to Sunday two days? making together eleven days. Thus then, supposing our Blessed Lord to have suffered on Friday, in no statement of Holy Scripture respecting it, can the word Three be used; or even the word Third, unless it is preceded by the Proposition On; yet in numerous passages of Holy Scripture these words are so used, see Matt. xxvii. 63, John ii. 19, and Matt. xvi. 21, Mark ix. 31, Luke ix. 32, 1 Cor. xv. 4, &c. &c. and they are also so used in each of the Three Creeds; therefore, it is certain, that our Blessed Lord did not suffer on Friday.

Thus then it appears, that in relation to the time of our Blessed Lord's suffering, the Word of God is clear and determined; yet this "Word hath been made of none effect through Tradition."

Tradition assumes, that the word Sabbath, as a mere Appellation of a day, is Synonymous with The Seventh day; yet in Lev. xxiii. 32 it is recorded, "In the ninth day of the seventh month at even, from even unto even, shall ye celebrate your Sabbath." And in the record of the Ten Commandments it is, Exo. xx. 10, "But the seventh day is (not The Sabbath, but) A Sabbath to the Lord," hence this assumption cannot be regarded. Every Seventh day is A Sabbath, but every Sabbath is not a Seventh day.

Tradition may assert, that our Blessed Lord suffered on A day of preparation; for Holy Scripture so records it. Tradition may assert, that it was on A day of preparation for a Sabbath; for Holy Scripture so records this also. But Tradition cannot justly assert, that that Sabbath was The Sabbath of the Seventh day; for Holy Scripture records a contradiction of it. "So shall the Son of man be three days and three nights in the heart of the earth."—St. John xix. 14 records "It was a day of preparation for the Passover;" and St. Luke xxiii. 54 records "That a Sabbath drew near," not a Sabbath of The seventh day, for that approaching day was Friday, but A Sabbath of The Passover; hence St. John xix. 31, "For that Sabbath Day was an high day."

It therefore appears, that there is no authority for the observance of Good Friday, above, Dogmatic Teaching; or, The Edict of a Living Infalible Head.

HERMAN HEINFETTER.

17, Fenchurch-street,
October 1, 1851.

P.S.—Mar. 30, 1855. This is the One Million One Hundred Thousandth anniversary of the day when our Lord Jesus Christ was born. *any hath we between and thine? if the Lord be God, follow him; if Baal, follow him; ye cannot serve God and Mammon;* for he that is of God heareth God's words; and whosoever shall be ashamed of me or of my words, of him shall the Son of man be ashamed. I beseech you, therefore, brethren, by the mercies of God, that ye present your bodies a living sacrifice, holy, acceptable unto God, which is your reasonable service; and be not conformed to this world; but be ye transformed by the renewing of your mind, that ye may prove what is that God, and acceptable, and perfect will of God; for whosoever doth not bear his cross, and come after me, cannot be my disciple; heaven and earth shall pass away, but my words shall not pass away.

Be not deceived. This is not an immaterial selection of one day for another, but a question of grave importance; even of acceptance or rejection of our Lord Jesus Christ; the decision of which we cannot avoid. We know that our Blessed Lord hath declared, and we must either accept his declaration, or "make him a liar."

Be not deceived. We feel that there is no uncertainty in our Blessed Lord's declaration, and that the disturbing cause, is an opposing declaration of Tradition. We know that our Blessed Lord has said—Three days and three nights; and that Tradition says—Three days and two nights.

Be not deceived. The appearances are of peace, Facts determine that war is raging; That Christ and Tradition are warring for our submission, and one must secure us.

Be not deceived. Tradition has not secured any one, that is not so convinced of its authority, as to satisfy himself of its adhesion to it, as clearly, as though Tradition's badge was marked on his forehead; and that does not by his actions, and the systems he supports, as clearly point out to others his conviction, as though Tradition's Badge was marked on his hands. Tradition is not a scrupulous master; it has been, that it has denounced buying and selling, without all required marks of adhesion to it.

GOING HOME.

We said that the days were evil,
We felt that they might be few,
For low was our fortune's level,
And heavy the winters grew;
But one who had no possession
Looked up to the azure dome,
And said, in his simple fashion,
"Dear friends, we are going home!"

"This world is the same dull market
That wearied its earliest age;
The times to the wise are dark yet,
But so hath been many an age.
And rich grow the toiling nations,
And red grow the battle spears,
And dreary with desolations
Roll onward the laden years.

"What need of the changeless story
Which time hath so often told,
The spectre that follows glory,
The canker that comes with gold,—
That wisdom, and strength, and honour
Must fade like the far sea foam,
And Death is the only winner!—
But, friends, we are going home!"

"The homes we had hoped to rest in
Were open to sin and strife,
The dreams that our youth was blest in
Were not for the wear of life;
For care can darken the cottage,
As well as the palace hearth,
And birthrights are sold for pottage,
But never redeemed on earth."

"The springs have gone by in sorrow,
The summers were grieved away,
And ever we feared to-morrow,
And ever we blamed to-day.
In depths which the searcher sounded,
On hills which the high heart clomb,
Have trouble and toil abound :—
But, friends, we are going home !

"Our faith was the bravest builder,
But found not a stone of trust ;
Our love was the fairest gilder,
But lavished its wealth on dust.
And time hath the fabric shaken,
And fortune the clay hath shown,
For much they have changed and taken,
But nothing that was our own.

"The light that to us made baser
The paths which so many choose,
The gifts there was found no place for,
The riches we could not use ;
The heart that when life was wintry
Found summer in strain and toime,
With these to our kin and country :—
Dear friends, we are going home !"

London, 1855.

FRANCES BROWN.

PICTORIAL COPYRIGHT AND COPYWRONG.

WE continue to receive a great number of communications on the subject, which it has been the fortune of Mr. Ward to raise, and which we trust it will prove his happiness to settle. Most of our correspondents agree that registration is necessary, and nearly all concur in the belief that legislative interference is required in order to give a legal sanction to the act of registration, and impose a penalty on those who perpetrate the sort of violence to fame and profit from which Mr. Ward has rescued himself by his prompt and manly exposure of the wrong.

A story told by Mr. Stirling, and quoted in another column, of the repainting of the Velasquez in the National Gallery, scarcely impeaches more strongly the infallible wisdom of picture-cleaners than the facts related in the following extract from a letter addressed to us by Mr. Ward impeach the wisdom of picture-dealers :—

"11, Upton Park Villas, Slough, March 24.

"I am sure you will be pleased to hear that the publicity you have kindly given to the forgery case has already had the good effect of bringing back the spurious copy into the hands of one of the dealers, Mr. Lloyd, who has sent it down to me to have my written opinion upon it, with a view of returning it into the hands of Mr. Gambart; and I have no doubt it will soon find its way back to the person who first originated it. The copy is a very indifferent affair. On the whole, some of the subordinate parts are tolerably well imitated; but the principal heads are very poor indeed. I cannot imagine a competent judge being deceived by any part of it, except the signature, which is admirably forged, and would, indeed, have deceived myself. I have received letters from several first-rate collectors thanking me for the exposure I have given to the affair, and expressing their gratification that it has been taken up by the *Athenæum*. In reference to the letter which appeared in your last number, I think the idea excellent in the main; but I cannot agree with the writer in his opinion concerning legislative interference, as I feel convinced that the very existence of a law making the forgery felonious would be the only one to affect the fears of such as unfortunately carry on their nefarious transactions with comparative impunity at present. The price paid by Mr. Lloyd to Mr. Gambart for the copy was 200*l.*; and I have every reason to believe that it must eventually have fetched between three and four hundred pounds. It is really not worth five pounds.

I am, &c. E. M. WARD."

Another artist, who first suggested in our columns the use of a stamp as a means of preventing forgery, writes :—

"March 28.

"The remarks of your Correspondent last week in reference to the suppression of picture forgery are worthy of consideration; but I cannot altogether understand his objections to a legislative enactment, without which, it appears to me, there

could be no protection. The registration and stamping of pictures by some public body cannot be objected to, but unless they, or the artist, have the power legally to punish an offender for forging the stamp, which could be as easily imitated as the picture, I fear the matter would be almost in the same state as it is now. The stamp *could* be the only evidence of the picture having been registered, and how could any one in the hurry of a large picture sale by auction possibly ascertain whether the picture had been registered, but from the evidence of the stamp which for the time might satisfy the purchaser, who upon inquiry afterwards finds that the stamp is a forgery. Where would be the remedy without a legislative enactment ?

"I am, &c. J. C."

The following notes, from a Correspondent who has had ample means of knowledge, are also worthy of consideration :—

"London, March 28.

"Will you allow me to add a word or two to the plan suggested by your last Correspondent for the prevention of picture piracy? The remedy proposed at present, as I understand it, is the establishment of a registration office in London, and the placing of that office under the ceremonial superintendence of Members of the Royal Academy. Why should not the office itself be set up in the first instance by the Royal Academy, and be placed in the building in Trafalgar Square? By this means, your Correspondent's suggestion might be practically carried out entirely by the painters themselves. The Royal Academy is rather apt to stand on its dignity, I know; but it is not easy to see why the Members might not just as gracefully, and with quite as much propriety, be registrars of pictures as exhibitors of pictures. Then, again, as to the stamping, there seems no reason why the Academy,—which makes its own laws, gets the Queen's ratification of them when made, and imposes them on all artists who wish to exhibit or to win professional honour, in Trafalgar Square, should not invent a special seal to be impressed on the backs of pictures sent for registration. The Royal Academy stamp would be the most satisfactory of all certificates of genuineness. On the question of legislative enactments, I am not competent to speak; but I apprehend that the counterfeiting of the seal of a public institution would be an offence punishable at law; and that the establishment of a small fund to meet the necessarily rare contingency of legal expenses incurred for prosecuting counterfeiters might be taken into consideration, in regulating the amount of the registration fee, without imposing any unendurably heavy tax on the pockets of artists. Whether this registering and stamping plan be the best that can be devised, I know not; but of this I feel certain, that the prevention of picture-piracy might fairly and gracefully originate with the Royal Academicians, who represent the profession of painting, and who, during the summer months, keep the largest picture-market in England. Is it not their interest as our principal picture sellers to protect our picture buyers?—or, if this be too low ground to take, I will say, is not their professional position concerned in coming forward to offer this said protection? If I had money enough to buy pictures, I should be apt, in reference to the Royal Academy and its duties towards helpless patrons of Art, to reason with myself in this wise :—if I want to be certain of the soundness of a horse, I have an incorporated profession of veterinary surgeons to appeal to: if I want to be certain of the genuineness of a picture, why should I not have an incorporated profession of painters to appeal to also?—I am, &c. W. W. C.

We concur in this suggestion. The Royal Academy, though at present pretending to no higher place than that of premier private association of artists, may ere long assume a larger character, becoming a real National Academy instead of "a secret and irresponsible society." Even under present circumstances, it is the natural guardian of the rights of artists—the body to which all artists look up, and into the ranks of which they all hope to enter. Within the edifice in Trafalgar Square a machinery already exists—or might easily be

introduced—for such registration as may be found necessary.

OUR WEEKLY GOSSIP.

THE appointment of Sir Charles Eastlake as salaried Director of the National Gallery—with large powers and large responsibilities—completes the more important changes needed in the Art department of the public service. From a Director so eminent as a painter and so intimately acquainted with schools of painting as Sir Charles Eastlake, and a Secretary so active and well informed as Mr. Wornum, the public will naturally expect a vast improvement in the Gallery. Mistakes are henceforth inexcusable; spurious or doubtful pictures in the one Gallery of the State must no more vex the public patience. We have not heard whether Sir Charles Eastlake means to resign—or to retain—his office as Secretary of the Fine Arts Commission, or the Presidency of the Royal Academy. The first is a salaried office: the second will become so on the death of Lady Chantrey. Is it desirable that all these offices should be held by the same artist? Is it wise to establish a precedent for their being so held? Apart from personal considerations, which fairly have some weight—there is something to be said for and something against this system of pluralities. Art, like Literature, offers very few public prizes to its votaries:—it may be urged that the paucity of public rewards is a good reason for not throwing all into a single hand. As regards Sir Charles Eastlake, no one will deny his great deserts—his learning, his urbanity, his respect for his profession; but a time may come when so many eminent qualities cannot be found in a single person, and then the precedent for such a combination of offices as he may justifiably hold, will prove a serious evil. On the other hand, it may be urged that the Presidency of the Royal Academy is an office of dignity, absorbing much time, for which no adequate money value is received by the occupant, and that therefore it is desirable to improve its state by adding the salary of some office, such as that of Director of the national taste in pictures. Such are the views that occur at first consideration. If Sir Charles should live to hold the two offices of President of the Royal Academy and Director of the National Gallery for a number of years, a connexion between them would be established which no man in this precedent-governed country would choose to disturb. Is it desirable that the two offices should go together for ever?

On Wednesday the Literary Committee appointed to draw up a scheme for a new Charter for the Literary Fund Society met for the second time. While referring to this subject, we may take occasion to say a word on a point suggested by the *Times*, by *Lloyd's Newspaper*, and other journals :—namely, that the salary of 200*l.* a year to the Secretary of the Literary Fund is the least part of the evil. We speak no word against the Secretary; we are willing to admit all that his best friends say of him: in a post demanding daily care, incessant activity, and thorough business habits, we assume that he would be distinguished. We are sure he would be worth his salary and more. But in Bloomsbury there is, under the present system, no field—or ought to be no field—for his abilities. If the officers were to do the duties which they undertake there would not be three days' work a year for a Secretary. Indeed, a Secretary is no more required for the Literary Fund than a fine house. It is the name that justifies the expense, not the necessities of the case or the wants of the institution.

Mr. Ewart has obtained leave to introduce his measure for promoting the establishment of Free Public Libraries in Ireland.

The easy way in which our Ministers dispose of the property of English authors, confiscating it at the Cape and in Canada by a mere Order in Council, reminds us, by way of contrast, of the care with which the German governments regard the rights of their own authors. Not only do they religiously guard the property of all—extending the line of ownership of intellectual wealth in every case for thirty years after the creator's death,—but they seek, with a deep veneration, for every

chance of marking their gratitude to genius by extending this line. Children and grandchildren of several German writers are at this moment living on their copyrights:—we recall those of Jean Paul, of Herder, of Wieland, and of Schiller. In respect to their descendants these writers worked as profitably as the bankers, bakers and soldiers of their time: for the wealth they created by toil of hand and force of fancy has not been confiscated to the public use. But what advantage have the descendants of Milton, of Defoe, of Fielding, from their labours? The profits are all confiscated. Had Defoe put his genius into a quack medicine instead of into literature, he might have done the world some harm, and gained house and lands which the law would have protected. He put his faculty into 'Robinson Crusoe': the world appropriated his property, and his descendants are only snatched from starvation by the beneficent interposition of a few men of letters. In the eyes of Red-tape such is the just reward of genius!

An interesting sale began yesterday (Friday) of coins and medals collected by the late Mr. Loscombe. The sale will extend over nine days, and will bring to the arbitration of the hammer a number of rare specimens:—comprising Greek coins, in gold and silver, Roman Imperial gold and silver,—first, second, and third brass, each series affording rare and choice specimens,—ancient British and Anglo-Saxon coins, English silver and hammered gold coins,—beautiful patterns and proofs, in gold, silver, and copper,—Anglo-Gallic and Indian coins, in silver and gold,—historical medals, in the different metals,—coin cabinets, and a collection of numismatic books.

In the library of a nobleman, sold this week by Mr. Hodgson, were several lots of Oriental manuscripts and books, which realized good prices. A Persian MS., Shah Jahan Nama, a History of the Emperor Shahjahan, in 2 vols. folio, 1616 pages, with 36 illuminations, some being portraits of the Kings of Persia, which MS. was formerly in the possession of the King of Delhi, was bought by the Messrs. Boone at 94*l.*, probably for the British Museum,—the Koran, in Arabic, 868 pages, sold for 7*l.* 5*s.*,—the Odes of Hafiz, small 8vo., 334 pages, for 3*l.* 2*s.* 6*d.* A small volume, a Tragedy, supposed to be the only production in print of Napoleon Bonaparte, which was taken from the carriage of King Joseph at the Battle of Vittoria, and presented to His Royal Highness the Duke of Clarence, fetched 3*l.* 10*s.* Morrison's Chinese Dictionary, 6 vols., fetched 12*l.* 15*s.* The rest of the books went off at good prices.

Mr. Nichols has favoured us with a very long letter on the subject of Richard the Third. We give the material paragraphs of his communication:—

"Historical documents of any kind, whatever their authenticity or their official authority, require to be used with caution and with criticism. It is unsafe to jump to conclusions. And this is what Mr. James Gairdner has done when in his letter printed in your last paper, page 351, he expresses his surprise that I did not discover documents proving the Duke of Gloucester to have been Protector on an earlier day than the 14th of May, 1483, inasmuch as your Correspondent is able to produce two, one of which is dated the 2nd of May, and the other the 21st of April. I beg to reply that I have omitted neither of the documents in question. That dated the 2nd of May, or rather 'the idle day of June,' occurs at page 68 of my book, where I have appended this note: 'In MS. May, evidently in error.' It is so, because it immediately follows documents dated the 23rd, 25th, 28th, 29th, and last day of May, and another dated the 2nd of June, in regular sequence. The word 'May' is clearly, therefore, a clerical error. The second document to which Mr. Gairdner refers is the Commission of the Peace for the County of Somerset, dated the 21st of April. This is noticed in my abstract of the Patent Roll at page xxxii of the Introduction, in these words:—'Somerset (21 April, with the names of the Dukes of Gloucester and Buckingham, but possibly this date is a clerical error.)' I might have expressed myself with more decision, as the existence of some error was manifest; and besides the same commission is entered a second time as dated on the 3rd of June. There are, in appearance, twenty-six Commissions of the Peace entered on the *dorso* of this roll, but the proofs of clerical carelessness are many. There are really only twenty two; for those for the county of Westmorland and the parts of Kesteven in the county of Lincoln are entered twice without a difference; that for Devon twice, first under the correct date of the 14th of May, and again as dated the 24th of May; and that for Somerset twice, first with the date in question of the 21st of April, and afterwards as having been issued with that for Dorsetshire on the 3rd of June. The Commission for Gloucestershire is dated the 14th of June, probably in error for the 14th of May. Now the presumptive proof that no one of these commissions was

issued before the 14th of May, consists in these considerations:—1. That such is the date of seventeen out of the whole, whilst four others are dated on the 27th of May, 3rd and 4th of June. 2. They all contain the names of the Duke of Gloucester as Protector, and the Duke of Buckingham, and not the names of the Marquess of Dorset and Earl Ryvers; whilst, 3. The Commissions of Taxes (in various counties) entered on the same *dorso*, which were dated on the 27th of April, all contain the names of the Marquess of Dorset and Earl Ryvers, and not the names of the Dukes of Gloucester and Buckingham. These facts I have pointed out at page 14 of my book as being of some interest, from their supplying additional evidence that either party was ready to circumvent and supplant the other; and the Commissions of Taxes clearly prove that the Duke of Gloucester was not Protector on the 27th of April, nor before his arrival in London, as Mr. Gairdner has suggested.

"I am, &c.,

JOHN GOUCH NICHOLS."

The Cupola of the new Reading Room begins to show itself above the outer buildings of the British Museum, and to attract attention from the street passengers. When completed, the interior of the room will be one of the finest in the world—being some feet larger than the dome of St. Peter's, at Rome. Light will flow in from twenty windows and a great central circle in the cupola; between the windows will be twenty broad spaces, arched and well lighted. What is to be done with these spaces? We trust they will not be thrown away on whitewash. London offers few public buildings to the artist; the simplicity of our Protestant ritual denying him the privilege of covering churches, as in Italy, with mural works. Grand art—monumental art—has therefore scarcely any room to flourish. Here, however, is a field for our Raphaels and Michael Angelos. The slopes of this fine cupola offer as fine a ground for a series of grand historical or allegorical paintings as any in Europe. What would not Barry have given for such a canvas on which to write his pictorial history of civilization—those glorious works so long buried in the gloomy apartments at the Adelphi.

Messrs. Hurst & Blackett announce as forthcoming the third and fourth volumes of the Duke of Buckingham's 'Memoirs of the Court and Cabinets of George III., from original Family Documents, comprising the period from 1800 to 1810,' and completing the work,—'The Memoirs of Lieut. Bellot, with his Journal of a Voyage in the Polar Seas in search of Sir John Franklin,'—a new work by Mr. Leigh Hunt,—'The Monarchs of the Main,' by Mr. George W. Thornbury,—'My Travels; or, an Unsentimental Journey through France, Switzerland, and Italy,' by Capt. Chamier; also new novels by Mrs. Trollope, the Author of 'Emilia Wyndham,' Mrs. Maberly, the Author of 'Temptation,' and the Author of 'Singleton Fontenoy.'

Excavations on a very extensive scale are going on at Capua Antica, and some highly interesting and beautiful objects have been brought to light. Many vases have been discovered in excellent preservation, some of which are gilt. Some coins were found on this same site last year; these have just been sold to the Museum for 500 dollars.

From Paris we hear that M. Ponsard, author of 'Lucrèce,' 'Agnès de Méranie,' 'Charlotte Corday,' 'Honneur et Argent,' and other dramas, has been elected a Member of the French Academy in the room of M. Baour-Lormian, by 16 votes out of 28. M. Liadières had 7 votes, and M. Augier 5. The political tendencies of the Academy have received a slight check. M. de Falloux, who was spoken of to fill this vacancy, abandoned the contest as hopeless.—The Emperor has allowed M. Berryer to abstain from the usual visit to the Tuileries, observing that he "respects in the adversary of to-day the defender of former times." M. Berryer defended Louis Napoleon after the affair at Boulogne in one of his most powerful forensic speeches.—MM. Rossignol and Miller have been appointed Professors of Greek Literature, of the first and second degrees, to the College of France.

M. Ste.-Beuve's Lectures are suspended. Despotism as the Government is, the students of the Quartier Latin have conquered its obstinacy. At first, it is said, the Emperor refused to accept M. Ste.-Beuve's resignation, and ordered the Professor to persevere; but on the morning of the resumed Lectures the student district was placarded with a seditious paper, and the Emperor gave way.

An application has been made by the early Closing Association to the wholesale booksellers, to close their establishments at either two or three o'clock on certain Saturdays, in lieu of five o'clock, as agreed on the 14th of July, 1854; and the principal houses—Messrs. Longman & Co., Simpkin, Marshall & Co., Whittaker & Co., Hamilton, Adams & Co., A. Hall, Virtue & Co., Aylott & Co., Piper, Stephenson & Spence, W. Kent & Co., Groombridge & Sons, Houlston & Stoneman, Tegg & Co.—having given consideration to the application, have come to the conclusion that four o'clock is the earliest hour at which their establishments can be closed. These houses have consequently agreed to close their establishments on Saturdays at four o'clock during the light months, from April to September inclusive, excepting those Saturdays which may happen to be influenced by the excess of business on Magazine days. The new arrangements will commence on the 7th of April—this day week.

A project is on foot for "Exploring and Evangelizing Central Africa by means of Native Agents," and is rapidly gaining a solid basis of strength. The object seems to be—to dispute the possession of Interior Africa with the followers of Mohammed; and if we may judge by the moderation of the Prospectus, the warfare is to be carried on in no spirit of vindictive rivalry. The Committee state their case with modesty, and without that rancorous abuse of their opponents which at times accompanies religious zeal. The toleration, the disposition to help, and other good qualities of Moslem rulers are pointed out:—"No obstacle exists among any of the Arab tribes, or the Twareg, 'the lords of the Sahara,' to induce them to oppose or impede the circulation of the Bible, since every Moslem has the highest respect and veneration for Torat, Elanbeyae walangeel Saidna Aisa, 'the law, the prophets, and the testament of our Lord Jesus.' We can also mention the name of a Mohammedan prince and that of a cad, residing in an oasis of the Desert, who have actually already done much towards so desirable an object. Mr. Richardson, previous to his departure for Central Africa in 1849, drew up a paper, in which he says:—"Whilst endeavouring to excite the Christian Churches to dispute Central Africa with the Mohammedans, I would not assert that Africa has not benefited by the introduction of Mohammedanism, I would not be guilty of such injustice, even to the followers of the false prophet of Mecca. The Mohammedans have introduced deism in contradistinction to fetishism, and the worship of many gods. They have abolished human sacrifices. They have limited and regulated polygamy, and so protected the rights of widows and children. They introduced principles of abstinence and moderation in living by the Ramadhan. They have also introduced reading and writing with the Arabic language, besides many other things which have raised the Africans from mere brute existence to social and political confederacies. But they have failed in teaching the knowledge of the true God, as revealed in the Christian Scriptures." It is just and generous to cite this testimony. The Committee add:—"Ignatius Pallme, a Bohemian, who travelled in Kordofan in the years 1837 and 1838, strongly urges European Societies to direct their attention to Central Africa. 'If they delay much longer,' he says, 'it will be too late, for when the negroes have once adopted the Koran no power on earth can induce them to change their opinions. I have heard,' Pallme continues, 'that there are but few provinces in the interior of Africa, where Mohammedanism has not already begun to gain a footing.' If the explorers and missionaries work in the spirit of these words, faithfully, patiently, and without offence, they will at least merit success.

BRITISH INSTITUTION, Pall Mall.—The GALLERY for the EXHIBITION and SALE of the WORKS of BRITISH ARTISTS, is OPEN DAILY, from Ten till Five. Admission 1*s.*; Catalogue 6*d.* GEORGE NICOL, Secretary.

EXHIBITION of the SOCIETY of BRITISH ARTISTS, incorporated by Royal Charter.—The THIRTY-SECOND ANNUAL EXHIBITION of the Society is NOW OPEN from 2 p.m. till dusk.—Admission, 1*s.* ALFRED CLINT, Hon. Sec. Suffolk Street, Pall Mall East.

THE PORTLAND GALLERY. 306, Regent Street (opposite the Royal Polytechnic Institution). **THE EIGHTH ANNUAL EXHIBITION OF THE NATIONAL INSTITUTION OF FINE ARTS** is NOW OPEN from Nine till dusk. Admission One Shilling. Catalogue Sixpence. **BELL SMITH, Secretary.**

NOW OPEN.—THE EXHIBITION OF ART-CONTRIBUTIONS in aid of the PATRIOTIC FUND for the Relief of the WIDOWS and ORPHANS of BRITISH OFFICERS, at the Gallery, 121, Pall Mall, opposite the Opera Colonnade. Open from 10 to 6 o'clock daily.—Sensou Ticket, Five Shillings; Admission, One Shilling. Catalogue, Sixpence.

LEICESTER SQUARE. **THE AZTECS and the EARTHMEN.** The first of either race ever seen in Europe. Exhibited daily from 3 to 5, and 7 to half-past 9. Lectures at 4 and 5. Vocal and Instrumental Concerts every Exhibition.—Admission, Stalls, 2s.; Reserved Seats, 1s.; Gallery, 6d.

LOVES LENTEN ENTERTAINMENTS.—VENTRILLOQUISM EXTRAORDINARY.—REGENT GALLERY, 60, Quadrant.—Every Evening at 8, except Saturday; Saturday, at 3. Monday and Tuesday, Mr. LOVE, universally accepted as the first Dramatic Ventriloquist in Europe, will present his NEW ENTERTAINMENT, called 'THE LONDON SEASON.' Wednesday, Thursday, and Friday, a LECTURE on the OCCULT POWERS of the VOICE; with the entertainments, LOVE IN ALL SHAPES and LOVE'S LABOUR'S LOST.—Saturday at 3. Love in all Shapes, and other entertainments. Piano-forte, Miss Julia Warman.—Stalls, 3s.; Area, 2s.; Gallery, 1s.—Tickets at Mitchell's, 33, Old Bond Street; Turner's Music Depot, 19, Poultry; and at the Rooms, between 12 and 3.

SCIENTIFIC

SOCIETIES.

ROYAL.—*March 22.*—Lord Wrottesley, President, in the chair.—A paper was read 'On the Anatomy of Nautilus Umbilicatus,' by Mr. J. Macdonald.

GEOGRAPHICAL.—*March 26.*—The Earl of Ellesmere, President, in the chair.—R. E. Arden and L. Oliphant, Esqs., were elected Fellows.—'Extract of a Letter from Admiral Mathieu to Admiral Smyth, on the Survey of the Strait of Gibraltar.' Admiral Mathieu states that all the triangulation and hydrographical reconnaissance of the Spanish and Morocco coasts are finished. The sounding operations have only been suspended by unfavourable weather. Some soundings have, however, been already obtained at the prodigious depth of 4,000 metres, or 2,188 English fathoms. It is expected that the survey will be completed in October next.—'Traces of Leichhardt's Expedition in Australia, and rumours of the Existence of Mr. B. Boyd, on the island of Guadalcanar,' communicated by Capt. P. P. King, R.N., to Admiral Smyth. Intelligence has reached Sydney, N.S.W., that some horses and a mule had been found on the confines of the colony, which are supposed to have belonged to Leichhardt's expedition. The brands on the horses have been made out, and may lead to their identification. A further communication may be expected. It is rumoured that Mr. B. Boyd, who is supposed to have been massacred by natives in the Pacific; while on a voyage in his yacht, the Wanderer, is still alive in the island of Guadalcanar, in the Solomon group; and a further search is proposed to be made for him.—'Report on a Group of Islands seen in the Southern Ocean,' by Capt. J. S. Hutton, commanding the merchant ship Earl of Eglinton, of Glasgow.—'Despatch from Loanda, respecting Dr. Livingston's Exploration of Central Africa,' communicated by Consul Brand through the Foreign Office. Dr. Livingston left the Cape of Good Hope in May 1852, for the purpose of exploring the interior of the continent and establishing mission stations beyond Lake N'Gami, which, in company with Capt. Oswell, he had discovered on a previous journey. After travelling for eight months, he reached the river Leeambye, or Zambeze, where it bends from a southerly to an easterly course, between 17° and 18° S. latitude, and about 24° E. longitude. He was received by Sekeletu, the chief of this country, in a most friendly manner. He acquired a knowledge of its geography, its inhabitants and their language; and remained there, instructing the people in Christianity and civilization, for eight months. With the assistance of Sekeletu, he continued his travels up the Zambeze river and its affluent as far as 11° 30' S. latitude, into the Balonda country, the chief of which (named Matiamvo) is reputed to be the most powerful in this part of Africa. The subjects of this chief treated him with kindness, but his desire to push on for the west coast prevented him from visiting their master. In passing through the countries adjacent to the frontier of the Portu-

guese territory of Angola, he experienced great difficulties from the rapacity of the tribes, who now intercept the traffic passing between the coast and the interior, and are permitted to levy extortionate imposts on everything which comes within their grasp. But having reached the limits of Angola, the Portuguese protected him from all annoyance, and assisted him to reach Loanda, where he was treated with marked attention and friendship by the governor, the bishop, and the whole population,—having thus accomplished a journey of 2,500 miles through unknown countries. In an address to the Portuguese settlers at Loanda, Dr. Livingston maintains the opinion that two or three years of honest commercial intercourse would result in establishing a profitable trade with the interior. Bees'-wax and other articles of commerce, with which the country abounds, are now thrown aside as useless. Ivory is abundant, and a ready sale would increase the supply. Cattle thrive marvellously in the Borotse Valley, on the river Zambeze. At present the obstacles to commerce are, the absence of roads and the rapacity of the border tribes. About ninety men are now required to carry a load in Angola, which a Cape merchant would convey in two large bullock-carts, with cattle and five Hottentots. Dr. Livingston urges on the Portuguese merchants the construction of a road from Loanda to Matiamvo's country, with the concurrence of that powerful chief, as the best means of overcoming the difficulties of transit, as well as the extortion of the intervening tribes, and yielding a profitable revenue from moderate tolls. Dr. Livingston adverts to the remarkable fertility of the province of Angola. Its coffee stands high in the London markets; it grows throughout the whole of the interior, and trees once planted continue to bear fruit even when entirely neglected. The country is particularly suitable for cotton, and the introduction of a better quality of seed is desirable. Dr. Livingston left Loanda with his faithful African attendants, on his return into the interior, on the 20th of September last. He had perfectly recovered from the effects of his extraordinary journey, and he is the bearer of a friendly communication and a present of a quantity of trade goods from the merchants of Loanda to his friend the chief Sekeletu. After his return to Sekeletu he intends to trace the river Zambeze to its mouth, with the expectation of reaching Quillimane, in the Portuguese territory, on the east coast, in November next. The Governor of Angola has given him letters to all the Portuguese authorities; and Lord Clarendon has been requested to cause one of Her Majesty's ships on that station to make occasional inquiries for him at Quillimane, and enable him to proceed to the nearest port to England.

SOCIETY OF ANTIQUARIES.—*March 15.*—F. Ouyry, Esq., Treasurer, in the chair.—Mr. Tymms exhibited some leaden inscribed crosses found at Bury; also, some Anglo-Saxon relics.—Mr. Morgan exhibited an ivory Viativium.—Sir H. Ellis exhibited a cast from a seal of Boppard on the Rhine.—The Secretary communicated an extract from a letter from M. Troyon, 'On the Subsidence of the Waters of the Lake of Neuchâtel,' which had brought to light the remains of ancient habitations.—The Secretary also communicated transcripts of five letters written by Dr. Devevier, a surgeon in the army of the Parliament, to Capt. Adam Baynes.

March 22.—J. P. Collier, Esq., V.P., in the chair.—The Rev. T. Hugo exhibited two bronze sword-blades found in the Thames.—Mr. Mackenzie communicated remarks on the supposed submerged city of Vineta.—Mr. Collier read an account of a MS. written by Thomas Norton, M.P. for London and City Remembrancer, describing the duties of the Mayor and Corporation.

BRITISH ARCHEOLOGICAL ASSOCIATION.—*March 14.*—J. H. Davis, Esq., V.P., in the chair. Three Associates were elected.—A fine specimen of Belannine was exhibited by Mr. Beauchamp, received from Wiltshire. Mr. Bradbury sent the impression of a Sassanian gem, upon which Mr. Pettigrew made some remarks, referring the Society to a

paper by Mr. Thomas, of the Bengal Civil Service, printed in the 13th vol. of the Journal of the Royal Asiatic Society, and also to a collection recently put forth in the Nineveh room of the British Museum. These gems are of considerable interest, inasmuch as they serve to elucidate the ancient philosophy of Central Asia.—The Rev. Beale Poste forwarded a paper in relation to the Chronicles of Tysilio and the territories of Vortigern,—in which he undertakes a defence of Geoffrey of Monmouth, in answer to the objections of Mr. Wakeman and others.—Mr. Gunston exhibited three specimens of padlocks: one of which was of a globular form, another wedge-shaped with the keyhole at the side, and the third a flat lock, pointed at the base, and so contrived that the loop bow does not move on a hinge, but is forced up with a stem from beneath when the bolt is thrown back.—Mr. Sidney Cooper exhibited a Spanish Medio-Peseta of Ferdinand and Isabella, struck between 1474 and 1504.—Mr. Syer Cumming read some observations on the Nimbus, in continuation of the remarks by Mr. French at a former meeting, and exhibited some fine specimens obtained from the East, and showed also by others that this type of glory was not unfrequent in America and in the South Seas. Illustrations are also to be seen in the collection of Mexican antiquities now exhibiting in Pall Mall.—The Chairman announced that the autumnal Congress of the Association would be held at Newport, in the Isle of Wight, under the Presidency of the Earl of Perth and Melfort; and that on this occasion it was proposed to examine several of the most interesting barrows in the island.

NUMISMATIC.—*March 22.*—J. B. Bergne, Esq., in the chair.—Mr. Roach Smith exhibited a fine Imperial Greek coin of Caracalla, struck at Perinthus. The reverse is a galley with a sail set. This rare coin was found, a short time since, during some excavations made near the Tower of London. It is almost, if not quite, the only Greek coin, Mr. Roach Smith observed, he could authenticate as discovered in London. With this coin was exhibited an ancient leaden piece, struck from the dies for the penny of William the Conqueror. It is similar to the coin on Pl. xix, fig. 246, of Hawkins's 'Silver Coins,' and was found at Walbrook, in the City. It is now in Mr. Roach Smith's collection.—Mr. Evans exhibited two copper coins, of Cunobeline, in singularly fine preservation.—Mr. Vaux read a paper, 'On Bactrian Coins,' by Dr. W. H. Scott, of Edinburgh.

STATISTICAL.—*March 19.*—Thomas Tooke, Esq., V.P., in the chair.—Thomas Hopley, Esq., was elected a Fellow.—A discussion on Mr. Newmarch's paper, 'On the Loans raised by Mr. Pitt during the First French War, 1793–1801,' occupied the entire evening.

ROYAL INSTITUTION.—*Feb. 9.*—William Pole, Esq., Treasurer and V.P., in the chair.—'On the Anthropoid Apes, and their relations to Man,' by Prof. Owen.

Feb. 16.—Frederick Pollock, Esq., in the chair.—'On Siege Operations,' by Edward Jekyll, Esq.
Feb. 23.—The Rev. John Barlow, V.P. and Secretary, in the chair.—'On Providing an Additional Supply of Pure Water for London,' by John Dickinson, Esq.

March 2.—William Robert Grove, Esq., V.P., in the chair.—'On the Economical Applications of Charcoal to Sanitary Purposes,' by Dr. John Stenhouse.

March 9.—The Rev. John Barlow, V.P. and Secretary, in the chair.—'On the Mining Districts of the North of England,' by Mr. Thomas Sopwith, Esq.

INSTITUTE OF ACTUARIES.—*March 26.*—E. J. Farren, Esq., V.P., in the chair.—Two candidates were elected Associates of the Institute.—'An Examination of the Objections urged against the Plan of Decimal Coinage proposed by the Royal Commissioners and by the Select Committee of the House of Commons,' by Charles Jellicoe, Esq.—The author commenced by stating that for the most part the objections had no real weight, or at least

they were founded on misconceptions. Thus it was proved, that labour would not be increased by the change, as was asserted; that no real embarrassment would arise from the cent and the mil not being aliquot parts of any present coins; that very simple arrangements might be made to obviate such inconveniences as would naturally arise during the transition state; that the notion of a revision and alteration being necessary of the taxation based on the penny, such as the Income-Tax and Customs rates, was utterly groundless. The author alluded to the smallness of the number of persons who had written in opposition to the Committee's plan; and to the fact that, on the other hand, it was recommended by a host of persons of the highest intelligence, amongst whom might be numbered some of the profoundest thinkers and men having the widest range of knowledge and experience of this or any other age; and he concluded by observing that with such a phalanx of ability as they represented, and after the length of time during which they had digested the proposed innovation and the unanimity with which they had joined in the recommendation of it, it was somewhat surprising that a government which had with the easiest nonchalance issued several coins nobody ever asked for, should look with such coyness on the small request now made, and so powerfully supported,—viz., that they would issue simply two more comparatively insignificant pieces to complete a system which they themselves had initiated, and which without such addition must remain altogether imperfect and abortive.—A protracted discussion followed, resulting in an almost unanimous expression of opinion in favour of the pound as the basis of a decimal system.

MEETINGS FOR THE ENSUING WEEK.

- Mon. Entomological, 8.
 Tues. Royal Institution, 2.—General Monthly Meeting.
 Institution of Civil Engineers, 8.—Renewed Discussion on Mr. Robinson's paper, "On the Application of the Screw Propeller to the larger Class of Sailing Vessels."
 Horticultural.
 Wed. Society of Arts, 8.—"The Diseases and Accidents of Miners," by Mr. Mackworth.
 Geological, 8.—"On the Comparative Geology of the Palæozoic Rocks of the Harz, the Thuringerwald, and other Parts of Europe," by Sir R. L. Murchison.
 Thurs. Zoological, 3.—General.

FINE ARTS

SOCIETY OF BRITISH ARTISTS.

THE Exhibition of the Society of British Artists opened on Monday. The walls present an average number of average works, and, we think, a fair proportion of pictures worthy attention.

Landscape stands higher in Suffolk Street than figure, and portrait is at a very low ebb. With originality we are not overburdened, and can generally predicate what each artist will produce. Mr. Pyne loves Italy, and Mr. Pettitt Wales.—Mr. Wilson, jun. rules the sea, and Mr. Boddington paints the land very pleasingly by rule. Of the young artists Mr. Rolt seems the most ambitious and the most promising. Mr. Darvell (a new name) has a Tennysonian subject, well painted, and with much mediæval and pre-Raphaelite feeling, but without any absurdity. Mr. Clint is dashing and careless; and Mr. Zeitter picturesquely to the bounds of obscurity. Mr. Woolmer is poetical and unreal, and appears this year with one of his most successful works. The minor artists are less meritorious than usual.

Mr. Woolmer is so charming in the scenes he gives as to make us long for more variety. His mannerism is not only too marked, but his colouring is fanciful and monotonous. We entreat him to paint with a more lavish palate, to remember Oriental depths of azure and crimson, and not to weary the eye with his cold, northern, yellowish greys and low-toned greens. What a world it would be if Mr. Woolmer had devised the sunsets with no richer flush than buff and Naples yellow! Could he not be less sketchy and more modelled, and tint less with dry crispness and more with juicy fullness? His fairy world has a cold March air about it; but we suppose we must bear these faults and be thankful for the real grace and poetry we get, for the originality and the idyllic feeling. Of all his pictures we like the *Den of Error* (No. 13) best. It has quite a Spenserian feeling about it, though perhaps more of a Pilgrim's Progress reality

—and this is Greatheart at the cave of the Giant Despair, who is gnashing his teeth in the twilight just out of sight. There is great mystery and terror about the cave,—and we already seem to follow the Knight in his perilous quest by the glow-worm flicker of the light upon his armour. The Lady watching on the bank clung over with brambles and flowers is graceful, but she is not looking towards the hero. We like the great Titanic, Druidical slabs of rock heaved against the sky, and the oak with its broad antlers and billowy, gnarled boughs. In this picture Mr. Woolmer's monotone of colour comes seasonably into play, and rather enhances the subject. His *Cymon and Iphigenia* (21) is one of his average studies of landscape with classical figures. We should be glad to see fewer pictures from his hand, and more of his hand in those fewer pictures. *The Sound in the Shell* (62) is the old story of a boy putting a shell to his ear, and told in no new manner.

Mr. Noble has an *Incident in the Shepherd and Shepherdess Time of Louis XIV.* (164),—an ambitious, large picture of the Leslie school. The story is this: during the reign of false sentiment, when operative shepherdesses with beribboned crooks sighed amid luxurious gardens for a rural peace which they had only heard of in the pompous novels of Mlle. Scudéry, the Countess de Lamballe gave a grand entertainment and private theatricals, at which a real shepherd was to appear driving real sheep. The "brebis de Paurge," alarmed at the babble of the company, leapt over a fence among them, and the rams seeing supposed enemies defying them from the looking-glasses dashed them to a thousand pieces. The subject requires the strength and humour of a Ward. Mr. Noble has given us little more than a clever sketch, well grouped, and gay and vivacious in its colour. But the figures are not half finished. The expression of the faces is slurred, and much opportunity for contrast is lost. In the detail there are many defects. No lamb could fly like a deer over a three-foot fence. The broken glass is heavy and opaque as slabs of ice. The best bits are the stupid, distracted shepherd scratching his head in perplexity, and the bleating sheep that puts his head over the railing. The scene is well chosen.

Mr. Buss's *Origin of the English Free Press* (58) is a clever sketch, but scarcely worth enlarging, being defective in character and deficient in truth of dress and feeling of the age. The subject is a village barber reading to his gossips the narrative of Elizabeth's procession to St. Paul's to return thanks for the defeat of the Armada. The barber is like a stage fool, who is always ten times more of a fool than any natural fool. There is no knowledge of the age in the picture, and the costumes are incongruous.

Mr. Hurlstone is as clever and sketchy as ever,—as pleasing in expression, but brown, smeary, and glutinous in colour. A beautiful boy's head is his *Neapolitan Fisher* (169), but we think more care and labour greater artists than even Mr. Hurlstone would have condescended to expend upon so large a canvas. The public do not care how long an artist is at his work,—all they want is perfection, or as near it as they can get.

Mr. Rolt shows much power and some high-toned feeling both in his head of *St. Paul* (399) and in his *Cordelia* (117). The former is so firmly painted and of so solemn a tone of colour that, though it be a mere study of a head, and shows little of the intellect of the gifted and learned apostle, it arrests the attention like a fragment of a high-art picture. In his 'Cordelia'—a very beautiful head—there is considerable pathos. We expect much from Mr. Rolt,—and hope that he will not be wanting in boldness of aspiration.

Among the new men, Mr. Darvell stands well in a careful and poetical *Lady of Shalott* (357). The accessories are well chosen, and have none of the flimsy insincerity of mere studio properties. The landscape seen through the magic glass wants tenderness and distance.—Though not quite in drawing, there is something minute in the finish and expression of Mr. Hallyar's faces in his *Teetotaller and Tippler* (482). The character of colour is almost too strongly marked, and gives the picture the appearance of being painted by two

hands.—Mr. Zeitter is clever and dashing as ever. Spots and smudges of pure colour give his works a meretricious air of self-confident mastery that has its attraction. He is eminently picturesque, and his figures are generally heaps of coloured shreds and flying rags. His most respectable men look beggars, and his beggars we do not know what. His *Hungarian Piper* (201) illustrates all his excellencies and all his defects.

Mr. Montaigne's *Good Samaritan* (97) is an ambitious, well-painted picture, of a rather raw tone. It hardly tells the story, and would do much better for a Dominican friar supplicating a man fresh from the Peruvian rack to repent. There are vigour and life about the whole, and yet the result is unsatisfactory. There is that something wanting which Wilson could only express by cracking his fingers. There is no compassion in the Samaritan's face, but rather the insane excitement of a vindictive bigot.—Mr. Powell's *Timidity* (370) is powerfully painted and is rich in colour; but his female figure is gross, and her expression unmeaning. About the whole there is an oily, glistening, lamp-light tone which seems like an effort to imitate the effect of time and London fog upon a Titian.

Mr. Cowie, in his *Brides of Venice* (420), is too palpably an imitator of Mr. Pickersgill, even to the colours of his caps and gowns, and to the character of his faces. With originality, his picture, as far as the female figures, would be good in colour and graceful in composition.—Mr. A. F. Patten's *Bridal of Andalla* (566) is a very pleasing realization of the old ballad of Zarifa and the golden cushion.

Mr. Buckner's best portrait is the (very) full-length of the *Duchess of Hamilton* (101); who is, according to the artist, nearly ten feet high. The face is very beautiful, but rather thin and feebly painted; and yet with an expression that would make us forget errors, if there were a thousand.

Mr. Pyne appears in full force this year, in all the originality of his singular manner. Bright and clear in colour, he is frequently flimsy and vapoury, and not always truthful. His *Evening at Chelsea* (108), though excellently painted and full of freshness and life, is, to our eyes, more Continental than English in character; and the *Tuffa Ravine at Sorrento* (136) is far inferior to his English scene. We give no credence to those pink wainscot cliffs to the right, and utterly disbelieve in the brown indistinctness of the foreground beneath.

Mr. Pettitt is, as usual, poetical and eccentric; but more elaborate in finish,—or rather, in the affectation of finish. He frequently shows evidence of want of taste, and seems to us to be a man rather straining to appear imaginative than really to be so. In this year's pictures, we have brown oily water, frothy scum, and heavy opaque bubbles till we cloy with them. His foliage is indistinct and vague, his boughs want massiveness, and his rocks are streaky and resemble chalk. His boldest flight is the *Fairies' Glen on the Conway* (175), on a midsummer's night. The moonlight is more fanciful than real.

Mr. Wilson, jun. has made a great stride this year. His water is sparkling, frothy, glistening, and foamy; and he promises to be in time the first sea-painter of the day. We know no one who conveys better the purity and freshness of summer air,—no one who conveys real distance with more beautiful truth, and yet with a truth dashed with poetry. His touch is rather dry and thin:—with more paint, and a bolder and fuller brush, his mechanism would delight as much as his feeling. In landscape, his *Water Mill* (44) is a perfect little gem, so dewy and sparkling that the sun is felt as it steals along the grass. *Off the South Coast of England* (92), and *Fishing Boats off Fécamp* (77), are perhaps his best examples in this Exhibition.

Mr. Clint is, we are sorry to say, careless and sometimes slovenly, trusting to dash and talent, and neglecting the good gifts with which he has been endowed. When we see broad tracts of hill literally smeared in, we are sure an artist is either in bad health, indifferent to his subject, pressed for time, or bent on the mere covering of saleable canvas. The *Evening near Ilfracomb* (28) displays

great power and great knowledge of Nature; but the result is a clever sketch,—not a picture that deserves perpetuity.

Mr. Boddington's best picture is, *Summer Morning on the Thames* (130); though even this is distinguished by that creamy opaqueness which constitutes this artist's mannerism. The picture is full of light and morning, and is pleasant and refreshing to the eye, though slurred and careless in detail.

Mr. West contributes more of his spirited and grand Norwegian scenes, which are neither better nor worse than usual. The figures in one of them are ill drawn. The *Sogne Fiord* (213) is a wonderful scene of rock and lake, grander than Switzerland as to lake, but inferior as to mountain. The pines, in these Titanic rocks, sink to mere bushes, and amongst them the smoke of waterfalls boils up as from witches' cauldrons. The sky of this picture wants air and softness, and is the hardest spot in the work.

Modest and not flaunting with green and gold into notice, but worthy attention for their thought and poetry, are Mr. Lear's two works—*The Calabrian Ravine* (214), and *The Devonshire Glen* (216),—companion pictures. A grand and epical feeling pervades both, and there are a dignity and terror about each that make us look upon them as creations. The one is a great, gloomy cleft of the hills, worn by rain, and unvisited by birds. The other, a pass, ramparted by dark rocks, with blue distances, down which the giants may have been driven when they fell from heaven,—Jove's bolts thundering and burning through their broken ranks.

PATRIOTIC FUND ART-EXHIBITION.

WORKS of charity it would be uncharitable to criticize severely. We will, therefore, only notice briefly those drawings of the Patriotic Exhibition which have either some interest, exclusive of their being works of Art, or those which demand attention as artistic performances. Considering that this effort of kindness must appeal, after all, to a limited class, it speaks well of our national kind feeling that nearly eight hundred drawings, sketches, statuettes, &c. should in a short time have been contributed to the "fund for the relief of the widows and orphans of British officers engaged in the war with Russia." Abounding, as might be expected of amateurs' works, in defects either of ignorance or inability, we have seldom felt more powerfully convinced of our growth in Art than when we looked round the walls of this Exhibition. We see a wider range of amateur subject, a bolder and more unshackled taste, greater technical power, and, above all, a wider diffusion of Art-education. When amateurs attain with such comparative ease to the level of the artists of twenty years ago, we feel sure that the artists of twenty years hence will have also progressed,—for though genius rises far above the multitude, it still is of great consequence that the multitude from which it springs should themselves be elevated above the race in general. Shakspeare rose, for instance, high above his contemporaries,—but it still heightens his greatness a thousand-fold to remember that his rivals were also great, and were themselves raised far above the great of many other ages. Our English tastes are conspicuous in this Exhibition; and the foreigner, without any very profound sagacity, might gather from it that we were a people who travelled much, who loved external nature, delighted in flowers, were deeply sympathizing in the war now raging,—that we were fond of the sea,—that we were imaginative and domestic people.

Great interest is, of course, felt in the five drawings by the Royal Family:—the *Knight* (No. 1), by the Prince of Wales,—*The Battle Field* (2), by the Princess Royal,—*Prince Hal* (3), by Prince Alfred,—*Prayer* (4), by the Princess Alice,—and the *Girl Asleep* (5), by the Princess Helena.—The best of these is undoubtedly 'The Battle Field,' by the Princess Royal. It represents a dead soldier, with a woman bending over him; the background is a red, autumn sunset, and has a solemn feeling full of repose. The picture is rich in colour, and the drawing careful and correct.—'Prayer,' by the Princess Alice, is a study of a praying figure; very

chaste and pure in feeling, and not unlike the manner of Mr. Dyce.—The 'Girl Asleep' is a pretty head of a sleeping child; and sleep is well expressed.—The 'Knight' and 'Prince Hal' are mere pen sketches, boldly drawn, but of less merit. All these sketches show an hereditary taste for Art which will, we hope, educate a race of enlightened patrons for artists yet to be born.—The Duchess of Gloucester's sketches (6, 7, &c.) of friars, gamekeepers, shepherds, and fishermen, though rather careless, are bold and spirited; and have a rough character far removed from the prevalent tameness and servility of amateurs.—Perhaps the most notable sketches in the room are Nos. 22 and 23, by a Lady of title. The *Camaldolese Monk* (22) is powerful in its light and shade.—Miss Blake's *Rest by the Wayside* (104) is very highly finished and excellent in expression. The head of the old man reminds us of Edie Ochiltree resting in the Antiquary's porch.—Miss Bostock's *Child's Head* (115) is firmly and skilfully painted.—The Countess of Clarendon's *Porch of the Cathedral at Ulm* (163) is a clever architectural sketch, free and artistic, and very delicate in colour.—Miss Colson's *Rocks at Cromer* (174) is warm and rich in tone, and full of Nature.—In a frame of Sketches by distinguished Artists (192), the *Deserter*, by Mr. W. Douglas, is worth observing from its original and imaginative character. The deserter is up to the arm-pits in water, half hid by reeds, and his pursuers stand in the distance, black against the white sky.—Mr. T. E. Gordon's *Etchings on the Rhine* (275) are free and truthful.—Among the more poetical landscapes is the Hon. C. Hardinge's *Ruins at Thebes* (294), deep toned, and excellent in keeping.—Miss Hasker's *Crypt* (316) is worthy of a mature artist.—Mr. A. Hughes contributes a Pre-Raphaelite sketch (345). It represents the soldier's return in the spring, embracing his wife and child.—Capt. Inglefield (348) furnishes a sketch of one of the shipwrecked vessels of the Spanish Armada. Though rather smooth and clean, his sketch has all that real sea truth and free touch that we generally see in marine sketches when executed by naval officers.—Miss Kirby has thrown much expression into her well-drawn *Italian Peasant Girl* (384).—Miss Paris's Welsh sketches (474, 475) have great breadth, and display singular perception both of the picturesque and the beautiful.—Mr. Townsend's *Dead Game* (663) is very commendable.—Mr. Wyndham's *Club-House at Gibraltar* (721) is excellently clear and lucid, but too cold in colour.—One of the most beautiful landscapes is, *A View in Wotton Wood* (526), by Mrs. R. Redgrave. It is an interesting trait of the times that one of the best photographs exhibited should be by a Lady.—We must not forget to mention an exquisite medallion, over the fireplace, by Mr. Munro, delicate in drawing, pure and classical in feeling, and subtly poetical in touch.

FINE-ART GOSSIP.—At the last meeting of the Literary Society of Jerusalem, Mr. Finn, the English Consul of Jerusalem, remarked that the old masters were correct in the blue and red dresses that they always gave to the Bethlehem peasantry, and which were still to be seen daily in the suburbs of the Holy City.

A collection of pictures, by living artists—and by some of the more recent illustrators of the English school—from the galleries of more than one proprietor, will be sold next week; including 'A View of Pastum,' a recent work by Mr. David Roberts,—'On the Danube,' by Mr. W. Müller,—'Crossing the Sands at Low Water,' by Mr. F. R. Lee,—'Coast Scene,' by Mr. C. Stanfield,—'Sherwood Forest,' by Mr. T. Creswick; the figures introduced by Mr. Ansdell,—'Wood Green,' by Mr. Linnell,—four examples of Mr. Sidney Cooper,—'A Roman Peasant Woman,' by Mr. T. Uwins,—'The Rescue,' by Mr. P. F. Poole,—'Nineveh,' a grand composition, by Martin,—'Children at Prayers,' by Mr. T. Webster,—and specimens of Messrs. F. Stone, C. R. Leslie, G. F. Herring, J. Phillip, W. P. Frith, E. W. Cooke, F. Danby, J. Sant, W. E. Frost, Etty, G. Lance,—'The Brides of Venice,' by Mr. J. R.

Herbert,—'The Scribes reading the Chronicles,' by Mr. H. O'Neil,—'Beilstein on the Moselle,' by Mr. J. D. Harding,—and some few others.

Two pictures have lately left the studios of Düsseldorf:—one of them ('Die Lorelei,' by Prof. Sohn) suggested by a popular German tradition, and the other ('Romeo und Julie,' by Prof. Köhler) owing its origin to Shakspeare's drama. Everybody knows the Saga of 'Lorelei,' the beautiful but nefarious water-fairy of the Rhine. Properly speaking, it is not a genuine national legend. Lorelei is a child of the glowing imagination of Clemens Brentano (the late brother of Frau Bettina von Arnim), who, some forty years ago, produced first his ballad of 'Lorelei,' giving by it a soul and a charm to the mighty rock of that name which presents itself to the eye of the traveller after having left, on his way southwards, the lake-like basin of St. Goar. Since then, almost every German poet of note has made the wicked river-fairy the theme of his songs,—most happily so Heinrich Heine, whose sweet and melodious stanzas are on the lips of every German. But it is not in the gorgeous light of the setting sun that Prof. Sohn (unlike the late Begas, whose picture of 'Lorelei' is almost a downright transcription of Heine's poem) has represented the fair sorceress. He shows us Lorelei in the grey tints of twilight; the rock is half-veiled by the deepening shadows—the moon is invisible—only one dim star stands over the head of Lorelei, whose fine and wanton figure, relieved by the double darkness of evening and drapery, leans over the edge of the precipice, and, with eyes of an almost fiendish expression, looks passionately down to the river. The figure is large and full, and of a perfect beauty. The arms are said to produce a peculiar life-like effect. They remind one, a Correspondent writes to us, of the Northern legend of that white-armed maiden who, stepping forth from the castle of her father, lighted up the darkness of the night by the snowy splendour of her white arms. Altogether, the picture makes a deep and fascinating impression on the beholder, and proves quite as attractive in its sombre and monotonous light as Prof. Köhler's 'Romeo und Julie' in the rich and splendid colouring which is at the command of that artist, and which he has lavishly bestowed upon this his latest work. He gives us the celebrated parting-scene on the balcony, pouring out over it the threefold light of the silvery moon, of the slowly-dawning morning, and of the last rays of the night lamp which has witnessed the raptures of the lovers. Both pictures are at present at Darmstadt, standing side by side in the studio of Prof. Felsing, the eminent engraver, who is about to reproduce them by his art, having almost completed already the plate of 'Lorelei.' Among those who admired the paintings in his atelier, we find also mentioned that august friend and protector of Art, King Ludwig of Bavaria.

MUSIC AND THE DRAMA

ST. MARTIN'S HALL.—Programme of Mr. ALFRED MEL-
LON'S FIRST CONCERT, MONDAY EVENING NEXT,
April 2, to commence at 8.—Part 1. Overture, 'Ruy Blas,' Men-
delssohn; Duett, 'Nolla Notte,' Meyerbeer; Fantasia (violin),
'Rigoletto,' first time. M. Sainton-Sainton; Scena, 'Ocean, thou
mighty monster,' Weber; Symphony, Pastoral, Beethoven.—
Part 2. Overture, 'Heloise' (first time), A. Mellon; Aria, 'Del
vieni,' Mozart; Andante and Rondo (pianoforte) in B minor, Mr.
Cusins, Mendelssohn; Aria, 'Largo al Factotum,' Rossini; Ove-
ture, 'Carnaval Romain,' Berlioz. Vocalists, Madame Clara
Novello and Herr Formes. Conductor, Mr. Mellon.—Stalls, 7s. 6d.;
Reserved Seats, 5s.; Galleries, 2s. 6d.; Area, 18s. Tickets to be had
of Messrs. Cramer & Beale, 201, Regent Street, and at St. Martin's
Hall.

CONCERTS.—"What a bad musical season!" is the cry. Mr. Addison's loungers in Regent Street take up the lament of Messrs. Cramer & Co.'s guests echo-wise. Yet, let us just enumerate what any strange amateur passing through London might have managed to hear betwixt Wednesday week and the day before yesterday. 'The Creation,' sung (we read) to a crowd at *St. Martin's Hall*,—Mendelssohn's 'Lobgesang' and Mozart's 'Requiem' at the last concert of the *Sacred Harmonic Society*,—the second *Old* and the second *New Philharmonic Concerts*,—the former including Beethoven's 'Choral Symphony,'—the latter, English music, in a selection from Mr. C. Horsley's 'Comus,'—the *Bishop Concert at Exeter Hall*,

—'The Messiah,' by the *Harmonic Union*, at the Hanover Square Rooms,—not to speak of *M. Billet's Soirée*, and of Mr. Ella's last *Winter Evening*, for those who prefer chamber-music. The cry and facts appear to be as diametrically at variance as cry and facts are apt to be. The latter establish that there is a public for music,—a public for novelty,—a public for native talent, in the fullest activity,—and, indeed, so ample and rich is the list, that the critic who is not a special reviewer, is tempted to reverse Burney's axiom, "*Praising all is praising none*,"—and to act, for common justice sake, as if "noticing none in detail were noticing all." It is necessary to reserve the *Philharmonic Concerts* for separate comment; but with regard to the other entertainments, the above enumeration must suffice.

PHILHARMONIC SOCIETY.—The *Second Concert*, comprising the overture to 'Der Freischütz' and Beethoven's 'Choral Symphony,' had possibly been arranged so as to give Herr Wagner full opportunity of displaying himself as a romantic conductor. It was to be perceived that the new comer's predilections lean towards music *alla fantasia*, from his handling of the *bâton* during the overture—which was *encored*—and the Symphony; and his reading may be credited with a certain coarse and overstrained enthusiasm. To impress this on the orchestra, that precision to which the band (with all its imperfections) had been wrought during later years, has been already sacrificed. A case of more discreditable scrambling through well-known music—period and place considered—is not in our recollection. The accompaniment, too, to Mendelssohn's *Violin Concerto*, played by Mr. Blagrove, was positively bad, in spite of the affectation of care given by the withdrawal of the *ripianti* instruments from the *solos*. In the dashing disrespect, however, with which this masterpiece of music was treated, Herr Wagner was self-consistent. He has, as a critic (unless we mistake) "finished up" Mendelssohn, having described him as a man "who, having nothing to say, said it elegantly." As a transcendental conductor—having nothing to do with such music—he did that nothing with due bustle and pretension.

Besides appearing as conductor and critic on Monday evening, Herr Wagner also produced himself as a composer. Some fragments from his last, and, we think, his best, opera were performed. On these we must dwell for a moment. The selection from 'Lohengrin' consisted of—1st. An instrumental introduction, musically describing "the *Saint Greal*, brought to this earth by a miraculous escort of angels";—2nd. The bridal procession, when *Lohengrin* weds *Alice of Brabant*;—3rd. The *entr'acte* to the third act (specified in our notice of the production of the opera at Weimar, *Athen*. No. 1194), and an epithalamium. So far as we can recollect, these are about the only movements (belonging to 'Lohengrin,' which is a long opera) in which there is even a pretext of melody,—as melody was understood before it was "emancipated" by these men of the future, and its existence asserted to be independent of form, rhythm or beauty.† In No. 1 the idea, if idea it be, recalls a phrase used by Weber in 'Euryanthe,' and another by Halévy, in his 'Guido.' This is dressed out by a division of the violins and the employment of them at the *altissimo* notes of the scale, so as to produce an impression of singularity rather than sublimity. Thus, also, M. Félicien David and (in his 'Atila') Signor Verdi have described dawn effects by the orchestra; thus M. Julien has, more than once, fitted out a sunrise, for one of his descriptive Quadrilles, previously to the bursting out, in all their glory, of

the orb of day and of the conductor's luminous smile. Employing a like principle, it would not be difficult to paint a night-picture or a descent of *Proserpine* into the lower regions, for any *maestro* who had courage to use the deepest notes of united *viola* and *violoncelli* for one hundred bars;—but (as the Irish Lady asked concerning the *Torso*) "where are the features?" The name of the *Saint Greal* and the angels, nearly as good as "the mobbed queen" in 'Hamlet,' and the length of such an unrelieved piece of monotony apparently impressed a part of the audience with the idea that the Introduction was celestial and new, and they applauded it accordingly. No. 2, to our thinking, which better merited favour, pleased less. In this wedding music, a certain dignity is to be recognized; though no tone of festivity, no bridal tone. Herr Wagner has, nevertheless, tried as hard for musical climax as though he was one of the wicked effect-makers on whose destruction he is bent—and to obtain it, he has used his voices as arbitrarily as the most conventional copyist of the Rossinian *crescendo*. On what principle of dramatic truth are all the female singers kept still so long, when a bride is in the case, merely that they may bring up the *cortège* with a few bars at last,—a sort of "trot for the avenue"? And yet, somehow, the climax comes to nothing. The magic cauldron bubbles, but does not boil. The effect, to attain which the writer has stooped so low, (trying him by his own canons) never arrives. In this music again, Herr Wagner's acute fancies of scoring give the ear more pain than pleasure.—No. 3, the *entr'acte* is (as we have heretofore said) the best page in the opera,—but the *Epithalamium*, as an accomplished musician remarked to us, is as petty and pretty a tune of short phrases, as if M. Adam had flung it off for the opera-wedding of some *Trianon Jocrisse* with some *Toinette of Marly*.—Dr. Liszt or Herr Wagner would be sadly puzzled to prove the propriety or truth of such a piece of common-place at nuptials so sublime, told by a poet so mystical in his meanings.—It is true, that the episodic strophe sung by eight ladies, "while the sumptuous robes of *Lohengrin* and *Alice* are taken off by their attendants," is symphonized by certain *pizzicati*,—and these may possibly represent the withdrawal of the diamond pins; but as a whole, the chorus is small to silliness—one which, had it been presented at a *Philharmonic Concert* as an extract from some old-new opera by Ricci or Coppola, could hardly have been allowed to pass. Herr Wagner, however, in his common-places "stands by his order." Those who have abused the melodious school of musical thinkers have always recurred to rhythm and melody whenever they could—and in this recurrence have often taken refuge in frivolity or dryness. Except, in short, for the stir which has been made in the matter, and the empiricism with which the music was recommended in the *programme*, these specimens of "composition for the future" would hardly have been worth a line of analysis for any intrinsic novelty or merit they possess. Compared with outlines so lean and with colours so exaggerated, what a treasury of rich, distinct, and various *motivi* seemed to be the *Choral Symphony*! There are thoughts, indeed!—there are melodies!—and it is because the first are so vigorous and the second are so hauntingly sweet that the Symphony is accepted;—and not because of the novelties of form contained in it, since these are not happy,—and not because of its evidence of purpose, since it is manifest, from the printed analysis of the composer's meaning (written by Herr Wagner in 1846, and translated, and circulated on Monday evening), that there is no amount of solemn bombast or of sentimental nonsense which may not be imputed to poor Beethoven on the occasion by the initiated, who can see in the clouds "whales or ouzels" as their distempered fancy pleaseth.

STANDARD.—On Saturday, the tragedy of 'The Duchess of Malfi' was introduced to the stage of this theatre. No other play of the same class has yet established itself on the boards. Horror is rightly a prohibited element, and ought not to be—

though it has been by careless critics—confounded with the Terror which, with Pity, is a legitimate attribute of the more severe and sublime drama. But, in mitigation, it is pleaded that old Webster has "touched the horror skilfully"; and the objectionable points, in the acting copy, have been still further reduced by the adapter of the tragedy, Mr. Horne. Neatly as all this has been accomplished, the unsophisticated audience of this ultra-popular theatre were not exactly prepared for the catastrophe, and showed their compassion for the awful fate of the heroine by manifesting their indignation at the atrocity of her murderers. However, they survived this feeling, and confessed audibly enough their appreciation of the tragic power which had produced but too strong an excitement. The tragedy has been mounted with great care; the scenery and costume are really excellent; and the acting is better fitted to the characters than it was in the more ambitious effort that preceded. Even Mr. Bradshaw was not exactly out of place in *Bossola*. Miss Glyn still acts the part of the *Duchess*, according to her original conception. The first scenes are light and airy;—the later ones slow and solemn. That the contrast thereby obtained makes the character the more acceptable to a mixed audience, there can be no doubt; and, indeed, on the present occasion, the sympathies in favour of her innocent gaiety were evidently secured in more than an ordinary degree. In noticing Mr. Marston's *Duke Ferdinand* for the first time, we must take the liberty of recommending to him the expediency of more minute detail in the working of the initial scenes. When the passion fairly sets in, he is remarkably powerful; and the moment of the accession of madness was fearfully depicted; as were also its more mature manifestations in the last act. We must add, that in the incident of the echo among the abbey ruins, supposed to be the voice of the deceased *Duchess*, advantage is taken of the allusion in the text to the sudden light among the trees to introduce the ghost of the assassinated lady slowly vanishing in the spiritual illumination. We suspect that Webster intended something of this;—and though ourselves inclined to a more ideal treatment, we cannot deny the effectiveness of the theatrical expedient. The house was overflowing; and, notwithstanding the excruciation of the feelings that had been experienced, the curtain fell to unanimous applause, and "the stars" were recalled before it to receive "assurance doubly sure" that "they and their tragedy" had succeeded.

MUSICAL AND DRAMATIC GOSSIP.—The *Bishop Concerts*, great and less, have been so successful, that Mr. Mitchell announces his intention of resuming them after Easter.

It is reported that the Lady who in her unmarried days was Miss Hawes intends to resume her career of oratorio and concert-singing.—Mr. Charles Braham is expected in London during the musical season,—also Signor Marchesi.

The Drury Lane Lenten season closed last Saturday. A day or two ere it closed the Lessee addressed his public on the occasion of his benefit, with especial reference to his crosses in the matter of 'L'Étoile.' Mr. Smith's speech was curiously at variance with the advertisements of the preceding fortnight. Those told of "hundreds nightly turned away from the doors." The oration complained of want of justice done to a spirited manager. In alluding to the criticisms of the press on the occasion as having damaged him, Mr. Smith answered one complaint with statements which will appear singular to calculators. Referring to the engagement of *solo* singers—his having been stigmatized as inferior—the manager said he had done the best he could, and alluded to the high terms of better vocalists than those of his *troupe* as among the difficulties which he had to encounter. Now, if, with nightly "overflows" and cheap singers, Mr. Smith found himself obliged to speak so drearily of his speculation, and to close his theatre a week ere Lent closed, what, may it be asked, would have been the result had M. Meyerbeer accepted Mr. Smith's five-hundred-

† That we may not be accused of caricaturing, when our purpose is to offer a fair picture, let us refer those who have any curiosity to examine further to two separate *Opera Airs* (as they are called) from the series now in publication by Messrs. Ewer:—one, No. 4, 'Vie Todesahnung,' from 'Tannhäuser,' the other, No. 5, 'Athmet du nicht mit mir,' from 'Lohengrin.' We have heard the former spoken of throughout 'Young Germany' (Dr. Liszt has written of it) as something equal to the best of Schubert's *Lieder*,—that is, to Schubert's 'Ave Maria,' 'Ständchen,' 'Ungeduld.' The pass at which tolerance and partisanship can arrive can hardly be more instructively tested than by verifying such a comparison.

guinea proposal, claimed his usual number of rehearsals, and made out his own cast? Among many explanations addressed to the public, under the assumption that said Public is a monster, from whose composition memory has been totally omitted, Mr. Smith's funeral elegy over 'L'Étoile' is one of the most curious. Let him be reminded that loss (if loss there has been) was not rushed into without warning:—'L'Étoile,' from the moment of its production in Paris, having been universally described as one of the most difficult operas to put on the stage ever produced.

The *Sacred Harmonic Society* is taking another step towards consolidating itself (if the Johnsonian verb may pass) by establishing a "Benevolent Fund" in aid of those who have been connected with it in a professional capacity, and who may stand in need of assistance. This is a considerate design, and we are glad to see that it has been already responded to in a manner promising permanence to the new benevolent establishment. But while we announce it, let us also warn all concerned against the formalities and accessories by which one institution of the kind after another has been rendered useless, its funds absorbed, and the motives of those concerned in its administration impugned. We trust that there will be the utmost simplicity in the statutes, the smallest amount of speechmaking over the distribution of the funds,—that beneficence will manage its work with as much secrecy as strictness,—without perpetually dining with itself, without hanging on its charities those compliments, social courtesies, and other agreeable abuses, for which, in reality, the recipients of the monies contributed have to pay. To assist and to befriend are a pleasure and a privilege such as ought to raise those practising Man's dearest duty above joberry and jollification.

We hear that the foreign opera talked of for Drury Lane is to be conducted (supposing the plan carried out) by Mr. Balfe. Madame Persiani is mentioned among the artists likely to appear there. So far as we can gather, Signor Baucardé has not kept his ground at Paris as *primo tenore*. His voice has grown uncertain, without its having been cultivated to that point of execution at which decay of physical power can be concealed.

Madame Goldschmidt has been munificent, after the old *Lind* fashion, in Holland; and has devoted the large proceeds from one of her concerts in Amsterdam to the sufferers under the late inundation.

We paraphrase, from the *Journal des Débats*, M. d'Ortigue's account of the Symphony, by M. Gounod, which was lately brought forward by the *Society of Young Artists*.—

This is the work of a master. The first *allegro*, in D major, is carried on spiritedly, without an introduction;—the second movement is an *andante*, in D minor, in which is to be found a delicious little fugue. The minuet is charming,—it is in F, if I recollect right, and the final *rondo* is full of vivacity and effect. * * In all, there is an abundance of ideas, freshness of imagination, clearness of line, unexpected details, and a science all the more consummate because it is capitally disguised beneath a light and brilliant veil.

—M. d'Ortigue further commends this Symphony, —avowedly written for a young society,—for the comparative simplicity of the means employed. We note his praise for the benefit of all who confound progress and novelty with exaggeration, and who forget that in Music this has not been the law. Long after Beethoven's Ninth Symphony, and *Missa Solennis*, and Posthumous Quartetts were written came Mendelssohn's Symphonies, and Oratorios, and Quartetts; and these can get a hearing and keep favour, though the amount of genius exhibited in them be smaller—though their style be less pretending and their executive claims less difficult than Beethoven's.

We are told that M. Biletta, whose "White Magic" produced so agreeable an impression of his power as a dramatic composer in London, is engaged on a work for the *Grand Opéra* of Paris,—and that M. Schimon, who also passed some seasons here as professor and accompanist, is at work for the *Théâtre Lyrique*.

An anecdote from a paper by M. de Varennes in the *Revue Française* throws too pleasant a light on one of the greatest artists who ever trod the

stage to be concealed. We offer it in a compressed form:—

On the day of Mlle. Rachel's *début* at the *Théâtre Français* as *Camille* in 'Les Horaces,' after she had appeared in secondary parts elsewhere, without exciting much attention, I met [says M. Varennes] Mlle. Mars. "Ah!" said she to me, "did you know that we have a *début* this evening?"—"Yes, but they say that the new comer is nothing extraordinary."—"On the contrary, people competent to judge tell me that she is full of promise. Come with me to see her." * * We were three in her box, the third being a young gentleman who, possibly with the view of paying court to Mlle. Mars, was disposed throughout the evening to be very critical on the young actress. When *Camille* entered, Mlle. Mars observed her closely; then, half turning to me, with a slight smile, and approving motion of the head, said, "She walks well." This was praise worth having, as coming from Mars.—*Sabine* has to address some words to *Camille* when the latter is entering. Mlle. Rachel had not opened her mouth, when Mlle. Mars turned to me with a yet more cordial smile. "She listens well" was now the praise. * * *Camille* began to reply; she had not been heard for many instants when Mlle. Mars exclaimed, with an air of satisfaction I shall never forget, "Ah! she does not declaim; she speaks." When at last came the famous imprecation,—

Rome, l'unique objet de mon ressentiment—

Rome, enfin, que je hais, parce qu'elle t'honore,—

in place of venting one of those classic bursts of voice which traditionally "brought the house down," the young tragedian, whether from fatigue or settled purpose, delivered the verses with a dull, dogged, concentrated passion; and the public, not used to the reading, failed to applaud "the point."—"Well!" said our young gentleman, "there's no power here! She has pitched the part too low."—"But, sir," exclaimed Mlle. Mars, turning round impatiently, with an air of almost irritation, "Give her time to get power, then! Are you afraid that she will not get older? That girl will grow while she is acting."

The above, we repeat, is pleasant, precisely because it is not according to the stage-pattern of *Rosalinda*'s greeting to *Stutira*. All actresses, however, are not (as we remarked when dealing with Madame de Beauvoir's flimsy book concerning this very Mars) such greedy, jealous, illiterate creatures as those who would reduce the art to a mere sensual excitement have delighted contemptuously to describe them. M. de Varennes's anecdote reminds us of the farewell of a *Stutira* to a *Rosalinda* for which we can vouch. This was the remark of a great operatic *artiste* on the last performance of Madame Pasta, when that Lady appeared, a few years since, at *Her Majesty's Theatre* for one night. The speaker had never before heard and never seen the "*Medea* of other days"; but hardly had Madame Pasta sang a dozen bars, than, turning eagerly, with tears in her eyes, Madame — exclaimed, "You are right. She is like the *Cenacolo* at Milan! There is nothing left of the picture; yet it is still the greatest picture in the world!"

Mr. C. Mathews has publicly announced his secession from the management of the Lyceum, and from all management, "at once, and for ever." Our readers will do us credit to remember, that we have traced the decline of such management step by step, and from time to time assigned its proximate causes. The result confirms the opinion that the custom of living on the *vaudeville* productions of a foreign stage is one not only "more honoured in the breach than the observance," but must ultimately prove ruinous to the conduct of a large and important theatre. The public may not loudly express its dissatisfaction with being thus systematically cheated of nationality and originality in new pieces;—but the audiences gradually diminish, and out-of-doors an influence gradually gathers which induces conscientious and well-informed individuals to stay away. They wait for the report in the morning paper, and having read it, exclaim—"Another French piece! We are tired of French pieces! Can't we have something English?" And in this way the dishonest practice has died out. Want of capital is pleaded by Mr. C. Mathews in extenuation of his failure; and to the same want may be traced the managerial preference for translations. They cost less than first-rate productions procured first-hand from living authors; sometimes cost nothing but the manual labour of the manager himself in transferring them from one language into another. "Why," once said a manager in our hearing, "should I give four hundred pounds for an original five-act play, when I can get for some fifty pounds a translated melo-drama, that will run two hundred nights?" This intimates what is the true state of the question;—it remains

with the English public to decide whether they will be the victims of such parsimony or impecuniosity? We read their answer in part in the present failure, and entertain no fear of the final response in full. "The English stage for English genius" is the decree of justice; and ultimately the English public will see it executed.

MISCELLANEA

Scott's Signature.—"It would appear that Sir Walter Scott sometimes signed his initials *only*, though the occasions must have been extremely rare; since Mr. Skene, who was in almost daily communication with him for forty years, never saw an example. Mr. Robert Cole has one in his rich collection of autographs, but it is only a scrap of four or five lines, sent from his house in Edinburgh to the hotel of his familiar friend and favourite, Mr. William Scrope; and I feel confident that he never thus abbreviated his name when addressing Mr. W. Spencer, to whom his letters were very 'few and far between.' Yet as I observe that the *pseudo* "Waverley Novel," 'Moreduin,' is advertised for immediate publication, I think it right the public should know that brevity is far from being the chief objection to the genuineness of the signature in question. In the tracing of the *contrafeçon* which was shown to me, these immortal initials are written in imitation of PRINTED letters (W. S.); a mode of signature which you may be perfectly certain Sir Walter Scott never used on any occasion. I remain, &c.

"GEORGE HUNTLY GORDON."

Chouse.—Leipsic, March 16.—The passage you quoted in your last number from Trench's 'English Past and Present,' may well serve as a caution to etymologists, who are too often led astray by a mere resemblance of letters. Even Mr. Webster is not free from this fault. On referring to his Dictionary you will find that, not knowing what to do with the word "chouse," coming as it does "in such a questionable shape," and unable to trace it to any root of the Indo-European family, he straightway takes us into the region of the Semitic languages, and sets up in array a number of words having about as much connexion with the word whose root he wants to trace as the man in the moon. A pity it is that, standing on Oriental ground, Webster should, in this instance, have entirely overlooked the Turkish language,—here, as Mr. Trench shows, the one thing needful, for he would then at least have perceived himself to be on the wrong track. He might very probably have been puzzled at the discovery that the English meaning of the word differs so widely from the Turkish, as it does not necessarily follow, though it may occasionally happen, that an interpreter is a cheat; but at least we should have been spared the pain of seeing a man like Webster proceed in so unscientific a manner as is here exhibited. For neither the Arabic nor the Ethiopian has any affinity with the word in question; they are both identical with the Hebrew כָּזַב (*Kasab*, to lie, deny), and no analogy warrants Webster to assume that the last letter of the root was dropped on its transmigration into the English language. It, however, has the merit of confirming Mr. Trench's statement, the first authority he quotes being 'Hudibras.' This leads to the supposition that Butler, who lived so close to the time when the great fraud was practised by the Turkish interpreter, may have been the first of the great writers of the age to lay hold of the foreign importation for his burlesque; and by his authority to stamp it for ever as a genuine coin of the realm.—Your insertion of the above in your valuable columns will greatly oblige. Yours, &c.,

DR. D. ASHER.

Official English.—"The schoolmaster is said to be abroad; if so, he had better come home as soon as possible. The Committee of Council on Education, in requesting certain returns from the managers of parish-schools, have issued a short circular (signed, R. W. Lingin) in which occur two grammatical errors,—one a violation of orthography, the other of construction. Here they are:—1. 'The annexed fly-leaf should then be detached.' 2. 'Add a cross to the name of every such master or mistress who has been an apprentice.' Is not the Schoolmaster wanted at head-quarters?" "KAW."

TO CORRESPONDENTS.—C. B. C.—D. C.—P. L.—W. B.—A. A.—F. T. V.—J. W.—P. P., M.D.—received.

For the convenience of Subscribers residing in remote places, the weekly numbers are reissued in Monthly Parts, stitched in a wrapper, and forwarded with the Magazines.—Subscriptions for the Stamped Edition for the Continent, for not less than Three Months, and in advance, are received at BAUDRY'S LIBRARY, 3, Quai Malaquais, Paris, or at the Publishing Office, 14, Wellington Street North, Strand, London. For France and other Countries not requiring the postage to be paid in London, 2s. 6d. or 1l. 2s. the year. To other Countries, the postage in addition.

MR. CHURCHILL'S PUBLICATIONS.

NEW BURLINGTON-STREET.

Now ready at all the Libraries, in 3 vols.

MISS JEWSBURY'S NEW NOVEL, CONSTANCE HERBERT.

From THE ATHENÆUM.—“‘Constance Herbert’ is a poem in its beauty and its lofty purpose—a romance in its variety and fascination. The tale, as a tale, is deeply interesting,—full of quiet pathos, and a calm and beautiful morality. ‘Constance Herbert’ will be read with pleasure and remembered with healthful interest.”

From THE MESSENGER.—“Miss Jewsbury may be said to occupy the same place in the present time which Miss Austen held in the past.”

From THE GLOBE.—“No one can read this book without being the better for its noble teaching.”

Also, now ready, in 3 vols.

THE WIFE'S TRIALS. A NOVEL.

HURST & BLACKETT, Publishers, Successors to Henry Colburn, 13, Great Marlborough-street.

Mr. KINGSLEY'S NEW HISTORICAL NOVEL.

This day is published, 3 vols. post 8vo. 31s. 6d.

WESTWARD HO!

OR,

THE VOYAGES AND ADVENTURES OF SIR AMYAS LEIGH, KNIGHT,

Of Burrough, in the County of Devon,

IN THE REIGN OF HER MOST GLORIOUS MAJESTY QUEEN ELIZABETH.

Rendered into Modern English by CHARLES KINGSLEY.

Cambridge: MACMILLAN & Co. London: BELL & DALDY, 186, Fleet-street.

MR. NEWBY'S NEW PUBLICATIONS.

MEMOIRS OF THE COUNTESS OF BLESSINGTON.

The Editor of this Work would beg to call the attention of the readers of the *Athenæum* to the announcement of a SECOND EDITION of the MEMOIRS, now preparing for publication, and would earnestly solicit any aid that might kindly be given to his undertaking by the use of any correspondence of Lady Blessington adapted for it; and he would at the same time beg to express his grateful sense of the services rendered by the many eminent and distinguished persons who, by similar communications of letters connected with the subject of this work, have contributed so largely to its success.

30, Welbeck-street, Cavendish-square, March 22, 1855.

In 1 vol. price 10s. 6d. with Coloured Illustrations,

NINE YEARS' RESIDENCE IN RUSSIA, FROM 1845 to 1854;

With Notices and Original Anecdotes of the Tzars NICOLAS and ALEXANDER II.

By R. HARRISON, Esq.

Contents:—The Journey—Moojiks or Peasants—Svestcheunik or Priest—Pameshtchik or Landowner—Chinovnik or Civil Functionary—The Military Man—The Tzar, &c. &c.

THE MOST POPULAR NEW NOVELS.

In 3 vols. 31s. 6d.

LOVE versus LAW;

Or, The DECEASED WIFE'S SISTER.

By JOSEPH MIDDLETON, Esq. Barrister-at-Law.

In 3 vols. 31s. 6d.

THE WARHAWK.

By the AUTHOR of ‘THE TWO MIDSHIPMEN.’

“It opens with a bit that might pass for Scott.”

“It is full of incidents, and moving accidents. Those who love Cooper's and James's novels will gladly read ‘The Warhawk.’”—*The Globe*.

“It is intensely interesting and exciting.”—*The Sun*.

In 3 vols. 31s. 6d. (this day),

THE STORY OF A NUN.

By Mrs. CRAWFORD.

In 3 vols. 31s. 6d. (this day),

THE DWARF;

Or, MIND and MATTER.

In 3 vols. 31s. 6d.

MARRIED WOMEN.

By the AUTHOR of ‘BROOMHILL.’

“It is well written, and full of attractions and charms.”

“It should be read by every married woman and every spinster. It will instruct by its moral and interest by its story.”—*Herald*.

In 3 vols. 31s. 6d.

THE QUICKSANDS OF FASHION.

By the AUTHOR of ‘TREACHERY.’

“It exhibits unusual traits of excellence. Pictures of fashionable life, full of animation and reality, abound.”

“It should be read and laid to heart by those who enter into the vortex of fashionable life.”—*Evening Post*.

Now ready, Gratis and Post Free,

A LIST of SURPLUS COPIES of RECENT WORKS withdrawn from MUDIE'S SELECT LIBRARY, and offered at greatly reduced prices for cash.

CHARLES EDWARD MUDIE, 510, New Oxford-street, London, and 76, Cross-street, Manchester.

Handsomely Bound in Cloth,*

ORR'S CIRCLE OF THE SCIENCES:

A SERIES OF TREATISES

ON THE FUNDAMENTAL PRINCIPLES AND PRACTICAL APPLICATIONS OF SCIENTIFIC KNOWLEDGE.

WITH NUMEROUS ILLUSTRATIVE ENGRAVINGS ON WOOD.

THE FOLLOWING SUBJECTS ARE ALREADY COMPLETED, AND MAY BE HAD, STITCHED IN AN ORNAMENTAL WRAPPER, OR IN CLOTH, AT THE PRICES QUOTED:—

PHYSIOLOGY of ANIMAL and VEGETABLE LIFE. By Dr. BUSHNAN. Price 1s. sewed; 1s. 6d. cloth.

SIMPLE ARITHMETIC and its APPLICATIONS. By J. R. YOUNG, late Professor of Mathematics at Queen's College, Belfast. Price 6d. sewed; 9d. cloth.

THE PRINCIPAL FORMS of the SKELETON and the TEETH, as the Basis for a System of Natural History and Comparative Anatomy. By Professor OWEN. Price 1s. sewed; 1s. 6d. cloth.

GEOLOGICAL SCIENCE: including Practical Geology and the Elements of Physical Geography. By Professor ANSTED. Price 2s. sewed; 2s. 6d. cloth.

VARIETIES of the HUMAN SPECIES, introductory to the Study of History. By R. G. LATHAM, M.D. F.R.S. Price 9d. sewed; 1s. cloth.

ELEMENTS of ALGEBRA; with Definitions and Explanations of its Principles. By Professor YOUNG. Price 9d. sewed; 1s. cloth.

ON SERIES and LOGARITHMS. By the Rev. J. F. TWISDEN, M.A., late Scholar of Trinity College, Cambridge, and Mathematical Professor, Sandhurst College. Price 6d. sewed; 9d. cloth.

PLANE GEOMETRY, founded on the First Four and Sixth Books of Euclid's Elements; with a Treatise on Proportion, as a substitute for the Fifth Book. By Professor YOUNG. Price 1s. sewed; 1s. 6d. cloth.

ON PLANE and SPHERICAL TRIGONOMETRY: a Treatise on Planes and Spherical Geometry. By the Rev. J. F. TWISDEN, M.A., late Scholar of Trinity College, Cambridge. Price 1s. sewed; 1s. 6d. cloth.

MENSURATION, or PRACTICAL APPLICATIONS of GEOMETRY and TRIGONOMETRY. By the Rev. J. F. TWISDEN, M.A. Price 6d. sewed; 9d. cloth.

PRACTICAL GEOMETRY; being a Solution of the Problems most useful to the Practical Draughtsman. By ALEXANDER JARDINE, Civil Engineer. Price 6d. sewed; 9d. cloth.

STRUCTURAL and SYSTEMATIC BOTANY; with numerous Microscopic and other Illustrations. By EDWARD SMITH, M.D. LL.B. Price 1s. 6d. sewed; 2s. cloth.

NATURAL HISTORY of INVERTEBRATED ANIMALS. By W. S. DALLAS, F.L.S.

CRYSTALLOGRAPHY and MINERALOGY. By the Rev. W. MITCHELL, M.A., and Professor TENNANT, King's College.

THE completion of the above Treatises marks an epoch in this undertaking which the Conductors venture to think will justify them in an appeal to those among their fellow-citizens who are interested in the promotion of sound scientific knowledge. To CLERGYMEN, SCHOOLMASTERS, and DIRECTORS of INSTITUTIONS for Adult Education and for Self-instruction more especially, they would point out the existence of a Work, recommended at once by the names of the eminent men who have contributed to its pages, and by the very moderate price at which it is published.

In the CIRCLE OF THE SCIENCES it has been the aim of the Conductors to have every subject treated in a philosophic spirit; not merely reproduced abridgments of larger Works or dry details of Art Processes, but a series of Treatises exhibiting the fundamental principles on which each branch of Science is based. It will probably be admitted that they have taken the best means of attaining their object when the names of Professor OWEN, Dr. LATHAM, Professors YOUNG and TWISDEN, Professor TENNANT, the Rev. WALTER MITCHELL, and Professor ANSTED are given as the writers of the Treatises already completed, or on the point of completion.

Amid so great a variety of subjects as the Work embraces, there are some which must involve references to the very foundations of philosophic speculation. It is proper, therefore, to indicate the path which, in this respect, will be pursued. In treating of Physical Science, and the various phenomena by which the subject is illustrated, these Treatises will indicate the Baconian rule, that nothing in the phenomena themselves but uniform law is discoverable; but they will sedulously maintain the doctrine—without, however, going out of their path to do so—that Nature does manifest the existence of a Law Giver as well as a Law—of a personal Omnipotence superior to law—of a Creator who made the universe by His Fiat and maintains it by His Power.

The Volumes of the Series already completed, price 4s. 6d. each, cloth lettered, are as follows:—

ORGANIC NATURE, Vols. I. & II. | The MATHEMATICAL SCIENCES.
INORGANIC NATURE.

THE SUBJECTS NOW IN COURSE OF PUBLICATION ARE AS FOLLOWS:—

THE NATURAL HISTORY of MECHANICAL PHILOSOPHY. By VERTEBRATED ANIMALS. By W. S. DALLAS, the Rev. W. MITCHELL and ROBERT SCOTT BURN, Esq.

THE CHEMISTRY OF IMPONDERABLE BODIES.

London: WM. S. ORR & CO. Amen-corner, Paternoster-row.

MRS. LOUDON'S LADIES' FLOWER GARDEN.

ORNAMENTAL ANNUALS,
4to. cloth, price 1l. 15s.

ORNAMENTAL PERENNIALS,
4to. cloth, price 3l.

**ORNAMENTAL BULBOUS
PLANTS,**
4to. cloth, price 2l. 2s.

**ORNAMENTAL GREENHOUSE
PLANTS,**
4to. cloth, price 1l. 11s. 6d.

EACH SUBJECT FORMING A SEPARATE AND
INDEPENDENT VOLUME.

THIS series of works on Floriculture, though ranged in a consecutive form, is essentially distinct, and only presents to the reader the most *Ornamental Flowers*, which are described and illustrated in coloured groups.

Each Work being arranged according to the natural system, the whole series forms a comprehensive illustration of the different orders of Plants, which not only affords a general idea of their arrangement, but greatly facilitates the study of Botany.

The authoress, in addressing her readers, especially those of the gentler sex, judiciously remarks:—"The love of flowers is calculated to improve our best feelings, and subdue our bad ones; and we can hardly contemplate the beauty and richness of a flower-garden without feeling our hearts dilate with gratitude to that Almighty Being who has made all these lovely blossoms, and given them to us for our use."

Lithographed and richly-coloured Plates of about a thousand ornamental flowers illustrate the volumes, which are accompanied with a Glossary of botanic terms, an alphabetical List of the Authorities quoted, and a copious Index.

BRITISH WILD FLOWERS.

BY MRS. LOUDON.

"Ye Field Flowers! the gardens eclipse you, 'tis true;
Yet, wildings of Nature, I dote upon you;
For ye waft me to summers of old,
When the earth teemed around me with fairy delight,
And when daisies and buttercups gladdened my sight,
Like treasures of silver and gold."—CAMPELLE.

UNIFORM with the above. This volume is descriptive of British Wild Flowers. The object of the authoress has been to enable the uninstructed reader to ascertain the name, and some particulars respecting the genera, of any pretty flower picked up; therefore the volume will be found highly useful to those who have neither time nor opportunity to consult the larger works on the subject.

The volume is illustrated with sixty Plates, representing upwards of three hundred carefully drawn and highly coloured figures of the rarest ornamental wild flowers; and a copious Index completes the general attraction and utility of the work.

TO MEMBERS OF THE LEGAL PROFESSION.
COMMON LAW AND EQUITY REPORTS.
 PUBLISHED MONTHLY.
 With a view to extend the usefulness of the Work, the Proprietors have resolved upon adding two Divisions to their Series of Reports,—the one consisting of all the Cases applicable to the Practice of the QUARTER SESSIONS and COUNTY COURTS; the other, the LEADING STATUTES passed during the Session, together with full Abstracts of the less important Titles, Alphabetical Indexes, &c. In compliance also with numerous and urgent applications, they have decided upon receiving separate subscriptions for each division of the Series. The Annual Subscriptions, therefore, in future, will be as follows:—
 ENTIRE SERIES (with Leading Statutes) £4 4 0
 THE REPORTS (without Statutes) 3 3 0
 COMMON LAW 2 2 0
 EQUITY 2 2 0
 BANKRUPTCY AND INSOLVENCY 1 1 0
 ECCLESIASTICAL & ADMIRALTY (with Prize Court) 1 1 0
 SESSIONS AND COUNTY COURT CASES, &c. .. 1 1 0
 LEADING STATUTES (Authorized Edition) .. 1 1 0
 Subscriptions received, by Post or otherwise, by
 A. & G. A. Spottiswoode, New-street-square, London.

 Instruction in all the processes.
 Catalogues sent upon application.

BLAND & LONG, Opticians, Photographical Instrument Makers and Operative Chemists, 153, Fleet-street, London.

XYLO-IODIDE of SILVER, exclusively used at all the Photographic Establishments.—The superiority of this preparation is now universally acknowledged. Testimonials from the best Photographers and principal scientific men of the day, warrant the assertion, that hitherto no preparation has been discovered which produces uniformly such perfect pictures, combined with the greatest rapidity of action. In all cases where a quantity is required, the two solutions may be had at Wholesale price in separate Bottles, in which state it may be kept for years, and exported to any climate. Full instructions for use.
 Each bottle is stamped with a Red Label bearing my name, RICHARD W. THOMAS, Chemist, 10, Pall Mall, to counterfeit which is felony.

CYANOGEN SOAP, for REMOVING all kinds of PHOTOGRAPHIC STAINS. The genuine is made only by the inventor, and is secured with a red label bearing his signature and address, RICHARD W. THOMAS, CHEMIST, 10, PALL MALL. Manufacturer of pure Photographic Chemicals: and may be procured of all respectable Chemists, in Pots, at 1s., 2s., and 3s. 6d. each, through Messrs. Edwards, 67, St. Paul's Church-yard, and Messrs. Barclay & Co. 95, Farringdon-street, Wholesale Agents.

PHOTOGRAPHIC CAMERAS of EVERY DESCRIPTION CAN BE HAD AT OTTEWILL & MORGAN'S MANUFACTORY, 24 and 25, Charlotte-terrace, Caledonian-road, Islington.—OTTEWILL'S REGISTERED DOUBLE-BODY FOLDING CAMERA, adapted for Landscapes or Portraits, may be had of A. Ross, Featherstone-buildings, Holborn, Photographic Institution, Bond-street, and at the Manufactory as above; where every description of Cameras, Slides, and Tripods may be had.—The Trade supplied.

THE IODIZED COLLODION, manufactured by J. B. HOOKIN & CO. 899, STRAND, LONDON, still remains unequalled for *sensitiveness and density of Negative—exceeds all others* in its keeping qualities and uniformity of constitution.—Albumenized Paper, 17s. by 11, 5s. per quire; Waxed ditto, 7s., of very superior quality.—Double Achromatic Lenses, *equal in all points* to those of any other manufacturer: Quarter Plate, 2l. 2s.; Half Plate, 3l.; Whole, 10l.—Apparatus and pure Chemicals of all descriptions.
 Just published, "PRACTICAL HINTS on PHOTOGRAPHY," by J. B. HOOKIN. 3rd edition, price 1s.; per post, 1s. 4d.

BANK of DEPOSIT,
 NATIONAL ASSURANCE and INVESTMENT ASSOCIATION,
 No. 3, PALL MALL EAST, LONDON.
 Established A.D. 1844.
 Empowered by Special Act of Parliament.
 Parties desirous of INVESTING MONEY are requested to examine the plan of this Institution, by which a high rate of interest may be obtained with perfect security.
 The Interest is payable in January and July at the Head Office in London; and may also be received at the various Branches, or through country bankers, without delay or expense.
 PETER MORRISON, Managing Director.
 Prospectuses and Forms for opening Accounts sent free on application.

NEW AND PECULIAR SYSTEM of LIFE ASSURANCE.
THE Directors of the NATIONAL ASSURANCE and INVESTMENT ASSOCIATION invite attention to the New System of Life Assurance exclusively adopted by this Association—viz. that of allowing the assured to receive, by instalment, per annum on all Premiums paid, instead of the remote and uncertain system of Bonuses usually adopted.
 By this plan, the Policyholder will secure to himself a constantly increasing annual income during life, as well as the payment of the sum assured to his representatives at his death.
 Tables of Rates specially adapted to this system of Assurance may be obtained at the Office of the Company, 3, Pall Mall East, or forwarded free, on application.
 March 1, 1855. PETER MORRISON, Managing Director.

ST. GEORGE ASSURANCE COMPANY,
 118, PALL MALL, London.
 Chairman—Viscount RANELAGH, Park-place, St. James's.
 Deputy-Chairman—HENRY POWNALL, Esq., Ladbroke-square, Notting Hill.
 Indisputable Policies, Annuities and Provision for Families and Children on the most favourable terms. Unmarketable titles assured.
 Loans granted on a new and liberal principle.
 For further particulars apply at the Office as above.
 W. C. URQUHART, Secretary.

SUN LIFE ASSURANCE SOCIETY, LONDON.

SHARE OF PROFIT INCREASED FROM ONE-HALF TO FOUR-FIFTHS.

Policies effected with this Society now will participate in FOUR-FIFTHS of the Net Profits of the Society, according to the conditions contained in the Society's Prospectus.

The Premiums required by this Society for insuring young lives are lower than in many other established offices, and Insurers are fully protected from all risk by an ample guarantee fund in addition to the accumulated funds derived from the investments of Premiums.

Policy Stamps paid by the Office.
Prospectuses may be obtained at the Office in Threadneedle-street, London, or of any of the Agents of the Society.
CHARLES HENRY LIDDELL, Actuary.

SUN FIRE OFFICE, Established 1710, 40, Wigmore-street, Cavendish-square, London.

Managers.
William R. Hamilton, Esq. *Chairman and Treasurer.*
Charles Bell Ford, Esq. *Deputy-Chairman.*

The Right Hon. William Fox, M.P.
Hon. P. Pleydell Bouverie.

John Drummond, Esq.
Russell Ellice, Esq.
William Franks, Esq.
Capt. H. G. Hamilton, R.N.
Joseph Hoare, Esq.
Sir J. Weir Hogg, Bart. M.P.

All persons insured in this Office, the Premiums on whose Policies fall due at the Lady-Day Division, are hereby reminded to pay the said Premiums, either at the Offices in Threadneedle-street; Craig's-court, Charing-cross; at No. 40, Wigmore-street, Cavendish-square; or to the Agents in the County, on or before the 9th day of April, 1855, when the fifteen days, allowed by the Office, over and above the time for which they are insured will expire.

Insurances may be made for more years than one by a single payment, and in such cases there will be a discount allowed on the premium and duty for every year except the first.

RATES OF PREMIUM.

First Class.	Second Class.	Third Class.
1s. 6d. per cent.	2s. 6d. per cent.	4s. 6d. per cent.

Farming Stock may now be insured at 3s. per Cent. if covered to a fair value, and situate in a district free from Incendiarism.
This Office insures Property in Foreign Countries, and the Rates are regulated by the nature of the risks.
The Duty paid to Government by the Sun Fire Office in 1853, amounted to 135,544.

THE YORKSHIRE FIRE AND LIFE INSURANCE COMPANY.

Established at York, 1824, and Empowered by Act of Parliament.
CAPITAL, 500,000.

LIFE DEPARTMENT.—Under the provisions of an Act of Parliament, this Company now offers to future Insurers Four-fifths of the Profits, with Quinquennial Division, or a Low Rate of Premium, without participation of Profits.

The next division of Profits will be declared in June, 1855, when all Participating Policies which shall have subsisted at least one year at Christmas, will be allowed to share in the Profits.

At the several past Divisions of Profits made by this Company, the Reversionary Bonuses added to the Policies from One-Half the Profits amounted, on an average of the different ages, to about one per cent. per Annum on the sums insured, and the total Bonuses added at the four Septennial Divisions exceeded 700,000.

FOREIGN RISKS.—The Extra Premiums required for the East and West Indies, the British Colonies, and the northern parts of the United States of America, have been materially reduced.

INVALID LIVES.—Persons who are not in such sound health as would enable them to insure their Lives at the Tabular Premiums may have their Lives insured at Extra Premiums.

LOANS granted on life policies to the extent of their values, provided such policies shall have been effected a sufficient time to have attained in each case a value not under 500.

ASSIGNMENTS OF POLICIES.—Written Notices of, received and registered.

Medical Fees paid by the Company, and no charge will be made for Policy Stamps.

NOTICE IS HEREBY GIVEN. That Fire Policies which expire at Lady-Day must be renewed within fifteen days at this Office, or with Mr. SAMS, No. 1, St. James's-street, corner of Pall Mall; or with the Company's Agents throughout the Kingdom, otherwise they become void.

Losses caused by Explosion of Gas are admitted by this Company.

THE LIVERPOOL AND LONDON FIRE and LIFE INSURANCE COMPANY.

Capital, 7,500,000. Established in 1800.

Abstract of the REPORT of the Directors for 1854:—

"The number of Policies issued during the year. 1854.	1,302
Assuring the sum of.	£583,074 0 0
Annual Premiums thereon.	19,624 8 8
Policies issued from the commencement of the Institution in December, 1845.	17,494
Policies now in force.	13,175
Annual Income—From Premiums (after deducting 33,342, abatement allowed).	£177,969 5 9
Ditto—From Interest on invested capital.	44,073 7 7
Amount returned to Members in abatement of Premiums.	240,134 11 8
Amount of Bonuses added to sums assured.	126,564 0 0
Amount paid in claims by Death from the commencement of the Institution.	441,369 11 11
Balance of receipts over the disbursements in the year.	117,669 6 0
Increasing the Capital Stock of the Institution to 1,092,166 9 8".	

At the last division of surplus profits made up to Nov. 30, 1852, the reductions varied from 6 to 80 per cent. on the original amount of premiums, according to the age of the member, and the time the policy had been in force; and the bonuses ranged in like manner from 50 to 75 per cent. on the amount of premiums received during the previous five years.

Members whose premiums fall due on the 1st of April next, are reminded that they must be paid within 30 days of that date.

Prospectuses and other information may be obtained on application at the Office.

March 23, 1855. JOSEPH MARSH, Secretary.

GREAT WESTERN RAILWAY.—COALS.

Orders for the best RUABON HOUSE COALS, equal to the finest Durham, may be executed at 25s. per Ton (cash price), delivered within 4 miles of the Paddington Station.

These Coals are bright and durable in burning, and contain only one-half per cent. of dust.

They are now for the first time introduced into the London Market by the recent opening of the Great Western Railway into North Wales.

Address the Superintendent of the Company, Paddington Station.

CHEMICAL AND ASSAY BALANCES.

LUDWIG OERTLING begs to inform Chemists, Assayers, and the Scientific Public in general, that he keeps on hand a large assortment of the best and most accurate balances, and that they are all constructed upon the same principle as those for which the Council Medal was awarded to L. O. at the Great Exhibition of 1851.

Grain and Gramme Weights accurately adjusted to the correct Mint standard.

PAINLESS TOOTH EXTRACTION, without Chloroform.—Mr. WALTER BLUNDELL is at home daily, from Ten till Four, for Dental Operations under his new patent process.—29, New Broad-street, City.

A NEW DISCOVERY IN TEETH.

MR. HOWARD, SURGEON-DENTIST, 52, FLEET-STREET, has introduced an ENTIRELY NEW DESCRIPTION OF ARTIFICIAL TEETH, fixed without springs, wires, or ligatures. They so perfectly resemble the natural teeth as not to be distinguished from the originals by the closest observer; they will never change colour or decay, and will be found superior to any teeth ever before used. This method does not require the extraction of roots, or any painful operation, and will support and preserve teeth that are loose, and are guaranteed to restore articulation and mastication. Decayed teeth rendered sound and useful in mastication.

52, FLEET-STREET.—At home from Ten till Five.

CONSTANT EMPLOYMENT GUARANTEED.—Ladies or Gentlemen are instructed in the New, Elegant, Ornamental Arts of WHITE, GOLD, or OAK DECORATION, for articles of general use. DR. ARNOTT'S SMOKE-CONSUMING
FIRE-GRATE is manufactured by F. EDWARDS, SON & Co., 42, Poland-street, Oxford-street; where one may be seen in daily use. The advantages of this Grate consist in the smoke being perfectly consumed, no chimney sweeping being required, and a saving of from 40 to 50 per cent. being effected in the cost of fuel. Prospectuses, with Testimonials, sent on application.

THE PATENT PRIZE KITCHENER, with Boiler to supply Bath, Scullery, Hot and Steam Closet, is Manufactured, with all its recent improvements, by THOMAS KILBY & CO., Leamington, Warwickshire, of whom plans, prices, and testimonials may be had on application. It is made from three feet to twenty, all worked by one small fire. A great saving in fuel is effected by having this Kitchen, and it effectually cures smoky chimneys, and is the best cooking-range extant. Experienced and steady workmen sent out for fixing, &c. when required.

RUPTURES.—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of a steel spring, so often hurtful in its effects, is here avoided; a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A spring circular may be had, and the Truss (which cannot fail to be forwarded by post, on the circumference of the body, two inches below the hips, being sent to the Manufacturer, Mr. WHITE, 228, Piccadilly, London.

ELASTIC STOCKINGS, KNEE CAPS, &c.
For VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price, from 7s. 6d. to 16s. each; postage 6d.
MANUFACTORY, 228, PICCADILLY, LONDON.

BERMUDA ARROWROOT, unremoved from the tin cases in which it is shipped, weight, case exclusive, 261 lb., price 50s. Small quantity, at 2s. 6d. per lb.
JAMES EPPS, Homoeopathic Chemist,
Egyptian Hall, Piccadilly;
112, Great Russell-street, Bloomsbury; and
82, Old Broad-street, City.

AT Mr. MECH'S ESTABLISHMENT, 4, LEADENHALL STREET, London, are exhibited the finest and most useful English manufactures, in DRINKING CASES, Work Boxes, Writing Cases, Dressing Cases, and other articles of utility or luxury. A separate department for Papier Maché Manufactures and Bagatelle Tables, Table Cutlery, Razors, Scissors, Penknives, Strops, Paste, &c. Shipping Orders executed. Superior Hair Brushes, &c. &c. M.B. The extensive alterations for Mr. Mech's West-end Establishment, 112, Regent-street, are fast approaching completion.

THE IMPROVED CHARCOAL RESPIRATOR,
(sanctioned and approved by Dr. Stenhouse.)
The only Respirator (excepting the original cumbersome one) in which the object sought by Dr. Stenhouse, viz. the purification of an impure or infected atmosphere, is entirely effected; the construction of this Respirator completely prevents the inhalation of any air that has not come in contact with the charcoal. As an instrument for simply warming the air it also supersedes the ordinary Respirator.

To meet the expressed views of Dr. Stenhouse, "that inventions for the prevention of disease ought to be sold at the lowest possible price," we have offered it to the public at as low a cost as we believe a perfect instrument can be constructed.—Price 5s. 6d.; or post free on receipt of 6s. DABY & GOSDEN, 139, Leadenhall-street, London.

DECORATION OF THE HEAD.—The admirable taste displayed in the Head Dresses of some of our leading belles, who are no less indebted to art than to nature for their superiority, may be imitated, but never equalled, without the material to work upon. The indispensable requisite is a GOOD HEAD OF HAIR. This, the skilful artist may embellish; but the lank, weak, and thinly-scattered locks he laboriously and vainly attempts to arrange in a manner befitting the requirements of the fashionable circle. For this, the Hair must be nourished and invigorated, and all relaxing tendencies overcome. *Oldridge's Balm of Columbia* is the only preparation, truly efficacious, without being in the slightest degree injurious.

By its frequent use the Hair is prevented from turning grey, is improved in appearance, strengthened, and receives, by frequent application, the beautiful gloss and luxuriance which so greatly adds to the grace and dignity of the human form.
Price 3s. 6d., 6s., and 11s. per Bottle; no other prices are genuine. Ask for OLDIDGE'S BALM, 13, Wellington-street North, Strand, London.
Sold by all respectable Chemists, Perfumers and Stationers.

BEAUTIFUL HAIR, WHISKERS, &c., are
invariably produced in Two or Three Weeks by COUPELLE'S CELEBRATED CRINTRAIR, which is universally acknowledged to be the most perfect and most reliable preparation for the failing production of Hair, also checking Greyness, Baldness, &c., and rendering the Hair luxuriant, curly, and glossy.—Mr. Williams, 8, Louth-street, Liverpool. "I can now show as fine a head of hair as any person, solely from using your Crintrair."—*Sergeant Crofton, Longford, Berwick, Ireland.* "Through using your Crintrair, I have an excellent Moustache."—*Mrs. Carter, Pangbourne, Berks.* "My head, which was quite bald, is now covered with new hair."—*Price 2s. per packet, through all Chemists, &c.; or sent free for 24 penny stamps, by ROSALIE COUPELLE, 69, Castle-st., Newman-st., Oxford-st., London.* Guard against imitations under closely similar names. ELY & CO. PUT UP BY COUPELLE on the Hair; with numerous starting and indisputable Testimonials; list of Country Agents, &c., post free for two stamps.

DO YOU WANT LUXURIANT HAIR,
WHISKERS, &c.—No other compound for the Hair has maintained such an enduring celebrity as EMILY DEAN'S CRINTRAIR. It is guaranteed to produce Whiskers, Moustachios, Eyebrows, &c. in a few weeks, and restore the Hair in baldness, from whatever cause, strengthen it when weak, prevent its falling out, and effectually check greyness in all its stages. Price 2s. per Package (dearly perfumed); sent post free on receipt of 24 penny-postage stamps, by MISS DEAN, 37A, Manchester-street, Gray's Inn-road, London. Sold by every Chemist.—"In one fortnight it produced a beautiful set of moustachios."—*H. Adams.*—"It has prevented my hair falling out."—*J. Hooper.*—"It has quite checked the greyness that was coming on."—*Mrs. Elder.*
Beware of imitations under closely similar names.

DINNEFORD'S PURE FLUID MAGNESIA
has been for many years sanctioned by the most eminent of the Medical Profession as an excellent remedy for Acidities, Heartburn, Headache, Gout, and Indigestion. As a Mild Aperient it is admirably adapted for delicate Females, particularly during Pregnancy; and it prevents the Pool of Indigestion from turning sour during digestion. Combined with the ACIDULATED LEMON SYRUP, it forms an Effervescent Aperient Draught, which is highly agreeable and efficacious.—Prepared by DINNEFORD & CO., Dispensing Chemists, (and General Agents for the improved Henslow's Balm of Life, 112, Regent-street, London); and sold by all respectable Chemists throughout the Empire.

DR. DE JONGH'S LIGHT BROWN COD LIVER OIL.
Prepared for MEDICINAL USE in the LOFFODEN ISLES, NORWAY, and put to the test of Chemical Analysis.
Extracts from Medical Testimonials.

The late JONATHAN PEREIRA, M.D. F.R.S.E. F.L.S., Professor at the University of London, Author of 'The Elements of Materia Medica and Therapeutics,' &c.
"I know that no one can be better, and few so well, acquainted with the physical and chemical properties of this medicine as yourself, whom I regard as the highest authority on the subject. The oil which you gave me was of the very finest quality, whether considered with reference to its colour, flavour, or chemical properties; and I am satisfied that for medicinal purposes no finer oil can be procured."

ARTHUR H. HASSALL, M.D. F.L.S., Member of the Royal College of Physicians, Physician to the Royal Hospital, Chief Analyst of the Sanitary Commission of the Lancet, Author of 'Food and its Adulteration,' &c. &c.
"I have more than once, at different times, subjected your Light Brown Oil to chemical analysis—and this unknown to yourself—and I have always found it to be free from all impurities, and rich in the constituents of bile. So great is my confidence in the article, that I usually prescribe it in preference to any other, in order to make sure of obtaining the remedy in its purest and best condition."

Sold in bottles, labelled with Dr. de Jongh's Stamp and Signature, WITHOUT WHICH NONE ARE GENUINE, by ANSAR, HARBORD & CO., 77, Strand, LONDON. Dr. de Jongh's sole accredited Consignees and Agents for the United Kingdom and the British Possessions.

May be obtained in the COUNTRY, from respectable Chemists and Venders of Medicine. Should any difficulty be experienced in procuring them, Messrs. ANSAR, HARBORD & Co. will forward four half-pints (part of England, CARRIAGE PAID, on receipt of a remittance of 10s.
Half-pints (10 ounces), 2s. 6d.; Pints (20 ounces), 4s. 9d.; Quarts (40 ounces), 9s. Imperial Measure.

METCALFE & CO.'S NEW PATTERN TOOTH BRUSH & PENETRATING HAIR BRUSHES.
The Tooth Brush has the important advantage of searching thoroughly into the divisions of the Teeth, and is famous for the hairs not coming loose, &c. An improved Clothes Brush, with the durable unbleached Russian bristles. Flesh Brushes of improved graduated and powerful friction. Velvet Brushes, which act in the most delicate manner. It is a novel and rapidly spreading idea of direct importations, Metcalfe & Co. are enabled to secure to their customers the luxury of a Genuine Smyrna Sponge. Only at METCALFE, BINGLEY & CO.'S Sole Establishment, 130, Oxford-street, one door from Holles-street.
Caution.—Beware of the words "From Metcalfe's," adopted by some houses.

METCALFE'S ALKALINE TOOTH POWDER, 2s. per box.

COLES'S ALGA MARINA is the Concentrated Essence of the Sea-weed, containing in a highly condensed form all the virtues of those plants, to which medical authorities ascribe the principal benefits derivable from a residence by the Sea. It affords speedy relief and a certain cure in all cases of Cough, Rheumatism, Rheumatic Gout, Neuralgia, and other pains in the limbs and joints. It is a most rapidly superseding all other external remedies in cases of Weakness, Relaxation, Contraction, Paralysis, Stiffness, Deformities, Swellings, Tumours, Scrofulous Diseases, and the Malformations of Rickets or badly-nursed Children; and in all cases where friction is recommended, it will greatly increase its effects. Sold in bottles, 2s. 6d., 4s. 6d., and 11s. each, by T. KEATING, 7, St. Paul's Churchyard, London, and all Chemists.
All sufferers should read the Pamphlet, which may be had, gratis, on application, and by post on enclosing six postage stamps.

NO MORE PILLS NOR ANY OTHER MEDICINE.—For Indigestion, (Dyspepsia), Constipation, Nervous, Bilious, and Liver Complaints, Asthma, Bronchitis, Cough, Consumption, and Debility. By DU BARRY'S delectable REVALENTA ARABICA FOOD, which saves fifty times its cost in medicine.

A few out of 30,000 cures are here given.
Cure No. 71, of dyspepsia, from the Right Hon. the LORD STUART DE DECLES. "I have derived considerable benefit from Du Barry's Revalenta Arabica Food, and consider it due to yourselves and the public to authorize the publication of these lines."
STUART DE DECLES.

From the Dowager-Countess of Castletown.
Cure 62,692.—Rosstrevor, County of Down, 19th December, 1851. The DOWAGER-COUNTESS OF CASTLE-STUART feels induced, in the interest of suffering humanity, to state that Du Barry's excellent Revalenta Arabica Food has cured her, after all medicines had failed, of indigestion, bile, great nervousness, and many other ailments. It is a most rapidly serving the confidence of all sufferers, and may be considered a real blessing. Inquiries will be cheerfully answered.

Cure No. 49,832.—"Fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness at stomach and vomiting, have been removed by Du Barry's excellent food."

"MRS. JOLLY, WORTHAM, LING, near Diss, Norfolk."
11b, 2s. 9d.; 21b, 4s. 6d.; 51b, 11s.; 121b, 22s.; super-refined, 11b, 6s.; 21b, 11s.; 51b, 22s.; 101b, 33s. The 101b. and 121b. cures are sent on receipt of a Post-office order.—Barry Du Barry & Co., 77, Regent-street, London. Hospital Agents, Fortnum, Mason & Co. Purveyors to Her Majesty, 182, Piccadilly; and also at 60, Gracechurch-street; 49, Bishopsgate-street; 4, Cheap-side; 330, and 451, Strand; 55, Charing Cross; 54, Upper Baker-street.

DEAFNESS AND NOISES IN THE HEAD.—
Institution for the Cure of Deafness, 9, Suffolk-place, Pall Mall, London. Instant and permanent restoration of hearing guaranteed. The use of ear-trumpets, instruments, &c., causing one moment's inconvenience to the most aged or nervous sufferer. Dr. HOUGHTON'S new and extraordinary discovery, by one consultation enables deaf persons of either sex to hear immediately with perfect ease the lowest whisper, and magically removes all ringing in the ears. Hospital Agents, Fortnum, Mason & Co. and certificates from the most eminent Physicians and Surgeons in England, in whose presence deaf persons have been cured, and many hundreds of private patients cured can be seen or referred to. Hours of consultation, 11 till 4 every day. Francis Robert Houghton, Medical Officer to the Royal College of Surgeons, May 2, 1845; Licentiate of the Apothecaries Company, April 30, 1846.

Just published,
"SELF-CURE OF DEAFNESS," for out-patients; a step to empiricism, quackery, and exorbitant fees, sent on receipt of seven stamps, free. Examination free. 9, Suffolk-place, Pall Mall.

RUPTURES EFFECTUALLY CURED
WITHOUT A TRUSS!—All sufferers from this alarming complaint are earnestly invited to consult or write to Dr. LESLIE, as he guarantees them relief in every case. His remedy has been successful in curing thousands of persons during the last twelve years, and is applicable to every kind of single and double Rupture, however bad or long-standing, in male or female of any age, causing no confinement or inconvenience in its use whatever. Sent post free to any part of the world, with full instructions for use, on receipt of three postage stamps. Hospital Agents, Fortnum, Mason & Co. payable at the General Post-office, to Dr. Herbert Leslie, 37A, Manchester-street, Gray's Inn-road, London.—At home daily (except Sunday) from 11 till 4 o'clock. A Pamphlet of Testimonials sent post free on receipt of one postage stamp.

CURES OF ASTHMAS, COUGHS, &c., by
Dr. LOCOCK'S PULMONIC WAFERS.
From Mr. J. W. Bowden, Bookseller, Market-place, Gainsborough. "One gentleman's case I may especially mention. After having suffered from a periodical attack of asthma for many years, by taking one box of Dr. Locock's Wafers, obtained immediate relief, and by their occasional use remains perfectly free."
TO SINGERS and PUBLIC SPEAKERS their are invaluable for clearing the throat, and strengthening the voice.
THEY HAVE A PLEASANT TASTE.
Price 1s. 1/4d., 2s. 9d., and 11s. per Box.
Sold by all Medical Vendors.

KAYE'S WORSDELL'S RESTORATIVE
PILLS are peculiarly adapted for both sexes, all ages, and every climate. Every Mother, Family, Sailor, and Emigrant should possess them. Sold everywhere, in 1s. 1/4d., 2s. 9d., and 4s. 6d. Wholesale Depot, 22, BREAD-STREET, London.

HOLLOWAY'S PILLS EXTRAORDINARY
REMEDY FOR DEBILITY.—Mr. John Collins, of Airdrie, states in a letter to Professor Holloway that having derived such immense benefit from the use of his Pills, he has great pleasure in bearing testimony to their wonderful properties. For a long time he was afflicted with nervous debility, loss of appetite, and suffered also from a disordered liver; his complexion became sallow, and his frame so emaciated, that there appeared little hopes of his recovery, and after trying other medicines in vain, he is proud to declare that he is solely indebted to Holloway's Pills for the radical cure effected in him.—Sold by all Vendors of Medicine; and at Professor Holloway's Establishments, 24, Strand, London; and 80, Maiden-lane, New York.

13, GREAT MARLBOROUGH-STREET.

MESSRS. HURST & BLACKETT,*Successors to Mr. Colburn,*

WILL SHORTLY PUBLISH THE FOLLOWING NEW WORKS:—

Vols. III. and IV. of
**THE DUKE OF BUCKINGHAM'S MEMOIRS OF THE COURT AND
 CABINETS OF GEORGE III.**

FROM ORIGINAL FAMILY DOCUMENTS. COMPLETING THE WORK. In 8vo. with Portraits.

Among the principal important and interesting subjects of these volumes (comprising the period from 1800 to 1810) are the following:—The Union of Great Britain and Ireland—The Catholic Question—The Retirement from Office of Mr. Pitt and Lord Grenville—The Addington Administration—The Peace of Amiens—The connection of the Prince of Wales with the Opposition—The Coalition of Pitt, Fox, and Grenville—The Downfall of the Addington Ministry—The Conduct of the Princess of Wales—Nelson in the Baltic and at Trafalgar—The Administration of Lord Grenville and Mr. Fox—The Abolition of the Slave Trade—The Walcheren Expedition—The Inquiry into the Conduct of the Duke of York—The Convention of Cintra—The Expeditions to Portugal and Spain—The Quarrel of Lord Castlereagh and Mr. Canning—The Malady of George III.—Proceedings for the Establishment of the Regency, &c. The volumes also comprise the Private Correspondence of Lord Grenville, when Secretary of State and First Lord of the Treasury—of the Right Hon. Thomas Grenville, when President of the Board of Control and First Lord of the Admiralty—of the Duke of Wellington, during his early Campaigns in the Peninsula; with numerous confidential communications from George III., the Prince of Wales, Lords Castlereagh, Elgin, Hobart, Camden, Essex, Carysfort, Melville, Howick, Wellesley, Fitzwilliam, Temple, Buckingham, Mr. Fox, Mr. Wyndham, &c. &c.

MEMOIRS of LIEUT. BELLOT; with his Journal
 of a VOYAGE in the POLAR SEAS in SEARCH of SIR JOHN FRANKLIN.
 2 vols. with Portrait.

A NEW WORK by LEIGH HUNT. 2 vols.

THE MONARCHS of the MAIN. By GEORGE
 W. THORNBURY, Esq. 3 vols.

MY TRAVELS; or, an Unsentimental Journey
 through FRANCE, SWITZERLAND, and ITALY. By CAPTAIN CHAMIER,
 Author of 'The Life of a Sailor,' &c. 3 vols.

**The MOSLEM and the CHRISTIAN; or, Adven-
 TURES in the EAST.** By SADYK PASHA. 3 vols. [Now ready.]

New Novels by the following Popular Authors :

MRS. TROLLOPE, the AUTHOR of 'EMILIA WYNDHAM,' MRS.
 MABERLY, the AUTHOR of 'TEMPTATION,' the
 AUTHOR of 'SINGLETON FONTENOY,' &c.

Also, just published, in 2 vols.

NATURE and HUMAN NATURE. By SAM
 SLICK. 2 vols.

CONSTANCE HERBERT. By MISS JEW-
 BURY. 3 vols.

THE WIFE'S TRIALS: a Novel. 3 vols.

INTERESTING NEW WORKS—NOW READY.

In 2 vols. post 8vo. with a Drawing from his Bust by C. MOORE,

MEMOIRS OF THE LATE RIGHT HON. RICHARD LALOR SHEIL.

By TORRENS M'CULLAGH, Esq.

Also, in 2 vols. post 8vo.

MR. SHEIL'S LEGAL AND POLITICAL SKETCHES.

Edited, with Notes, by M. W. SAVAGE, Esq.

"The value of these Sketches as contributions to the history of Ireland during a stirring and momentous period in her annals will alone be sufficient to procure for them a permanent place amongst the productions of the age. They serve to rescue from the danger of being lost many interesting particulars regarding some of the most eminent men of an age now passed."—*Belfast Whig*.

LIVES of the PRINCESSES of ENGLAND. By

MRS. EVERETT GREEN. The SIXTH and Concluding Volume, comprising the Conclusion of the Life of the Queen of Bohemia—Mary Princess of Orange—Henrietta Duchess of Orleans, &c., with Portraits.

THE MODERN ORLANDO. By Dr. CROLY.

Second Edition. Post 8vo. 5s.

"By far the best thing of the kind that has been written since Byron."—*Lit. Gazette*.
 "Dr. Croly has only done justice to himself in putting his name to the wittiest poem of the day."—*Britannia*.

**CHEAP EDITION of the CRESCENT and the
 CROSS.** By ELIOT Warburton. 1 vol. 15 Illustrations, 6s. bound.

"The new interest given to all that relates to Turkey and the East will doubtless create a new demand for so clever a description of it as Mr. Warburton's 'Crescent and the Cross,' whose popularity has been already attested by ten editions. The eleventh now appears, and doubtless will be the most extensively bought of any of them, for it is brought within the means of all classes by a great reduction in price."—*The Critic*.

Published for HENRY COLBURN, by his Successors, HURST & BLACKETT, 13, Great Marlborough-street.

**CHEAP EDITION of PEPYS' DIARY and COR-
 RESPONDENCE;** comprising all the recent additional Notes and Emendations,
 printed uniformly with the last Edition of Evelyn's 'Diary,' in 4 vols. post 8vo.
 with Portraits, &c., price only 6s. each bound.

**CHEAP EDITION of LIVES of the QUEENS of
 ENGLAND.** By AGNES STRICKLAND. With all the late Improvements, and
 Portraits of every Queen. 8 vols. 7s. 6d. each, bound.

**CHEAP EDITION of MADAME D'ARBLAY'S
 DIARY and LETTERS.** In 7 vols. with Portraits, price only 3s. each, bound.

THE QUEENS before the CONQUEST. By

REGENT-STREET.

Resident Director—J. H. PEPPER, Esq.
A SELECT EVENING CLASS, not exceeding Four, for the STUDY OF PRACTICAL CHEMISTRY, is in progress of formation in the Laboratory of this Institution, under the superintendence of J. H. Pepper, Esq., and Mr. J. Spiller, of the Museum of Practical Geology, and late Senior Assistant in the Royal College of Chemistry.

The Course, which will consist of Twelve Demonstrations and Twelve Experimental Lessons, will embrace the general principles of Chemistry and of Chemical Analysis, with special reference to the Application of the Science to the Useful Arts.

Also, an EVENING CLASS for the STUDY of the CHEMISTRY of PHOTOGRAPHY, under the superintendence of Mr. J. Spiller.

This Course will consist of Twelve Lectures, in the Laboratory of the Institution.

ROYAL ACADEMY OF ARTS, Trafalgar-square.—NOTICE TO ARTISTS.—All Works of Painting, Sculpture, Architecture, or Engraving, intended for the ensuing EXHIBITION at the ROYAL ACADEMY, must be sent in on Monday, the 9th, or Tuesday, the 10th of April inst., after which time no Work can be received, nor can any Works be received which have already been publicly exhibited.

FRAMES.—All Pictures and Drawings must be in gilt frames. Oil Paintings under glass and Drawings with wide margins are inadmissible. Excessive breadth in frames as well as projecting mouldings may prevent Pictures obtaining the situation they otherwise merit. The other Regulations necessary to be observed may be obtained at the Royal Academy.

JOHN PRESCOTT KNIGHT, R.A. Sec.
Every possible care will be taken of Works sent for exhibition, but the Royal Academy will not hold itself accountable in any case of injury or loss, nor can it undertake to pay the carriage of any package.

The prices of Works to be disposed of may be communicated to the Secretary.

TESTIMONIAL to the late LORD DUDLEY

COUTTS STUART.—At a PUBLIC MEETING, held at Will's Rooms on Friday, the 23rd of March, 1855, The Right Hon. the EARL of SHAFESBURY in the Chair,

It was Resolved,—That a subscription be opened for the purpose of erecting a testimonial to Lord Dudley Coutts Stuart, in commemoration of his persevering advocacy of the rights of the Polish nation, and of his incessant and benevolent labours in succouring the afflicted and oppressed of every country and condition.

Contributions will be received at Messrs. Coutts & Co.'s, 59, Strand; Messrs. Hanbury, Taylor & Lloyd's, 60, Lombard-street; and by the Secretary of the Literary Association of the Friends of Poland, 10, Duke-street, St. James's.

R. MONCKTON MILNES, Chairman.
W. L. BIRKBECK, } Hon.
CHARLES SZULCZEWSKI, } Secretaries.

LADIES' COLLEGE, 47, Bedford-square.—

A Course of EIGHT LECTURES on EARLY ENGLISH LITERATURE will be delivered in the Easter Term, by the Rev. JOHN M. JEPSON, B.A., beginning on Tuesday, the 24th of April, at Three o'clock.

The first Lecture will be open to Gentlemen as well as Ladies.

WESTBOURNE COLLEGE, Porchester

Lodge, Bayswater-road, will be OPENED on MONDAY, April 23, 1855, (under the management of a Committee,) as a School for the Sons of Gentlemen.

Under the Patronage of the Archbishop of Canterbury and the Bishops of Winchester and Lincoln.

Visitor—The Lord Bishop of London.

Principal and Head Master—Rev. CHARLES MACKENZIE, A.M., Prebendary of St. Paul's, and late Head Master of St. Olave's Grammar School, Southwark.

The names of other Patrons, Masters, and Professors will be shortly announced.

The year will be divided into three Terms, viz. 1.—From April to July, from September to December, and from January to Easter.

Fees for nominees 5, 6, or 7 guineas a Term, according to instruction; for non-nominees, 6, 7, or 8 guineas a Term.

An entrance fee of 2 guineas, and 1 guinea a year for stationery.

All Pupils must be introduced by a Patron, a Promoter, or a Master in the College.

Arrangements will be made for Pupils to dine on the premises. The Masters are ready to take Boarders.

Prospectuses may be obtained at the above address.

NORTHWOOD PARK, COWES, Isle of

Wight.—Mr. WHITE (St. John's College, Cambridge) has

VACANCIES for PUPILS who are preparing for the Public

Schools, the Navy, and the Military Schools. The Mansion and

Grounds are unrivalled, and opportunities are given for Sea

Bathing, Boating, and Pony Exercise. The Terms are moderate.

References and testimonials, extending over 14 years, from Heads

of Colleges, Dignitaries of the Church, Officers in both Services,

Members of Parliament, &c., can be submitted.

HYDE HOUSE SCHOOL, WINCHESTER.—

Dr. BEHR, assisted by Graduates from the Universities of

Oxford and Cambridge, and foreign Masters (all of whom are resident

with him), undertakes the EDUCATION of a LIMITED

NUMBER of BULLS, the Sons of Noblemen and Gentlemen,

with a view to prepare them for the Public Schools, Naval

Military Colleges, or any of the various Professions.

His system of instruction includes—

1. The CLASSICS and MATHEMATICS—in which the Pupils

will be thoroughly well grounded, according to the most

approved method.

2. The MODERN LANGUAGES—to which especial attention will

be paid, and for the acquisition of which more than ordinary

advantages are afforded.

3. The USUAL BRANCHES of an ENGLISH EDUCATION—all, or any of which, may be made more or less prominent in

the plan of study, as may be deemed desirable in any particular

instance.

4. FORTIFICATION, DRAWING, FENCING, and MILITARY

TACTICS—in which the Military Class receives regular

instruction.

The Establishment is divided into an Upper and a Lower

School. Pupils in the latter division are thus kept separate from

their seniors, both in the hours of study and recreation.

References may be made to the parents of Pupils and others,

including several Noblemen, Dignitaries of the Church, and individuals

of high standing in society.

Terms.—If under twelve years of age, 50 Guineas per annum;

above that age, 60 Guineas. No extras whatever, except Books and

Medical Attendance.

THE SPRING TERM COMMENCES on TUESDAY, April 10.

PRIVATE TUITION.—A Married Clergyman,

with no Parochial Duty, who is preparing a few Pupils

two for a VACANCY after Easter for a Pupil, to whose health or

Education great personal attention is required.—Address the

Rev. E. R., Post-office, Tonbridge, Kent.

HOME EDUCATION for BOYS in DELI-

CATE HEALTH.—A Fellow of the London College of

Physicians, &c. at Warrington, and others for Woolwich and Eton, will

have a VACANCY after Easter for a Pupil, to whose health or

Education great personal attention is required.—Address the

Rev. E. R., Post-office, Tonbridge, Kent.

HOME EDUCATION for BOYS in DELI-

CATE HEALTH.—A Fellow of the London College of

Physicians, &c. at Warrington, and others for Woolwich and Eton, will

have a VACANCY after Easter for a Pupil, to whose health or

Education great personal attention is required.—Address the

Rev. E. R., Post-office, Tonbridge, Kent.

A SOUND CLASSICAL, MATHEMATICAL, SCIENTIFIC AND GENERAL EDUCATION is afforded on moderate Terms at the **LICHFIELD GRAMMAR SCHOOL**.—For Prospectus apply to the Rev. J. G. CUMMINS, M.A., F.G.S., Head Master.

BRIGHTON.—EDUCATION.—There are **VACANCIES** in a first-class Establishment where only Twelve Young Ladies are received. A Parisian Gentleman resides in the house, Signor F. Lablache, Herr Kuhn, Messrs. E. de Paris, Michau, and other eminent Professors attend. References to Parents of Pupils.—For Terms, &c. address Misses B. care of Mr. Rolandi, 20, Berners-street, Oxford-street, London, where Prospectuses can also be had.

KENSINGTON HALL COLLEGIATE INSTITUTION FOR LADIES.
Lady Superintendent—Mrs. Johnson.
Director of Education—Mr. Johnson.
The object of this Institution is to provide Resident Pupils with a complete and systematic course of education and instruction, upon a plan that combines the advantages of a School and a College, with more than usual attention to individual peculiarities, and to the useful as well as elegant requirements of after-life.—Terms, List of Lectures, &c., will be forwarded by the Lady Superintendent.
Kensington Hall, North-End Fulham.

DENMARK-HILL GRAMMAR SCHOOL,
Near London.
Principal—Mr. C. P. MASON, B.A., Fellow of University College, London.
The aim of the system pursued at the above-named School is to combine the mental discipline of a sound course of Classical and Mathematical study with the acquisition of a substantial knowledge of Modern Languages and of the Physical Sciences.
Pupils are prepared either for the Universities or for commercial pursuits.
There is a separate Preparatory Department for Pupils of from Seven to Ten or Eleven years of age.
Prospectuses may be obtained at the School; and of Messrs. Lindsay & Mason, 84, Basinghall-street; and Messrs. Relie Brothers, School Booksellers, 139, Aldersgate-street.

DR. KINKEL'S CLASSES FOR LADIES, in GERMAN AND THE HISTORY OF ART, and MADAME KINKEL'S CLASSES IN SINGING and HARMONY, will RE-COMMENCE, after April 16, at their residence, 6, Eastbourne-terrace. Twelve Lectures, in English, on the History of Modern Art from the Sixteenth Century. An advanced German Class, for the History of German Literature during the Nineteenth Century, with practice in Composition and Conversation. Two German Evening Classes for Gentlemen.—Particulars in the Prospectus, to be applied for to Dr. KINKEL, 6, Eastbourne-terrace, Paddington.

NORTHUMBERLAND COLLEGE FOR LADIES, 42, CRAVEN-STREET, STRAND.
Superintended by MRS. LOUIS WATSON.
Visitor—The Rev. HENRY MACKENZIE, M.A., Vicar of St. Martin's-in-the-Fields.
EASTER TERM will commence on MONDAY, APRIL 16th, 1855, under the following Professors:—
Algebra, Geometry, and Arithmetic—A. D. Sprange, Esq. M.A. Libral Literature—Rev. Sydney Clarke, M.A., St. John's Coll., Cambridge.
Botany—
Dancing and Exercises—Miss Coulton.
Drawing—Figure, Landscape and Perspective—H. Wichelow, Esq.; and A. Pelelier, Esq.
Florentine—Alexander Bell, Esq.
English Grammar and Composition and English Language and Literature—Alfred D. Sprange, Esq. M.A.
French—Mons. Tourin.
Geography—Charles Galbraith, Esq.
German—Rev. A. Lowy.
Harmony and Composition—H. C. Lunn, Esq. R.A. Music.
History (Ancient and Modern)—Rev. A. G. Edouart, M.A., St. John's College, Cambridge.
Italian—Signor Maggioni, R.A. Music.
Latin and Natural Philosophy—Rev. J. K. Jennings, M.A., Queen's College, Cambridge.
Piano-forte—Cipriani Potter, Esq., Principal R.A. Music, and H. C. Lunn, Esq. R.A. Music.
Singing—F. R. Cox, Esq. R.A. Music.
Writing—W. McCulloch, Esq.

Prospectuses to be obtained on application at the above address.
A JUNIOR CLASS is open at the College.
THERE ARE VACANCIES FOR TWO BOARDERS.
Pupils are received at the Half Term.

GERMAN EDUCATION.—CANNSTATT ON THE NECKAR.—Mr. HIRSCH, who formerly resided in England, and who has now a FEW VACANCIES in his Establishment, will commence on the 6th of April to the 1st of May. References can be given to Gentlemen in London, whose sons are still under Mr. Hirsch's care.
For Prospectuses—Messrs. Walton & Maberly, 27, Ivy-lane, Newgate-street; or Mr. Cotes, Bookseller, 139, Cheapside. For interviews with Mr. Hirsch, apply to Mr. Cotes, by letter.

A GRADUATE of the University of London offers to READ, either privately or in classes, with Students preparing for MATRICULATION, or for the EXAMINATION at APOHECARIES' HALL.—Address B. A., Palmer's Library, 27, Lomb's Conduit-street.

WANTED, after EASTER, at BRIGHTON COLLEGE, a FRENCH MASTER. Besides being able to teach his own language well, he must have a fair knowledge of English, and be a man of liberal education. Testimonials of character and attainments to be sent to the Rev. H. Cotterill, Principal of the College, Brighton, who will give full particulars as to the salary and duties to such candidates as appear suitable.

SCHOOLMASTER.—WANTED, a SECOND MASTER for the Boys' School in connexion with the Leeds Mechanics' Institution and Literary Society. The object of these Schools is to provide a thoroughly sound and practical education according to the most approved method. It is material that the Second Master should be able on an emergency, to take charge of the whole school, and therefore he should be competent to teach all the branches of a sound English Education, together with Mathematics, Latin, and the Elements of French. Salary from £60 to £100 per annum, according to qualifications. Applications, with testimonials, must be sent to the Honorary Secretaries on or before the 10th of April. Further particulars may be had from the Secretary.
J. N. DICKINSON, } Hon. Secs.
J. TAYLOR, }

Leeds, March 30th, 1855.

HOME for a GENTLEMAN engaged in Town during the day, in the family of an Independent Minister, at a First-class Station on a Railway south of London. Half-an-hour's journey. Separate Rooms and Board. Terms, 100 Guineas a year.—Apply O. O., Ward & Co's, Paternoster-row.

MR. CURT, of London, ANTIQUARY, &c., now in Town for the Loscombe Sale of Valuable Coins and Medals, will return to Paris on the 14th of April, to attend the Royal-Rochette Sale of Coins and Antiquities, the Catalogue of which is just published. Commissions, as usual, executed at 10 per cent.—Address, post paid, 10, Leinster-street, 1st floor, or Hotel Brabant, Paris. Mr. Curt will be again in London about the 24th of April.

HYDROPATHY.—MOOR PARK MEDICAL and HYDROPATHIC ESTABLISHMENT, near Farnham, Surrey, within three miles of the Camp at Aldershot. This Institution is now open for the reception of Patients under the Superintendence of Dr. EDWARD W. LANE, A.M. M.D. Edin.—Dr. Lane may be consulted in London every Tuesday between half-past 12 and 2, at 69, Conduit-street, Regent-street.

MILD SEA-AIR.—THE WIDOW of a SURGEON and her Daughter, RECEIVE DELICATE CHILDREN, YOUNG LADIES, requiring Sea-Air and Bathing. They have had much experience in the care of invalids, and devote much attention to education as the health of the Pupils will permit. References given and required.—For all particulars, address W. Messrs. Groombridge, Paternoster-row.

ART ABROAD.—An Artist, proceeding to Italy, would enter into arrangements for undertaking some few additional Commissions for Portraits and Sketches in the Galleries of Florence and Rome. Pictures may be seen, during the week commencing Monday the 9th, at Mr. Collis's, 1, 8, Bond-street.

LESSONS in LITERATURE and COMPOSITION.—MANUSCRIPTS prepared for the Press. Address to A. B., 31, Newman-street, Oxford-street.

NEWSPAPERS.—A New Writer, whose style is keen and epigrammatic, wishes for AN ENGAGEMENT to WRITE for a NEW-PAPER. He is thoroughly conversant with the leading topics of the day, and of business habits.—Address T. W., No. 2, Manor Cottages, Kennington Oval.

TO EDITORS and PUBLISHERS.—A Military Gentleman (who can refer to several Essays already published) is desirous of AN ENGAGEMENT (permanent or occasional) to WRITE on MILITARY SUBJECTS.—Address, post paid, C. S. S., Dulau's Library, Soho-square.

TO BOOKSELLERS, &c.—A Gentleman of many years' experience in the BOOKSELLING BUSINESS, and who is the proprietor of a good and certain trade, although not in possession of immediate available capital, is desirous of forming an ENGAGEMENT with a respectable house in London, that would lead to a PARTNERSHIP at an early date. Address M. A., No. 119, New Bond-street.

BOOKSELLING and STATIONERY BUSINESS for DISPOSAL. The present Proprietor wishes to retire. It is one of the oldest Businesses in the trade in Liverpool, and is situated in one of the chief streets. The rent of house and shop very moderate.—Apply to Mr. GERT, Weekly Advertiser Office, 55, Market-street, Manchester.

TO PARENTS and GUARDIANS.—A Married Surgeon, in general practice, has a VACANCY for a PUPIL. Profoundly moderate. Advantages made for attending Hospital during term, if desired.—Address MEDICUS, care of Messrs. Simpson & Maule, Manufacturing Chemists, Kennington-road.

A PHYSICIAN, residing in a large house at the West-end of London, and connected with a Metropolitan Medical School, wishes to RECEIVE into his family a PUPIL, whose studies he would superintend, and to whom he can offer unusual advantages. Terms, 120 guineas per annum, or 500*l.* for four years, including the fees for hospital practice and lectures.—Address N. R., care of Mr. Churchill, Medical Publisher, 11, New Burlington-street, London.

A BURLINGHAM, of great experience in every department of Education, and possessing very unusual facilities for teaching the Applied Sciences, in addition to the ordinary routine of instruction, RECEIVES into his family the SONS OF GENTLEMEN, to fit for immediately active life, or to prepare for any of the Educational Establishments and Colleges. References of the highest character can be furnished, and every satisfaction will be given as to the thorough efficiency of the system pursued. Terms according to age and requirement.—For particulars address Rev. M. A. Cantab, care of Messrs. Watkins & Hill, 5, Charing-cross; or J. J. Griffin, Esq., 10, Finsbury-square.

CONVERSATION.—TO SECRETARIES.—The Advertiser has a very interesting OFTICAL INVENTION, which he would be happy to exhibit at any Conversation or numerously-attended Soiree, in Town or Country. The exhibition would in all cases be FREE, as the Advertiser wishes to make the invention generally known. Secretaries, and others wishing to secure the exhibition for their meetings, are requested to send particulars to T. H. C., 13, Bayham-place, King-street, Camden Town.

PATERNOSTER - ROW.—OFFICES TO LET, on First, Second, and Third Floors, together or separately. Convenient access. Suitable for an Agent, Wood Engraver, Map Colourer, &c. &c.—Apply at No. 21.

MICROSCOPE.—WANTED, a MICROSCOPE, by Ross or other good maker.—Address T. J. D., Post-office, Battersea.

MAYALL'S PORTRAIT GALLERIES, 224, REGENT-STREET, Corner of Argyll-place.
DAGUERRETYPE and STEREOSCOPIC MINIATURES in the highest style of Art taken daily.
Mr. Mayall has proved his mastery over the art by producing photographic portraits of the full size of life &c. without the slightest sacrifice of definition, or the smallest approach to distortion;—indeed, the errors and peculiarities of former impressions appear to be corrected.—*Athenæum*, July 29, 1854.
Mr. Mayall's portraits represent the high art of the daguerreotype; they are superior to the generality of such pictures as a delicate engraving is to a coarse woodcut.—*Art-Journal*, Nov. 1853.
"More pleasing, and far more accurate than the generality of such pictures."—*Times*, July 17, 1854.

Fulcan Wharf, Earl-street, Blackfriars.

BY MESSRS. FULLER & HORSEY, on
TUESDAY, April 10, 1855, at 11 o'clock, on the premises as
above, without reserve, TWO AND A HALF CENTS PATENT VICTORIA
PRINTING MACHINES, lying at Dagford, where they
may be inspected.—The machines were constructed by Messrs.
Hall, in a very superior manner on the principle of the patent
granted to Mr. Applegarth in 1851. The columns are each in a
separate chase, half upon one Type Cylinder, half upon the other,
and they are united in register by the Paper Cylinder, the sheet
receiving the impression as it revolves. 9,000 copies per hour may
be obtained without any damage to the machines. The machines
measure 37½ inches between the bearers, and are about 40 feet in
length.

To be seen at Dagford at any time by order, which, with Catalogues,
may be had of Messrs. Fuller & Horsey, Billiter-street,
City.

13, GREAT MARLBOROUGH-STREET. HURST & BLACKETT, Successors to Mr. Colburn, WILL SHORTLY PUBLISH THE FOLLOWING NEW WORKS.

VOLS. III. and IV. of THE
DUKE of BUCKINGHAM'S MEMOIRS of the COURT and CABINETS of GEORGE III., from Original Family Documents. Completing the Work. In 8vo. with Portraits. (In a few days.)

Among the principal important and interesting subjects of these volumes (comprising the period from 1800 to 1810) are the following:—The Union of Great Britain and Ireland—The Catholic Question—The Retirement from Office of Mr. Pitt and Lord Grenville—The Addington Administration—The Peace of Amiens—The connexion of the Prince of Wales with the Opposition—The Coalition of Pitt, Fox, and Grenville—The Downfall of the Addington Ministry—The Conduct of the Princess of Wales—Nelson in the Baltic and at Trafalgar—The Administration of Lord Grenville and Mr. Fox—The Abolition of the Slave Trade—The Walcheren Expedition—The Inquiry into the Conduct of the Duke of York—The Convention of Cintra—The Expeditions to Portugal and Spain—The Quarrel of Lord Castlereagh and Mr. Canning—The Malady of George III.—Proceedings for the Establishment of the Regency, &c. The volumes also comprise the Private Correspondence of Lord Grenville, when Secretary of State and First Lord of the Treasury—of the Right Hon. Thomas Grenville, when President of the Board of Control and First Lord of the Admiralty—of the Duke of Wellington, during his early Campaigns in the Peninsula; with numerous confidential communications from George III., the Prince of Wales, Lords Castlereagh, Elgin, Hobart, Camden, Essex, Carysfort, Melville, Howick, Wellesley, Fitzwilliam, Temple, Buckingham, Mr. Fox, Mr. Wyndham, &c. &c.

MEMOIRS of LIEUT. BELLOT; with his JOURNAL of a VOYAGE in the POLAR SEAS in SEARCH of SIR JOHN FRANKLIN. 2 vols. with Portrait.

A NEW WORK by LEIGH HUNT. 2 vols.

THE MONARCHS of the MAIN. By GEORGE W. THORNBURY, Esq. 3 vols.

MY TRAVELS; or, an UNSENTIMENTAL JOURNEY through FRANCE, SWITZERLAND, and ITALY. By CAPTAIN CHAMIER, Author of 'The Life of a Sailor,' &c. 3 vols.

Also, in the Press,

NEW NOVELS

By the following Popular Authors:—

Mrs. Trollope; the Author of 'Emilia Wyndham;' Mrs. Maberly; the Author of 'Temptation;' the Author of 'Singleton Fontenoy,' &c.

Also, just published,

NATURE and HUMAN NATURE. By SAM SLICK. 2 vols.

"We enjoy our old friend's company with unabated relish. These two new volumes are full of fun and fancy."—*Athenæum*.

"Every page of the book is amusing."—*Examiner*.

CONSTANCE HERBERT. By GERALDINE E. JEWSBURY. 3 vols.

From the *Athenæum*.—"Constance Herbert" is a poem in its beauty and its lofty purpose—a romance in its variety and fascination. The tale, as a tale, is deeply interesting: full of quiet pathos and a calm and beautiful morality. It will be read with rare pleasure and remembered with thoughtful interest."

From the *Messenger*.—"Miss Jewsbury may be said to occupy the same place in the present time which Miss Austen held in the past."

THE MOSLEM and the CHRISTIAN; or, ADVENTURES in the EAST. By SADYK PASHA. Revised by the Editor of 'Revelations of Siberia.' 3 vols.

THE SECRET MARRIAGE; or, CONTRASTS in LIFE. A Novel. By Miss F. WILLIAMS. 3 vols.

THE WIFE'S TRIALS. A Novel. 3 vols.

NEW WORKS.

The **EDINBURGH REVIEW**, No. CCVI. APRIL, 1855. 8vo. 6s. [On the 17th inst.]

Contents.

1. SLAVERY in the UNITED STATES.
2. SIBERIA.
3. ENGLISH SURNAMES.
4. THE CORRECTION of JUVENILE OFFENDERS.
5. HUC'S TRAVELS in CHINA.
6. PASCAL PAOLI.
7. THE CHEMISTRY of COMMON LIFE.
8. AUTOCRACY of the CZARS.
9. LORD BROUGHAM on CRIMINAL PROCEDURE.
10. ARMY REFORM.

2.
TEGOBORSKI'S COMMENTARIES on the PRODUCTIVE FORCES of RUSSIA. Vol. I. 8vo. 14s.

3.
The UNITY of WORLDS and the PHILOSOPHY of CREATION. By the Rev. BADEN POWELL, M.A., V.P.R.S. Crown 8vo. 12s. 6d.

4.
SISTERS of CHARITY, CATHOLIC and PROTESTANT, ABROAD and at HOME. By Mrs. JAMESON. Fcap. 8vo. 4s.

5.
The CHRIST of HISTORY: An Argument grounded in the Facts of His Life on Earth. By the Rev. J. YOUNG, M.A. Post 8vo. 7s. 6d.

6.
The ANGLER and his FRIEND; or, Piscatory Colloquies and Fishing Excursions. By JOHN DAVY, M.D. F.R.S. Fcap. 8vo. 6s.

7.
HISTORY of the SAPPERS and MINERS. By T. W. J. CONNOLLY, Quartermaster-Sergeant of the Corps. With 17 coloured Plates. 2 vols. 8vo. 28s.

8.
HISTORY of WOMAN. By S. W. FULLOM, Author of *Marvels of Science*, Second Edition. 2 vols. post 8vo. 21s.

9.
METRICAL CHRONOLOGY. By the Rev. J. H. HOWLETT, M.A. Fifth Edition, with Additions. Post 8vo. 7s.

Announcements for April.

X.
RUBY EDITION of MOORE'S POETICAL WORKS, complete in 1 vol. with Portrait. Post 8vo. 12s. 6d. [At the end of April.]

XI.
The PHASIS of MATTER; or, the Discoveries and Applications of MODERN CHEMISTRY. By T. LINDLEY KEMP, M.D. 3 vols. crown 8vo. [At the end of April.]

XII.
LOUDON'S ENCYCLOPÆDIA of PLANTS, corrected to 1855 by Mrs. LOUDON and GEORGE DON, F.L.S. 8vo. with 10,000 Woodcuts. [At the end of April.]

XIII.
The Rev. W. J. CONYBEARE'S ESSAYS, ECCLESIASTICAL and SOCIAL, from the *Edinburgh Review*. 8vo. [At the end of April.]

XIV.
The CALENDAR of VICTORY. By Major JOHNS, R.M. and Lieut. P. H. NICOLAS, R.M. Fcap. 8vo.

XV.
The LITURGICAL CLASS BOOK: A Series of Reading Lessons on the Book of Common Prayer. By J. JONES, C.M. 12mo. 1s. 6d. [Next week.]

XVI.
The LITTLE PHILOSOPHER on the SCIENCE of FAMILIAR THINGS. By T. TATE, F.R.A.S. With Woodcuts. Parts I. to III. 18mo. 1s. each.

XVII.
The Traveller's Library, Part 82.
PRINTING: Its ANTECEDENTS, ORIGIN, and RESULTS. 16mo. price One Shilling. [On the 30th inst.]

London: LONGMAN, BROWN, GREEN, and LONGMANS.

LONDON, SATURDAY, APRIL 7, 1855.

REVIEWS

Memoirs of the Right Hon. Richard Lalor Sheil.
By W. Torrens M'Cullagh. 2 vols. Hurst & Blackett.

FOR many reasons we turned with interest to the work before us. Sheil played a distinguished, if not a decisive, part in the history of his times. He was amongst the foremost of Irish tribunes, and was in the House of Commons a successful speaker, of a peculiar kind. In our Clubs and in London society his caustic tone and sparkling sayings were familiar to many, while his literary accomplishments commended him to the regard of several who had no taste for Irish agitation. Of the remarkable scenes through which he passed, and of certain concealed passages in Irish politics, we hoped to obtain here some striking revelations. But Mr. M'Cullagh has entered on his biography too soon. The elaborate reserve, the guarded tone, and the subdued spirit of the whole performance, impart a coldness to the volumes not in keeping with the subject, or in accordance with the picturesque eloquence of the writer. A bright and impulsive nature like Sheil should have been painted with more vivid colour and depth of tone. While placing the orator in the foreground, some of his contemporaries should have been spiritedly grouped together, in order to give a life-like and animated picture of the times in which Sheil flourished.

Sheil was born on the 17th of August, 1791, at Drumdowney—a small country house, near Waterford. Of his family we are told little by Mr. M'Cullagh.—

"Edward Sheil, the father of the subject of these memoirs, had passed his earlier years in Spain. He was a man of quick intelligence, and active in the pursuit of business. Many of his countrymen were settled at Cadiz, where they gradually acquired wealth and distinction by their devotion to trade. * * Not long after his return from Spain, Mr. Sheil married Miss Catherine McCarthy, of Spring House, in the county of Tipperary, whose sister was the wife of General D'Alton, an officer who served with distinction in the Austrian army. These ladies were nearly related to Count McCarthy, who had formerly possessed large estates in Ireland; but who, having disposed of them, settled at Toulouse, where his family subsequently resided."

An old man, James Hincks, retains to this day a recollection of Sheil as a boy.—

"I have often seen him walking about with his book in his hand, and talking to himself, and then, all of a sudden, he would put his book on the stump of a tree, and he would throw and fling his arms about, and he would scold at it as if it was a man he was in a passion with."

How intensely Sheil's instincts pointed towards oratory, we learn from a letter from Mr. Justice Ball (of the Irish Court of Common Pleas) to Mr. M'Cullagh.—

"He had always, as long as I can recollect, been in the habit of speaking of eloquence as beyond all other objects of admiration; and to become a great public speaker was, from the outset, the professed object of his ambition. Aware as he soon became of the obstacles to its attainment in his striking defects of voice, utterance, personal appearance, and manner, he went to work to correct them all with an undoubting faith in his success, and a determination to spare no toil or effort to accomplish it. The course he pursued was to practise declamation, accompanied by gesture and reading aloud. He would often apply to me and others to criticise his performance, and bespeak our candid opinion of its merits or defects; and the earnestness with which he courted and entreated the most unmitigated exposure of his faults, and the thankful spirit in which he welcomed it, were not the least remarkable or

least interesting traits of his character. The fact was, he was throughout sustained by the thorough conviction that he was destined to become one day a great orator; and I am satisfied that never for a single day, even while he was at school, was that impression absent from his mind."

The difficulty of the voice was partly overcome by Sheil's paying much attention to the art of pausing, so as to give relief to the ear, and taking great pains with distinctness of articulation. Of the successful speakers whom we now remember Sheil had beyond comparison the worst voice. Its cacophony used to remind us of the two lines by Pope imitative of harsh sounds (preserved by Spence)—

"Shields, helms, and swords all jangle as they hang,
And sound formidable with angry clang."

Yet let it be told to his lasting honour, in spite of this grievous defect, and with the disadvantages of narrow circumstances, Sheil made his way to social success and high political distinction. If we judge rightly from the hints of Mr. M'Cullagh, Sheil passed through the severest pecuniary difficulties.

It is upon this latter point we see most clearly that this work has appeared too soon. Our readers may recollect how, on a former occasion, it has been shown in these columns how much of what has appeared about Edmund Burke in print is mythical; and that the facts of his early life were carefully concealed. Mr. M'Cullagh, after deliberation, has resolved on the same policy in dealing with the history of his subject. After a pathetic description of the sufferings endured by gifted men of poverty, the writer says:—

"Something of the terrible experience in question was at a later period depicted by Sheil in some of the essays which he published anonymously, and to which allusion will hereafter more particularly be made: and other evidences are still in existence of the bitter mortifications which are the lot of every man who, without the possession of a competency, attempts to tread an ambitious path in life; and who, unable to stifle within himself the inspirations of a divine nature, is perpetually beset and baffled by the meanest exigencies of existence. Ought all these to be set forth in detail to gratify the curiosity of the crowd? Assuredly, no. To the many,—who after all are, happily for themselves, secure from such trials and temptations, and who, happily also for themselves, are out of all true and practical sympathy with those who undergo the struggle,—such details are, perhaps, more likely to convey misleading than correct impressions; and to the comparatively few who have been schooled by fellow-suffering in fellow-feeling, such details are seldom acceptable when uttered in the public way. If it be true of all men, surely it is more especially true of men of genius, that 'the heart knoweth its own bitterness, and a stranger comprehendeth it not.'"

The excess of the difficulties hinted at makes Sheil's subsequent success infinitely more meritorious and encouraging to others. Nothing, however, can be more eloquent as to his early tortures than Sheil's confession after he had risen to the pinnacle of success.—

"The long struggle of his youth with niggard fortune had left an indelible impress on his mind. 'The high-born and opulent,' he would sometimes say, 'are incapable of realizing the misery and humiliation to which a man of education and of feeling is exposed, when he has to gamble with his wits for the price of a dinner. But who that has passed through the ordeal can forget it? For myself I have never been able to get the chill of early poverty out of my bones.'"

It seems that his father, after having realized a large fortune, was by commercial reverses cast very low in the social scale.—

"He was no longer able to afford the expenses necessary for his son's collegiate studies; and these must have been interrupted for a considerable time, if not wholly abandoned, but for the kindness and liberality of a relative, who spontaneously undertook

to make Richard an allowance of a hundred pounds a year, until he should have been called to the bar. Dr. William Foley by whom this generous offer was made, was a physician of eminence in Waterford, where he had acquired in his profession a considerable fortune."

Sheil graduated in Trinity College, Dublin, in July, 1811, and proceeded to Lincoln's Inn to keep terms for the bar.

Many curious particulars have often reached our ears of the mode in which young Irish literary adventurers then conducted themselves in London. After the Union, there was for a time a great influx of them. The fact of Tom Moore having got to the suppers at Carlton House, and to a place in the Colonies, roused the ambition of several. His friend, Mr. Croker, a young barrister fresh from the Munster Circuit, becoming Secretary to the Admiralty, added to the desire of others for settlement in London. The success of the clever satire called 'All the Talents,' which gave its name to the Fox-Grenville Cabinet, and report of the pleasant social way in which its author, Eaton Barrett, and his friends, Hugh and John Doherty (afterwards Chief Justice) lived amongst "the Saxons," stimulated other young Irishmen to try their fortunes. Their countrymen, the Wellesleys, Lord Castlereagh, Lord Moira, Canning, and Sheridan, had also great political consideration.

It was in such times that Sheil, encouraged by the examples around him, aspired to recruit his fortunes by writing for the stage. On this part of his story his biographer is not deeply informed, and he has occupied too many pages with extracts from the plays of Sheil. Both the late James Kenney and Howard Payne were full of anecdotes of those days. We must be brief in treating of them. The dramas of Sheil, excepting 'Evadne,' were ephemeral in their success, and owed their effect to the charms of Miss O'Neil (Lady Beecher). 'Adelaide,' the first of them, was written for her; and played in Dublin with success on the 14th of February, 1814. Two years afterwards, when tried at Covent Garden, it did not succeed. His next play was 'The Apostate,' produced on the 3rd of May, 1817. Of the author's reading of this play, Mr. Macready observes:—

"When he began to read 'The Apostate' in the green room, there was a disposition to smile at his very peculiar voice and manner, but its earnestness soon rivetted attention, and the reading terminated to the satisfaction of all but myself, who had to undertake the disagreeable character of *Pescara*. I had met him the day before at Wallace's chambers, and it was impossible to be in his company and not to like him. Our acquaintance soon ripened into friendship, which was never relaxed during his life."

Of his nervous anxiety on the night of its performance, Mr. M'Cullagh tells us:—

"With painful solicitude he watched the performance during the first and second acts. All went well, however. There was some applause, no murmurs, and at length, sick of his own misgivings, and conscious perhaps that he betrayed a certain want of dignity in the irrepressible excitement of his look and manner, he betook himself to the green-room when the third act began, resolved to remain there during the remainder of the play. Few of its usual occupants were lingering there; and one of the attendants soon observed the restless author pacing with measured steps the *estrade*, or narrow platform, which was placed all round the room, and on which a continuous row of seats was specially devoted to the performers. For a time he seemed wholly unconscious that any one was present; he then suddenly stopped, and in a low tone exclaimed, 'Can you tell me, sir, about what time they generally begin to hiss tragedies at this house?'"

Of the profits derived from 'The Apostate,' we are told:—

"Besides the gratification derived from its success, the publication and performance of 'The Apostate' were productive of other advantages, not less acceptable. The copyright was purchased by Mr. Murray for 300*l.*, and in his hands it passed through several editions. In addition to this, the author is said to have received 400*l.* from the managers of the theatre."

—It is probable that the profits from the theatre were not quite so large, but they must have been considerable. For 'Bellamira,' which was played several nights in 1818, Sheil, according to his biographer, received 100*l.* from Mr. Murray for copyright, and 300*l.* from the theatre. Concerning the origin of the play of 'Evadne,' we shall let the biographer speak.—

"It was at Mr. Murray's that Mr. Sheil became acquainted with Mr. Gifford, who was then preparing an edition of the works of Shirley for publication. Gifford spoke of one of the plays as almost fit for representation, and asked Mr. Sheil to call upon him, that he might give him a printed copy: he did so next day, and received from him the proof-sheets of 'The Traitor,' with which he was greatly delighted; he at once applied himself to the task of its adaptation, and exulted in being able to find a new character in *Lorenzo* for his friend Macready. He made considerable alterations, and, omitting altogether the most important scene of the old drama, substituted for it one wholly different in conception and language. Old Mr. Harris, to whom it was then submitted, returned it with the remark, that an altered play never had the same interest and attraction as a new one, and that the person who could write such a scene as that in the third act (the statue-scene afterwards embodied in 'Evadne') ought to write the entire play himself. This suggestion was not unfruitful. His mind continued to dwell upon the subject, and some months after he had completed what was destined to prove the most lastingly popular of his compositions."

Many of our play-going readers must recollect that one of Miss Helen Faucit's favourite parts was *Evadne*. It is stated that the author derived 500*l.* profit from it. His subsequent play of 'The Huguenot' did not succeed, but he was a joint author with Banim in 'Damon and Pythias.' Mr. McCullagh does not appear to have received any information from Lady Beecher about Sheil in those days. His play of 'The Huguenot' suffered severely from her having left the stage, for, as Mr. Macready well says, "There was only one Miss O'Neil." In the elaborate paper on 'The Retirement of Miss O'Neil,' by Hazlitt (*London Magazine*, Feb., 1820), there is a pen-and-ink portrait extant of that brilliant and fascinating actress; but Hazlitt, though specially commending her *Belvidera*, *Isabella* and *Mrs. Beverley*, never mentions her successes in Sheil's plays. Yet there was a remarkable coincidence between the histrionic sensibility of the great actress and the oratorical vehemence of the young dramatist.

But we must turn from the dramatist to Sheil, the Irish popular leader. His public life naturally divides itself into his career as a popular tribune, haranguing from the platform, and as a senator, addressing the Imperial public. We cannot plunge into what has been called "the great Serbionian bog of Irish politics." The history of the Catholic Question (at least in its external phases) has often been told, and Mr. McCullagh has communicated no new facts upon it.

Sheil appears to have been an artist in words, of singular ingenuity and wonderful success. He did not decide events, or sway society with sustained power. He could scarcely be said to be a statesman, and he never was the leader even of a section in the House of Commons; but he made brilliant speeches, which were read far and wide, and often he lashed into frenzy the passions of Irish auditors and readers. It was easy to sneer at him as a melo-dramatic

declaimer, and to call him (as O'Connell did) "an iambic rhapsodist"; but still there was the power of intense susceptibility in his style, joined to mastery over language. It is not correct to say that in oratory he was "a second-hand Grattan." Many of his sentences have the antithesis and epigram of the chief of the Irish orators; but in logical construction, it is evident that Sheil had moulded his style on the masterpieces of the French pulpit which he had studied under the Jesuits.

Criticism on his eloquence would, however, carry us too far. We think that Mr. McCullagh might have profitably treated of this theme; but we are more concerned to observe that he gives us no picture of the inner life of Sheil, as an ally and contemporary of O'Connell. In his history of Sheil as a champion of the Catholics up to 1829, there is nothing told here that everybody did not know; and so rapidly, and almost evasively, does the biographer pass over the leading part taken by Sheil in the calamitous agitation for "Repeal of the Union," that an incident, in relation to "Who is the Traitor?" affair, comes upon the reader with surprise. A member of Parliament stated to his constituents that he knew that an Irish member, who spoke with violence against the Coercion Bill, went to Ministers, and "advised them in private not to bate an atom of the Bill." This charge was subsequently applied to Sheil; it was investigated before a Committee of the House of Commons,—and he was triumphantly acquitted.

But in Mr. McCullagh's narrative of the affair we are startled with the following passage. While the charge was still pending, Mr. McCullagh writes,—the italics in the following passage being our own:—

"Mr. Fonblanque, with whom he had long been intimate, happened to enter the Athenæum Club, and hastily crossed the hall without perceiving that Sheil was standing alone near the fire. Hearing his name sharply called, he turned round, and encountered a look of mingled reproach and despondency too painfully explained by the exclamation—'Are you also going to cut me?'—'Good God!' replied his friend, 'how could you suppose me capable of slighting or neglecting you? What can have induced you to conceive such an idea?'—'Because I fancy that every man I meet is anxious to avoid me; and I knew not whether you might not be disposed to go with the rest.' Shocked by the ill-suppressed agitation of his tone and manner, Mr. Fonblanque drew him aside, and earnestly endeavoured to persuade him that he exaggerated greatly whatever symptoms of coldness or alienation he might have casually encountered. He expostulated with him on the imprudence of betraying anxieties which would be too readily ascribed, however wrongfully, to self-conviction; and tried to rally the sense of pride and moral courage which seemed to have been suddenly paralyzed within him. His utmost efforts for a considerable time were wholly fruitless, and he gladly availed himself of some excuse to seek for Mr. Charles Buller, with whom he almost immediately returned to their desponding friend. Hours passed away in animated discussion of all the various phases which the pending inquiry might assume, and the thousand possible and impossible constructions that might be put upon every trivial word or ironical phrase of ill-remembered conversations. *He was possessed with the idea that O'Connell long desired an opportunity of getting rid of him, and would seize upon the present occasion 'to destroy him with his constituents in Ireland.'* Nothing could be more groundless than such an apprehension, as the sequel soon afterwards proved; but for the moment it was impossible to convince him of its fallacy. After a time his mind appeared to become somewhat more calm; but so deep and settled was the gloom that still hung over him, that his friends resolved not to leave him to himself, and insisted upon his spending the remainder of the day in their company. They dined together at the house of Mr. Fonblanque, and

both of them accompanied him to his home. The greater part of the following day was spent in the same manner, and it was only by the continuous care and judicious kindness of his gifted and considerate companions, that he at length regained somewhat of his accustomed buoyancy and self-possession."

In this passage is revealed the chief deficiency in this work, considered as a biography. Why should Sheil have entertained such an extraordinary idea about O'Connell's sentiments towards him? What had O'Connell done that Sheil should then anticipate such ferocious treatment from one who really acted on that occasion as a masterly advocate and generous friend? Only two years previously, when the Repeal party was formed, when Lord Killeen, Sir Henry Parnell, Mr. Wyse of Waterford, Mr. Lambert, Mr. Wallace, and all the moderate liberals of Ireland were assailed by O'Connell, Sheil had joined the agitator, and adopted the Repeal cry, which he afterwards called "a splendid phantom." He supported O'Connell in assailing the Whig Ministers with excessive virulence; and why should he in 1834 have supposed that his ally would then destroy him?

On that important point, on all the most peculiar relations which subsisted between O'Connell and Sheil, and in the singular part taken by Sheil in reference to "Repeal," this biography is silent. After Emancipation was conceded, England was astounded by a new cry being substituted, and the most consistent of liberals being flung out of the Irish representation, and their places given to Repealers, headed by O'Connell and Sheil. This is all that Mr. McCullagh has to say—about half a page—on that important passage:—

"He had sacrificed a popularity second only to that of O'Connell, by refusing to join with him in the resumption of agitation after the passing of the Relief Bill. He had steadfastly clung to the belief that Ministers could not long continue to be blinded as to the course which it was their constitutional duty to pursue, by the personal resentments of Mr. Stanley, or of those who contributed with him to maintain intolerant and illiberal views. But experience had falsified these anticipations. The taunts and reproaches of having deserted the cause of country and of creed, which he had previously borne with equanimity because he felt them to be unjust, assumed a very different significance when he could no longer persuade even himself that there was any definite prospect of seeing that sectarian equality established for which he so long had striven. *With the literal realization of the project propounded by O'Connell, for the dissolution of the Union and the reconstitution of a separate Parliament in Ireland, he gave himself perhaps no very practical concern.*"

Let the last damaging sentence be marked. His biographer tells us that Sheil "*gave himself no very practical concern*" (!) with a question that disorganized Irish society, disappointed all Englishmen interested in the prosperity of Ireland, and went far to restore the waning influence of the old ascendancy, by the reactionary influence it provoked. If Sheil's life was to be written at all, the public had a right to know what were his motives in coquetting as he did with such a question. He spoke for it in 1834; but just after he sat down, Sir Robert Peel made the walls of Parliament ring again by producing the evidence of "Richard Sheil, Esq." before a Special Committee in 1825, in which he stated that "Repeal" was only "*a rhetorical artifice*." Numbers of the most honourable Irish representatives refused to obtain seats by not taking "any practical concern" whether the disastrous Repeal cry was a delusion or reality. It is remarkable that with the Irish democracy and the English Whig aristocracy the conduct of Sheil was looked on as unsatisfactory; and after the revelations in Lord Cloncurry's Correspondence upon those

times, we had a right to expect that Sheil's biographer would have treated fully of his conduct.

The truth seems to be, that Sheil had no talents as a man of action, no presumptive qualities to the title of a statesman. His measure seems to be exactly taken in saying that he was an artist in words. He had few profound convictions—no deep moral passion; and without such qualities no man can expect to be a ruler of his kind. Some passages of his life, after reading these volumes, are more inexplicable than ever. After the (so-called) "Repealers" joined the English Liberals, Sheil's claims to notice were brought before Lord Melbourne, and Mr. McCullagh writes:—

"Lord John Russell wrote to Lord Melbourne, suggesting that he should ascertain what his views as to office were. The premier did so, asking him if he still looked for professional advancement. He said, No, that he had very much forgotten his law, and would prefer political or other office. On learning this, Lord John proposed that he should have the clerkship of the Ordnance, saying 'that although he might have forgotten his law, he was certainly well up to working the guns.' Some delay however intervened, and the commissionership of Greenwich Hospital fell vacant. It certainly was hardly worthy of his acceptance; but he had often expressed an anxiety to have something for life, as his income was chiefly dependent on that of Mrs. Sheil, and under the impression that it was permanent and compatible with parliament, Lord Melbourne offered it to him. In the conversation which took place upon the occasion, Sheil said he preferred it on this account to the clerkship of the Ordnance, although he added, laughing, the salary is not very splendid. Lord Melbourne replied that '600*l.* a-year was a very good thing, and 300*l.* a-year was a very good thing: Sir Henry Parnell used to boast that he lived upon 200*l.* a-year, and lived like a gentleman.' * * His acceptance of this appointment was much disapproved of by many of his warmest friends. When Mr. Woulfe heard of it, he exclaimed, 'It is an act that those who love and value Sheil as he deserves, never can forgive him.'"

—This shifting about from office to office reads pleasantly in the face of our disasters in the Crimea. Because Sheil had forgotten his law he was to go into a department the duties of which he had never learnt.

Sheil was not then in want of money; his wife (a most estimable woman) was very rich; he had only one child. A popular leader willing to acquire any post with a good salary—begging and bargaining for a provision, without one thought of his fitness or unfitness for the office—is by no means a wholesome spectacle. He was subsequently made a Vice-President of the Board of Trade, Judge-Advocate General, and Master of the Mint, and afterwards Minister at Florence. It seems, however, that he was not satisfied, inasmuch as he was not made a Cabinet Minister.

On a variety of other important questions we had hoped that Sheil's biographer would have thrown light. The general historian has not much to learn from the outlines in this work, and much of the personal life of Sheil is unnoticed. Several cases in which he distinguished himself at the bar are not even mentioned, including actions for breach of promise of marriage in which he was specially retained. Various important phases of the Roman Catholic question, before and after 1829, are not even indicated, and we have no account of the feelings of Sheil during Cardinal Wiseman's aggression. This reticence is the more remarkable from a biographer whose experience as a publicist must have qualified him for special elucidation of his subject.

From these points we turn to the interesting anecdotes scattered through this work. They are not so numerous as we could wish, but some of them are very good. In their latter

days Sir Robert Peel and Sheil often found themselves together.—

"Early in August [1848] he was one of a party invited to meet Sir Robert Peel at Nuneham, the seat of Mr. Vernon Harcourt, in Oxfordshire. He was much pleased with the tone and manner of the ex-Premier, which was, he said, much less reserved and more out-spoken than he had anticipated—no assumption and no compliments, but on the whole conciliatory, and his talk about politics very suggestive. There was a good deal of conversation about Ireland, of which his mind seemed full. The expediency of putting the relations between the State and the Catholic Church on a different footing had obviously engrossed much of his thoughts; and in reply to an observation respecting direct endowment, Sir Robert assented, adding pointedly, 'It would be impossible for me to do it.' In a letter, written on his return to town, allusion is made to this visit. 'I went on Saturday last to Mr. Harcourt's, in Oxfordshire, where I met Sir Robert Peel. He was exceedingly gay and agreeable, and appears to have no desire to return to office. We had a large party of Tories. I make no doubt that Ministers will propose to endow the Catholic Church next session.'"

The following, about Mr. Disraeli, is interesting:—

"For the wit and eloquence of Mr. Disraeli he often expressed the highest admiration. It was the fashion at the time among his own party, especially amongst the mediocrities and conventionalists, of which the bulk of all parties are made up, to decry the talents of one who had seized on political position by a Parliamentary *coup de main*, and seemed determined to retain it, in defiance of all the solemn protests of dowagerhood and dullness, by his own indomitable will. At the anger of the born-statesmen, that a great party should be led by a man without connexions or landed title to bear rule over a landed Parliament, Sheil laughed heartily. But with those few fellow-plebeians, who, like himself, were not ashamed of their order, the triumph of Mr. Disraeli was felt to be the triumph of unfriended, unaided, untolerated genius over the most relentless of all monopolies—that of political caste. 'It is wonderful,' he would exclaim, in audible soliloquy; 'I have had some experience of what he has undergone and overcome, and I think it wonderful.'"

—And the author then quoted the saying of Sheil, when, in a financial speech, Mr. Disraeli was dull,—“He is an anatomist without a corpse.”

In his latter days, Sheil gave himself up to saying very sharp things; some of the best of which were too savage for type.—The following is amusing to the initiated; and it is told guardedly. After alluding to Lord Bessborough's vice-royalty, Mr. McCullagh relates:—

"During the famine, a nobleman of large estates in Ireland had rendered himself somewhat remarkable by the publicity of the attentions he paid to a lady of great personal attractions. Many of his friends reproached him with not taking a more exclusive interest at such a time in public affairs. Their remonstrances proved unavailing, and Sheil resolved to try the effect of a joke. 'What is the armorial motto of the family?' he asked, 'for whatever it is, it must after this year be changed, and I can tell you what the new one will be—*Sine Cereve Venus*.'"

Of Sheil's extraordinary power of verbal memory, and his mode of preparing all his speeches, we get the following picture. In the O'Connell case, in 1843, he recited his speech to the reporters beforehand.—

"Far greater was their surprise when he undertook to speak it for them by anticipation. With his hands wrapped in flannel he kept moving slowly up and down the room, repeating with great rapidity, and occasionally with his wonted vehemence of intonation, passage after passage, and paragraph after paragraph; then, wearied with the strange and irksome effort, he would lay himself down upon a sofa, and after a short pause re-commence his expostulation with the jury, his allusions to the Bench, and his sarcastic apostrophes to the counsel for the Crown. On he went, with but brief interruptions,

and few pauses to correct or alter, until the whole was finished, and had been accurately noted down. Written out with care, it was sent to the printer, and at the moment when he rose to speak in court, printed copies were in the hands of those who had faithfully rendered his ideas previously. As he proceeded they were thus enabled to mark easily and rapidly any slight variations of phraseology; but these for the most part were so few and trivial as to cause little delay in the correction of the proofs."

All through life he carefully wrote out beforehand every word that he was going to say. Of course, such a system left him nothing but "a set speaker," incapable of following an adversary. It made him excel as a rhetorician. A debater he never became.

But there were brilliancy, sarcasm, and high literary finish in his words. His speeches in Parliament were like the essence of a score of pungent leading articles, allusive, caustic, and full of incrimination. They rarely exceeded an hour, and were not discharged often in a session. Though there was more of Vauxhall than of the actual siege of war in their stunning noise and flaming display in a party point of view, they were always ornamental, and often most formidable.

On the whole, we expected more from these volumes. The celebrity of their subject, and the well-known literary accomplishments of their author, made us hope that some important lights would have been thrown on the modern history of Ireland. We have read more effective compositions from the author's pen, and we fear that the constraint in its pages has diminished the vivacity of his style. But the work is composed in admirable temper; unlike the case of other Irish biographers, the author has neither pricked his own fingers nor those of any one else; and, in spite of its reticence and omissions, there is enough of curious matter in its pages to commend it to an extensive circulation.

Sisters of Charity, Catholic and Protestant, Abroad and at Home. By Mrs. Jameson. Longman & Co.

'Sisters of Charity,' a lecture, privately delivered, and now printed, we welcome gladly, for though it makes but a little book it is a leaven that will work much good. It is not only admirable in its design and spirit, but (what is scarcely less essential in the present instance to its success) it is written with exquisite tact and judgment, conciliating whatever of prejudice or adverse sympathy might lie upon the surface of the subject. It is what a woman's appeal ought to be, if it is to be successful,—full of the subtle sympathy and delicate tact which understands the vulnerable point where difficulties may be assailed, and which reconciles rather than conquers. Women have always been treated as though they were a race of beautiful zebras, entirely incapable of being trained for use. The subject presented in Mrs. Jameson's lecture is, "Whether there be any hope or possibility of organizing into some wise and recognized system the talent and energy, the piety and tenderness of our women for the good of the whole community?"

Here is a subject opened affecting the welfare of society; but it is from women themselves that the help must come,—the word that sleeps yet unspoken must be uttered by one of them. No man can give shape and utterance to the thoughts and aspirations and capacities that lie, latent or fermenting, in the hearts of women. There have been in all ages men endowed with apostolic natures, who have been able to speak to men,—to unite their hearts for the attainment of this or that great object of the moment:—but, as regards women, the ele-

ment of combination and coherence has yet to be discovered. They cannot be true to themselves:—with all their wealth of passionate sensibility, devotion, patient self-sacrifice, noble heroism, and high-minded sense of duty, it is nevertheless true of them as a body that "they all seek their own." Their virtues are individual, and their intense personality carries egoism and exclusiveness to the root of their inner life. Their virtues are all for the benefit of the men to whom they attach themselves; women are rarely friends to each other. It is scant measure of generosity, and still less of justice, that women mete out towards women,—each of them seeks to make her own terms secretly with the world; and being thus divided against themselves, what wonder that the "condition of woman" is still the complicated social problem, for which there are so many patent theories, but which no one has yet arisen to solve. The moral teacher who next rises to instruct the world needs to be a woman! But she is not come; and, in the meanwhile, we must proceed to deal with Mrs. Jameson's excellent little book,—in which there is a full appreciation of all the difficulty and a *presentiment*, at least, of the solution.—

"In the last census of 1851, there appears an excess of the female over the male population of Great Britain of more than half a million, the proportion being 104 women to every 100 men. How shall we employ this superfluity of the 'feminine element' in society, how turn it to good and useful purposes, instead of allowing it to run to waste? Take of these 500,000 superfluous women only the one-hundredth part, say 5,000 women who are willing to work for good, to join the communion of labour, under a directing power, if only they knew how—if only they could *learn* how—best to do their work, and if employment were open to them,—what a phalanx it would be if properly organised? Everywhere I find the opinion of thoughtful and intelligent men corroborative of my own observations and conclusions. In spite of the adverse feeling of 'that other public, to which we, the sensible reflecting public, are not in the least degree related,'—in spite of routine and prejudice,—the feeling of those who in the long run will lead opinion, is for us. They say, 'In all our national institutions we want the help of women. In our hospitals, prisons, lunatic asylums, workhouses, reformatory schools, elementary schools,—everywhere we want efficient women, and none are to be found prepared or educated for our purpose.' The men whom I have heard speak this, seem to regard this infusion of a superior class of working women into our public institutions as a new want, a new expedient. They do not seem to feel, or recognise, the profound truth, that the want now so generally felt and acknowledged, arises out of a great unacknowledged law of the Creator,—a law old as creation itself, which makes the moral health of the community to depend on the co-operation of woman in all work that concerns the well-being of man. For as I have said before, it is not in one or two relations, but in all the possible relations of life, in which men and women are concerned, that they must work together for mutual improvement, and the general good; and I return to the principle laid down at first, 'the communion of love and the communion of labour.'"

The following is admirable as well as eloquent. Mrs. Jameson throughout insists upon *training and discipline* as the indispensable prelude to any good word or work.—

"If domestic life be, then, the foundation and the bond of all social communities, does it not seem clear that there must exist between man and woman, even from the beginning, the communion of love and the communion of labour? By the first, I understand all the benevolent affections and their results, and all the binding charities of life, extended from the home into the more ample social relations; and in the latter I comprehend all the active duties, all intellectual exercise of the faculties, also extended from the central home into the larger social circle. When from the cross those memorable words were

uttered by our Lord, 'Behold thy Mother! Behold thy Son!' do you think they were addressed only to the two desolate mourners who then and there wept at his feet? No—they were spoken, like all his words, to the wide universe, to all humanity, to all time! I rest, therefore, all I have to say hereafter upon what I conceive to be a great vital truth,—an unchangeable, indisputable, natural law. And it is this: that men and women are by nature mutually dependent, mutually helpful; that this communion exists not merely in one or two relations, which custom may define and authorise, and to which opinion may restrict them in this or that class, in this or that position; but must extend to every possible relation in existence in which the two sexes can be socially approximated. Thus, for instance, a man, in the first place, merely sustains and defends his home; then he works to sustain and defend the community or the nation he belongs to: and so of woman; she begins by being the nurse, the teacher, the cherisher of her home, through her greater tenderness and purer moral sentiments; then she uses these qualities and sympathies on a larger scale, to cherish and purify society. But still the man and the woman must continue to share the work; there must be the communion of labour in the large human family just as there was within the narrower precincts of home. You will wonder that I begin with truisms such as no man in his senses ever thinks of disputing; but the wonder is that, while admitted, they are never acted upon. Can you give me any one instance in which this primal law of our being, with regard to the distribution of work, has been taken as the natural and necessary basis for any improvement in legislation or in education? Can you point to any one among these piles of Blue-books and reports,—educational reports, sanitary reports, jail reports, juvenile delinquent reports,—in which such principles are adverted to? It is granted as a principle that ample scope should be given for the man to perform his share of the social work, and ample means of instruction to enable him to perform it well. What provision is made to enable the woman to do *her* work well and efficiently! It is not charity, nor energy, nor intelligence which are wanting in our women, any more than dauntless bravery in our men. But something is wanting; or surely from so much good material, more positive and extended social benefits would arise. What is wanting is more moral courage, more common sense on the part of our legislators. If men were better educated they would sympathise in the necessity of giving a better education to women. They would perceive the wisdom of applying, on a large and efficient scale, the means of health, strength, and progress which lie in the gentler capacities of the gentler sex,—material ready at hand, as yet wasted in desultory, often misdirected efforts, or perishing inert, or fermenting to evil and despair. Lying at the source of the mischief we trace a great *mistake* and a great *want*. The great mistake seems to have been that in all our legislation it is taken for granted that the woman is always protected, always under tutelage, always within the precincts of a home; finding there her work, her interests, her duties, and her happiness: but is this true? We know that it is altogether false. There are thousands and thousands of women who have no protection, no guide, no help, no home;—who are absolutely driven by circumstance and necessity, if not by impulse and inclination, to carry out into the larger community the sympathies, the domestic instincts, the active administrative capabilities with which God has endowed them; but these instincts, sympathies, capabilities, require, first, to be properly developed, then properly trained, and then directed into large and useful channels, according to the individual tendencies. As to the want, what I insist on particularly is, that the means do not exist for the training of those powers; that the sphere of duties which should occupy them is not acknowledged; and I must express my deep conviction that society is suffering in its depths through this great mistake and this great want. We require in our country the recognition—the public recognition—by law as well as by opinion, of the woman's privilege to share in the communion of labour at her own free choice, and the foundation of institutions which shall train her to do her work well. I am anxious that you should not misunderstand me at the outset with regard to this '*woman-*

question,' as it has been called. I have no intention to discuss either the rights or the wrongs of women. I think that on this question our relations across the Atlantic have gone a mile beyond the winning-post, and brought discredit and ridicule on that just cause which, here in England, prejudice, custom, ignorance have in a manner crushed and smothered up. It is in this country, beyond all Christian countries, that what has been called, quaintly but expressively, the 'feminine element of society,' considered as a power applicable in many ways to the amelioration of many social evils, has been not only neglected, but absolutely ignored by those who govern us. The woman cries out for the occasion and the means to do well her appointed and permitted work, to perform worthily her share in the natural communion of labour. Because it is denied to her she perishes, 'and no man layeth it to heart.'"

In our progress through the book we find we had turned down nearly all the pages for quotation; but better than all quotation will it be if our readers will take the book in hand for themselves. In the belief that such will be the case, we leave Mrs. Jameson with the hope that the good seed she has scattered may take root and bring forth fruit.

History of the Two Tartar Conquerors of China, including the Two Journeys into Tartary of Father Ferdinand Verbiest, in the Suite of the Emperor Kang-hi. From the French of Père Pierre Joseph d'Orléans. Translated and edited by the Earl of Ellesmere. Printed for the Hakluyt Society.

THE reasons for the selection of this little work, we are told in the Preface, are, the highly interesting character of the two journeys into Tartary performed by Father Verbiest in the years 1682 and 1683, and the especial claim which all authentic information respecting the Tartar dynasty in China has upon the attention of the general reader at a time like the present, when the progress of that formidable and most singular revolution there bids fair to restore native princes to the throne of their conquerors.

The narrator, Father Ferdinand Verbiest, was sent out to China in 1659 as the coadjutor of the celebrated Adam Schall, a Jesuit of great skill in mathematics and the experimental sciences, and the successor of the illustrious Ricci. As Schall was advanced in life—almost seventy—Verbiest became his coadjutor, and partook of the favour which had been shown him by the Emperor. Soon after, in consequence of the Emperor's death, both Schall and Verbiest underwent under the regency severe persecution:—the former sank beneath his trials, at the age of seventy-eight; but Verbiest survived to become a favourite of the son, Kang-hi, who, on attaining his majority, appointed him successor of Schall in the department of astronomy, and even condescended to take lessons in mathematics, for which purpose Verbiest made himself master of the Tartar language. The varied talents of the Jesuit missionaries had often before—in China, as elsewhere—been put in requisition, but seldom, perhaps, more singularly than in the case of Father Verbiest, who in 1681 was desired by the Emperor to superintend the casting of his artillery, and who succeeded so well in this warlike occupation, that "he had the satisfaction of offering the Emperor a park of three hundred and twenty pieces of his own manufacture." Such a person had, therefore, no common opportunities for obtaining information regarding this far-off and little known kingdom; and we cannot be surprised that his narrative, although now well nigh forgotten, excited much interest on its first appearance in Europe.

The earlier portion of the narrative gives an account of the two successive conquests of China by the Tartars. The first, effected by the Eastern

Tartars,—the second, about a hundred and fifty years after, by the more energetic Western Tartars. Verbiest's narrative—very cursory as to the history of the last three Emperors—presents the usual details of conspiracies and revolts and most sanguinary contests, until the energetic rule of Chunchi reduced the land to peace and to a comparative degree of prosperity. Several anecdotes of this Tartar sovereign show how attached he was to the Jesuit missionaries, and how anxious to benefit by European knowledge. He died, however, while still young, of the small-pox, leaving a son only eight years old as his successor. As Chunchi was strict in maintaining the observance of Tartar customs,

"the queen, his mother, after his example, renewed the cruel custom of compelling the living to follow the dead. Chunchi had had a favourite, a young Tartar, one of the best born and best bred adherents of the court. As soon as the emperor had expired, the empress sent for this young man, and looking at him with an eye of anger, said: 'Is it possible that you are still alive?' The prince understood this language, and the empress was not long in making it clear. 'Go,' she said, more gently, 'go and keep company with my son. He loved you well, and, as I believe, you replied to his affection and the honour of his friendship. He expects you; go and rejoin him, and by your promptitude in so doing show yourself worthy of his impatience for the meeting. You love him. Further discourse is needless. Go and bid adieu to your parents, but hasten to show your fidelity to your sovereign and your attachment to your friend.' The sorrow which this sentence, so sad and so little expected, caused to the young man's family, is not to be described. He himself quitted life with regret, for his attachment was not strong enough to make him hate existence. He was counselled to escape, and was not deaf to the advice; but the queen took care to anticipate it, for she sent him in a gilded casket a bow-string by two messengers, who were charged to give every assistance for its use, which any failure of his own courage might render necessary. Thus perished this prince, happy had he been less favoured by nature and fortune."

Camhi, Chunchi's successor, on attaining his full age, re-established the Jesuits, and became on even more friendly terms with them than his father. After putting down a very extensive revolt, and "peace having been thus re-established, the Emperor set out on the 23rd of March, 1682, to go to the province of Leauton, which is the country of his ancestors, for the purpose of visiting their sepulchres." His eldest son, "his three principal queens, and the grandees and mandarins of the court," with a retinue consisting in all of more than seventy thousand, set forth; and "he desired that I also should accompany him, that I might make in his presence the observations necessary to know the disposition of the heavens, the elevation of the pole, and the declination of each country." For the convenience of this vast multitude, a new road was made, of far inferior construction, indeed, to those of Kublai Khan, but still a work of immense labour, for it extended eleven hundred miles from Pekin, was quite level, about ten feet in width, with a little bank about a foot high on each side, and "as clean as the floor where the labourers thresh the corn in the fields." Inferior roads were made beside this royal causeway, for "the infinite number of waggons, camels, horses, and mules;" besides the droves of oxen, sheep, and other cattle destined for the food of this immense concourse. The road was so well marked out that they encamped each night near the banks of some river. Speed, as may be supposed, was out of the question, and we find that in the space of three months they only advanced nine hundred miles.

A short account of a journey made in the suite of the same Emperor by Father Pereira

forms the Appendix; and the whole volume forms a pleasant addition to our stock, hitherto scanty, of *authentic* information respecting "the Celestial Empire."

MINOR MINSTRELS.

Sonnets, Reflective and Descriptive. Second Series. By Lord Robertson. (Edinburgh, Fraser & Co.)—The moment of the late Lord Robertson's decease, when the journals of the day were recording the style and titles on which he was allowed access to the intellectual and brilliant circles of the northern metropolis, was hardly one during which any critic would choose to deal with the deceased's attempts as a sonneteer.—The funeral train now, however, has passed, the herald has "said his say," the vault is closed, and the book of strange rhymes may be opened. Very strange are the rhymes in the book,—wandering on, betwixt reason and romance, with an aimless feebleness that is little stronger than fatuity. The late Lord Robertson fancied, apparently, that no language could be fine enough for verse; and that provided his language was fine, the fitting or misfitting of epithets and sentiments was a matter of minor consequence. Here, to exemplify, are things said by him concerning "the Mountain Ash" which have been

—"unattempted yet in prose or rhyme."

The Rowan Tree by the Mountain Stream.

Flaunting in summer's pride that garish tree,
Her fan-like leaves, her gems—a gorgeous shower,
Would fondly picture in the glowing hour,
Soothed by the chaunt of thy wild symphony,
That song she deems a serenade from thee.
But ah! like love's lorn wail thy drooping form
No answer yieldeth to her plaint forlorn,
In her dark bosom finds no sympathy.
Where might her mirror be? thy fountain rude
No spangled waters sends through this lone wild;
Simply she warbles, as a rustic child,
The hymn that charms this rock-girt solitude.
Then commune with the gales, bewildered tree,
Or with the glowing sky claim fealty.

Deeper and more mysterious oracles than the above are to be found among the sonnets which were produced by the late Lord Robertson, when he appears to have thought that he was thinking.

Ex Eremo: Poems written chiefly in India. By H. G. Keene. (Blackwood & Sons.)—Here is another odd miscellany, the contents of which may be pronounced "rich and strange," without abuse of language. Here, by way of sample, the ocean is made to "suffer a sea-change" which is new to us.—

Stand by the ocean;
Behold its undulating shelves,
How they alternately uplift themselves,
Their ceaseless motion!

Page 42 of 'Ex Eremo' contains another curiosity—a set of words to the well-known Italian melody, 'O cara memoria'—so constructed that it would be impossible to sing them to the tune. 'The Origin of Caste: a Mystery,' is apparently comical and philosophical, as though far-off echoes of the sarcasms of *Mephistopheles* and of the "battered thunder" in 'Festus' had swept over the strings of Mr. Keene's harp, making it utter strange sounds. The eight opening lines are spoken by a celebrated historical personage, on the top of "Meru Mountain," which, it may be remembered, the Smiths assured us is

—"ninety times as high as St. Paul's."

Satan. Whew! how I freeze! Of all the walks I've had—
And they've been many—none were e'er so mad
As into this unholy altitude:
Those plains are fine though, and, if I'm not wrong,
The climate there would suit me. I have viewed
The scene before; the people, I have long
Wished for my servants, even now are crossing
This very chain of mountains from the north.

A third and last extract shall show how a bridegroom in expectancy can lisp in numbers.

Creation casts its burthen
On such a holy day;
Shall I not to her then
My full heart's adoration meetly pay?

She who has consented
To be, to-day, my bride,
And has not repented
For any ills that might meantime betide.

Dearer than all creatures
Of sight, or thought, or dream,
Gilds me to-day her features
With the mild lustre of love's languid beam.

While, upon the Evangels,
I pledge to her my faith,
Give ear, all good Angels,
To the true words my passionate spirit saith.

Absurd as are the above fragments,—by no means the most absurd which 'Ex Eremo' contains,—the volume affords indications that Mr. Keene may have been originally capable of better things than making up a book of nonsense-verses for no one to buy.

The Olden and Modern Times: with other Poems. By the Rev. W. Smith Marriott, M.A. (Rivingtons.)—This is a most miscellaneous volume of pleasing and elegant verse—but verse of little force or originality. We have patriotic songs,—recollections of Dorsetshire,—the poor man's Paradise,—and a series of hymns and sacred pieces. They are poems to amuse a domestic circle or a neighbouring square, but are not worth a wider reputation. 'Olden and Modern Times' is a harmless satire by a man with too much of the milk of human kindness in him to have any preponderance of Juvenalian bile. The author attacks the cotton lords and the man who walks on the Drury-Lane ceiling, Sir James Graham and the Bishop of Durham, the Charitable Trust Commission and the voters for the Jew Bill. The verses indicate a good husband and warm politician, and a lover of nature, but not a nature much racked by poetic pains.

Lays and Lyrics. By C. Rae Brown. (Hall & Co.)—Our author, to judge by his Elegy to the Memory of Thom of Inverury, his praises of Roseneath, and his Jacobite Song, is probably a Scotchman. By his verses on a Stale Lobster, we should conclude him to be a man of small taste;—from his commonplace ding-dongs about emigration and progress, we presume him to be a political rhymist of the "good-time-coming" school. A few years ago, under the Pope régime, Mr. Brown would not have been bearable, and must have, very deservedly, withered away in the poet's corner of some provincial Scotch newspaper. Now, thanks to the fashion of drawing fresh from nature, we have a few verses that are truthful and graphic. A long experience with poetlings and poetasters enables us to know that a man whose title-page comprises merely a series of 'Caged Larks,' 'Childhood,' 'Nectar of Life,' and such strains, will never pluck the laurel; but we respect the author whose love of nature is sufficiently strong to lead him to wish, by publishing, to rouse other minds to see the same beauties. We esteem the author whose hopes in those climacteric moments of life when verse is written, tend to universal peace, make him sigh for Poland, shout consolation to our distant army, or denounce slavery. But when we find, however amiable such aspirations may be to the individual private man, that his publicly-expressed idealities are not more fervid than those of a debilitated speaker at a vegetarian banquet, or a pale, flaccid chairman at a Teetotal Reunion, we begin to think more of the writer's vanity and less of his disinterested patriotism.

Anglo-Belgic Ballads and Legends, and other Tales in Verse. By Charles F. Ellerman. (Houlston & Stoneman.)—The important pages in this volume are the prefaces to the Ballads and Legends. In these Mr. Ellerman flies at Columbus,—the Court of Chancery,—the Scarlet Lady of Babylon,—and Cobbett's antipathy, the Old Lady of Threadneedle-street, with that

determined sprightliness of style which makes up the most dismal reading printed.

Poetical Enigmas, by F. J. Matthew (Clarke, Beeton & Co.), is the laborious effort of perverted ingenuity. No poetry can redeem the intolerable solemn dullness of an enigma.

The Treasury of Rhapsodies: a Tale of Egypt. By J. T. Phillips, M.A. Illustrated by H. G. Hine. (Bogue.)—This is an old tale, out of Herodotus, chopped into metrical lengths, and loaded with slang and puns.

The Ballad of Sir Rupert, a Ghost Story, by E. H. R. (Monmouth, Farrer), is the story of the "spectre-tower," broken up into readable ballad verse.—*The Lost Child, a Legend*, by H. Stone (Adams & Gee), is a tale of maternal affection, founded, we presume, on a real incident.—*The Christian at Home, Reflections in Prose and Verse* (Fowler), is a well-intentioned volume of prose and verse. Herbert's lines should, however, be quoted.—*A Night in Buenos Ayres, a New Drama in Five Acts*, by Bushby (Settle),—a drama founded on a scene in the life of Rosas. A strange book, as full of murder as 'Titus Andronicus,' and about as amusing.—*Cristel, a Christmas Poem, and Sonnets*, by Cephas (Oxford, Slatter & Rose).—Very quaint verses, but though sadly affected not without merit. The rhymes seem written for the purpose of weaving fresh combinations of words rather than thoughts.—*The Life of C. W. Jayne* (Binns & Goodwin).—A very harmless satire, not in the best taste, attacking light reading, smoking, mustachios, and other enormities of a country enveloped, as Mr. Jayne rather oddly expresses it, in "a howl of war, a fog of ignorance, and a haze of blood."—*Our Country, an Essay* (Hardwicke), is a strange unmetrical protest against the national debt, which if the author wrote with more energy would be mere rant, but is now mere nonsense.

Among minor sacred poetry, we may class, almost without comment, *Sunday Afternoon* (Bagster),—*The History of Our Blessed Lord* (Parker),—*Sacred Melodies* (Edinburgh, Gall & Inglis),—and *Sacred Song-Book* (same Publishers), which are all well-intentioned books, of no merit, never rising in a single line to poetry.

The Chemistry of Common Life. By James F. W. Johnston, M.A. 2 vols. Blackwood & Sons. No more brilliant page has been written in the history of human progress than that which records the advance of chemical science. Dealing with the properties of elements whose relations to each other lie at the foundation of all human occupations, of all changes in the inorganic and organic worlds, and at the very source of life itself, chemistry is at once the most abstract and the most practical of all sciences. Within the present century it has realized more than the imagination of the most ardent alchemist dared to hope for, and still promises more brilliant results than any which have yet been attained. Although untaught in our Universities and neglected in our schools, it has fascinated a larger number of investigators in this country than any other branch of science; and England, though she cannot boast of her chemical schools, has reason to be proud of the position taken by her chemical philosophers. It will, we think, be a source of astonishment in future times to those who look back on the past history of our country, to find that amidst her vast material progress and the increasing development of her industrial resources, so little was systematically done to encourage a diffusion of the knowledge of the science which, above all others, seems to lie at the very foundations of her prosperity. Of all the natural sciences Chemistry seems the one best adapted for form-

ing a branch of study and a method of education in our schools; but how little has been done the statistics of our teaching will show. That there is a desire to know something more of this subject seems indicated by the demand for such works as 'The Chemistry of Common Life'; but it is a great mistake to suppose that chemistry, or any of the natural sciences, can be taught, or that they can become methods of education, by mere reading. The laws of natural science are derived from observation and experiment, and a correct knowledge of the import and value of these laws can only be imparted through the operations of the senses on the facts they embrace. It is useless to expect to teach natural science without museums, apparatus, experiments, and specimens. We know not to how large an extent there may be a public prepared to intelligently apprehend Mr. Johnston's 'Chemistry of Common Life'; but if we may judge of the want of a knowledge of the most elementary principles and facts of chemistry that characterize what are ordinarily regarded as the intelligent classes of our community, they are really very few. The desire to know, we believe, exists, but the education necessary to appreciate is limited. Yet Mr. Johnston's book is a book for the people: there is hardly a fact or a principle that it would not be for the benefit of the richest as well as the poorest to know. Who is not interested in common life?—and every day this common life abounds with marvels more astonishing than any performed by human dexterity or imagined in Eastern fiction. The Air we Breathe—the Water we Drink—the Soil we Cultivate—the Plants we Grow—the Bread we Eat—the Beef we Cook—the Beverages we Infuse—the Sweets we Extract—the Liquors we Ferment—the Narcotics we Indulge in—the Odours we Enjoy—the Smells we Dislike—the Body we Cherish, are the themes of Professor Johnston's volumes. In the bare enumeration we see the vast field of observation gone over; and yet in every separate department Chemistry has made its discoveries and won its triumphs.

One of the most interesting parts of this work is that devoted to the Narcotics we indulge in. Here the lovers of "the luxurious weed" will find a full account of the culture, properties, and chemical composition of their favourite; whilst those who condemn the use of this and other narcotics will do well to ponder over the curious fact of their almost universal employment by man.—

"Siberia has its fungus.—Turkey, India, and China, their opium.—Persia, India, and Turkey, with all Africa from Morocco to the Cape of Good Hope, and even the Indians of Brazil, have their hemp and haschisch.—India, China, and the Eastern Archipelago their betel-nut and betel-pepper—the Polynesian islands their daily ava.—Peru and Bolivia their long-used coca.—New Granada and the Himalayas their red and common thorn-apples.—Asia and America, and all the world, we may say, their tobacco.—the Florida Indians their emetic holly.—Northern Europe and America their ledums and sweet gale.—the Englishman and German their hop, and the Frenchman his lettuce. No nation so ancient but has had its narcotic soother from the most distant times—none so remote and isolated but has found within its own borders a pain-allayer and narcotic care-dispeller of native growth—none so savage which instinct has not led to seek for, and successfully to employ, this form of physiological indulgence. The craving for such indulgence, and the habit of gratifying it, are little less universal than the desire for, and the practice of, consuming the necessary materials of our common food. Thus it may be estimated that the several narcotics are used—

Tobacco	among	800	millions of men.
Opium	"	400	"
Hemp	"	200 to 300	"
Betel	"	100	"
Coca	"	10	"

A tendency which is so evidently a part of our general human nature, is not to be suppressed or extinguished by any form of mere physical, fiscal, or statutory restraint. It may sometimes be discouraged or repressed by such means, but even this lesser result is not always attainable. This was proved by the failure of the Spaniards, in their attempts to check the consumption of coca in Peru, of kings and priests to prohibit the spread of smoking in Europe and Western Asia, and more recently by the similar failure of the Imperial crusade against the use of opium in China. An empire may be overthrown by inconsiderate statutory intermeddling with the natural instincts, the old habits, or the growing customs of a people, while the instincts and habits themselves are only strengthened and confirmed."

In the chapter on the Poisons, we suspect that many will be astonished to find that substances, regarded as poisons too terrible almost for medicinal use with us, are used as a means of developing the normal powers of the system in other countries. Thus, in Styria, Lower Austria, and Hungary, the practice prevails of eating arsenic, not for the sake of its pleasurable effects, but for the purpose of developing personal beauty and increasing the strength of the body. The facts brought forward are numerous and conclusive. Prof. Johnston thus speculates on the use of such substances.—

"The perusal of the above facts regarding arsenic—taken in connexion with what has been previously stated as to the effects of the resin of hemp—recalls to our mind the dreamy recollections of what we have been accustomed to consider as the fabulous fancies of easy and credulous times. Love-philtres, charms, and potions start up again as real things beneath the light of advancing science. From the influence of hemp and arsenic no heart seems secure—by their assistance no affection unattainable. The wise woman, whom the charmless female of the East consults, administers to the desired one a philtre of haschisch, which deceives his imagination—cheats him into the belief that charms exist and attractive beauty, where there are none, and defrauds him, as it were, of a love which, with the truth before him, he would never have yielded. She acts directly upon his brain with her hempen potion, leaving the unlovely object he is to admire really as unlovely as before. But the Styrian peasant-girl, stirred by an unconsciously growing attachment—confiding scarcely to herself her secret feelings, and taking counsel of her inherited wisdom only—really adds, by the use of hidri, to the natural graces of her filling and rounding form, paints with brighter hues her blushing cheeks and tempting lips, and imparts a new and winning lustre to her sparkling eye. Every one sees and admires the reality of her growing beauty: the young men sound her praises, and become suppliants for her favour. She triumphs over the affections of all, and compels the chosen one to her feet. Thus even cruel arsenic, so often the minister of crime and the parent of sorrow, bears a blessed jewel in its forehead, and, as a love-awakener, becomes at times the harbinger of happiness, the soother of ardent longings, the bestower of contentment and peace! It is probable that the use of these and many other love-potions has been known to the initiated from very early times—now given to the female to enhance her real charms—now administered to the lords of the creation, to add imaginary beauties to the unattractive. And out of this use must often have sprung fatal results,—to the female, as is now sometimes the case in Styria, from the incautious use of the poisonous arsenic; to the male, as happens daily in the East from the maddening effects of the fiery hemp. They must also have given birth to many hidden crimes which only romance now collects and preserves—the ignorance of the learned having long ago pronounced them unworthy of belief."

In this book the curious in such matters will find an interesting account of the progress of Chemistry in the discovery of the natural compounds which give scents to fruits and flowers and the bouquet to wines. The chemist will evidently soon make us independent of the vegetable kingdom for the "odours we enjoy."

We might take exception to some of Prof.

Johnston's physiological views; but where physiologists differ, we must allow chemists to take one side or the other.

NEW NOVELS.

Thorney Hall: the Story of an Old Family. By Holme Lee. London, Smith, Elder & Co.

WE consider 'Thorney Hall' to mark a great improvement upon 'Maude Talbot,' the first work of this author, which was reviewed in the *Athenæum* last year [No. 1375]. The subject of both stories is "Family Pride,"—a different phase being treated in each. In 'Maude Talbot' it was the barren pride in mere antiquity of descent,—in the dry bones of ancestors and the possession of family monuments,—without care or respect for the heroic qualities which alone can ennoble a house, and enable it to subsist through generations of chance and change. It was the dying out of an old family from sheer moral inanition. In 'Thorney Hall' family pride is shown as an ennobling motive of action, inducing the exercise of courage, self-denial, and unswerving persistence in following out an object once adopted as worthy:—the result is, the building up and renewal of a once noble family fallen into decay. In both 'Maude Talbot' and 'Thorney Hall,' it is a sister who is the presiding influence in the story. 'Thorney Hall' is far the more interesting of the two stories: there is much quiet unobtrusive power evinced, and it is combined with a thoroughly healthy and invigorating tone of thought and feeling. It develops the practical heroism that lies in the most dull and unromantic duties of daily life, for all who do them with a noble motive.

We like the introductory sketch, which is extremely well managed. 'Thorney Hall,' with all its lands, which had been in the same family for six hundred years, has at last been squandered and gambled away by an unworthy descendant,—who, unable to endure the ruin he has brought, dies suddenly, leaving two sons and a daughter. The ghastly mystery connected with this old man's death is very well indicated. The daughter of the old squire devotes herself and the fortune she has inherited from her mother to keep a home for her brothers, and to save at least the old hall and a remnant of the estate for them,—living herself in penury and seclusion to give them education and launch them in the world. The elder brother, who is his father over again, sinks the family into irreparable ruin. The family hall passes into the hands of others, and the estates become the possession of strangers. The elder brother is obliged to fly the country, and the sister goes with him;—whilst the younger brother sinks into obscure mediocrity. The character of Miss Grisell Randal is an excellent sketch: her quiet untiring devotion to her brother, her stoical endurance of the utter ruin of all her hopes, and the mournful but noble silence with which she sits down in sight of the old hall, making no secret of her poverty, and no complaint until she dies,—her whole life seeming to have been nothing more than labour and great sorrow.

But it was not so in reality;—and this is the idea in the book which has pleased us. Miss Grisell's example has a living influence; and although she did not herself see the hope of her life realized, it still bears its fruit in the next generation. Nothing truly noble is ever lost. One of the grandsons of her younger brother determines to restore the family to its ancient consequence: it is one of those determinations that is the incantation of a strong will, seldom failing to work out its own fulfilment. He is attended by his sister,—named Grisell, after

their great-aunt,—who, without an idea of being anything more than a plain, conscientious young woman, anxious to do her duty day by day as it arises, stands beside her brother, strengthening him, watching over him, devoting herself to him so long as he needs her;—then leading her own life as a wife and mother,—seeming to take up the tangled and troubled web of her aunt's life, and to work it out to a true and worthy result. The story of the fortunes of the brother and sister is extremely interesting. The character of Hugh Randal is well drawn and sustained: his success in the grand object of his life—the restoration of the family to its former state—and the mortal sorrow that dims all the beauty of the hope almost as soon as realized, giving him days of darkness instead of joy, give an interest to the book, which is only kept from being tragic by the skill with which it is softened into "the milder grief of pity."

Our remarks show that we think well of this book; but we are mistaken if the author be not capable of producing something still better. There is occasionally a lack of force and a slurring over of details which ought to be clearly made out; and this often leaves the effect dim when the idea is excellent.

North and South. By the Author of 'Mary Barton.' 2 vols. Chapman & Hall.

WE imagine that this year of war will produce few better tales than 'North and South,'—which its author has gathered from the columns of a weekly contemporary, retouched and extended. The Author of 'Mary Barton' possesses some of an artist's best qualities. She will be attended to, having never as yet written without engaging the reader's interest, whether he agrees with or dissents from her philosophies. Her dialogue is natural,—her eye for character is keen. She enjoys humour, obviously,—she calls out pathos skilfully. Few things have been met in modern fiction more touching than the fading away of the poor girl to whom Margaret Hale attaches herself on removing from the South to a manufacturing town in Lancashire. The poetical Methodism of this girl,—the homely, uncomplaining affection,—the mixture of rudeness and of reverence with which she looks up to the delicately-nurtured Lady, make up an admirable picture. The Author of 'Mary Barton' seems bent on doing for Lancashire and the Lancashire dialect what Miss Edgeworth did for Ireland and Scott for the land across the border. There has been no use of English *patois* in English fiction comparable to hers. She has strong Lancashire sympathies, too:—if they be class-sympathies such as propel her to a somewhat disproportionate exposure of the trials and sufferings of the poor, her excess is a generous one, and not accompanied by that offensive caricaturing of her more "conventional" heroes and heroines, which must always bring the sincerity of the caricaturist displaying it under question.

In another point the Author of 'North and South' is open to remonstrance. She deals with difficulties of morals needlessly, and too fearlessly, because, as we have again and again said, the riddle propounded cannot be solved in fiction; and because by all one-sided handling of such matters,—when passions become engaged and generous feelings are persuaded, and when the temptation must be dwelt upon as cruel, in apology for the offence,—there is always a danger of unmooring the eager and the inexperienced from their anchorage. The flat lie which Margaret Hale is made to tell in order to secure the escape of her brother, is gratuitous, painful,—staggering as an incident, and without useful result as a lesson. We cannot, in our hearts, blame Margaret; yet the author,

by the sufferings which followed as consequence, takes pains to show how blame-worthy Margaret was. A kindred dilemma, it will be recollected, is to be found in the author's 'Ruth,'—which, in place of aiding, interfered with the advocacy of the cause which was the argument of that novel. Here the motive of the incident is less obvious. In real, actual life, blameable, cowardly, and selfish is the man who turns away from dealing with difficulties so terrible. They must be faced, with such honour, such charity, such disposition to excuse, and such power to weigh good and evil as can be summoned; but to thrust them forward in Fiction (where only artistic truth is possible) amounts, in deed, if not in purpose, to a wilful "playing with fire." It should be added, however, that the tenor and tissue of our author's writings are such as to satisfy us that no wilfulness has been in her mind, but an earnest, if a mistaken, desire to do good.

Life of Thomas Young, M.D. By George Peacock, D.D. Murray.

Miscellaneous Works of Thomas Young, M.D. 3 vols. Murray.

Thomas Young, the eldest of ten children, was born at Milverton, in Somersetshire, on the 13th of June, 1773. His parents were Quakers, occupying a respectable station in the middle ranks of life. Young was brought up in the strict discipline of that sect, and was accustomed in after-life to attribute his extraordinary power and success in acquiring and retaining information in every variety of human knowledge to the abiding influence of his early religious training. The following extract from an autobiographical fragment, giving an account of his early studies shows his precocity and grasp of intellect.—

"For the greatest part of the first seven years of my life, I was an inmate in the house of my maternal grandfather, Mr. Robert Davis, a merchant of great respectability, who lived at Minehead, in Somersetshire. At two years of age I had learnt to read with considerable fluency, and I subsequently used to attend the school of a village schoolmistress, besides being taught at home by my aunt Mary Davis. Under their instructions I read the Bible twice through, and also Watts's Hymns, before I was four years of age. Being naturally fond of reading, I was supplied with the usual run of children's books, and I well recollect the effect produced on my mind by the first perusal of Gulliver's Travels. From my earliest years I was in the habit of committing pieces of poetry to memory, such as Pope's Messiah, his Universal Prayer, Parnell's Hermit, Rack's Lavinia, and many others. When six years old I learnt by heart the whole of Goldsmith's Deserted Village."

After remaining some months at home, during which time he studied scientific books with, as he says, "the most intense interest and delight," he went to school at Compton, in Dorsetshire, where he remained four years. During this period his studies comprehended a wide range in science and literature, including Greek, Hebrew, and Persian. These extraordinary and premature acquisitions naturally attracted considerable attention, and they were soon made useful by his being appointed preceptor, when little more than fourteen years, to Mr. Hudson Gurney, who was Young's junior by only a year and a half. The two boys were subsequently joined by Mr. Hodgkin, who had the general superintendence of young Gurney's studies, though his youthful preceptor continued to retain his office for five years. Young always considered this period of his life as the most profitable with respect both to mental and moral cultivation and improvement. He certainly made great progress in his studies, for the first entry in his journal when he assumed the office of preceptor contains a statement of

his having written out specimens of the Bible in thirteen different languages.

When the time arrived to make choice of a profession he decided on that of medicine; but while studying for his degree the Duke of Richmond, then Master of the Ordnance, to whom he had been introduced by his uncle, Dr. Brocklesby—the friend of Johnson and Burke—offered him the situation of his private secretary. In a letter to his mother, he referred to this offer:—

"I have very lately refused the pressing offer of a situation which would have been the most favourable and flattering introduction to political life that a young man in my circumstances could desire. I might have lived at a duke's table, with a salary of 200*l.* a year, as his secretary, and with hopes of a more lucrative appointment in a short time. I should have been in an agreeable family, have had time enough for study, a library, a laboratory, and philosophical apparatus at my service; and I was not ashamed to allege my regard for our Society as a principal reason for my not accepting the proposal."

These religious scruples were not of long standing. A few months after declining the appointment he went to Edinburgh, where he cast off Quakerism, and entered into the gaieties of that city, which, however, did not materially interfere with his medical studies. From Edinburgh he removed to Göttingen. His great facility in acquiring languages enabled Young to seize the full import of the philosophical lectures by the German professors, and we soon find him plunged in all the deep subtleties of German metaphysics. After graduating and taking a Doctor's degree, he proceeded to Cambridge, where he completed his medical studies. In 1797 Dr. Brocklesby died, leaving Young his house in London and 10,000*l.*

Though now established as a physician, his love for science materially interfered with his professional success. As early as 1799 he wrote his celebrated memoir, 'Outlines and Experiments respecting Sound and Light,' which was read before the Royal Society, printed in their *Transactions*, and which speedily conducted him to the discovery of the kindred principles of optical interferences. "This discovery alone," says Sir J. Herschel, "would have sufficed to have placed its author in the highest rank of scientific immortality, even were his other almost innumerable claims to such a distinction disregarded." His other papers, 'On the Theory of Light and Colours,' followed, which received from the Council of the Royal Society the honour of being selected for the Bakerian Lectures. In 1801, Dr. Young accepted the office of Professor of Natural Philosophy at the Royal Institution, and in 1802 that of Foreign Secretary to the Royal Society,—an office which he held for the remainder of his life, and for which he was well qualified by his familiarity with the principal European languages.

In connexion with his Royal Institution professorship, he delivered a series of sixty lectures, which form the substance of his great work, on 'Natural Philosophy and the Mechanical Arts.' On the completion of this work, he turned his attention to the publication of a medical work, the nature of which will be gathered from the following letter addressed to a friend.—

"I believe your pheasants have assisted in bringing my friend Davy into a hundred a year and the office of Secretary of the Royal Society. It had never occurred to him to offer himself till I suggested it to him one day that he dined with me. The next day he heard of poor Gray's death, and upon applying to the President, he was, after some deliberation, approved, although another person had before been encouraged. If I had not been a member of an *illiberal* profession, I should have liked the situation myself; but perhaps the public is right in discouraging a divided attention. I purpose seriously to do something in physic, by collecting all that is

worth knowing, and comparing it with the general economy of the operations of Nature. I do not know who has attempted to do this soberly: Darwin had neither patience nor precision enough; and I am confident that much more may be learnt and taught in this way than from a routine of old woman's practice, which is all that a fashionable physician obtains. In many other departments of science I have been enabled to draw conclusions from a comparison of the experiments of others, which I should have been much longer in discovering by investigations of my own; and why not in physic?"

Dr. Young regarded the science of medicine as a branch of inductive philosophy; and his medical work, which includes a system of practical Nosology, bears much the same relation to the medical, as his lectures do to the mathematical and physical sciences.

While engaged in his professional and scientific labours, Dr. Young wrote numerous papers in the *Quarterly Review*,—and contributed sixty-three articles to the *Encyclopædia Britannica*, of which forty-six were biographical.

We can only afford space for a passing allusion to Dr. Young's hieroglyphical researches. Those interested in this subject will find it fully treated by his biographer, who shows very conclusively that he had made great progress in the discovery of phonetic hieroglyphics many years before Champollion appeared in the field.

The frequent demands made by Government on the Council of the Royal Society for scientific advice called Dr. Young's services into requisition. Thus, we find him acting as Secretary to a Commission for ascertaining the length of a seconds pendulum,—Secretary to the Board of Longitude,—and superintendent of the *Nautical Almanac*. Yet with this accession of labour, he found time to pursue his optical discoveries and to institute important and original researches on the value of life and life assurance, besides various other scientific investigations,—the results of which he communicated to the Royal Society. Scientific honours followed. Societies at home and abroad enrolled him among their honorary members; and in 1826 he was elected one of the eight Foreign Associates of the Paris Academy of Sciences.

Amidst all these labours, a complaint, from which he had been suffering some time, became more troublesome. The harassing effects of personal attacks, with reference to his management of the *Nautical Almanac*, aggravated the disease which terminated his existence on the 10th of May, 1829. The complaint proved to be ossification of the aorta, which must have been in progress many years, and every appearance indicated a premature old age, the result of unwearied and incessant mental labour. His remains were interred at Farnborough, in Kent, and an appropriate monument was erected to his memory in Westminster Abbey.

In reviewing Dr. Young's scientific life and labours, in connexion with Davy and Wollaston, Dr. Peacock observes:—

"The lapse of a quarter of a century, since the grave—within the brief space of six months—closed upon the labours of these three eminent philosophers, has somewhat changed the order in which they were classed by their contemporaries. If Young held the lowest place in the order of precedence then, he unquestionably occupies the highest now. The most brilliant achievements of Davy, whether considered singly or collectively, are probably surpassed in importance by the discovery and demonstration of the interference of light; but whilst the first received the prompt and unhesitating acknowledgment of the scientific world, and at once secured for their author the honours and rewards which were due to his merits, the second, even after emerging from a long period of misrepresentation and neglect, had to make its way, step by step as it were, and with various and fluctuating fortunes, against the opposition of adverse and long-established

theories, supported by the authority of the two greatest men known to the scientific history of the past and the present age; and it only received a tardy and reluctant recognition—and that rather by implication than avowedly—when near the close of his life, the Rumford medal was awarded by the Royal Society to Fresnel, who completed the structure of which Dr. Young had laid the foundations."

In truth, Dr. Young was an extraordinary being; and the scientific world will feel grateful to his widow for having urged Dr. Peacock with affectionate solicitude to enlarge a short introductory memoir of her husband, which he proposed prefixing to his works, to the full but not prolix life occupying the present volume. He has executed his task with judgment; and the subject of his biography will be raised to the high position which he would have occupied long since had his merits been more widely known. Henceforth Dr. Young will, as Arago predicted, take rank as one of the greatest of modern English philosophers. We have only to add, in conclusion, that the first and second volumes of the 'Works' contain Dr. Young's scientific memoirs, biographies, &c., edited by Dr. Peacock, and the third volume his hieroglyphical essays and correspondence, edited by Mr. John Leitch.

OUR LIBRARY TABLE.

Science and Mechanism: illustrated by Examples in the New York Exhibition, 1853-4. With Annotations and Notes relating to the Progress and Present State of Applied Science, and of the Useful Arts. Edited by C. R. Goodrich, aided by Profs. Hall, Silliman, &c. (New York, Putnam & Co.)—In this annotated catalogue of the New York Exhibition, there is a list, generally descriptive, of the objects exhibited in each class, with brief notes to explain the nature and origin of particular articles, or the processes involved in their manufacture. It is avowed in the Preface that, with few deviations, the plan of the Annotated Catalogue of the London Exhibition has been followed. There appears to have been a defect in the method of obtaining information from exhibitors, so that the statistics of the work are incomplete. The illustrations are few, and, for the most part, paltry. They were supplied by exhibitors, at their own expense, and some of them resemble the woodcuts attached to advertisements in county and colonial journals. We may remark in more favourable terms on the literary portion, executed by Mr. Goodrich and several other gentlemen whose names are given with their contributions. To the classification of products of the American soil some extremely interesting details are appended on the geological history of the continent, and the character of its mineral resources. If Art and Science, however, are sister powers in America, as elsewhere, they are certainly not twins, for the descriptions of works of imagination and fancy suggest little purity or elevation of taste. In decorative design, architectural or cabinet, the productions of the New York artificers by no means excel. They are heavy, rude, and rough. But in mechanics we observe surprising progress, inasmuch that the territories of the Union are likely, at no distant period, to be covered with the mightiest works of an industrial civilization. So rapidly are these material advances made that the national orators may boast without rebuke and extol themselves with impunity from satire, for their country rises above panegyric, and grows so swiftly that, as Burke said, we cease to dispute that we may begin to wonder; while we are calculating the exaggeration ends. As Mr. Goodrich reminds us, the greatest results of American enterprise are those which no Crystal Palace could contain:—the Croton Aqueduct, and the immense web of railways and canals. The quarto volume now published, as a companion to 'The World of Art and Industry,' abounds in varied though fragmentary matter, and goes far to conclude the history of the New York Exhibition, which the former publication left incomplete. Had the engravings harmonized more fully with the high pretensions of the work, there

would have been few deficiencies to regret, except such omissions of detail as the editor imputes to the exhibitors.

My Life; or, the Autobiography of a Village Curate. By Eliza R. Rowe. (Vizetelly.)—This is a mild, innocent story enough, without much freshness, although there is an evident absence of authorcraft. It is, however, very well intentioned; and will, perhaps, find a circle of readers of its own.

Catalogue of Specimens illustrative of the Composition and Manufacture of British Pottery and Porcelain, from the Occupation of Britain by the Romans to the present Time. By Sir Henry De la Beche, C.B., and Trenham Reeks.—The collection, of which we have a catalogue before us, is unique and is the property of the public. It illustrates a very interesting branch of British industry. Those who feel any desire to trace the history or to examine examples of English pottery and porcelain should visit the Museum of Practical Geology in Jermyn Street. This Catalogue contains a concise but valuable history of these branches of British industry, embracing many new and curious facts. It is illustrated with 150 wood engravings, is a royal octavo volume of 200 pages, and is sold to the public for one shilling.

Leaves from a Family Journal. From the French of Émile de Souvestre. (Groombridge & Sons.)—This is a very entertaining little book. We wish with all our hearts it were true; or that there were the least likelihood that anything like it could come to pass in this wicked world of reality, in which we are obliged for our sins to serve our time. King Solomon used to say, "A word spoken in season, how good is it":—how good, we never guessed till we read these "Leaves." They contain the history of a most exemplary young couple, who, although endowed with many virtues, are still only mortal, and fall into many errors; but there is a father—a perfect sage—and an aunt, who must have learnt wisdom from the lips of Penelope herself; and these two amiable individuals are always at hand to make the wrong right, not with the touch of a magic wand, like the good genius in a pantomime, but with that much-despised article—"Good Advice." Good advice in real life never has a fair chance of showing what it can do, for nobody takes it; but in this tale, "Good Advice" has the field all to itself—"a fair field," as one may say, and plenty of "favour"; and certainly no fairy godmother, no benevolent magician, has worked more wonders than Good Advice achieves when it is well followed, as it is in this story from the first page to the last. The young couple get into all manner of sorrows, and troubles, and mistakes; but this only makes more manifest the wonderful virtues of "Good Advice" to extricate them. It is a true enchanter for all who know how to use it. Never did Parr, or Holloway, or Ward of the famous "Drop," or the fabled fountain of perpetual youth do so much to cut off that "heritage of woe" as that wise father and that good aunt accomplish in the pages of the 'Family Journal'; to the which we commend our readers, with our blessing.

On the Study of Language: an Exposition of Ἑπεα Πρὸς ἑστῶτα, or, the Diversions of Purley, by John Horne Tooke. By C. Richardson, LL.D. (Bell.)—The venerable octogenarian, whose celebrated English Dictionary bears many traces of familiarity and sympathy with Horne Tooke's ingenious speculations, here presents to the public a systematic exposition of them, derived from papers drawn up many years ago. By so doing he renders acceptable service to those who may wish to know something of Tooke's doctrines, and yet have not the time or means to consult the two quarto volumes in which they are embodied. With every disposition to recognize the many merits of that remarkable work—the Diversions—especially considering the state of philological knowledge at the time of its composition,—we cannot go so far as Dr. Richardson, who appears quite to idolize its once famous author, and to receive his dicta with unquestioning faith. Were the reverend politician and antagonist of Junius now living, and aware—as he certainly would be—of the immense

progress made in philological science since his time, he would be the first to renounce the errors which his aged disciple holds up to the admiration of the world as magnificent discoveries. He might see reason to question the scientific soundness of starting with the principle that all words,—even indeclinable particles, such as conjunctions and prepositions,—are resolvable into nouns and verbs, and capable of explanation from them. He would certainly recant many of the derivations into which he was led. For instance, he would hardly derive the Latin *decem*, and the Greek *δέκα*, from *δέχσθαι*, if he were familiar with the researches of Grimm, Pott, and Bopp; nor would he trace the English word *just* to the Latin participle *jussum*, and explain it as "that which is ordered or commanded." Still less would he speak of the Latin as "a mere modern language compared with the Anglo-Saxon," and as being composed mainly of Greek and partly of Teutonic. Dr. Richardson's part of the present exposition is, on the whole, worthy of the rank he holds. We could have wished, however, that he had been a little less pugnacious and diffuse in his metaphysical discussions,—which are, to say the least, rather beside the mark, and sometimes border on useless quibbling.

The System of the Universe; or, a Treatise on the Laws of Matter and Motion. By An Observer. (Houlston & Stoneman.)—The author of this treatise undertakes to refute Newton without reading him. He has not the philosopher's work at hand, and, therefore, goes to Helsham's Lecturer. From this circumstance, we may take the exact measure of his logical faculty. He thinks he may explode Newton's theory without being at the pains to examine the reasoning on which it is founded. What his own peculiar notion is we are unable to detect,—unless it be, that matter moves without impulse; but the style of the volume is so hazy, and the illustrations are so confused, that we have failed to discover the author's real intention. All that is certain is, that his "system" contradicts that of Newton, and that he believes himself to be the first and only Light of the world. Professing to assume nothing, he assumes everything, and, most easily of all, that his doctrine rests on its "irrefutability." We believe, however, that a spark of modesty glimmers through the following lines, which occur after a warning to "pass nothing by as a principle which is incomprehensible":—"For the neglect of this care, in principles, has entailed upon us every absurdity now taught, as it will all others to the end of time; and, probably, this system of the universe among the rest." Whatever intelligence the author may possess is clouded by his arrogance and by his want of ability to express himself in clear terms. He admits that mankind is likely to reject his ideas; but hints, like Voltaire, "so much the worse for mankind."

The "Congregational Lectures" issued this year consist of a course, by R. Alliot, LL.D., on *Psychology and Theology; or, Psychology applied to the Investigation of Questions relating to Religion, Natural Theology and Revelation*. We have no mission to discuss the author's topics, but we may express our approval of his method. He takes up the challenges of honest thinkers without that tone of indisputable supremacy to which many of his order are addicted.—We may hand over to Dr. Cumming and his readers the Rev. N. S. Godfrey's *Conflict and the Triumph; or, the Things that are Coming on the Earth*, in which the writer states distinctly, not anything that has been, but all that is to be, though he argues that his rivals in prophecy are looking through the wrong end of the telescope.—*The Restoration of Belief* is concluded in a third part, on the miracles.—We have also, in connexion with abstract religion, a Lecture, by J. Brewin Grant, in answer to the inquiry *Is Man Responsible for his Belief?*—and *One Thousand Questions on the New Testament*, by a Teacher.—The same subject, in its relation to social life, is investigated in Mr. David Pirret's *Ethics of the Sabbath*. The essayist leaps from assertion to assertion, and fancies he is ratiocinating; like the French exquisite who argued that Paris was the finest city in the world,—that he was the best dressed man in Paris,—and that, therefore, he was

the best dressed man in the world. We confess ourselves unable to follow whither Mr. Pirret would lead.—At the head of Anti-Papal publications we have Dr. Merle d'Aubigné's *Church and Church Diet; or, Kirchentag*,—not so eloquent as his writings habitually are, but liberal and logical.—The Rev. J. Taylor has addressed *A Respectful, but Earnest Remonstrance to the Bishops of the English Church*, concerning Puseyism, which is rather too earnest and anything but respectful.—Mention is enough for *Reformata Fidei Confessio, sive Communia Religionis Christianæ Principia, in Articulis Duotriginta digesta*, since the title speaks for itself, with the addition *Opera Presbyteri Anglicani*.—*Peace*, a Sermon, by the Rev. J. A. Emerton, is a sensible and feeling discourse on the war.—The only other *Sermons* we have are by the Rev. A. P. Mendes, who has addressed a volume of them to the Jews, full of pious sentiment and Scriptural learning.—In suitable companionship with these are Miss Charlotte Montefiore's *Few Words to the Jews*,—florid, but elegant and earnest. Miss Montefiore's book is conceived in a friendly, though an admonitory spirit.

LIST OF NEW BOOKS.

- Butler's Travels and Adventures in the Province of Assam, 12s. cl.
Coleman (Dr.) The Redeemer's Plenary Truth, 8vo. 3s. cl.
Conolly's History of Royal Sappers and Miners, 2 vols. 8vo. 28s.
Copland's (S.) Reign of Terror, edited by Smith, cr. 8vo. 6s. 6d. cl.
Cotton's (Rev. H.) Rhemes and Doway, 8vo. 9s. bds.
Faraday's Experimental Researches in Electricity, Vol. 3, 8vo. 18s.
Faussett's (Dr.) Sacred Chronology, new edit. 8vo. 7s. 6d.
Forest's (Rev. G.) Every Boy's Book, illust. cr. 8vo. 3s. 6d. cl.
Fraser's Sermons preached before University of Oxford, 2s. 6d. cl.
Henderson's (Mrs. M. A.) Memoir, by her husband, fr. 8vo. 2s. cl.
Hibberd's (S.) Town Garden, 18mo. 2s. cl.
Hook's 'Sayings and Doings,' 'Passion and Principle,' 1s. 6d. bds.
Howell's (J. W.) Perfect Peace, new edit. fr. 8vo. 2s. 6d. cl.
Hunt's (Leigh) Stories in Verse, fr. 8vo. 3s. 6d. cl.
Lewis's Credibility of Early Roman History, 2 vols. 8vo. 30s. cl.
Light from the Lantern of Diogenes, 8vo. 1s. swd.
Lingard's History of England, People's Edition, Vol. 9, 3s. 6d. cl.
Mackenzie's Married Life, 3rd edit. 18mo. 1s. 6d. cl.
Mary Beaver; or, the Housemaid's Wedding, fr. 8vo. 1s. 6d. cl.
Ogilby's (Hon. and Rev. S. G.) Hospitals at Scutari, 4to. 8s. 6d. cl.
Piper's Dictionary of War Implements and War Terms, 1s. 6d. bds.

Willis's (A.) Vestryman's Guide, 12mo. 4s. 6d. bds.
Young's (Rev. J.) The Christ of History, post 8vo. 7s. 6d. cl.

NEWS IN AMERICA.

VARIOUS presses have expressed alarm that the removal of the newspaper stamp would overwhelm them with rivals, who, pirating the news purchased by their older established brethren, would speedily drive them from the field. American experience does not prove so. I may dismiss as absurd a supposition which implied that were the stamp removed from the country edition of the *Athenæum*, for instance, its readers would cease to take it, and would buy upstart sheets instead. Although the instances of the *Athenæum* and of a newspaper are not precisely analogous, there is some similarity between them. Established papers, literary or news-giving, would continue established. Inferior sheets might spring up,—create for themselves a few readers,—and eventually die out and disappear. A few of the aspirants might grow stout and strong, and become institutions. But the probabilities are all in favour of the papers already in healthy existence retaining their vitality. Of course I speak with reference to what experience has proved, and do not advance a mere opinion. Besides, the more papers the more readers. Experience has proved that. There is, possibly, no individual above the age of twelve years in any considerable city of the free States of America who does not see, or hear read, at least two papers daily.

There is, however, a method adopted in the United States which has, in reality, almost all the effect of a copyright of news. This is an adaptation of the principle of association. Robert Chambers in his notes on 'Things as they are in America' briefly, but imperfectly, adverts to the subject. As it happens, I represent here, in England, that association, and perhaps that circumstance may justify this reference to it.

New York, as I have said, is the metropolis of news,—and indeed in all respects is the metropolis

of the United States. The principal daily papers of New York are the *Courier and Enquirer*, *Journal of Commerce*, *Express*, *Commercial Advertiser*, *Evening Post*, *Herald*, *Tribune*, *Times*, and *Sun*. Persons conversant with the periodical press will recognize in these names influential papers occupying in America the position that the *Times*, *Daily News*, *Morning Chronicle*, *Morning Post*, *Morning Advertiser*, &c. do in England. They are of all shades of politics, and are continually attacking each other in a manner that is, at least, energetic. Except in respect to the possession of early intelligence, their interests are entirely conflicting and competing. They are united, notwithstanding, in the closest business relations, under the name of "The New York Associated Press." All other papers not within the pale of this association are known, familiarly, as "outsiders." It is open to any outsider to enter into the association, on payment of a due proportion of the expenses. It is precisely, in newspapers, what the Anglo-French association is in Europe, an alliance open to all for the common good.

The Associated Press charge themselves with the collection of all news, and with its distribution to the members of the association. It must be borne in mind that the Americans would not tolerate for a moment the sale of news by telegraph companies, —a system which, in the opinion of American business men, is thoroughly rotten, deceptive, and destructive of confidence in the telegraph as the depository of secrets. Consequently, the press charge themselves with an organized collection of news. The expenses borne in the first instance by the wealthy proprietors of the nine papers above named are something enormous. A proportion is, however, repaid by the papers in alliance with the association, and it is found to meet expectations in a business point of view, otherwise, it may be safely inferred, it would not be continued. The machinery is apparently complicated, but really simple. A central office, under experienced management, is maintained in New York, separate from the private offices of the newspapers. The general arrangement is totally distinct from the private correspondence of the papers. In every town of importance in the United States and British American provinces are paid agents of the association, —men already respectably connected with the local press. The duty of these agents is, night or day, to telegraph whatever occurs of interest, not to the newspapers, but to the central office, whence it is re-distributed. Take, for example, the foreign news. Liverpool, being the port of departure of the mail steamers which convey the much-looked-for news from Europe, is an important station; and hence the press maintain an office there, of which the annual outlay for news and papers is not much short of 1,000*l.*, while the receipts are—nothing. Liverpool is likewise a central station, secondary to the chief office in New York; and to it are forwarded correspondence from various parts of Britain and the Continent. At Southampton, also, a gentleman is charged with [the transmission of intelligence by the mail steamers from that port. Every mail steamer that leaves Europe for America carries out ten packets of "copy," one for each of the above-named papers, with one for the central office, and all ready to place in the printers' hands, but subject, of course, to the tone of each paper and to the supervision of its editors. Each alternate week a *résumé* of 3,000 words of the European intelligence, prepared in the Liverpool office, is telegraphed from Halifax, Nova Scotia—the point at which the mail steamers first make the American coast—to the office in New York, a distance of 700 miles, at a cost of about 100*l.* This intelligence is concealed in various shapes of cipher, all having their respective uses and destinations. Instantly on arrival at the central office copies are handed to the newspapers in New York, while some of the cipher forms are telegraphed east, others south, and others to the most westerly towns of the Union, but only to members of the association. At a given signal the news is simultaneously published in all parts of America, 1,000 or 2,000 miles apart, to the huge astonishment of British travellers, and (by appliances which it is

not necessary here to explain) not unfrequently before the steamer has arrived at her wharf. Against such a system, at once so comprehensive and simple, piracy becomes contemptible, and to apply copyright to the news would not be worth the 2*s.* 6*d.* it would cost. H.
Liverpool, April 3.

FOREIGN CORRESPONDENCE.

Naples, March 24.

THE sleep of the tomb seems to have fallen upon the mind of this city of the Syrens. No new works issue from the press; no new idea is expressed,—nothing that indicates the slightest intellectual activity; and as far as is apparent, no angel is at hand to come down upon and stir the stagnant waters. In vain I inquire, or look over our literary journal;—some work on jurisprudence, or notices of antiquarian interest, or sonnets to a *prima donna*, are the only symptoms of movement; and but for these Naples may be said to sleep the sleep of the dead. Anxious to confirm the truth of my own impressions, I asked an intelligent bookseller, "What is going on in the literary world?"—"Nothing," was the answer. "Talent there is,—literary men we have, and very many, too,—but all are paralyzed by some noxious unseen influence. No one will dare to write where the free expression of opinion may lead to his ruin,—or if he dare, no one will care to write when his productions are sure to be emasculated by the priest and the censor. We are dead, sir; and it is my belief that we shall never rise again."—"And your trade," I asked, "how is it going on?"—"We are doing nothing. Not that our books are arrested in the Custom House,—for we order comparatively none. Misfortune has taught us to what we are exposed, and how to avoid it. We are dead, sir; there is no hope for us. Is it not so?" he slyly asked, as if to extort some encouragement from me. It is dangerous, however, to enter on politics with a Neapolitan; and I adroitly evaded the question. It was a sad commentary upon his despair of, and yet his longing after, better things, that at this moment a burly, frowsy Franciscan friar presented himself at the door. My friend bounded towards him, and, taking his hand with profound veneration, kissed it; and, turning round to me, smiled sadly. Ah! thought I, that is one of the stray members of that incubus which sits upon and smothers the public mind. I must not follow out the idea in your pages; and, indeed, my notice of Naples I conclude with the only bit of literary news I can send you,—which is, that a new literary and artistic journal has just appeared under the title of *Rondinella*.

From other parts of Italy I send you the following *pot-pourri*. The Baron Camillo Ugoni, a man of some literary merit, is just dead. He was the author of an elegant translation of the Commentaries of Cæsar, as also of 'Essays on Petrarch,' written in English by Ugo Foscolo, and he wrote the 'Continuazione di Secoli della Letteratura Italiana,' by Corniani. Andrea Maffei, who translated the tragedies of Schiller, is now engaged in translating 'Paradise Lost,' and has already given to the world a portion of the Fourth Book as a specimen of his powers. It is said to be well executed.—The following literary intelligence from Florence, too, will doubtless be of interest to your readers. The Signori Colombi have lately presented to the Ricciardi Library in that city 112 autograph letters of Muratori. It is well known how rich this Library is in MSS. and letters of eminent Italians; and the contribution which I have announced will go far to complete the bulky correspondence between Muratori and Giovanni Lami. F.

OUR WEEKLY GOSSIP.

BETWEEN the days of Sir Isaac Newton and Sir John Herschel, the office of Master of the Mint has been a political office, the occupant of which, even when he was a man of letters and a man of genius, like Sheil, followed the fortunes of his party. With the appointment of Sir John Herschel, it was universally expected that so vicious a system had come to its natural term, and that

henceforward the Mastership of the Mint, like the Presidency of the Royal Academy, would follow a more stable law. For a time, it promised to do so. The changes from Lord John Russell to the Earls of Derby and Aberdeen both left Sir John in possession of the Mint. But when Lord Aberdeen retired a few months ago, Sir John resigned his office, and Lord Palmerston had to appoint a successor. It is creditable to him that he did not disturb the understanding that in future the Mint is to be managed by a man of science; and his nomination of Prof. Graham to the vacant post fulfils public expectation. But we cannot withhold an expression of regret and of hope. Sir John Herschel's retirement, perhaps unintentionally, coincided with the fall of Lord Aberdeen. This is what we regret, as creating a mischievous precedent. Our hope is, that Prof. Graham will not be compelled to adopt any party badge, or to contract any sort of obligation to retire with the Ministers. The Mint ought to be clear of politics; and we trust that in Prof. Graham's person it will attain the character of a permanent office.

We hear, with regret, from Yorkshire, of the death of Mrs. Nicol, better known as Miss Brontë, and best of all known as "Currer Bell,"—the literary title under which she fought her battle and won her reputation. Her end came very suddenly and unexpectedly: she only changed "her maiden state" last July, when she married the Rev. Mr. Nicol, her father's curate. The author of 'Jane Eyre,' of 'Shirley,' and of 'Villette,' was a personage too much talked of in her day, and of too marked a peculiarity as a novelist, to pass out of remembrance. "Ellis" and "Acton," her two literary sisters, so fondly commemorated in one of her last productions, were already gone; and by the time these lines reach the reader the grave will have closed over the last of a band of "sisters three" as remarkable as ever grew together in a literary home. Mrs. Nicol died last Saturday, in the night, at her father's house, at Haworth, in Yorkshire.

The King of Prussia has presented to Mr. Birch, of the British Museum, a copy of the great work on Egypt published at Berlin, and edited by Chevalier Lepsius, entitled 'Denkmäler aus Aegypten und Aethiopen.' The gift is a very graceful compliment, and one well earned.

In our remarks last week on the various appointments held by Sir Charles Eastlake we stated that the Presidency of the Royal Academy will become a paid office on the death of Lady Chantrey. More than one correspondent reminds us that, by a private arrangement of the Forty, Sir Charles already receives from the funds of the Academy 300*l.* a year for his services as President. The Treasurer, it is said, can certify the fact to any who may doubt. We had ourselves heard of this arrangement, and made no allusion to it because it is "private," and therefore subject to revision. In a few years, the President will have a legal income independent of the Academy. This was the point of our argument. Of course, the possession of a third salary—given in anticipation of the Chantrey provision—does not weaken the justice of a protest against accumulated offices in a single hand.

A Free Library and Reading-room, in connexion with the Office of the Commissioners of Patents, has been opened to the public. The hours of attendance are from ten till four o'clock. The Library includes a printed collection of all specifications filed since October 1, 1852, as well as a considerable number of those recorded under the old law.

The British Museum has just received a fresh importation from Nineveh filling 159 cases. It comprises a miscellaneous collection of small slabs, seals, pottery, and other objects, bearing more upon the domestic life of the ancient inhabitants of Mesopotamia than the pieces hitherto received. This is what was wanted. We possess already as many of the large historical slabs as we know what to do with. We have acquired a tolerably clear idea of the king and the warrior,—what we now want is to see the Ninevite in his home.

When quoting a rather rapturous account of the discoveries at Argos from the pages of a contemporary, we expressed some doubts of the

results obtained, and asked our readers to postpone enthusiasm until more reliable accounts arrived. A Correspondent, who has just arrived from Athens, enables us to correct the too lively figures of our contemporary, and justifies our own word of caution. The excavations at Argos were carried on—not by order of the Greek Government, as was reported—but by Messrs. Rangabé & Bursian, at the expense of Prof. Ross. King Otho and the Greek Government, we are assured, took no other interest in the excavations than that of claiming the few fragments of sculpture discovered by those gentlemen by their own enterprise and at the cost of their patron. The importance of these fragments of ancient Greek Art has been greatly exaggerated, both in Rome and Berlin, as well as in London. Vague surmises about the recovery of the works of Polyclétes may be very poetical;—speculations about a new series of sculptures to range with the Elgin Marbles may startle the curious:—but the discoveries at Argos yield no such treasures. As yet, the chief interest of the excavations lies in the fact of their having laid bare the foundations of the Temple of Juno.

Mr. Lance replies to a passage quoted last week from Mr. Stirling's work on Velasquez:—

"36, Hart Street, Bloomsbury Square, April 4.
"In your number for March 31 a passage is quoted from Mr. Stirling's book, entitled 'Velasquez and his Works,' in which it is stated that, when before the 'Boar Hunt,' by the great Spanish master, at the National Gallery, and in the presence of the Committee, I 'very candidly admitted that the lapse of time had led me to exaggerate my own share of the work, and that a good deal of the original painting still survived.' The extract then goes on to state, that 'the chasm which I had filled with mules was less in area by three-fourths than I had stated; and in these mules themselves I had been guided by the backs, necks, and ears, which had remained with tolerable distinctness, and enabled me to follow the design of the master.' 'So ended a story,' continues the author, 'which had amused the town for a day or two, that the picture, which the Trustees had purchased as an important work of the Castilian Vandyck, had really been executed by the English Van Huysum. No notice of this meeting at the National Gallery, at which I was present as a member of the Committee, occurs in the record of its proceedings. Mr. Lance's printed evidence (*Report and Minutes*, pp. 345-353), being most incomplete without it, the present note may serve, I hope, to supply the deficiency." It is with great unwillingness that I revive this subject, and I am grateful to the author for comparing me with the unapproachable Dutch master; but truth compels me not to permit this assertion to pass, as the end of the story. To every word of my printed evidence I adhere. At Mr. Thane's request I worked daily for six weeks on the injured picture. Two persons, not belonging to my family, who know and can prove this, are still alive. When I was before the picture at the National Gallery, several of the Committee, not unfrequently more than one at a time, asked me questions such as 'Did you do this?' pointing to one part of the picture; 'Did you do that?' pointing to another part. I may have said that I could not, after such a lapse of time (nearly twenty years), speak with certainty as to every touch of mine on the picture. No doubt 'a good deal of the original painting still survived,' but I distinctly deny that I ever said or thought that the chasm which I filled was less in area by three-fourths than I had stated, or that in these mules I had been guided by the backs, necks and ears which had remained with tolerable distinctness, and enabled me to follow the design of the master. To the best of my recollection, the canvas where I put in the mules was entirely bare, as it was in many other parts, and the injury which the picture had sustained may be guessed by the time which was consumed in repairing it,—time which I very unwillingly gave up at the earnest entreaty of Mr. Thane, and which nothing but his distressed state of mind would have induced me to employ in that operation. The money which I received was no equivalent for what I did, for I neglected my own works to relieve the distress of Mr. Thane. I am, &c.

"GEORGE LANCE."

The largest and finest diamond which has as yet been found in Brazil has recently been imported into Paris, and has received the name of the "Star of the South." In its rough state it weighs 807·02 grains, or 254½ carats. When cut it will be reduced to about 127 carats, and will therefore exceed the Koh-i-noor in size. Independently of its magnitude, it possesses much scientific interest from the regularity of its crystalline forms, and the indications it affords of the mode in which the diamond occurs. The gem has been examined by a Committee of the French Academy of Sciences, who have reported on the best mode of cutting it. This is now being performed; after which it will be shown at the *Exposition*, but it will then have lost its scientific interest.

It has been decided, within the last few days, that the three separate buildings destined for the Exhibition at Paris shall be connected by gallery tunnel work. This will add an intricacy more to the tripartite composition, and an expense the more

to its construction. Meanwhile, the original and central *Palais* itself may be described as all but complete. It is now under the hands of the carpenters, in preparation for the exhibitors. "The judgment ventured last year," says the Correspondent who then offered a note or two concerning the plan, "has received confirmation by a new inspection of this large edifice,—which might have been planned to appear as little large or august in its proportions as possible. The painting of the iron-work of pillars, ribs, arches in the roof, &c., is complete. For colour, a chill grey has been chosen, sparingly relieved in the pierced frieze round the building with heraldic colours and gilding. The effect, for the present, is not happy, as compared with the effects produced by Mr. Owen Jones in Hyde Park, and, to my eye, is that of a fog so universally diffused that I doubt whether any colour which the objects exhibited can introduce will be able to neutralize a sombreness of tint, at once so heavy without grandeur and so feeble without delicacy."

Spain in these later days has made but few contributions to the literary talk of Europe. This time, however, that fine old country of the romancers offers us nothing less than a coronation; and, moreover, the coronation of a poet:—since foreign journals tell us of a high ceremony in Madrid, on the 26th of last March, at which Señor Quintana, now an aged man, was crowned in the Senate House, at Madrid, with a gold crown, by the Queen of Spain herself; the investiture being accompanied with every mark of ceremony and honour.

A large gathering of notables took place on Saturday last at the Society of Arts, for a private view of the seventh annual exhibition of inventions. Not a little of the machinery is devoted to war-like purposes; and among the fire-arms exhibited the chief interest attached to those which had been captured from the Russians in the Crimea. Altogether, the display is attractive.

A Correspondent says:—

"I am much pleased to see by the notice in your Gossip of Saturday last, that the New Library and Reading-Room for the British Museum are now beginning to attract attention. Not only will the cupola be, as you say, larger than that of St. Peter's at Rome, but, with the exception of the Pantheon at Rome (which, however, is only two feet broader) it will be the largest in the world. Your suggestion that this noble space should be covered with historical or allegorical paintings is the first that has been made public; but the subject had not escaped the notice of the home authorities. The attention of the Trustees has, I believe, been twice drawn to the desirableness of rendering the new reading-room worthy of the nation to which it belongs by placing within it statues of remarkable persons, and covering the vault of the cupola with a series of mural paintings. But the Trustees, although at all times most anxious to extend the usefulness of the institution, have been deterred from submitting the proposition to the Lords of the Treasury by that stumbling-block in the way of all schemes for the public good which present themselves with other than a pounds, shillings, and pence recommendation—the expense. This ought not to be, but so it is. The Trustees felt that their appeal to the guardians of the public purse would not be listened to favourably, and therefore have not ventured to make it. The suggestion you have put forth is, consequently, most valuable and opportune. That which a body of gentlemen representing the highest rank and intelligence in the country felt they could not hope to obtain, the public may through its legitimated organ, the press, demand. It would be an insult to the English people to doubt for a moment the general verdict in favour of such an appropriation of the interior of the cupola, and I think I risk little in asserting that were England to adopt the whitewash, or any other similar mode of decoration, she would exhibit a defiance of good taste not to be paralleled in any other country of Europe."

Mr. Austin, agent in England for the King of Oude, asks permission to put on record a literary protest:—

"20, Pelham Place, Brompton.

"As the manager of the principal literary organ in London, I appeal to you with reference to an announcement which appears in the columns of the *Englishman* newspaper in Calcutta, relative to a work stated to be now in the press in London:—'It is stated that an account of the private life of Nussin-udeen, formerly King of Oude, is preparing for publication in London. Now that there is so much talk of "annexation" in reference to Oude, this report is significant. We have it on the best authority that the work in question gives a full account of the mismanagement of the country and the miserable condition of its inhabitants.' If it is intended to institute any comparison between Nussin-udeen and the present King of Oude, I trust you will never lend the sanction of your columns to a calumny which would be equally false and unfounded.

I am, &c., GEO. AUSTIN."

The bill before parliament for extending the benefits of the English Free Libraries Legisla-

tion to Ireland repeals the 16 & 17 Vict. c. 101, and the 99th section of the 17 & 18 Vict. c. 103, and provides for the adoption of the act in any incorporated borough, or any town the population of which shall exceed 5,000 persons, the adoption to be determined by the votes of two-thirds of the householders. The expenses of carrying the act into execution are to be defrayed out of the borough or town fund. Accounts are to be audited, and a copy is to be sent to the Lord Lieutenant. The amount of the rate to be levied for the purposes of the act is not to exceed 1d. in the pound in any one year. The councils or boards of any borough and the town commissioners of any town are empowered to appropriate lands, and to sell and exchange the same for the purposes of this act. The general management of the libraries and museums is to be vested in the borough councils and town commissioners, who are "to purchase and provide the necessary fuel, lighting and other similar matters,—books, newspapers, maps, and specimens of art and science," &c. The property of the library and all lands and buildings will be vested in the managers. A decision against the adoption of this act will be valid for one year. Museums and libraries established under this act will be open to the public free of all charge.

The PORTLAND GALLERY, 316, Regent Street (opposite the Royal Polytechnic Institution). THE EIGHTH ANNUAL EXHIBITION OF THE NATIONAL INSTITUTION OF FINE ARTS IS NOW OPEN from Nine till dusk. Admission One Shilling; Catalogue Sixpence. BELL SMITH, Secretary.

ADAM and EVE.—This great Original Work, by JOSEPH VAN LERUS, is NOW ON VIEW at 57, Pall Mall (opposite Marlborough House), from 11 to 6 daily.—Admission, 1s.

SIEGE OF SEVASTOPOL.—GREAT GLOBE.—All the New Approaches and Siege Works are placed on the MODEL of SEVASTOPOL, including Inkermann, Balaklava, and the Tchernaya, at the GREAT GLOBE, Leicester Square.—Admission to the whole building, 1s.; Children and Schools, Half-price. Open from 10 A.M. to 10 P.M.—A Collection of Trophies taken from the Russians.

ZOOLOGICAL CONCERT.—LOVE'S ENTERTAINMENTS.—VENTRILQUIISM EXTRAORDINARY.—REGENT GALLERY, 63, Quadrant.—Every Evening at 8, except Saturday; Saturday, at 3.—Monday and Tuesday, Mr. LOVE, universally accepted as the first Dramatic Ventriloquist in Europe, will present his NEW ENTERTAINMENT, called 'THE LONDON SEASON.' Wednesday, Thursday and Friday the entertainments, LOVE IN ALL SHAPES and LOVE'S LABOUR'S LOST. Saturday, at 3. LOVE IN ALL SHAPES, and other entertaining VENTRILQUISTICAL CONCERT every Evening.—Pianoforte, Miss Julia Warman.—Stalls, 3s.; Area, 2s.; Gallery, 1s.—Tickets at Mitchell's, 33, Old Bond Street; Turner's Music Depot, 19, Poultry; and at the Rooms, between 12 and 3.

SCIENTIFIC

SOCIETIES.

ROYAL.—March 29.—T. Bell, Esq., V.P., in the chair. The following papers were read.—'On the Existence of an Element of Strength in Beams subjected to Transverse Strain,' by P. W. Barlow, Esq.—'On the Optical Effects of Eyelashes, Eyelids, &c.,' by I. Jago, Esq.—'On Metallic and some other Oxides in relation to Catalytic Phenomena,' by E. Ashby, Esq.

BRITISH ARCHÆOLOGICAL ASSOCIATION.—March 28.—T. J. Pettigrew, Esq., V.P., in the chair. Mr. Halliwell presented to the Association five tradesmen's tokens.—Mr. Wakeman contributed a paper 'On the Antiquities of Trellech.'—Mr. Pettigrew read a paper relating to the several Leper Hospitals, Houses and Chapels in the several Counties of England, in continuation of a previous communication on those establishments.—The Council list of Officers, Council and Auditors proposed to the General Meeting to be held on the 11th of April, was submitted to the Association.

METEOROLOGICAL.—March 27.—Dr. R. D. Thomson, F.R.S., in the chair.—Capt. FitzRoy, R.N., and G. H. Fielding, Esq. were duly elected.—'On the recent Cold Weather, and on the Crystals of Snow observed during its Continuance,' by Mr. James Glaisher.—The present year was ushered in with a high temperature, exceeding its average by quantities varying from 8° to 12° daily. On January 10th a cold period set in, together with a dense fog; and the temperature, which was as high as 49°·6 on the 9th, fell to 26° on the 10th. This diminution of temperature was accompanied by a change in the wind, which, from blowing a compound from the west, changed to a compound from the east; and,

with few exceptions, has so continued up to the present time, as shown by the returns published in the *Daily News*. On January 12th and 13th the temperature was about its average value; but after the 14th, when the cold set in, its departures were very considerable, particularly over the south-west and eastern parts of England. Scotland and the northern counties were frequently exempt from any share in the great severity of the period, which was also less severely felt at the seaside than at inland places. The lowest temperature, viz. $0^{\circ}8$, took place at Berkhamstead. At different places in England, on different days, it was as low as 3° , 5° , 7° , and 10° . For a similar period to the one which has just passed, it is necessary to go back to the year 1814. That year, however, commenced with a very low temperature,—a frost having set in on December 26th, 1813. The intensity of the two periods was about the same. It ended, in 1814, on March 21st; whereas, with the exception of a short intermission about the first week in March, the temperature of the present period has descended lower and more frequently than it did in 1814, in which year the coldest day was on January 10th, when the reading was $19^{\circ}6$. The lowest temperature of this year also occurred in January, and was $19^{\circ}2$. In 1814 the lowest temperature in February was on the 4th, and was 22° . The lowest reading in this month of the present year was $20^{\circ}6$, and took place on the 18th; and this February was a much more severe month than the February of 1814. The mean temperature of February, 1814, was $32^{\circ}4$; and that of the present year was $29^{\circ}3$. The remarkable feature of the late severe weather has been the peculiar character and continuous fall of snow; which first made its appearance on January 16th, and laid on the ground from that date till the end of February. The average amount did not at any one time exceed a foot in depth; and its density has been from 8 to 10 inches of fresh fallen to 1 inch of water, which its melting has produced. The drifts have varied from 5 feet to 10 feet. The snow this year has been of that kind which former writers have designated “Polar snow,”—it having been chiefly composed of crystallized particles of compound figure, which they supposed to be confined, with rare exceptions, to the Arctic regions. This supposition, however, is not supported by the great prevalence this year of innumerable crystals, which have exhibited a degree of crystalline formation equal to any that have been recorded as seen in colder latitudes. They have been very generally distributed, and, whilst prevalent, attracted a considerable share of public attention. The primary figure or base of each crystal was either a star of six radii or a plane hexagon. The compound varieties included combinations of spiculæ, prisms, and laminae, clustered upon and around the radii, and seem, in their various stages of formation, and almost endless variety, to defy any attempt to classify or arrange them into groups. At the commencement of the first simple stellar forms were very prevalent, and fell in clusters of from 10 to 20 in a group, with a temperature at or about the freezing point. They were observed to fall both during a profound calm, with gusts and hard wind, and frequently unaccompanied with snow. On examination through a Coddington lens, they were found to be composed of transparent spiculæ, from which diverged other spiculæ set upon the main radii of the figure at an angle of 60° . A great number of plane hexagons fell on the morning of February the 8th. Some of these were of transparent laminae, beautifully marked with successive and inner tracings. As the morning advanced, they became intermixed with others, set round with solid hexagons, which continued to fall until an hour before noon. For half an hour after several large crystals, of compound figure, fell with the snow. Their centre or nucleus was similar to the compound hexagons of the morning, from which diverged radii laden on either side with prisms, each set on at an angle of 60° . From this time till 4 o'clock few crystals were observed to fall; but after 4 o'clock, innumerable crystals, of arborescent form, were discernible. The nucleus of the greater number was a plane hexagon marked

with inner parallel tracings, from which sprung radii, each of which intersected a crystalline formation very similar in appearance to the pinnæ of the Lady Fern. As the evening advanced, these became less prevalent, and were mingled with almost every variety which had previously fallen during the day. Snow continued to fall till late at night, when it lay upon the ground to the depth of 8 inches. The day will long be remembered as one of the most keen and inclement of the wintry period under discussion. The minimum of the preceding night had been $29^{\circ}8$; and throughout the day, the temperature never rose higher than 32° . Snow fell, without intermission, from early morning till late at night. It was accompanied by a piercing wind; and in the afternoon, when the arborescent form again set in, it was blowing quite a storm. Traffic on the railways was for a time suspended, and the day was one of bitter and intense cold. When, says Mr. Glaisher, I went out, at long past midnight, the snow sparkled everywhere with crystals, as granite sparkles with the grains of mica; every leaf, cobweb, knotty projection and sheltered nook bore its burden of drifted snow and glistening crystals. It was a night to be remembered, for the extreme loneliness of Nature arrayed in her most wintry garb. A large number of crystals fell on the mornings of February 13th, 16th, and 17th. Some, and the greater number of them, were arborescent, in different stages of formation, with three large alternating, with three small pinnæ, studded with prisms and spiculæ, extending on either side of the principal radii. Some exhibited an appearance, towards the end of each pinna, like a tuft of bended leaves, with serrated edges, beautifully white and seemingly opaque. Mr. Glaisher accounts for this appearance by the passage of the crystal in its descent through different regions of the atmosphere, in some one of which it has become partially thawed, and again frozen, in which condition it has been received on the surface of the earth. This conjecture is the more probable as the jagged and serrated appearance is often attendant upon the first thawing of these bodies on entering a temperature above the freezing point. The opaque and white appearance is communicated by a subsequent formation of granulated particles of snow, in all probability attaching to it, whilst in a transition state, in its descent to the earth. This is, however, only a surmise in the absence of any better solution of the fact. On February the 21st, with a temperature of 20° , there fell for an hour, unaccompanied by snow, a great variety of intensely beautiful and complicated figures. The radii were encrusted with solids, both of rhomboidal and irregular shape, cut into many facets, and heaped one upon the other. On this morning there were numerous double crystals, that is, two crystals united by an axis, at right angles to the plane of each. They generally fell with their radii intermediate, and the radii of the upper somewhat projected beyond the radii of the under crystal. Two days after, that is, on February 23rd, the frost gave way; but for some few hours in the morning Mr. Glaisher was able to continue his observations. The morning was overcast and calm, and snow fell in flakes, accompanied by minute spiculæ. Soon after 9 o'clock a change took place, and, mingled with the heavy flakes, there fell a large number of thick snowy crystals. On examining these with a Coddington lens, they were found to consist of an assemblage of prisms, grouped in thick arrangement, and bristling up (if the phrase may be allowed), at all angles, from some invisible nucleus. Some of the prisms were longer than others, but most of them were notched here and there, giving indications of the formation of other prisms or spiculæ. The longer prisms were midway in character between the prisms of high crystalline formation and the ordinary spiculæ. After the lapse of half-an-hour, the common flakes were fewer in number, and were accompanied with innumerable spiculæ. These did not fall separately, but in groups of several, clinging to each other at all angles. They had a fleecy appearance to the naked eye, but under the glass were long and rounded prisms, partaking much of the character of an icicle; but all notched and tapering to a

point. At this time the air was soft and mild, and the snow was falling thickly. At 10 h. 30 min. the air was still calm, and the snow continued. At this time it was easy to detect here and there pinnules in an intermediate stage of formation. The spiculæ, which were still falling, were now of greater length, and their figure more perfectly developed. At 11 h. crystals were falling, of great beauty and transparency, but of simple figure. They were thin and transparent in the highest degree, and bore a leafy appearance. Very many of them were double. Whilst observing them they changed their figure in the most curious and kaleidoscopic manner possible, the upper groups of prisms collapsing first, the next in order next, and so on,—the collapsing each time dissolving three or more prisms into one, a change effected with instantaneous rapidity. This was the first step preparatory to their dissolving; the next step was the rounding of every angle that remained; and the next step to that the extension and thickening of spiculæ, which had served as axes to prisms, and which now derived accession from their half-fluid and dissolving matter. In this manner they continued to exchange one simple form for another yet more simple, until the pristine drop of water occupied the site of the former crystal. At 11 h. 15 min. snow was falling quickly in minute crystals as described. The air was genial and mild, the clouds lightened as preparatory to sunshine, and the birds for awhile sang joyously. All nature seemed to rejoice in the mitigation of the weather. At 12 h. the snow had all but ceased, and the temperature was 37° . The cocks crowed as anticipating a change; the birds answered each other from the trees; icicles, two feet in length, which had been noticed for sixteen days previously, began fast to melt away. All nature, but the birds, was still; and, what is rarely seen, the trees were dripping moisture while the snow lay like a rime upon their branches and bended stems. At 1 h. 13 min. the temperature was $35^{\circ}5$, and small and fine snow was again falling; water was dripping everywhere, the birds were singing joyously, and the calm continued. After a short intermission, the cold set in again, but with much-abated rigour; and on the mornings of March 8, 9, and 10, with a temperature a few degrees above the freezing-point, Mr. Glaisher observed a number of stellar crystals, made up almost entirely of spiculæ and half-dissolving prisms. They were between 0.3 in. and 0.4 in. in diameter; they fell sparingly, without snow, sometimes singly, but more often in groups of three or four together. The collapsing, which would seem to be a method of change peculiar to a temperature below freezing, was not witnessed on this day; but the process of dissolving at a temperature above 32° was seen to great perfection. The outer and boundary line of each figure, and its component parts, became exchanged for curved lines, bending inwards, whilst the crystalline matter, every instant becoming more watery, ran out at the angles of the prisms in the form of spiculæ. The prisms of the crystals, thus in a transition state to their original fluid medium, presented each an exact similitude to a holly leaf, and as being made up of curved lines a very anomalous appearance. This change was not always simultaneous, sometimes commencing at either or both ends of the radii. There is room for much examination and study respecting the manner of the dissolving of these bodies, which under some circumstances would doubtless show a reversal of the conditions under which they were originally formed and attained their compound figure.

The author next proceeded to give a brief summary of each day's observations. On Feb. 8 they commenced with a temperature of 29° , which subsequently increased to 32° , at which the temperature continued for many hours. During the whole of this time, conspicuous for its uniform temperature, the prevailing figure of the crystals continued to change, until towards the close of the day they fell mingled together in the greatest profusion. In the early part of the morning, it will be remembered that they were arborescent; that these forms suddenly ceased, and were exchanged for hexagons; that these again became the centre of a more complicated arrangement;

that after a time these diminished in numbers, when the arborescent form again prevailed, and finally a mingling of nearly all that had previously fallen. On Feb. 16, with a temperature of 26°, there were two distinct orders of crystals, those which were arborescent and exhibited an intermediate formation, and those of cruciform character, of solid hexagons cut into numerous facets. Feb. 17, with a temperature of 32° throughout, exhibited figures, it will be remembered, composed of elongated prisms, ranged parallel to each other, and of very similar character. There were, however, exceptional instances of the prevailing character of Feb. 16. On Feb. 21, with the lowest temperature, viz. 20°, the figures were singularly compound, and departed more than on any previous day from the figure of the regular hexagon. On Feb. 23, the last day of the frost, there were a large number of arborescent crystals of one common character, and which never ceased collapsing into more and more simple figures. On March 8, after a week's respite, the cold set in again. The crystals on this and the next two consecutive days, were of a very distinctive class, of purely stellar figure, and composed chiefly of fine spiculæ. From these observations it would seem, that however temperature may affect these bodies, it is more than likely that other conditions of a different nature are involved in their first formation. This, apparently, was the view taken by a writer on the subject in the *Phil. Trans.* for 1672. Speaking of snow crystals (says the Rev. G. Langwith), "It is not easy to determine whether these figures may not be the result of the chemical components of the atmosphere, which as they preponderate may not under certain conditions of temperature give rise to these curiously simple and compounded bodies. Dr. Smallwood, of Isle Jesus, Canada East, imagines them to be intimately connected with the electrical states of the atmosphere, whether negative or positive. The foregoing observations show a wide difference between the various orders of crystalline formation, and it would seem from them that the greater the degree of cold the greater the departure from the simple star, with all its variously arranged spiculæ: also that shortly after the descent of a crystal, at any temperature below the freezing point, various processes of change take place, which are evidently an undoing, if not a reversal, of the operations which had assisted in their formation. These changes, through which every crystal never fails to pass, even at temperatures very many degrees below the freezing point, each more destructive than the last of its crystalline and compound figure, led the author to the same conclusions. The subject of snow crystals has engaged the attention of Aristotle, Descartes, Grew, Kepler, Dr. Nettes, Dr. Scoresby, and others, but like most subjects of meteorological inquiry, it has languished for want of extended and continuous observation. The published information concerning them is, however, likely soon to derive accession from Sir Edward Belcher's observations made in the Arctic Seas. Coming from this experienced and able officer, they will be of substantial benefit to the inquiry into the nature and circumstances of formation of these interesting bodies.

INSTITUTION OF CIVIL ENGINEERS.—*March 27.*—J. Simpson, Esq., President, in the chair.—The discussion on Mr. R. A. Robinson's paper, 'On the Application of the Screw Propeller to the larger class of Sailing Ships, for long voyages,' was continued.

April 3.—G. P. Bidder, Esq., V.P., in the chair.—The discussion on Mr. R. A. Robinson's paper was again renewed, and continued through the evening.—After the Meeting there was exhibited in the library a model of a system introduced by Mr. Clifford, for lowering ships' boats from the davits, evenly, quietly, and safely, in a gale of wind, and disengaging them without any risk of capsizing, or being dragged under by the speed of the vessel.

ROYAL INSTITUTION.—*General Monthly Meeting.*—*April 2.*—A. A. Goldsmid, Esq., V.P., in the chair.—E. Anderson, Esq., A. W. Barclay, Esq., M.D., and T. P. Woodcock, Esq., were elected Members.

MEETINGS FOR THE ENSUING WEEK.

- TUES. Syro-Egyptian, 7½.—On the Assyrian Deity, Nisroch, by Mr. Bonomi.—On the Cuthite Idol, Nergal, by Dr. Benisch.
— Zoological, 9.—Scientific.
WED. British Archaeological, 4.—Annual General Meeting.
— Society of Arts, 8.—The Mineral Industries of the United Kingdom, by Mr. Hunt.
— Ethnological, 8½.—On the Ethnology of the Macedonian Conquests, by Mr. Anstey.
FRI. Graphic, 8.
— Philological, 8.
— Astronomical, 8.

FINE ARTS

NEW PUBLICATIONS.

St. John and the Lamb. Painted by Murillo; Engraved by F. Bacon. Boys.

THIS is a good, careful engraving of one of Murillo's well-known pictures. There is unusual sweetness in the smile of the child-saint, who caresses the typical lamb with a tenderness admirably expressed. There is a religious feeling over the whole not merely Catholic, but Spanish; and the scene has that strong, naturalistic, material character for which the artists of the Peninsula are remarkable. It is singular that Holland and Spain should be the most materialistic of the schools. The one nation commercial, money-loving, neat, accurate, peddling, and restricted; and the other, chivalrous, superstitious, bigotted, and all but ignorant of trade: the one the most reforming, the other the most conservative of religionists: the one the freest, the other the most enslaved of nations. What common principle can have produced the same results in two such different nations? A voluptuous climate could scarcely make the Spaniard a materialist, for it made a poet of the Greek.

Ginevra, The Baron's Return, and The Court Side-board. Photographed by Lake Price. Graves.

THESE admirable photographs we have already had occasion to praise. More attention to his models would have enabled Mr. Price to have produced three very complete and original pictures, well grouped, and pleasing in the arrangement of light and shade. About every boss and curve of the carving and every glint and flash of the armour there is, we need scarcely say, a truthfulness little short of enchantment—a truth that no mere labour can achieve, and only artistic genius can surpass.

A Water Party. Painted by J. J. Chalon. Engraved by J. T. Willmore, A.R.A., from the Original Picture in the Possession of A. E. Chalon, Esq. Art-Union of London.

EXCEPT from respect for the artist and as a remembrance of his labours, we really see no reason why such a painting as this should have been honoured with "a short eternity" (as an Irishman would say) on steel. The picture is an indistinct dream of Claude and Turner, laid in the land of Nowhere. About the landscape, with the exception of the clouds, which are false as they can be, there is a poetry both of air and water; but the figures are poor and ill drawn, lifeless and unreal. They are neither Charles-the-Second courtiers, Italian masquers, classical revellers, nor anything but red and blue spots to carry out colour and fill up the foreground. There is a want, throughout the whole, of masculine strength.

Honour thy Father and Mother. Painted by H. Barraud; Engraved by W. T. Davey. Boys.

THIS picture is a representation of drawing-room religion. It reminds us not of primitive Christianity, but of pages carrying gilt prayer-books behind rustling peereesses,—of fashionable chapels which the poor never enter but to sweep them out,—of fashionable preachers delivering the benediction with hands "as white as is the whale's bone." The work is wholly devoid of sincerity;—the faces are ill drawn, and have neither poetry nor expression. Mr. Barraud's Christians never kneel but on embroidered cushions,—never soil their velvets by coming into contact with dying men's beds,—refuse to visit the sick, because they do not aspirate their h's when they pray. This artist's rooms are always scented,—his children wear purple and fine linen,—and all his respectable people are people who have brick vaults of their own, and never moulder away into common churchyard earth. The re-

ligious feeling he appeals to is the placid self-satisfied religion that binds up its Ledger and Bible in the same volume, and believes in little paradises set apart for the "ten thousand pounders."

FINE-ART GOSSIP.—The annual exhibition of works of eminent English painters at the rooms of the Society of Arts is fixed. The Messrs. Chalon follow Etty and Mr. Mulready. Mr. Alfred Chalon is preparing the works of his late brother, Mr. John Chalon, and a selection from his own studio.

The members and supporters of the Artists' General Benevolent Institution dined at the Freemasons' Tavern on Saturday last. The chair was taken by the Lord Mayor, supported by Mr. Alderman and Sheriff Muggeridge and Mr. Sheriff Crosley, and a goodly gathering of Art celebrities. A subscription of 611l. was announced.

Our public places begin to tell of preparation for the great artistic contest in Paris. During the last few days workmen have been engaged in removing the stained glass from nine of the lower compartments of the large window at the bottom of Westminster Hall, for the purpose of being transmitted to Paris as a specimen of Birmingham art in the manufacture of stained glass, at the forthcoming Exhibition of the Works of Industry of all Nations.

The Taylor Museum, in Oxford, is growing rich in Art collections of many kinds. Its series of Michael Angelo's drawings is superb; and Mr. Chambers Hall has presented a magnificent collection, including a large cartoon by Razzie, of Siena, framed; a pen drawing of the Nativity (engraved in Ottley's 'School of Design'); another by Raphael, of the Circumcision, and a superb study of a figure in his picture, called 'La Belle Jardinière'; about 50 drawings by Rembrandt; 43 by Ostade; 30 by Claude Lorraine; and specimens by Leonardo da Vinci, Correggio, Albert Dürer, Rubens, Vandyck the elder and younger, Van der Velde, Paul Potter, Teniers, Wilson, and Zoffany. We may mention, also, a collection of about 200 etchings by Rembrandt, 60 by Ostade, 50 by Claude, and 24 by Vandyck, proofs and early states. The etchings of four of the greatest artists in that way are of the most select quality, and in point of variety and beauty equal to any in the first cabinets in Europe. A portfolio of original sketches in water-colours, made in the East and various parts of the Continent, by Mr. Hall and his brother, and a series of useful etchings, by his friend the late Mr. Read, of Salisbury. A small collection of paintings, among which will be found landscapes by Rubens, Guardi, Wilson, Linnell, Read, and Constable; sketches and heads by Vandyck; 'The Enraged Musician,' 'The Inn Yard,' 'The Portrait of Sir James Thornhill,' and a conversation piece, by Hogarth; Portraits of Admiral Keppel and Miss Keppel, and a most interesting sketch of 'The Charity,' for the window at New College, by Sir Joshua Reynolds. Upwards of 70 specimens of early Greek and Etruscan sculpture, in bronze and other metals, such as statuettes and portions of larger figures, vase-handles, ornaments, and implements, many of them of singular beauty and interest. A few Greek terra-cottas, paintings, and some gems. In addition to these classical objects, may be mentioned a small model in wax by Michael Angelo, for the recumbent figure of Aurora, on the tomb of Lorenzo de' Medici, Duke of Urbino, at Florence.

A statue is about to be erected at Montrose to the memory of the late Joseph Hume. It will be an odd turn of the wheel if a vast sum of money shall be expended on a memorial to the most severe economist of our economical nation.

Our Florence Correspondent writes:—"The remarks of Signor Bezzi in the *Athenæum* of the 17th ult. on a notice from a Correspondent in No. 1426, respecting the statues under the portico of the Uffizi at Florence, show errors. In the *Athenæum* of May 26, 1849, page 550, may be found a letter from me, giving some account of these statues, which had then recently been erected. Seven statues have been added to the collection since the above date. They are those of Leon Battista Alberti, the architect and poet,—Galileo,—Paolo Mascagni,

the anatomist,—Andrea Cesalpino, of Arezzo, born in 1519, for many years Professor of Medicine at Pisa, and one of those Italians to whom Harvey was probably more indebted for the hints which led him to his great discovery than he cared to acknowledge,—Accorso, a Florentine lawyer of the twelfth century, celebrated among canonists by the title of 'Il Chiosatore,' the glossarist,—St. Antonino, a Dominican, and Archbishop of Florence in the fifteenth century,—and, lastly, the jovial Medico Redi, the well-known author of the *Bacco in Toscana*. The statues, though not falling below decent mediocrity, are not of striking merit, nor equal to some of the best of those described in my former letter. Redi, who has ventured into this grave and solemn assembly of figures in togas, tunics, armour, and flowing draperies, in coat, waistcoat, breeches, and wig, the sole representative of modern habiliments and notions, is yet far from being the least characteristic and striking statue of the gallery. The Dominican who has been selected to represent the Church in this permanent congress of the representative men of Florence, seems as he stands in his niche, with bent body and shaven crown, among the representations of all the lay occupations which illustrate humanity, a singular evidence of the success with which Romish discipline has striven to impress on her favourites a distinctive and peculiar type, wholly unlike that of any other, either saints or sinners, in the world. The artist has perfectly succeeded in reproducing the well-known look, so familiar to those acquainted with the portraits of Latin hagiography, which is conventionally understood in these lands to be the expression of sanctity. It is a look in which the crouching attitude and the lines of the mouth say, 'Smite me, if you will!' while there is easily to be read in the down-cast eye a warning, which adds, 'But my bite in your heel shall pour poison through your veins, if you but thwart me!'"

MUSIC AND THE DRAMA

SACRED HARMONIC SOCIETY, Exeter Hall.—Conductor, Mr. COSTA.—On FRIDAY NEXT, April 13, Mendelssohn's 'ELIJAH.' Vocalists: Madame Clara Novello, Miss Dolby, Mrs. Locke, Mr. Sims Reeves, and Herr Formes. The Orchestra, as usual, will consist of nearly 700 Performers. Tickets, 3s., 5s., and 10s. 6d. each, may be at once secured by immediate application at the Society's sole Office, No. 6 Room, within Exeter Hall.

THE THEATRES.

THE popular direction now taking by the highest drama merits further consideration. Its descent in social rank is, to the mind that thoroughly investigates the fact, of much significance. The popular drama preceding Shakspeare was low, tentative, inartificial, yet amusing. Mysteries and moralities then answered the purpose of our modern melo-dramas and *vaudevilles*. The former, like the latter, lay level with the intellect of the audience. Had the aim of our earliest dramatic poets been simply to please the existing public taste, they had only to continue the supply of such pieces. But they took a nobler course, they lavished the finest poetry on the unprepared minds of the vulgar, and exercised their genius in the creation of a responsive taste in a rude auditory. They produced at once a new style of entertainment and a new standard of appreciation. In this they were assisted by scholars, and patronized by the aristocracy. There are critics, however, of Shakspeare who affect to think that the poet had no purpose but to amuse his audience, and that the wit and wisdom, the poetry and morality which we find in his various plays, got into them by mere accident, and indeed would not have been found in them at all had he suspected the ultimate unpopularity of such heavy metal. They were due, in the opinion of such flippant judges, to his want of art,—a quality which it was left to the French playwright of the nineteenth century to develop. Little they knew of the poet, who thus esteem his productions. Our early dramatists were conscious of their mission, showed their consciousness in their complimentary verses to each other, and exhausted in discharge of what they felt to be a noble duty the benevolence of a fecund nature. All was of purpose and aforethought;

and they gave to the English language a literature which is a marvel among nations.

We have since had poets who have worked with similar desires; some whose power has not been equal to their will, and a few whose power has been far greater than their opportunity. But the efforts of the best, as of the worst, were for a long time defeated by the operation of bad laws, infamous monopolies, and the vested interests of actors in old parts. The correction of the laws in question was fortunately productive of an immediate result. It at once found or made an audience for the poetic drama. But it was not among the classes by whom the early poet had been supported. Those classes had become careless of learning, and were impatient of all kinds of entertainment but that which possessed the least pretension to meaning, and preferred theatrical pieces which in purpose and structure were immeasurably below even the obsolete Mystery and Morality, as if the art and its patrons had returned to a second and a weaker infancy. Exposure sufficed to shake their authority, and to make the more clear-sighted of theatrical conductors substitute a heavier sort of ordnance for the pop-gun artillery with which they had managed to carry on a sham war, in an age of shams. Where this was not attempted, the bubble altogether bursts;—and thus the LYCEUM is compelled to confess to ruin, while the PRINCESS'S, notwithstanding its heavy losses, manages to retrieve a portion of its reputation by the performance of an historical tragedy,—not only new, but striking from its singularity, though not original. Meanwhile, in the suburban districts, signs of positive growth have accumulated. Not only are new dramas of the highest mark established, but original productions of poetic promise are introduced to the boards. There is, also, a principle of development in continual operation;—and transplantations of talent and pieces take place from one theatre to another, and both thrive the better for the change of situation. The metropolitan Orient is dappled with the prophetic hues of Aurora, and is abundant in signs of a bright approaching morning.

In these statements we desire to be practical. Large remuneration to authors of original pieces should not be expected from a low-priced theatre. We have lately indicated that 400*l.* is the hypothetical value of a five-act play. Now, it would be absurd to expect this from a sixpenny or shilling pit. But apart from this consideration, there is something exceptional in the supposed sum in itself. The price paid by managers in general to the recognized playwright on the staff of his theatre is regulated by the number of acts; 50*l.* an act to the well-established writer, and 25*l.*, or even less, to the comparatively untried. We see not why this rule should not be applied to five-act pieces. 250*l.* for a tragedy, with the chances of production rendered frequent, would be, we should think; not a despicable sum; and half that for a first attempt, or at a lower-class theatre, might in many cases, we can easily imagine, be very acceptable. Other arrangements, according to circumstances, might be made, not offensive to the most esteemed poets of the present day. We mention this, because we have reason to believe that if the bugbear of excessive pecuniary valuation for this class of production were removed from the managerial mind, there are now more than one theatre where the Poet, if he have the wish, and will but observe the conditions of dramatic structure, may obtain a satisfactory hearing. In Shakspeare's day, high prices were not common. We read in Alley's Diary of thirty shillings being given for the addition of a scene—and so forth; and in the popular development of the drama which we are recording, we must expect things to be reduced to their first elements. The fact, indeed, is so. The late John Wilkins received a weekly salary from the City of London Theatre for the regular supply of the pieces they wanted, and from small beginnings became able to write such five-act plays as 'Civilization' and 'The Egyptian.' Etty demanded but trifling prices for his early paintings; but they obtained circulation by reason of his humility, and ultimately a large money value. Let the modern dramatist benefit

by the example; and though his first patrons be poor, they may help him to rich ones hereafter.

MUSICAL AND DRAMATIC GOSSIP.—If "Passion Week" meant a week during which English persons have a passion for concert-going, such desire could not have been more amply responded to than has been the case during the past six days. *Promenade Concerts* at Drury Lane, during which the unfortunate 'L'Etoile' has been served up à la Jullien,—Mr. Alcock's annual benefit at the Lyceum,—Mr. Mellon's *Orchestral Concerts* at St. Martin's Hall,—Mr. W. S. Bennett's *Second Soirée*, form only the secular part of the week's provision. There have been, in addition, many Oratorios. In short, Drama has been devoutly mortified as usual, while Music has been more rampant in her penitential entertainments than ever. How can we wonder if our foreign neighbours,—who cannot be expected to know "the what and the why" of severities balanced by compliances at the opposite extremity of the scale of allowance,—accuse us, as roundly as they do, of dishonesty and hypocrisy?

The performance of Mr. Leslie's Oratorio, which was to have taken place on Thursday week, is postponed till the end of May.

Schubert's *Pianoforte Trio* in B flat, his Op. 29, which was performed by Herren Molique and Pauer and Signor Piatti, at Mr. Ella's last *Musical Evening*, gives us reason to return to that entertainment: since the *Trio*, we believe, had not before been performed at a concert in London. Though, perhaps, in some points (the slow movement especially) the composition may be described as too delicate for public use, it has still too much beauty and fancy,—too much unborrowed, unstudied novelty, to be entirely neglected for the future. In particular the first and last movements pleased. The *finale*, which looks—and which is—slight, has withal so much quaintness, elegance, and originality as to be acceptable even to a public so steeded—we may say, so stiffened—in classical predilections for a few writers as Mr. Ella's. But Herr Molique is hardly freakish and sentimental enough to do justice to such music, consummate master of his instrument though he is. In the hands of Herr Ernst this interesting *Trio* would have proved far more interesting.

A fair Correspondent reminds us that the piece recently produced at the Lyceum under the name of 'A Cozy Couple' [*Athen.* No. 1430], has but little, if any, claim to originality. The plot is taken from a play by M. Octave Feuillet, entitled 'Le Village: Scènes Provinciales.' "To change the names of *Dupuis* and *Rowière* into those of *Dormouse* and *Russeton*, and omit some allusions to Continental customs," says our Correspondent, "does not require much skill. It is so seldom that the *Athenæum* allows such thefts to escape notice, that it may perhaps find room for this assertion of the principle."—We had already discovered the original of the 'Cozy Couple,' but the sudden closing of the theatre, and the implied rejection of these foreign wares by the public, led us to neglect further reference to the subject. Perhaps, as our lady Correspondent suggests, it is better to put the true fact on record "for the sake of the principle."

Two Easter pieces are announced. At the Haymarket, an extravaganza by Mr. Planché, entitled 'The New Haymarket Spring Meeting (1855)'; and at the Princess's, a new romance in two acts, called 'The Mulester of Toledo.'

A new entertainment was inaugurated on Monday at St. Martin's Hall, in which the well-known dramatic and vocal talents of Mrs. T. German Reed (late Miss P. Horton), assisted by her husband, were engaged in the representation of a number of new characters, appropriately costumed, under the title of 'Illustrative Gatherings.' The first part of the entertainment has an appropriate sub-title, which is suggestive, and the idea of which is carried out in the naming of the characters. 'The Animated Bouquet—Flowers gathered from Real Life,' is the appellation in question; and the characters introduced accordingly bear the name of some flower or other. Thus, we have Mrs. Myrtle, of Holly Lodge; Miss Snowberry,

a scandal-loving philanthropist, which was capably acted; Mr. Southernwood, a veteran who discomfited the war; Rose Lily, with Dame Crocus and Dame Daffodil—the two latter characters played at the same time, each side of the person being differently appressed and mask-painted, that as the actress turned the part was humorously changed; Sir Jonquil, Miss Fuschia Willow, Miss Larkspur, and Master Nettle Myrtle—the last rather a good intention than a success. This portion of the entertainment was, on the whole, eminently satisfactory. The second, entitled 'The Enraged Musician,' awakened associations with Hogarth's picture, which were scarcely realized. Mrs. Quillquaker, a loquacious landlady, was, however, amusing; and Francisco Vergoni, an Italian boy, with his nice and hurdy-gurdy, pathetic. There was also a country servant, Kezia Wilcox, who would put things to rights in the Musician's room; but the part requires more development. As a French *artiste*, however, seeking an engagement in the Musician's new opera, Mrs. Reed recovered her *prestige*, both as an actress and singer; and her execution of 'Robert, toi que j'aime,' was remarkably effective. 'The Illustrative Gatherings,' altogether, are calculated to amuse, and may be pronounced elegant both in their conception and ultimate embodiment. Among the semi-dramatic drawing-room entertainments of the metropolis, they are therefore likely to secure a position.

We note the revival of Cherubini's 'Medea,' at the Frankfort Opera. To this magnificent work—written for the *Opéra Comique* of Paris, and accordingly written with spoken dialogue—Herr Lachner has added recitatives. It is a pity that no adaptation can be made of this opera, such as could bring it within the reach of ordinary singers; the part of the heroine being inaccessible by any one possessing less than Mdle. Cruvelli's voice and physical power. There must, however, be much music from Cherubini's operas available and interesting for concert performances; and we repeat this recommendation, being under the charm of the delicious chorus from 'Blanche en Provence,' which we heard an evening or two since, in Paris, where it is a stock concert-piece, though entirely unknown in London.

'Le Demi-Monde,' the new drama by M. Alex. Dumas the younger, now in representation at the *Théâtre Gymnase*, is, possibly, the most successful play which has been produced during late years in Paris:—every place being taken for every representation for a fortnight to come, and the interest of the crowded audiences who attend being that sort of living, breathless sympathy and attention, which the least experienced of playgoers can at once distinguish from the commanded raptures of a *claque*, or the delight of a few ardent personal friends. Yet what is it that the Parisians throng so eagerly to rejoice in? Another tragi-comedy of corrupt manners;—another picture of the bad world which is suspended, like Mahomet's coffin, betwixt earth and heaven;—another exhibition of Ill Fame struggling—almost strangling itself—to arrive at "social position";—of haggard Dishonour, with excuses, wistfully intriguing and agonizing itself in desperate hope of gaining the sympathy and support of Honour. The dialogue is natural, life-like, modern French talk, (some of the too direct questionings and too explicit confidences of the stage allowed for). The characters are, for women—a wife without a husband; a widow with a forged marriage certificate; a needy aunt, with an outspoken niece, who has grown up in this bad street of Vanity Fair pure in heart but bold in tongue: for men—a retired *roué*; a philosophical one, put forward as a man of sense, honour and feeling, who does sundry Jesuitical things, first to screen, afterwards to abase, the heroine *Madame d'Ange*, in order that he may interpose betwixt her and a marriage with a brave and credulous young soldier. On ourselves the impression made by this play was more disagreeable and melancholy than exciting; and we came home from it feeling as if we had passed an evening in that worst of all company, among which grossness and cruelty of heart and knavery are glossed over with genteel seemings. 'This 'Demi-

Monde' is wonderfully acted and arranged:—a despair to those who long to get rid of the set tones, and set chairs, and set groups in which English stage-managers delight. Madame Rose-Chéri, as the *Becky* of the drama, is almost a rival to Mdle. Rachel as *Lady Tartuffe*, in real viciousness and assumed elegance and candour. Mdle. Figeac, as the "lioness" of the 'Demi-Monde,'—a creature one degree coarser, gayer, and truer than the heroine,—pleased us even more. One scene,—in which her former husband refuses recognition and reconciliation, and in which, after having shown a touch of heart in her dismay, she breaks into feverish, restless frivolity, by way of getting rid of troublesome thought,—struck us as a scene from that tragedy of every-day life, so full of conscious and unconscious misery, which is daily, hourly acted, wherever people consort. M. Dupuis, too, as *M. Jalin*, the Mentor and the detector, goes through his difficult and little gracious part with the ease, humour and *sang-froid* of a thorough artist.—We dwell here on this play, because it has made a real "sensation";—yet neither as regards literary merit nor story can it claim more respectful notice in a literary English journal. But what a strange passion is that of the public, that throngs to see the abominations of its own under-world dragged out to open day and daguer-retyped!

MISCELLANEA

Richard III.—I do not think the arguments in Mr. Nichols's last letter justify his conclusion that the Duke of Glo'ster could not have been Protector before his arrival in London. I admit that the dates I have adduced, being only two in number, may both of them be clerical errors, and therefore cannot be called quite decisive of the point; but I cannot see that the reasons given for regarding them as erroneous are at all conclusive. And I will take the liberty of suggesting that Mr. Nichols, however thoroughly convinced in his own mind, has carelessly made a perfectly fair use of his materials in changing "2nd of May" into "2nd of June." He would have done better to have given the date as it stood in the original, and added his own observations in a note. This date of the 2nd of May occurs in a MS. volume, the authority of which in historical investigations stands very high. It consists of a large collection of grants, warrants, and other documents proceeding from the Crown during the reigns of Edward the Fifth and Richard the Third, which appear to have been very carefully transcribed. The order of the different entries, however, is very irregular throughout. A number of those belonging to Richard the Third's time are arranged in months, and here and there a more or less regular succession of days may be found, but the bulk of the volume exhibits no very strict chronological arrangement. Even the dates which immediately precede the one in question are not in the true order of time, though Mr. Nichols calls them a sequence. Within four pages of that date I find the 23th, 25th, and 23rd of May with the order of time inverted, and another 23rd of May following the 29th. Indeed, the strict order of time is not preserved even in the four documents immediately preceding that date which Mr. Nichols challenges on account of its breaking a sequence. In point of fact there is no sequence at all. With regard to the other date, the 21st of April, found among the Commissions of the Peace, the argument against it is, that there are certainly inaccuracies among these documents. Two or three commissions are repeated without a difference, and some with only a difference in date. Well, what does this amount to? Why, that there are some commissions enrolled twice,—this is frequently the case in the Patent Rolls;—and that there are others that have been issued more than once at different dates,—this, also, will be found of constant occurrence, not only in Edward the Fifth's reign, but, I believe, in every other. But these things give no evidence of error, except in the enrolling of some documents twice when once would have been sufficient. The reasons for rejecting the date of the 21st of April are, therefore, reduced to one. It is presumed that the Queen Dowager's party were all-powerful in the Council before the arrival of the Dukes of Glo'ster and Buckingham, and that they would never have granted offices, not even Commissions of the Peace, except to their own friends. In proof of this, Mr. Nichols appeals to the Commissions of Taxes issued on the 27th of April, none of which contains the name of the Duke of Glo'ster or of Buckingham, though they contain those of the Earl of Rivers and the Marquis of Dorset. But, though the Queen's party were certainly powerful, it does not, by any means, appear that they possessed uncontrolled power. The reduction of the young King's escort is a strong argument to the contrary. Nor does it appear evident, as Mr. Nichols would seem to think, that, if the Duke of Glo'ster had been Protector, then his name should have appeared in the Commissions of Taxes. There is no reason why a Protector of England should be a Commissioner of Taxes.

"I am, &c., JAMES GAIRDNER."

TO CORRESPONDENTS.—J. C. E.—L. M. T.—G. L.—W. T.—G. W.—C. B.—H.—Ed. H. G.—P. S.—J. C.—received.
E. R.—The publisher of the work referred to is Mr. Reeve, Henrietta Street, Covent Garden.

Erratum.—P. 373, col. 3, line 12 from bottom, for "Sonna," read *Tonna*.

Mr. HIGHLEY'S PERIODICAL PUBLICATIONS, NOW READY.

NOTICE.

. Gentlemen desirous of having any of the following Periodicals regularly forwarded on the day of Publication, are requested to remit, at the commencement of each year, the amount of the Annual Subscription specified.

I.
**The QUARTERLY JOURNAL of
PUBLIC HEALTH, and RECORD of EPIDEMICS;** including the Transactions of the Epidemiological Society of London. Edited by Dr. B. W. RICHARDSON.
No. I. was published on March 31.
Annual Stamped Subscription, 10s.; single Parts, 3s. each.

II.
The BRITISH and FOREIGN MEDICO-CHIRURGICAL REVIEW; being a combination of the *Medico-Chirurgical Review*, formerly edited by Dr. James Johnson; and the *British and Foreign Medical Review*, formerly edited by Dr. Forbes.
Published Quarterly.
Annual Subscription, 24s.; or 6s. per Part.

"We regard the *British and Foreign Medical Review* as quite a model of what reviews should be now-a-days. It addresses, of course, a special class; but the way it is edited might teach some thing to all the other reviews. It is worth consulting even by non medical readers."—*The Leader*.

III.
The ASYLUM JOURNAL. Published by Authority of the Association of Medical Officers of Asylums and Hospitals for the Insane. Edited by Dr. BUCKNILL, Devon County Asylum.
Published every Six Weeks.
Annual Stamped Subscription, 4s. 8d. Price 6d., stamped 7d., in Parts.

"It will evidently be a very useful periodical for the class for whom it is intended."—*Medico-Chirurgical Review*.

IV.
The MONTHLY JOURNAL of MEDICINE; containing Original Communications—Reviews—Periscope—Medical News, &c. Illustrations. 8vo.
Annual Subscription, 24s.; or 2s. per Part.
No. I. New Series, commenced January, 1855.

V.
The DUBLIN HOSPITAL GAZETTE. Published on the 1st and 15th of each Month.
Annual Stamped Subscription, 10s.; or separate Numbers, 5d. by post.

"It is intended as a record of the most interesting cases in the Irish hospitals....To all appearance will furnish a valuable series of cases."—*Medico-Chirurgical Review*.

VI.
QUARTERLY JOURNAL of MICROSCOPICAL SCIENCE; including the Transactions of the Microscopical Society of London. Edited by E. LANKESTER, M.D. F.R.S. F.L.S. &c.; and G. BUSK, F.R.G.S. F.L.S. &c.
Illustrated with Lithographs and Woodcuts. 8vo.
Annual Subscription, 16s.; single Numbers, 4s.

"We congratulate all lovers of natural history on the issue of this periodical....The getting-up is extremely good, and both Editors and Publishers seem to have done their utmost to do justice to their theme."—*Medico-Chirurgical Review*.

VII.
The NATURAL HISTORY REVIEW; including the Transactions of all the Irish Natural History Societies.
Published Quarterly.
Annual Subscription, 8s.; or 7s. 6d. per separate Part.

. A periodical devoted to advance the cause of natural history by recording many interesting communications which are constantly being made to various Societies, but which have hitherto seldom had any notice, or merely a publication in the newspapers of the day; to reviewing Works; and giving notices of the contents of Periodicals connected with Natural Science.

VIII.
COSMOS.
Revue Encyclopédique Hebdomadaire des Progrès des Sciences, et de leurs Applications aux Arts et l'Industrie. Fondée par M. B. R. DE MONFORT, rédigée par M. L'ABBE MOIGNO.
Annual Stamped Subscription for 1855, 25s., payable in advance to Mr. Highley, the appointed English Publisher.

IX.
The SCIENTIFIC BOOK CIRCULAR. A Quarterly Catalogue of all New English Publications on the Natural, Medical, and Applied Sciences.
Annual Stamped Subscription, 2s. Forwarded gratis to Mr. Highley's regular customers.

. Subscriptions should be forwarded by Post-Office Order, made payable to SAMUEL HIGHLEY, at the Strand Office.

London: SAMUEL HIGHLEY, 32, Fleet-street.

NEW WORK BY SAMUEL SHARPE, ESQ.
HISTORIC NOTES ON THE BOOKS OF THE OLD AND NEW TESTAMENTS. 12mo. cloth, 3s.
 London: Edward Moxon, Dover-street.

PRIZE ESSAY FOR THE INSTITUTE MEDAL.
 Just published, demy 8vo. price 1s. 6d. in paper cover; or 2s. 6d. cloth gilt, and lettered.
A POPULAR ACCOUNT OF THE STYLES OF ARCHITECTURE: their Rise, Progress, and Present Condition. By EDWARD L. TARRUCK, Architect; Editor of 'The Builder's Practical Director.' Author of Articles contributed to the *Builder*. 'On the Present Condition of the Profession of Architecture,' &c.
 London: J. Hagger, 67, Paternoster-row.

CATHOLIC LEGENDS. A New Collection.
 2s. 6d.; cloth, 3s.; gilt, 3s. 6d.; (by post, 6d.)
 "Provided that due care is taken to impress upon the growing intelligence the true character and weight of these legends, (which do not profess to be more than their name imports), they will tend to feed the imagination with that nourishment which it ardently desires, and which it is almost impossible to supply to it, in connexion with the realities of the invisible world, and not with purely secular romance and poetry alone."
 London: Burns & Lambert, 17, Portman-street.

HEROINES OF CHARITY; containing complete and interesting Accounts of Mdlle. Legras, and the other Foundresses of the "Sisters of Charity", Jeanne Biscot (who attended the dying soldiers at Arras); the Sisters of the Poor; the Sisters of Vincennes; Mdlle. de Méun, Princess of Epinay, Foundress of the Hospital at Baucé; Mdlle. de Miramon, &c. &c. 2s. 6d.; cloth, 3s.; gilt, 3s. 6d.; (by post, 6d.)
 "In the practical departments of Christian charity, there are many things which Protestants have yet to learn. In this volume are recited the lives and works of some who have been distinguished for benevolence to the poor, the sick, and the afflicted."
Literary Gazette.
 London: Burns & Lambert, 17, Portman-street.

FABIOLA: a Tale of the Catacombs. 3s.; cloth, 3s. 6d.; gilt, 4s.; (by post, 6d.)
 "Putting aside the peculiarities of the tale, 'Fabiola' is a work of thrilling interest. No one will lay it aside until he has read it through; and we shall have no confidence in the lessons of the past, if he does not rise from its perusal more charitable towards those who differ from him in religious belief."—*Athenæum*.
 "The story is interesting, the scenery and general setting carefully, learnedly, and tastefully executed."—*Globe*.
 N.B.—This Work has already been translated into French and German.
 London: Burns & Lambert, 17, Portman-street.

This day, Cheaper Edition,
'THE SYSTEMA THEOLOGICA' of LEIBNITZ. Author of 'The Refutation of Spinoza,' lately published. Translated, with Essay and Notes, by Dr. RUSSELL. In 8vo. cloth, 7s. 6d. (by post, 8s.)
 "The most purely philosophical mind of his time, he never opens his hand without giving proof of the profusion of his mental riches, for which his natural powers were such that he could be said without exaggeration to find oil *difficult things easy*, his erudition, so vast and varied and minute, was no less marvellous."
Edinb. Guardian.
 London: Burns & Lambert, 17, Portman-street.

Just published,
PRACTICAL PHOTOGRAPHY, on GLASS and PAPER: a Manual containing simple Directions for the Production of Portraits and Views by the Agency of Light, including the Collodion, Albumen, Calotype, Waxed Paper, and Positive Paper Processes. By CHARLES A. LONG. Price 1s., per post, 1s. 6d.

PHILOSOPHICAL INSTRUMENTS.
GENERAL AND DESCRIPTIVE CATALOGUE of Philosophical Apparatus and Chemical Preparations Manufactured and Sold by BLAND & LONG, Opticians, &c., 133, Fleet-street, London: comprising Twenty-one Sections on various branches of Natural Philosophy.
 Price 1s.; per post, 1s. 6d.
 Published by Bland & Long, Opticians, Philosophical and Photographical Instrument Makers, and Operative Chemists, 133, Fleet-street, London.

THE INFALLIBLE PROCESS.
 Just ready, 2s. 6d. bound in cloth; by post, 3s.
THE CALOTYPE PROCESS.—A HANDBOOK to PHOTOGRAPHY on PAPER.
 By THOMAS SUTTON, B.A. of Corpus College, Cambridge.
 "The Process described in this treatise is so certain that it may fairly be called Infallible. It gives the utmost clearness and sharpness of definition, and renders admirably the atmospheric effects of landscape. The certainty of this Process consists in the fact, that the mode of development is adapted to the exposure that may have been given to the picture, so that over-exposure is scarcely possible, and the details of the deepest shadows may in this way be fully brought out without injury to the lights; and intense blacks may always be obtained. It is peculiarly the Process for the tourist, and pictures of immense size may be taken with great certainty.
 The author will be in attendance at the Photographic Institution for a few weeks, for the purpose of demonstrating the Process to Pupils, at a charge of Three Guineas each.
 Photographic Institution, 165, New Bond-street, next the Clarendon.

Just published, 8vo. price 10s. 6d.
A HISTORY OF THE CITY OF DUBLIN.
 Vol. I. containing an Account of the more Ancient Districts of the Metropolis in Ireland; with Notices of the various Important Personages and Historical Events connected with those localities. Illustrated with a MAP of the ANCIENT CITY, and an Appendix of Documents, now first published from Original Manuscripts. By J. T. GILBERT, Hon. Sec. Irish Archaeological and Celtic Society.
 Dublin: James M'Glashan, 50, Upper Sackville-street. London: W. S. Orr & Co. Amen-corner, Paternoster-row.

Just published,
 Large 8vo. handsomely bound in boards, and forming an elegant volume, price 12s. 6d.
LYRA HELLENICA;
 OR,
TRANSLATIONS INTO GREEK IAMBIC VERSE,
 By E. R. HUMPHREYS, LL.D.
 Head Master of the Cheltenham Grammar School.
 The above Work, forming a complete and regularly arranged KEY TO THE 'EXERCITATIONES IAMBICÆ,'
 Can be obtained by Teachers alone, upon application to the Author, either directly or through a Bookseller, the price being inclosed in the form of a Post-office Order, made payable to John Waterworth, Esq., Secretary of the Cheltenham Grammar School.

Schools.) By **SIR EDMUND HEAD, Bart.** With Illustrations by **GEORGE SCHARF.**

JOHN MURRAY, Albemarle-street.

SIR CHARLES LYELL'S WORKS.

Now ready, *Fifth Edition*, thoroughly revised, with 750 Woodcuts, 8vo. 14s.

**A MANUAL OF ELEMENTARY
GEOLOGY;**

Or, the ANCIENT CHANGES of the EARTH and its INHABITANTS, as
illustrated by its GEOLOGICAL MONUMENTS.

By **SIR CHARLES LYELL, F.R.S.**

"It is now more than three years since the appearance of the last Edition. In that interval the science of Geology
has been advancing as usual at a rapid pace, making it desirable to notice many new facts and opinions, and to consider
their bearing on the previously acquired stock of knowledge. In my attempt to bring up the information contained in
this Treatise to the present state of the science, I have added no less than 200 new illustrations and 140 new pages of
ext, which, if printed separately and in a less condensed form, might have constituted alone a volume of respectable
size."—*Author's Preface.*

Also, *Ninth and revised Edition*, Woodcuts, 8vo. 13s.

LYELL'S PRINCIPLES of GEOLOGY; or, the Modern
Changes of the Earth and its Inhabitants, as illustrative of Geology.

Also, *Third and Cheaper Edition*, Map, 4 vols. post 8vo; 6s. each,

LYELL'S TWO VISITS to NORTH AMERICA, CANADA,
and NOVA SCOTIA: with GEOLOGICAL OBSERVATIONS.

JOHN MURRAY, Albemarle-street.

In 1 vol. 8vo. with many hundred Woodcuts, price 50s.

**LOUDON'S ENCYCLOPÆDIA of GARDEN-
ING**: Comprising the Theory and Practice of Horticulture,
Floriculture, Arboriculture, and Landscape Gardening: Including
all the latest Improvements, &c. A New Edition, corrected and
improved by **Mrs. LOUDON**.—Also,

LOUDON'S HORTUS BRITANNICUS; or,
Catalogue of all the Plants indigenous to, cultivated in, or intro-
duced into, Britain. New Edition, with a Supplement, price
31s. 6d. The Supplement, *separately*, price 14s.

London: Longman, Brown, Green, and Longmans.

INSTRUCTION IN ART.

**MR. J. D. HARDING'S EDUCATIONAL
WORKS ON ART.**

Second Edition.

LESSONS ON ART.

By this Work every one may learn to draw either with or with-
out a Master. Size, imperial 8vo. in Six Parts, paper sides, or
One Volume imperial 8vo. 15s. cloth. Containing 127 Lessons, 155
pages of Text, 48 Lithographic Plates, and 103 Woodcuts.

NEW WORK.

**GUIDE AND COMPANION TO LESSONS
ON ART.**

In one volume imperial 8vo. price 12s. 6d. cloth, containing 178
pages of Text, 15 Lithographic Plates (some Tinted), and 87
Woodcuts.

The above Works are approved by the Department of Science
and Art.

Fourth Edition.

Size, imperial 4to. price 25s. cloth,

ELEMENTARY ART.

Containing 97 pages of Text, 24 Plates in Lithography (many
Tinted), and 45 Woodcuts.

Second Edition.

Size, imperial 4to. in Six Parts, paper sides, or One Volume,
cloth, price 15s.

LESSONS ON TREES.

Containing 12 columns of Descriptive Text, and 63 Lessons in
30 Lithographic Plates.

The whole of the above Works are greatly improved, and much
reduced in price.

THE SCIENCE of LIFE; or, How to Live

and What to Live for: with ample Rules for Diet, Regimen, and Self-Management; together with Instructions for securing health, longevity, and that sterling happiness only attainable through the judicious observance of a well-regulated course of life. By a PHYSICIAN.—London: Piper Brothers & Co. 23, Paternoster-row; Haunay, 63, Oxford-street; Mann, 39, Cornhill; and all Booksellers.

ADLARD & JONES,

BOOKBINDERS, 35, Villiers-street, Strand,
(Established upwards of Thirty Years.)
Libraries arranged, classified, repaired, and furnished.
Books carefully bound in elegant and plain styles, antique and modern. Various Specimens may be seen on application to
35, VILLIERS-STREET, STRAND, LONDON.

BOOKBINDING.—W. HOLMES, Practical

Bookbinder, 125, Oxford-street, London. Books bound in Morocco, Russia, or Calf, both plain and elegant, on the lowest terms. Gentlemen waited upon with patterns. Estimates given for large or small Libraries.—Address, 125, Oxford-street.

ROSS'S PHOTOGRAPHIC PORTRAIT and

LANDSCAPE LENSES.—These Lenses give correct denitification at the centre and margin of the picture, and have their visual and chemical action coincident.

Great Exhibition Jurors' Report, p. 274.

"Mr. Ross prepares lenses for Portraiture having the greatest intensity yet produced, by procuring the coincidence of the chemical, actinic and visual rays. The spherical aberration is also very carefully corrected, both in the central and oblique pencils."

"Mr. Ross has exhibited the best Camera in the Exhibition. It is furnished with a double achromatic object-lens, about 3 inches in aperture. There is no stop, the field is flat, and the image very perfect up to the edge."

Catalogues sent upon application.
A. Ross, 2, Featherstone-buildings, High Holborn.

THE NEW COLLODION, manufactured by

BLAND & LONG, 153, Fleet-street, London, will bear comparison with any other preparation offered to Photographers. Price 9d. per oz. Can be had separate from the Iodizing Solution. Nitrate of Silver, 1s. 6d. per oz.; Pyrogallol Acid, 1s. 6d. per drachm; Glacial Acetic Acid, 6d. per oz.; Hyposulphite of Soda, 1s. per lb.

CAMERAS, LENSES, and every description of Apparatus, of first-class workmanship.

Chemicals of ABSOLUTE PURITY, and every material required in the Photographic Art, of the finest quality.

Instruction in all the processes.

Catalogues sent upon application.

BLAND & LONG, Opticians, Photographical Instrument Makers and Operative Chemists, 153, Fleet-street, London.

XYLO-IODIDE of SILVER, exclusively used

at all the Photographic Establishments.—The superiority of this preparation is now universally acknowledged. Testimonials from the best Photographers and principalscientific men of the day, warrant the assertion, that hitherto no preparation has been discovered which produces uniformly such perfect pictures, combined with the greatest rapidity of action. In all cases where a picture is required, the two solutions may be had at Wholesale prices in separate Bottles, in which state it may be kept for years, and exported to any climate. Full instructions for use.

CAUTION.—Each Bottle is stamped with a Red Label bearing my name, RICHARD W. THOMAS, Chemist, 10, Pall Mall, to counterfeits which is felony.

CYANOGEN SOAP, for REMOVING all kinds

of PHOTOGRAPHIC STAINS. The genuine is made only by the inventor, and is secured with a red label bearing this signature and address, RICHARD W. THOMAS, CHEMIST, 10, PALL MALL. Manufacturer of pure Photographic Chemicals; and may be procured of all respectable Chemists, in Pots of 1lb., 2s., and 3s. 6d. each, through Messrs. Edwards, 67, St. Paul's Church-yard; and Messrs. Barclay & Co. 95, Farringdon-street, Wholesale Agents.

PHOTOGRAPHIC CAMERAS of EVERY

DESCRIPTION CAN BE HAD AT

OTTEWILL & MORGAN'S MANU-

FACTORY, 24 and 25, Charlotte-terrace, Caledonian-road, Islington.—OTTEWILL'S REGISTERED DOUBLE-BODY FOLDING CAMERA, adapted for Landscapes or Portraits, may be had of A. Ross, Featherstone-buildings, High Holborn, Photographic Institution, Bond-street, and at the Manufactory as above; where every description of Cameras, Slides, and Tripods may be had.—The Trade supplied.

THE IODIZED COLLODION, manufactured

by J. B. HOCKIN & CO. 289, STRAND, LONDON, still remains unrivalled for sensitiveness and density of Negative, it excels all others in its keeping qualities and uniformity of constitution.—Albumenized Paper, 17s. by 11. 5s. per quire. Waxed ditto, 7s. of very superior quality.—Double Achromatic Lenses, equal in all points to those of any other manufacturer: Quarter Plate, 2l. 2s.; Half Plate, 5l.; Whole, 10l.—Apparatus and pure Chemicals of all descriptions.

Just published, 'PRACTICAL HINTS on PHOTOGRAPHY,' by J. B. HOCKIN. 3rd edition, price 1s.; per post, 1s. 4d.

BANK OF DEPOSIT,

NATIONAL ASSURANCE and INVESTMENT ASSOCIATION,
No. 3, PALL MALL, EAST, LONDON.

Established A.D. 1844.

Empowered by Special Act of Parliament.

Parties desirous of depositing MONEY are requested to examine the plan of this Institution, by which a high rate of interest may be obtained with perfect security.

The Interest is payable in January and July at the Head Office in London; and may also be received at the various Branches, or through country bankers, without delay or expense.

PETER MORRISON, Managing Director.

Prospectuses and Forms for opening Accounts sent free on application.

WESTMINSTER and GENERAL LIFE

OFFICE, established 1836, at the Westminster Fire Office, 27, King-street, Covent-garden. Founded 1717.

Assurances effected during the current year, on the participating scale, will share in the ensuing division of profit to be declared 1857.

The additions made to sums assured by Policies in the Participating Class up to the 31st December, 1851, have averaged one-half of the Premiums paid on them.

W. M. BROWNE, Actuary.

MINIMUM PREMIUMS for LIFE

ASSURANCE.—The following are the LIFE PREMIUMS for Assurances of 1000 £, charged by the SCOT-TISH AMICABLE LIFE ASSURANCE SOCIETY, on the terms stated below:—

Age	Age	Age	Age	Age
20	30	40	50	60
£1 8 6	£1 16 7	£3 9 7	£3 10 9	£5 7 2

These Rates have been formed on the principle of applying the Bonus Additions to reduce the Premium on the assumption of a Bonus at the rate of 10 per cent. If the addition be more, the Policy will be increased; if less, it will be diminished. The rates of addition at the Investigations at 31st Dec. 1852, and 31st Dec. 1853, were 15 per cent., at 31st Dec. 1854, 2 per cent., and at 31st Dec. 1853, 15 per cent.

WILLIAM SPENS, Manager.

J. E. C. KOCH, Resident Secretary, London.
45, Lombard-street, London,
March 17, 1855.

LIFE ASSURANCE.

REDUCED RATES for SHORT PERIODS.

Age.	One year.	Seven years.
60	£3 4 0	£3 15 0
55	1 14 0	2 9 6
50	1 9 0	1 14 0
45	1 8 7	1 9 6
40	1 5 0	1 8 2

The above are extracted from the new Table of Rates for Assurance of and if death occur within one or seven years. Parties desirous of effecting such Insurances will find these Rates lower than those of other Offices.

WILLIAM SPENS, Manager.

J. E. C. KOCH, Resident Secretary, London.
45, Lombard-street, London,
March 17, 1855.

ST. GEORGE ASSURANCE COMPANY,

118, PALL MALL, London.

Chairman.—Viscount RANELAGH, Park-place, St. James's.

Deputy-Chairman.—HENRY POWNALL, Esq., Leadenhall-square.

Noting Hall.

Indisputable Policies, Annuities, and Provision for Families and Children on the most favourable terms. Unmarketable titles assured.

Loans granted on a new and liberal principle.

For further particulars apply at the Office as above.

W. C. URQUHART, Secretary.

GREAT WESTERN RAILWAY.—COALS.

Orders for the best RUABON HOUSE COALS, equal to the best Durham's, may be executed at 5s. per Ton (cash price), delivered within 10 miles of the Paddington Station.

These Coals are bright and durable in burning, and contain only one-half per cent. of dust.

They are now for the first time introduced into the London Market by the recent opening of the Great Western Railway into North Wales.

Address the Superintendent of the Company, Paddington Station.

LOCKWOOD'S celebrated NUGGET PENS,

being electro-gilt, are not liable to rust or corrode; with Fine, Medium, or Broad Points, 1s. per box of one dozen. Wholesale and retail at LOCKWOOD'S Stationery and Dressing-Case Warehouse, 75, New Bond-street.

N.B. A box of one dozen post free for 13 stamps.

DR. SCHÖNBEIN'S OZONOMETER.

L. CASELLA & CO. having been appointed sole Agents for the above, are prepared to supply them at 5s. 6d. per box; each box contains sufficient for one year, with ample directions for taking Observations. Register Forms for one year, 1s. The ozonometer sent post at 10d. extra; the Register Forms at 6d. extra. L. CASELLA & CO. Meteorological Instrument Makers to the Admiralty, the Board of Trade, and the Government of America.—23, Hatton-garden, London.

F. DENT, 61, STRAND, and 34 and 35,

ROYAL EXCHANGE, Chronometer, Watch, and Clock Maker, by appointment to the Queen and Prince Albert, sole Successor to the late E. J. Dent in all his patent rights and business at the above Shops, and at the Clock and Compass Factory, at Somerset Wharf, Maker of Chronometers, Watches, Astronomical, Turret, and other Clocks, Diploidescopes, and Patent Ships' Compasses, used on board Her Majesty's Yacht, Ladies' Gold Watches, &c.; Gentlemen's, 16 guineas. Strong Silver Lever Watches, 6l. 6s.

E L K I N G T O N and C O.,

PATENTERS of the ELECTRO PLATE.

MANUFACTURING SILVERSMITHS, BRONZISTS, &c. Respectfully urge upon Purchasers to observe that each article bears their Patent Mark, "E. & Co. under a crown," as no others are warranted by them.

The fact frequently set forth of articles being passed by "Elkington's process," affords no guarantee of the quality. These productions were honoured at the late Great Exhibition by an award of the "Council Medal," and may be obtained at either Establishment.

22, REGENT-STREET, LONDON.

45, MOORGATE-STREET, BIRMINGHAM.

Estimates, Drawings, and Prices sent free by post. Replating and Gilding as usual.

WATHERSTON & BROGDEN caution the

Public to have thecarat gold stated on the invoice, and redress is obtainable in a County Court. Waterston & Brogdén's Gold Chains are sold on this principle only, at manufacturer's prices.—Crystal Palace, Central Transept Gallery, and Manufactory, 16, Henrietta-street, Covent-garden. Assays made of chains and jewelry for 1s. each.

MESSRS. J. & R. MCCRACKEN, FOREIGN

AGENTS, and AGENTS to the ROYAL ACADEMY, No. 7, Old Jewry, beg to remind the Nobility, Gentry, and Artists, that they continue to receive Consignments of Objects of Fine Arts, Baggage, &c. from all parts of the Continent, for clearing through the Custom House, &c.; and that they undertake the shipment of effects to all parts of the world. Lists of their Correspondents abroad, and every information, may be had on application at their Office, as above. Also, in Paris, of M. M. CHENU, No. 28, Rue Croix des Petits Champs (established upwards of fifty years), Packer and Custom-House Agent to the French Court and to the Musée Royal.

POTICHOMANIA.—HUTTON & Co., 6, New-

gate-street, London, supply (Wholesale only) Le Ken's new Sheets of small and medium size Figures, and Borders for Etu- can Potichomania—Glass Vases of Classic and Artistic shapes— and every requisite for this new Art.—N.B. ONE THOUSAND BEDSTEADS TO CHOOSE

FROM—HEAL & SON have just erected extensive Premises, which enable them to keep upwards of One Thousand Bedsteads in stock. One Hundred and Fifty of which are fitted for inspection, comprising every variety of Brass, Wood, and Iron, with Chintz and Damask Furnitures, complete. Their new Ware-rooms also contain an assortment of BED-ROOM FURNITURE, which comprises every requisite, from the plainest Japaned Deal for Servants' Rooms, to the newest and most tasteful designs in Mahogany and other Woods. The whole warranted of the soundest and best manufacture—HEAL & SON'S ILLUSTRATED CATALOGUE OF BEDSTEADS, and PRICED LIST OF BEDDING, sent free by post.—HEAL & SON, 136, Tottenham Court-road.

FENDERS, STOVES, and FIRE IRONS.

Buyers of the above are requested before finally deciding, to visit WILLIAM S. BURTON'S SHOW-ROOMS, 39, Oxford-street (corner of Newman-street), Nos. 1, 2, and 3, Newman-street, and 1 and 3, Perry's place. They are the largest in the world, and contain such an assortment of FENDERS, STOVES, RANGES, FIRE IRONS, and GENERAL IRONMONGERY as cannot be approached elsewhere, either for variety, novelty, beauty of design, or cheapness of price. Bright stoves, with ornate ornaments and two sets of bars, 21. 14s. to 51. 10s.; ditto with ornate ornaments and two sets of bars, 31. 10s. to 121. 12s.; ditto with ornate ornaments, with standards, from 7s. to 31.; Steel Fenders from 21. 15s. to 61.; ditto, with rich ornate ornaments from 21. 15s. to 71. 7s.; Fire-irons, from 1s. 9d. the set to 41. 4s. The best and all the Patent Stoves, with radiating plates. All which he is enabled to sell at these very reduced charges—

Firstly—From the frequency and extent of his purchases; and Secondly—From those purchases being made exclusively for cash.

THE PERFECT SUBSTITUTE FOR SILVER.

—The REAL NICKEL SILVER, introduced 30 years ago by WILLIAM S. BURTON, when PLATED by the patent process of Messrs. Elkington & Co., is beyond all comparison the very best article next to sterling silver that can be employed as such, either usefully or ornamentally, as by no possible test can it be distinguished from real silver.

	Fiddle Thread.	King's Pattern.	Pattern.
Tea Spoons, per dozen	18s.	25s.	32s.
Dessert Forks	30s.	40s.	46s.
Dessert Spoons	30s.	40s.	46s.
Table Forks	30s.	40s.	46s.
Table Spoons	40s.	55s.	66s.

Tea and Coffee Sets, Waiters, Candelsticks, &c., at proportionate prices. All kinds of re-plating done by the patent process.

CHEMICALLY PURE NICKEL NOT PLATED.

WILLIAM S. BURTON has TEN LARGE SHOW-ROOMS devoted to the show of GENERAL FURNISHING IRONMONGERY (including Cutlery, Nickel Silver, Plated and Japaned Wares, Iron and Brass Bedsteads), so arranged and classified that purchasers may easily and at once make their selections.

Catalogues, with Engravings, sent (per post) free. The money returned for every article not approved of.

29, OXFORD-STREET (corner of Newman-street); 1, 2, and 3, NEWMAN-STREET; and 4 and 5, PERRY'S PLACE.

DURABILITY OF GUTTA PERCHA

RUBING.—Many inquiries having been made as to the Durability of Gutta Percha Tubing, the Gutta Percha Company have pleasure in giving publicity to the following letter:—FROM SIR RAYMOND JARVIS, Bart., VENTNOR, ISLE OF WIGHT.—Second Testimonial. "March 10th, 1852. In reply to your letter, received this morning, respecting the Gutta Percha Tubing for Pump Service, I can state, with much satisfaction, it answers perfectly. Many Builders and other persons have lately examined it, and there is not the least apparent difference since the first laying down, now several years; and I am informed that it is to be adopted generally in the houses that are being erected here."

N.B. From this Testimonial it will be seen that the CORROSION OF WATER OF THE ISLE OF WIGHT has no effect on Gutta Percha Tubing.

THE GUTTA PERCHA COMPANY, PATENTEES, 18, WHARF-ROAD, CITY-ROAD, LONDON.

GENTLEMEN purchasing their own Material

will find one of the most extensive and best-assorted STOCKS of WOOLLEN GOODS, &c. for Spring and Summer wear, at HILL & SONS, 89 and 91, St. Martin's Lane. Goods in the cross. Every article is marked at the lowest price, and in plain figures. A good Tailor can be recommended if required.

BERDOE'S SPRING OVER-COATS and

CAPES, rendered (without extra charge, or confining perspiration) thoroughly impervious to rain, a fact established beyond dispute by ten years' extensive trial, superseding all other over-coats and capes. A very large stock of superior garments, in-tended not merely for rainy weather, but general use.—CAPES, 2s. to 40s.; COATS, 40s. to 50s.

W. BERDOE, 96, New Bond-street, and 69, Cornhill (only).

S. O. SILVER & CO., OUTFITTERS,

CLOTHIERS, CONFECTIONERS, and MANUFACTURERS of Outfitting Requirements, WATERPROOF CLOTHING, and the various INDIA RUBBER APPLIANCES.

CABIN PASSENGERS' Outfitting Branch 66 & 67, Cornhill.

SECOND CLASS and EMIGRANTS' 3 & 4, Dishopgate-street, opposite the London Tavern; also at Liverpool.

SHIRT FACTORIES Porten and Romsay, Hants. Commissioners of the Admiralty, London.

CABIN FURNITURE Do. North Woolwich, opposite H.M.'s Dock Yard.

WATERPROOF CLOTHING Do.

Thus, passengers and purchasers generally may be supplied at a GREAT SAVING OF COST, and embrace the HOME quality at SLIPPING PRICES.

RUPTURES.—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of a steel spring, so often hurtful in its effects, is here avoided; a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER Spring, with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumstance of the body, two inches below the hips, being sent to the Manufacturer, Mr. WHITE, 225, Piccadilly, London.

ELASTIC STOCKINGS, KNEE CAPS, &c.

For VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price, from 7s. 6d. to 16s. each; postage 6d.

MANUFACTORY, 225, PICCADILLY, LONDON.

HARVEY'S SAUCE.—The admirers of this

celebrated Fish-Sauce are particularly requested to observe, that none is genuine but that which bears the name of WILLIAM LAYNE & CO. on the back of the label, in addition to the label used so many years, and signed ELIZABETH LAZENBY, 6, Edwards-street, Portman-square, LONDON.

LEA & PERRINS' WORCESTERSHIRE

SAUCE imparts the most exquisite relish to Steaks, Chops, and all Roast Meat, Gravies, Fish, Game, Soup, Curries, and Salad, and by its tonic and invigorating properties enables the stomach to perfectly digest the food. The daily use of this aromatic and delicious Sauce is the best safeguard to health. Sold by the Proprietors, LEA & PERRINS, 6, Vere-street, Oxford-street, London, and 68, Broad-street, Worcester; and also by Messrs. Barclay & Sons, Messrs. Crosse & Blackwell, and other Grocers and Merchants. London; and generally by the principal Dealers in Sauce. N.B. To guard against imitations, see that the names of "Lea & Perrins" are upon the label and patent cap of the bottle.

BERMUDA ARROWROOT, unrecovered from

the tin cases in which it is shipped, weight, case exclusive, 201b. price 30s. Small quantities can be had at 2s. 6d. per lb.

JAMES EPPS, Homeopathic Chemist, Egyptian Hall, Piccadilly; 112, Great Russell-street, City; and 82, Old Broad-street, City.

THE IMPROVED CHARCOAL RESPIRATOR.

The only Respirator (excepting the original cumbersome one) in which the object sought by Dr. Stenhouse, viz. the purification of an impure or infected atmosphere, is entirely effected; the construction of this Respirator completely prevents the inhalation of any air that has not come in contact with the charcoal. As an instrument for simply warming the air it also surpasses the ordinary Respirator.

To meet the expressed views of Dr. Stenhouse, "that inventions for the prevention of disease ought to be sold at the lowest possible price," we have offered it to the public at as low a cost as we believe a portable instrument can consistently be sold, without loss of profit on receipt of 6s. DAREY & GOSDEN, 140, Leadenhall-street, London.

METCALFE & CO'S NEW PATTERN

TOOTH BRUSH & PENETRATING HAIR BRUSHES.

The Tooth Brush has the important advantage of searching thoroughly into the divisions of the Teeth, and is famous for the hairpins, which are so much improved by its use, and are incapable of injuring the finest hair. Penetrating Hair Brush, with the durable unbleached Russian bristles. Flesh Brushes of improved graduated and powerful friction. Velvet Brushes, which act in the most successful manner. Smyrna Sponges.—By means of direct importations, Metcalfe & Co. are enabled to secure to their customers the luxury of a genuine Smyrna Sponge. Only at METCALFE, BINGLEY & CO'S Sole Establishment, 130, Oxford-street, one door from Holles-street.

Caution.—Beware of the words "From Metcalfe's," adopted by some houses.

METCALFE'S ALKALINE TOOTH POWDER, 2s. per box.

BEAUTIFUL HAIR, WHISKERS, &c., are

invariably produced in Two or Three Weeks by COUPELLE'S (ELECTROLYTIC) CHLORIDE, which is universally acknowledged as the only preparation to be really depended upon for the un-failing production of Hair, as also checking Greyness, Baldness, &c., and rendering the Hair luxuriant, curly, and glossy.—Mr. Williams, 8, Leinster-street, Liverpool. "I can now show as fine a head of hair as any person, solely from using your Chloride."—Captain Croft, Zouave, Irregular Cavalry, 18th Hussars, 1851. "I have an excellent moustache." Mrs. Carter, Pangbourne, Berks. "My head, which was quite bald, is now covered with new hair." Price 2s. per packet, through all Chemists, &c.; or sent free for 24 penny stamps, by ROSALIE COUPELLE, 69, Castle-st., Newmarket, Oxford-st., London. Guard against imitations under closely similar names.—FIVE ALPHABETICALLY BY THE HAIR; with numerous startling and indisputable Testimonials; list of Country Agents, &c., post free for two stamps.

DO YOU WANT LUXURIANT HAIR,

WHISKERS, &c.?—No other compound for the Hair has maintained such an enduring celebrity as EMILY DEAN'S CREMINE. It is guaranteed to produce Whiskers, Moustaches, Eyebrows, and all the hair on the face, and to prevent baldness, from whatever cause, strengthen it when weak, prevent its falling out, and effectually check greyness in all its stages. Price 2s. per Package (elegantly perfumed); sent post free on receipt of 24 penny postage stamps, by MISS DEAN, 37A, Manchester-street, Gray's Inn-road, London. Sold by every Chemist. "In one fortnight I produced a beautiful set of moustaches." H. Hickson. "It has prevented my hair falling out." J. Hickson. "It has quite checked the greyness that was coming on." Mrs. Eld. Beware of imitations under closely similar names.

THE "BABY'S" NEW FEEDING BOTTLE.

—From the *Lancet*.—"We have seldom seen anything so beautiful as the nursing bottles introduced by Mr. Elam, of Oxford-street. Whether for water, milk, or any other liquid, the feeding, are quite unrivalled."—BENJAMIN ELAM, 196, Oxford-street. 7s. 6d. Each bottle is stamped with my name.

COLE'S ALGA MARINA is the Concentrated

Essence of the Sea-weed, containing in a highly condensed form all the virtues of those plants, to which medical authorities ascribe the principal benefits derivable from a residence by the Sea. It affords speedy relief and a certain cure in all cases of Acute or Chronic Rheumatism, Rheumatic Gout, Neuralgia, and other pains in the limbs and joints. It is now rapidly superseding all other external remedies in cases of Weakness, Relaxation, Contraction, Paralysis, Stiffness, Deformities, Swellings, Tumors, Scrofulous Diseases, and the Malfunctions of Rickets or Badly-nursed Children; and in all cases where friction is recommended, it will greatly increase its good effects. Sold in bottles, 2s. 9d., 4s. 6d., and 11s. each, by T. KEATING, 79, St. Paul's Churchyard, London, and all Chemists.

*A. All sufferers should read the Pamphlet, which may be had, gratis, on application, and by post on enclosing six postage stamps.

DEAFNESS and NOISES IN THE HEAD.—

Institution for the Cure of Deafness, 9, Suffolk-place, Pall Mall, London. Instant and permanent restoration of hearing guaranteed, without the use of ear-trumpets, instruments, or causing one moment's inconvenience to the most aged or nervous sufferer. Dr. HOGHTON'S new and extraordinary discovery, by one consultation enables deaf persons of either sex to hear immediately with perfect ease the lowest whisper, and magically removes all ringing in the ears. Hospital and private testimonials and certificates from the most eminent Physicians and Surgeons in England, in whose presence deaf persons have been cured, and many hundreds of private patients cured can be seen or referred to. Hourly consultation, and the Malfunctions of Rickets or Badly-nursed Children, and in all cases where friction is recommended, it will greatly increase its good effects. Sold in bottles, 2s. 9d., 4s. 6d., and 11s. each, by T. KEATING, 79, St. Paul's Churchyard, London, and all Chemists.

*A. All sufferers should read the Pamphlet, which may be had, gratis, on application, and by post on enclosing six postage stamps.

*SELF-CURE OF DEAFNESS, for country patients; a step to empiricism, quackery, and exorbitant fees, sent on receipt of seven stamps, free. Examination free. 9, Suffolk-place, Pall Mall.

DINNEFORD'S PURE FLUID MAGNESIA

has been for many years sanctioned by the most eminent of the Medical Profession as an excellent remedy for Acidities, Headaches, Indigestion, Gout, and Irritation. As a Mild Aperient, it is admirably adapted for delicate Females, particularly during Pregnancy; and it prevents the Food of Infants from turning sour during digestion. Combined with the ACIDULATED LEMON SKRUP, it forms an Effervescing Aperient Draught, which is highly agreeable and efficacious.—Prepared by J. H. LESTER, 37A, CO. Dispensing Chemists, (and General Agents for the improved Horse Hair Gloves and Belts,) 173, New Bond-street, London; and sold by all respectable Chemists throughout the Empire.

RUPTURES EFFECTUALLY CURED

WITHOUT A TRUSS!—All sufferers from this alarming complaint are earnestly invited to consult or write to Dr. LESLIE, as he guarantees them relief in every case. His remedy has been successful in curing thousands of persons during the last twelve years, and is applicable to every kind of single and double Rupture, however bad or long-standing, in male or female of any age, causing no commencement or inconvenience in its use whatever. Sent post free to any part of the world, with full instructions for use, on receipt of 7s. 6d. in postage stamps, cash, or post-office order, payable at the General Post-office, to Dr. H. LESLIE, 37A, Manchester-street, Gray's Inn-road, London.—At home daily (except Sunday) from 11 till 4 o'clock. A Pamphlet of Testimonials sent post free on receipt of one postage stamp.

DR. DE JONGH'S

LIGHT BROWN COD LIVER OIL.

This OIL, long known, extensively prescribed, and highly appreciated in the Continent, has now come to the aid of the proved superior power and efficacy, acquired the general and entire confidence of the medical profession in this country. It is of the purest and finest quality, free from admixture and adulteration, or the usually repulsive and nauseous flavour, or sickly after-taste of the ordinary oil, or of the coarse brown OIL commonly sold, though totally unfit for medicinal use. It is as low in price per ounce as any other genuine Cod Liver Oil, whilst its regular and speedy effects render it incalculably cheaper. Medical and scientific testimonials of the highest character delivered or forwarded gratis on application.—Sold in bottles, capsuled and labelled, with Dr. de Jongh's Stamp and Signature, without which the OIL cannot be genuine. By ANSAR, HARFORD & CO., 77, STRAND, LONDON. Dr. de Jongh's sole accredited Agents; and in the country by respectable Chemists.—Half-pints (10 oz.) 2s. 6d.; Pints (20 oz.) 4s. 9d.; Quarts (40 oz.) 9s. 10p. IMPERIAL MEASURE.

NO MORE PILLS NOR ANY OTHER

MEDICINE.—For Indigestion, (Dyspepsia,) Constipation, Nervous, Bilious, and Liver Complaints, Asthma, Broucheitis, Cough Consumption, and Debility. Prepared by Dr. H. LESLIE, 37A, REVALENTA ARABICA FOOD, which saves fifty times its cost in medicine.

A few out of 50,000 cures are here given.

Cure No. 71, of dyspepsia, from the Right Hon. the LORD STUART DE DEVON, who has derived considerable benefit from Dr. Barry's Revalenta Arabica Food, and consider it due to yourselves and the public to authorize the publication of these lines.

STUART DE DEVON.

From the Dowager-Countess of Castlesuart.

Cure 52,692.—Rossrevor, County of Down, Ireland, 9th December 1851.—I have derived considerable benefit from Dr. Barry's Revalenta Arabica Food, and consider it due to yourselves and the public to authorize the publication of these lines.

Cure No. 49,532.—"Fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness at the stomach and vomiting, have been removed by Dr. Barry's excellent food."

W. H. LESTER, 37A, Manchester-street, Gray's Inn-road, London.

11b, 2s. 9d.; 21b, 4s. 9d.; 51b, 11s.; 121b, 22s.; super-fined, 11b, 6s.; 21b, 11s.; 51b, 22s.; 101b, 33s. The 101b and 121b, carriage free on receipt of a Post-office order.—Barry Du Barry & Co., 77, Regent-street, London; London agents, Fortnum, Mason & Co., Porters of the Houses, 112, Piccadilly; and also at 69, Gracechurch-street; 49, Bishopsgate-street; 4, Chopside; 350, and 401, Strand; 55, Charing-cross; 54, Upper Baker-street.

MRS. JOHNSON'S AMERICAN SOOTHING SYRUP, FOR

CHILDREN CUTTING THEIR TEETH.

MRS. JOHNSON'S AMERICAN SOOTHING

SYRUP.—This efficacious Remedy has been in general use for upwards of Thirty Years, and has preserved numerous Children from suffering from the effects of teething, and from Denudation. As soon as the Syrup is rubbed on the Gums, the Child will be relieved, the Gums cooled, and the inflammation reduced. It is as innocent as effluvia, tending to produce the Teeth with ease; and so pleasant, that no Child will refuse to take it. It is the only Remedy that Parents can rely upon, and to ask for JOHNSON'S AMERICAN SOOTHING SYRUP, and to notice that the Names of BARCLAY & SONS, 95, Farringdon-street, London (to whom Mrs. Johnson has sold the recipe), are on the Stamp affixed to each Bottle.—Price 2s. 9d. per Bottle.

ASTHMA, INFLUENZA, &c.—KAYE'S

WORMSLEY'S PILLS form a highly popular Medicine for Asthma, Influenza, Dropsy, Diarrhea, Consumption, Liver Complaints, &c.—Sold everywhere, at 1s. 14d., 2s. 9d., and 4s. 6d. Wholesale Depot, 22, BREAD-STREET, London.

KEATING'S COUGH LOZENGES.—

Upwards of Forty Years' experience has fully confirmed the superior reputation of these Lozenges, in the cure of Asthma, Winter Cough, Hoarseness, Shortness of Breath, and other Pulmonary Maladies.

Prepared and sold in boxes, 1s. 14d., and tins, 2s. 9d., 4s. 6d., and 10s. 6d. each, by Thomas Keating, Chemist, &c. No. 79, St. Paul's Churchyard, London.

The testimonials of their efficacy are too numerous for publication.

KEATING'S COD LIVER OIL, imported

direct from Newfoundland, of the finest quality, pale, purified, and nearly tasteless. Imperial Measure, half-pints, 2s.; pints, 3s. 6d.; quarts, 6s. 6d.; five-pint bottle, 15s.

*A. Orders from the country should expressly state "KEATING'S COD LIVER OIL."

HOLLOWAY'S OINTMENT and PILLS in-

comparable REMEDIES for BAD LEGS.—Mr. Shackell, Butcher, of Old Brentford, was afflicted for a long time with three wounds in his leg, which rendered him totally unable to attend to his usual avocations; in fact, his leg was so bad that it defied all skill to effect a cure. He then made use of Holloway's Ointment and Pills, paying every attention to the instructions given with the medicine, and the result was the complete healing of these remedies for about ten weeks, that his leg was completely cured, and he now enjoys most excellent health.—Sold by all Medicine Vendors; and at Professor Holloway's Establishments, 244, Strand, London, and 80, Maiden-lane, New York.

Particulars may be had on application at the College.

LADIES' COLLEGE, 47, Bedford-square.—

A Course of **EIGHT LECTURES on EARLY ENGLISH LITERATURE** will be delivered in the Easter Term, by the Rev. JOHN M. JEPHSON, B.A., beginning on Tuesday, the 24th of April, at Three o'clock.

The first Lecture will be open to Gentlemen as well as Ladies.

HYDE HOUSE SCHOOL, WINCHESTER.—

Dr. BEHR, assisted by Graduates from the Universities of Oxford and Cambridge, and foreign Masters (all of whom are resident within the walls), undertakes the **EDUCATION of a LIMITED NUMBER of PUPILS**, the Sons of Noblemen and Gentlemen, with a view to prepare them for the Public Schools, Naval and Military Colleges, or any of the various Professions.

His system of instruction includes—

1. The **CLASSICS** and **MATHEMATICS**—in which the Pupils will be thoroughly well grounded, according to the most approved methods.

2. The **MODERN LANGUAGES**—to which especial attention will be paid, and for the acquisition of which more than ordinary advantages are afforded.

3. The **USUAL BRANCHES of an ENGLISH EDUCATION**—all, or any of which, may be made more or less prominent in the plan of study, as may be deemed desirable in any particular instance.

4. **FOUNTAINING, DRAWING, FENCING, and MILITARY TACTICS**—in which the Military Class receives regular instruction.

The Establishment is divided into an Upper and a Lower School. Pupils in the latter division are thus kept separate from their seniors, both in the hours of study and recreation.

References may be made to the parents of Pupils and others, including several Noblemen, Dignitaries of the Church, and individuals of high standing in society.

Terms:—If under twelve years of age, 50 Guineas per annum; above that a fee of 60 Guineas. No extras whatever, except Books and Medical Attendance.

The **SPRING TERM** COMMENCED on **TUESDAY, April 10**.

TO GENTLEMEN.—M. DELILLE'S FRENCH CLASSES, at 32, Ely-place, Holborn, assemble in the Evening three times weekly. They are of distinct degrees of forwardness, and the more advanced class is applied to the practice of French Conversation.

BRIGHTON COLLEGE.—The STUDIES of the COLLEGE will RECOMMENCE on MONDAY, the 10th inst. at 11 a.m., when new Students will be admitted.
H. COTTERILL, Principal.

ST. JOHN'S WOOD COLLEGE FOR LADIES, 21, Clifton-road, Carlton-hill.

French—Mons. Tourrier.
Geography—Charles Galbraith, Esq.
German—Rev. A. Lowy.
Harmony and Composition—H. C. Lunn, Esq. R.A. Music.
History (Ancient and Modern)—Rev. A. G. Edouart, M.A., St. John's College, Cambridge.
Italian—Signor Maggioni, R.A. Music.
Latin and Natural Philosophy—Rev. J. K. Jennings, M.A., Queen's College, Cambridge.
Literature—Cyprian Potter, Esq., Principal R.A. Music, and H. C. Lunn, Esq. R.A. Music.
Singing—F. R. Cox, Esq., R.A. Music.
Writing—W. McCulloch, Esq.

Prospectuses to be obtained on application at the above address.
A JUNIOR CLASS is open at the College.
THERE ARE VACANCIES FOR TWO BOARDERS.
Pupils are received at the Half Term.

DR. KINKEL'S CLASSES FOR LADIES, in GERMAN and the HISTORY of ART, and MADAME KINKEL'S CLASSES in SINGING and HARMONY, will RECOMMENCE, after April 16, at their residence, 6, Eastbourne-terrace. Twelve Lectures, in English, on the History of Modern Art from the Sixteenth Century. An advanced German Class, for the History of German Literature during the Nineteenth Century, with practical exercises in German Composition and Conversation. Evening Classes for Gentlemen.—Particulars in the Prospectus, to be applied for to Dr. KINKEL, 6, Eastbourne-terrace, Paddington.

A SOUND CLASSICAL, MATHEMATICAL, SCIENTIFIC and GENERAL EDUCATION is afforded on moderate Terms at the LICHFIELD GRAMMAR SCHOOL.—For Prospectus apply to the Rev. J. G. CUMMING, M.A. F.G.S., Head Master.

BRIGHTON.—EDUCATION.—There are VACANCIES in a first-class Establishment where only Twelve Young Ladies are received. A Parisian Governess resides in the house. Signor F. Lablache, Herr Kube, Messrs. E. de Paris, Michau, and other eminent Professors attend. References to a number of Pupils.—For Terms, apply to Misses E. and Mr. Roland, 20, Berners-street, Oxford-street, London, where Prospectuses can also be had.

PRIVATE TUITION.—A Married Clergyman, with no Parochial Duty, who is preparing a few Pupils—two for Addiscombe and others for Woolwich and Eton, will give VACANCIES for a Pupil, to whose health or Education great personal attention is required.—Address the Rev. E. R., Post-office, Tonbridge, Kent.

THE WIFE of a PHYSICIAN, residing in one of the Squares near Kensington-gardens, wishes to take the entire charge of ONE or TWO LITTLE GIRLS to EDUCATE with her own Children under an accomplished Governess. Terms, 150*l.* per annum, including every expense for education, board and dress.—Address M. D., 11, Glasshouse-street, Regent-street.

PRIVATE TUITION.—A CLERGYMAN, M.A. of Cambridge, for some time Master of a Grammar School, and now resident in one of the Island Counties, will be ready at Midsummer next to receive into his Family a LIMITED NUMBER of PUPILS, under the age of fourteen, to prepare for the Public Schools, Professions, &c.—For terms, references, &c. address the Rev. O. K., Harris's Library, Bridge-street, Northampton.

A CLERGYMAN, of great experience in every department of Education, and possessing very unusual facilities for teaching the Applied Sciences, in addition to the ordinary routine of instruction, RECEIVES into his family the SONS of GENTLEMEN, to fit for immediately active life, or to prepare for any of the Educational Establishments and Colleges. References of the highest character can be produced, and every satisfaction will be given as to the thorough efficiency of the system pursued. Terms according to age and requirement.—For particulars address Rev. M. A. Cantab, care of Messrs. Watkins & Hill, 5, Charing-cross; or J. J. Griffin, Esq., 10, Finsbury-square.

GERMAN EDUCATION.—CANNSTATT, on the NECKAR.—Mr. HIRSCH, who formerly resided in England, and who has now a few VACANCIES in his Establishment, will be in London until the 1st of May. References can be given to Gentlemen in London whose Sons are now under Mr. Hirsch's care.—For prospectuses, Messrs. Walton & Maberly, 27, Ivy-lane, Paternoster-row; or Mr. Cotes, Bookseller, 139, Chesham-street, for interviews with Mr. Hirsch, apply by letter to Mr. Cotes.

RESIDENT GOVERNESS.—A LADY, of experience in tuition, and who has resided several years in France and Germany, desires a RE-ENGAGEMENT in a Nobleman's or Gentleman's Family. Qualifications: English, in its usual branches, French, Italian, and Music.—Address J. B. Burn's Library, Kennington-green, Surrey.

MR. B. H. SMART, formerly of Connaught-terrace, now of 7, WYNDHAM-STREET, Bryanston-square, acquaints his Friends that he continues to INSTRUCT CLERICAL and other PUPILS in ELOCUTION, to meet Classes in Families and Schools for English generally, and to engage for Public Readings and Lectures.

MR. CURT, of London, ANTIQUARY, &c., now in Town for the Loscombe Sale of Valuable Coins and Medals, returns to Paris on the 14th of April, to attend the second Recette Sale of Coins and Antiquities, the Catalogue of which is just published. Commissions, as usual, executed at 10 per cent.—Address, post paid, 15, Lisle-street, Leicester-square; or Hotel Brabant, Paris. Mr. Curt will be again in London about the 24th of April.

HYDROPATHY.—MOOR PARK MEDICAL and HYDROPATHIC ESTABLISHMENT, near Farnham, Surrey, within three miles of the Camp at Aldershot. This Institution is now open for the reception of Patients under the Superintendence of Dr. EDWARD W. LANE, A.M. M.D. Edin.—Dr. Lane may be consulted in London every Tuesday between half-past 12 and 2, at 61, Conduit-street, Regent-street.

MILD SEA-AIR.—THE WIDOW of a SURGEON and her Daughter RECEIVE DELICATE CHILDREN or YOUNG LADIES requiring Sea-Air and Bathing. They have had much experience in the care of invalids, and devote as much attention to education as the health of the Pupils will permit. References given and required.—For all particulars, address W. Messrs. Groombridge, Paternoster-row.

BRIGHTON.—A HOME for INVALID and ORPHAN CHILDREN of the Higher Classes, in a superior Mansion in the most delightful and healthy part of Brighton. Only a limited number taken, and from the age of one month to twelve years. A Governess, Nurses, and every suitable accommodation. References permitted to several eminent Medical Men and Clergymen.—Address A. C. L., care of Mr. Wallis, 5, Bartholomews, Brighton.

LONDON INSTITUTION.—A Share in the above Institution, with Bronze Medal, to be sold on moderate terms. The Subscription is paid up to next Midsummer.—Address to K. N. S., 810, Frenchchurch-street.

LETTERS in LITERATURE and COMPOSITION.—Manuscripts prepared for the Press.—Address to A. B., 31, Newman-street, Oxford-street.

ART ABROAD.—An Artist, proceeding to Italy, would enter into arrangements for undertaking some few additional Commissions for Copies or Sketches from Pictures in the Galleries of Florence and Rome. Pictures may be seen, during the week commencing Monday the 10th, at Mr. Collis's, 108, New Bond-street.

PARTNERSHIP.—WANTED, by a BOOK-SELLER and PUBLISHER in LONDON, a Gentleman of energy and capital to join him as PARTNER. The Business is a profitable and increasing one, and will form an eligible opening for a person of Parts and Ability. About 2,000*l.* required.—Address in the first place by letter only, to Messrs. RICHARDSON & SADLER, Solicitors, Golden-square.

MANUSCRIPTS.—Persons possessing LETTERS or other MANUSCRIPTS relative to the FRENCH REVOLUTION of 1789, would greatly oblige an Author who is in search of such documents, by communicating with Mr. G. WILLIS, Bookseller, Great Piazza, Covent-garden.

ENGRAVINGS BROUGHT WITHIN THE REACH of ALL.—Immense quantities of first-class Subjects (chiefly from Salest, at unheard-of prices. One instance:—Morning and Evening (pub. at 2*l.* 1*l.* 3*d.* per pair. Such an instance has never before occurred to adorn the Wall and enrich the Folio.—For Catalogue of some of the chief subjects, see the *Athenæum* of March 31st, 1855.—J. MABLEY, 9, Wellington-street North, Strand.

INSTITUTE of PHOTOGRAPHY, 179, REGENT-STREET.—Portraits, Copies of Pictures, Sculpture, &c. taken, and INSTRUCTION in the Art given daily, by Mr. ARCHIBALD LEWIS COCKE. Photographic Apparatus of all kinds, with the necessary Chemicals, constantly on Sale.

MR. LAROCHE begs to inform his Patrons and the Public in general, that having succeeded in the late important action of Talbot v. Laroché, in establishing that the Photogenic process as patented by him is different from, and very superior to, the Talbotype, he continues to take these much-admired PORTRAITS, by his instantaneous method, at his Rooms, 65, Oxford-street, two doors from Wells-street, where an inspection of the life-size and other Portraits is respectfully solicited.

MAYALL'S PORTRAIT GALLERIES, 224, REGENT-STREET, Corner of Argyl-place.
DAGUERRETYPE and STEREOSCOPIC MINIATURES in the highest style of Art taken daily.

"Mr. Mayall has proved his mastery over life by producing photographic portraits of the full size of life ** without the slightest sacrifice of definition, or the smallest approach to distortion;—indeed the errors and peculiarities of former impressions appear to be corrected."—*Athenæum*, July 22, 1854.
"Mr. Mayall's portraits represent the high art of the daguerretype; they are as superior to the generality of such pictures as a delicate engraving is to a coarse woodcut."—*Art-Journal*, Nov. 1853.
"More pleasing, and far more accurate than the generality of such pictures."—*Times*, July 17, 1854.

ADVERTISEMENTS for the MAY Number of the DUBLIN QUARTERLY JOURNAL OF MEDICAL SCIENCE, should be received not later than the 25th inst.

AUCTIONEERS and GENERAL COMMISSION MERCHANTS, BOSTON, UNITED STATES, respectfully solicit CONSIGNMENTS of Books, Engravings, Paintings, and Objects of Art and Virtù generally. They pay especial attention to the sale of such Consignments, and insure for their English friends good prices, liberal advances (when desired), and prompt returns in all cases. References—the Right Hon. R. B. Campbell, United States Consul, London; Hon. Jefferson Davis, Secretary at War; Hon. James Campbell, Postmaster-General; Hon. Robert McClelland, Secretary of the Interior; Hon. John M. Trumbull, United States Treasury; Washington, D. C. United States.

J. A. BRODHEAD & CO., Boston, United States.

TO CAPITALISTS.
ELIGIBLE INVESTMENT.
DUNCAN SINGH & SONS' LETTER FOUNDRY,
EDINBURGH, which obtained the Great Exhibition
Prize Medal in 1851.

To be SOLD by PRIVATE CONTRACT (Family arrangements
having rendered it necessary).

THE Entire PLANT and GOOD-WILL of the
above Old-Established FOUNDRY, consisting of a numerous
and complete series of Punches, Matrices, Moulds, Strikes, and
every implement and utensil necessary to carry on the Business of
a Typefounder on a large scale. The Plant includes the Punches,
Matrices, &c. of the celebrated Music Faces, considered to be the
most complete and elegant in the Trade. And a series of numerous
Strikes can be adapted to branches of the parent establishment.

There is also a large and well-assorted Stock of Book and News-
paper Points of these Faces most admirably run upon.
Every department is in excellent working condition, and the ex-
perienced staff of management, with the commodious premises of
Whiteford House, capable of employing upwards of fifty Casters,
will be available to a purchaser.

The present is a most favourable opportunity for an investment
of this kind. The contemplated immediate abolition of the News-
paper Stamp Duty must also give a great impetus to the Trade.

For particulars apply to Messrs. Christopher Douglas & A. G.
Monlows, W.S., 23, Young-street, Edinburgh; and Ellis, Phillips &
Co., Solicitors, Clements's Lane, City, London.

TO STATIONERS, BOOKSELLERS, and
OTHERS.—South of the City.—Mr. PAGE is directed to
SELL the TRADE of a BOOKSELLER and STATIONER,
together with a Public Library. The Returns are good and
increasing. The Rent is about 300 per annum required.—Apply to Mr.
PAGE, Auctioneer and Valuer, 8, Coleman-street.

TO BOOKSELLERS, NEWS-AGENTS, and
OTHERS.—Premium, One Year's Purchase on the Net
Profits.—Mr. PAGE is directed to SELL valuable NEWS-
AGENTS', BOOKSELLERS', and STATIONERS' BUSINESS.
The House is modern; the Trade established for nearly forty
years; and may be entered upon for about 5000.—Apply to Mr.
PAGE, Auctioneer and Valuer, 8, Coleman-street.

Sales by Auction.

A Further Portion of the Valuable Stock of Mr. JAMES
BOHN, late of No. 66, St. James's-street.

extra.

London: W. Tweedie, 337, Strand.

Just published, in crown 8vo. price 7s. 6d. cloth,

BALDER.

By the AUTHOR of 'THE ROMAN.'

Second Edition, with Preface.

"In this poem we read a magnificent protest against the ten-
dency of our age to materialism and positive philosophy and the
apostrophe of mechanism and intellect. An age which everywhere
manifests a blind atheistical dedication of force and power. The
age to which of all others that trumpet-tongued tongue, 'What shall
it profit a man if he save the whole world and lose his own soul?'
needs to be preached and sung. There are two hundred and
eighty-three pages in this book, and not one but contains fine
thoughts, magnificent imagery, striking similes, or searching re-
flections. Of the wealth of thought revealed we can scarcely trust
ourselves to speak, it is so great. We consider 'Balder' to be the
first and worthy part of a great poem—one of such a degree of
greatness, that it has scarce an equal in our century, and one that
will take the public opinion some years to arrive at that greatness.
To those who cannot see its purpose, we may say, as the old chro-
niclers wrote of Shakespeare, 'Read it again and again, and if so
you be you do not understand it then, there is manifest danger that
you are not quick of comprehension.'—*Electric Review*.

"Genius is unmistakably present in every page of the strange
book before us, that to give examples from one without injustice
to the others, we find to be beyond possibility in the limits of a
magazine review. We cannot, however, resist a passing allusion to
the absence of all melo-drama in those scenes which nevertheless
reach the very bounds of the dramatic, and to the instinctive
avoidance of the horrible and the terrible, and the admirable under
circumstances of the highest tragedy. These general facts infer a
quality of intuition in the author, which only the true critic can
properly estimate; and in such passages as the portrait of Amy in
scene twenty-eight, and the *chœur* of scene thirty-seven, or scene
twenty-four, he will recognize the same wonderful truth of instinct
at work, in the calmest nooks and most pastoral quietudes of the
many-coloured landscape of life."—*Press's Magazine*.

"The lesson to be taught would make a grand theme for
poetry, but only a crowned singer could hope to teach it. Let
some large and wealthy mind study the darker possibilities of his
own being—then the question may be metly handled. Some such
genius—understanding by experience the peculiar temptations of
high poetic temperament—knowing well all those
airy illusive tongues that 'sylvan men's names' in the haunted
wilderness of aspiration—looking steadily down that wrong turn-
ing, the gloomy avenue of that *via mala* he himself might have
chosen—such an one could address his brethren, and all of us, with
happiest effect. Qualifications adequate to an enterprise so worthy,
Mr. Vendys unquestionably possesses; to some such purpose he
appears to have devoted himself in the present poem, and, in our
judgment, with signal success."—*British Quarterly Review*.

Recently published, in post 8vo. price 5s. cloth,

THE ROMAN.

By the AUTHOR of 'BALDER.'

"Should any one after the preceding extracts doubt whether we
have a new poet amongst us, he should almost despair of his con-
version. But we should not abandon the attempt while we had
such an argument in reserve as the ensuing description of the
Coliseum."—*Athenæum*.

"How far the merit corresponds with the magnitude of the work
there may be some difference of opinion, but none as to the
genius and power of the author."—*Library Gazette*.

"Any man might be proud to be the author of this poem, which,
if the first production of an author hitherto unknown, is full of the
richest promise; and at any rate shows that we have poets still
among us, who, if they would but take equal pains with our old
writers, are capable of achievements not any way inferior to
theirs."—*Gazetteer*.

"The hand that has struck this lyre is the hand of a master."—*Sun*.

SMITH, ELDER & CO. 65, Cornhill.

MEMOIRS OF THE LATE

RIGHT HON. RICHARD LALOR SHEIL.

By TORRENS M'CULLAGH, Esq.

"Such a man as Sheil eminently deserved a biography; and Mr. M'Cullagh has, we think, proved himself an exceedingly proper person to undertake it. His narrative is lucid and pleasant, sound and hearty in sentiment, and sensible in dissertation. Altogether, we may emphatically call this book an excellent biography."—*Daily News*.

Also, just published, in 2 vols. post 8vo.

MR. SHEIL'S LEGAL AND POLITICAL SKETCHES.

Edited by M. W. SAVAGE, Esq.

LIVES OF THE PRINCESSES OF ENGLAND.

By Mrs. EVERETT GREEN.

The SIXTH and CONCLUDING VOLUME, comprising the Conclusion of the Life of the Queen of Bohemia—Mary Princess of Orange—Henrietta, Duchess of Orleans, &c.

Published for H. COLBURN, by his Successors, HURST & BLACKETT, 13, Great Marlborough-street.

CHAMBERS'S NEW AND IMPROVED ATLAS FOR THE PEOPLE.

Edited by W. & R. CHAMBERS.

Conductors of 'CHAMBERS'S JOURNAL,' and other Publications.

It will consist of *Thirty-two Quarto and Four Folio Maps*, beautifully printed in colours, along with a *Descriptive Introduction*; and will likewise embrace a *Consulting Index*, so copious that it will for the most part supersede reference to a Gazetteer. As regards the Maps, every attention has been paid to insure their clearness and accuracy. The work will possess a beautifully Engraved Title-page.

MODE OF PUBLICATION.

To be published in Monthly Numbers, each containing at least Three Maps and a Sheet of Letter-press, in a printed wrapper. The Work will be completed in Twelve Numbers. Price of each Number, *One Shilling and Twopence*.

** The First Number will be issued on May 1.

W. & R. CHAMBERS, 47, Paternoster-row, London, and High-street, Edinburgh; W. GILLING, Liverpool; T. DINHAM, Manchester; H. CAMPBELL, Glasgow; J. M'GLASHAN, Dublin; and all Booksellers.

Quoted in the 'QUARTERLY REVIEW' of September, No. 190, pp. 171, 181, and 182, described as "very clever," and no over-statement,

LONDON LABOUR AND THE LONDON POOR.

By HENRY MAYHEW.

A Cyclopædia of the Social Condition and Earnings of Those that work^k, Those that cannot work, and Those that WILL NOT work; with Engravings of the Scenes and People described, copied from special Daguerreotypes by "BEARD." A few more Copies of this valuable Work, in Back Numbers, Cloth, and Half Morocco, will be ready on Monday next, price 15s. and upwards.

GEORGE NEWBOLD, 8, Regent-street, Westminster; and of all Booksellers.

N.B.—The main portion of the Work can be supplied without the fiction relating to Those who will not work, which is to some objectionable from motives of delicacy.

REVIEWS

Meleager: a Tragedy—[*Meleager, Eine Tragödie*].—*Novels*—[*Novellen*]. By Paul Heyse. Berlin, Hertz; London, Williams & Norgate.

Herr Heyse is a young German poet, whose talents met with early acknowledgment and reward. He is one of the stars in that poetical constellation (as yet of more promise than brilliancy) which shines round the throne of Munich. Schemes for the protection of Art and of Poetry seem always to have filled the mind of Maximilian the Second,—himself distinguished by poetical gifts of such an order that even Count Platen, in one of his most stately and high-flown odes, could address to him words like these:—

Der du selbst in der Brust die Glut melodischer Dichtung
Hegst, dem Vater gleich, und der Kunst tief sinnige Meister
liebste.

This was in 1831. Ten years later, the then Crown Prince sent out (through the medium of the late Minister of State, Eduard von Schenk) a circular invitation to the most eminent German poets to gather round him, and to form under his patronage a "*Dichterbund*,"—in fact, a poetical Guild of Literature. A poetical annual ('*Musen Almanach*') and a critical review were to have been published by this Poets' Union; yearly prizes of golden goblets and golden laurel-crowns (or, to those who preferred it, a good round sum of ducats instead) would have been awarded, by the Prince's munificence, to the best productions in epic, dramatic, and lyric composition. Old King Ludwig himself volunteered to be one of the judges at the future Olympic games of the German poets. This plan, however, failed at the time. Uhland wrote bluntly back, that, to his belief, poetry and royalty would never go well together in these days. Other of the invited poets answered in a similar way. The scheme was therefore abandoned for a time; but the course followed by King Maximilian ever since his accession clearly shows that he never ceased to cherish it, only waiting for a period more favourable to its execution, and meanwhile remodelling and modifying it to the best of his maturer judgment. What he has done for poetry and poets in the last few years is not exactly what he proposed to do in 1841, but it is more and it is better. He has surrounded himself by a circle—not of old and long-established celebrities, like the King of Prussia in 1840, but of young and rising talents, full of hope and promise, to whom, with all the liberality of a royal Mæcenas, he has given a free and independent position near his person; asking in return neither the services of office nor even the customary tasks of laureateship, but only the conscientious cultivation, the quiet and steady development of those faculties which he has sheltered from the cares and the harassing necessities of life. This is good and noble indeed; and if the harvest should not answer the sowing—if the exploits of the literary Knights of the Round Table of Maximilian the Second, of Bavaria, should happen, in future times, not to be thought equal to those of the spiritual chivalry of Karl August, of Weimar, the fault can never be imputed to the intentions and the goodwill of the younger Mæcenas. Certain it is, that in the days of Goethe and Schiller it was far more easy for the German poet to accept princely favours than at present, when he is no sooner distinguished by the princes than he is looked on with suspicion by the people; while, on the other hand, the powers overlook, or even hate and persecute, him as soon as he is declared

favourite of the multitude. There is something in this which, we cannot but think, also weighs heavily (though perhaps unconsciously) on the minds of the young men of Munich, to such an extent even that it acts as a drawback on the free development of their poetical powers. The Star of the Order for Literary Merit (also newly created by Maximilian the Second) glitters on the breasts of Herren Dingelstedt, Bodenstedt, Heyse, and von Geibel; but the stubborn independence of Uhland (courted again, even after the refusal of 1841) sent it back most unceremoniously.

The author of '*Meleager*' and the '*Novels*' has not, like Herren Dingelstedt, von Geibel, and others on account of court successes, forfeited public confidence. The nation at large does not yet know much of him. Up to this time he is only a favourite with the more refined classes of society; his talents, great and unquestionable as they are, have made him the poet *par excellence* of some exclusive literary circles:—universally popular (and therefore envied or distrusted) as yet he is not. We sincerely wish that these halcyon days of his Muse may be turned to account by him, before their smooth and even current is ruffled by the gusts and gales of the ever-changing *aura popularis*.

The two little volumes before us (the first-fruits, we believe, of the young Laureate's happy leisure at Munich) show in a pleasing way that he is seriously occupied in cultivating his rare gifts. He is conscious of his mission as well as of his successes; but, thinking "that which he has done but earnest of the things that he shall do," he is eager and active to justify the good opinion entertained of him by ever-new productions following each other in rapid succession.

In '*Meleager*' he treats the well-known Greek tradition—prompted, perhaps, in the choice of his theme by some sonorous fragments of his great master of form, Count Platen, who, not long before his death, contemplated a tragedy on the same subject. Althæa, to whom the Fatal Sisters have given the ominous power over the life of her madly-beloved son, thinks herself, as it were, one of the Fates: she wishes to direct imperiously the will and the inclination of her son; and when Meleager, vigorous and self-willed, shakes off this most loving but most intolerable of all despotisms,—when he confers his free love on Atalanta, killing at the same time his uncle, who treats him as a boy,—the unhappy mother, blind with passion, throws the fatal billet into the flames, and repents only when it is too late. A subject like this is grand and tragic indeed,—and as far as the poet's giving himself up to his theme is concerned, Herr Heyse undoubtedly has done it justice. The characters are drawn with precision;—the diction, elegant and forcible, pulsates with life and passion;—some passages are not only beautiful, but almost bordering on the sublime. Nevertheless, we are bound to say, that we are not entirely satisfied with the work. There is too little of the drama in it; the action moves within narrow bounds, and, for the greatest part, is laid behind the scene. The talent of the writer—as is visible by the interwoven songs, by the Chorus of the Fates, in the last scene, and by some excellent descriptions—leans evidently more to lyric and epic poetry than to the drama. Besides this, we have another objection. Deterred, perhaps, by the but indifferent stage success of the original classic drama of the Greeks as revived by Tieck and others about ten years ago, and wishing, most likely, to bring his characters nearer to the modern heart, Herr Heyse has written his tragedy,

not in the metres of Æschylus and Sophocles, not even in our own noble blank verse, but in a varying rhymed measure, after the pattern of Goethe's '*Faust*.' This, we believe, is decidedly a mistake. We do not like to hear Atalanta speak like Gretchen—just as we dislike the Alexandrines of Corneille and Racine from the lips of Phædra and Sabina. The little bells of rhyme jingling about these stately classic figures produce an effect, to our feeling at least, similar to that produced by the falling of the rosy light on the marble limbs of Dannecker's Ariadne in the Villa Bethmann, at Frankfort. It is pretty, but out of style. Moreover, the fault does not stop here. A great deal of what Herr Heyse's characters have to tell us is modern in feeling as well as it is modern in form.

In the '*Novels*' (Englishmen, by-the-bye, would call them '*Tales*,' Herr Heyse using the word '*novel*' in the original sense of the Italian *novella*), we meet our author in a different province,—and in one, we are inclined to say, which is more within the reach of his faculties than the drama. These four little tales are conceived with a poet's heart, and dashed off with an artist's hand. They are simple in plot and construction, but they show acute psychological observation;—they are full of terse and graphic descriptions;—and, with regard to form and diction, are of an exquisite roundness and finish. A fresh and healthy moral atmosphere pervades them all. To show the author's tone and manner, we translate a passage from '*La Rabbia*,' an Italian village story, "full of the warm South," and, to our taste, the best tale in the book. "*La Rabbia*" is a beautiful young peasant girl of Sorrento, who, because her father has been a very bad husband to her mother in his day, has become afraid of matrimony, to such a degree even that she has forsworn marriage—and love too, because it would lead to marriage. She shuns, in a wild and proud way, the young men of the village,—and they, in revenge, have given her the surname of "*La Rabbia*." One of them, Antonino, the boatman, loves her passionately,—and she too, as we learn afterwards, looks on him with no indifferent eyes. But because she feels that Antonino could become dangerous to her, she avoids him more than all the rest. One fine hot summer day it happens that he rows her over to Capri, where she has to do some business for her mother. On their passage out a good old priest keeps them company; when they return, however, chance affords them a long tête-à-tête.—

Bidding them a hasty farewell, he ran down to his boat, loosened it from its moorings, and stood waiting for the girl; who, again taking leave of the host and hostess, proceeded towards the boat with lingering steps. She first looked round on every side, as though she expected some one might cross with them. But the shore was deserted; the fishermen slept or were at sea with their nets; a few women or children sat by the doors sleeping or spinning; and the strangers who had come over in the morning, awaited a cooler time of day for their return. She had not much time, however, to look around, for before she could prevent it, Antonino had caught her in his arms, and carried her like a child into the boat, and, springing after her, with a few strokes of the oars they were in the open sea. She sat herself in the forepart of the boat, and half turned her back on him, so that he could only see her sideways. Her features were still more serious than usual. Her hair hung deep over her brow, and round her delicate nostrils trembled a resolute expression; her full lips were firmly closed. After they had for some time silently pursued their voyage, she felt the heat of the sun, and took the bread out of the handkerchief, which she wound round her head. She then began to eat the bread and make her dinner, for at Capri

she had eaten nothing. Antonino did not long suffer this. He took two oranges from one of the baskets which he brought over full in the morning, and said: "There you have something to your bread, Laurella. Do not suppose that I have saved them for you. They fell out of the basket into the boat, and I found them when I brought back the empty baskets."—"Eat them yourself. My bread's enough for me."—"They are refreshing in the heat; and you have walked a long way."—"They gave me a glass of water yonder, and that has refreshed me."—"As you like," said he, and let them fall again into the basket.—A fresh silence. The sea was as smooth as a mirror, and scarcely rippled round the keel. The white sea-birds, too, which have their nests in the holes of the shore, pursued their prey in silence.—"You might take the two oranges to your mother," recommenced Antonino.—"We have some at home; and when they are gone, I can go and buy more."—"But take them to her with my good wishes."—"But she does not know you."—"Then you can tell her who I am."—"But I do not know you either."—"This was not the first time that she had thus refused to know him. A year back, when the painter came to Sorrento, it happened one Sunday that Antonino was playing with other boys at *boccia* in an open place by the chief street. There the painter first met Laurella, who, with a water-jug upon her head, passed by without taking notice of him. The Neapolitan, struck by her appearance, stood still to look after her, although he was in the midst of the players, and could with two steps have left the way clear. A bowl that struck him by no means softly on the ankle reminded him that this was not the place to be lost in thought. He turned round as if he expected an apology. The young fisherman who had thrown the bowl stood silent and sturdy among his friends, and the stranger thought it advisable to avoid a dispute and depart. The affair, however, was talked about and remembered when the painter openly paid court to Laurella. "I do not know him," she said petulantly, when the painter asked whether she refused him on account of that ill-bred boy. But the talk had come to her ears. Subsequently, when she met Antonino, she very well remembered him. And now they sat together in the boat like the bitterest enemies, and the heart of each beat violently. Antonino's usually good-humoured face was turning red; he rowed with such violence that the foam sprinkled his face, and his lips trembled at times as though he muttered angry words. She pretended to observe nothing, and looked as unconcerned as possible,—leaned over the side of the boat, and let the water glide between her fingers. She then untied her handkerchief, and arranged her hair as if she were alone in the boat. But her eyebrows trembled, and in vain she held her wet hands against her burning cheeks to cool them. They were now in the open sea; and near and far no sail was to be seen. The island was distant behind, and the coast lay far off in the sunny vapours; not even a sea-gull flew across that wide solitude. Antonino looked round about him. A thought seemed to rise up within him. The rudeness suddenly left his cheeks, and he let the oars fall. Involuntarily Laurella looked around, surprised, but fearless. "I must make an end of it," broke forth the boy. "It has lasted too long, and I wonder it has not brought me to the grave. You know me not, you say. Have you not long enough seen how I pass you like a madman, and had my heart full to pour out before you? But you pout, and turn your back on me."—"What should I have to say to you?" she replied tartly. "I have indeed seen that you wished to make acquaintance with me; but I had no mind to fill people's mouths about nothing at all. For I do not wish you for a husband; no, nor any one else."—"Nor any one else? You will not always say so, because you have refused the painter? Bah! you were a child then. Some time or other you will feel solitary; and then, mad as you are, you will take the first that comes."—"No one knows his own future. It may be that I may change my mind. But what is that to you?"—"What is that to me!" He sprang up from his seat, so that the boat rolled. "What is that to me! And can you ask that when you know the state of my mind? May he perish miserably whom you

treat better than me!"—"Have I ever promised myself to you? Can I help it, if you take such foolish notions into your head? What right have you over me?"—"Oh," he exclaimed, "it is not indeed written, and no lawyer has engrossed it in Latin and sealed it; but this I know, that I have as much right to you as I have to go to heaven if I am an honest fellow. Do you suppose that I will stand by, when you go to the church with another, and the girls pass me shrugging their shoulders? Shall I allow such a slight to be put upon me?"—"Do what you like. I am not afraid, threaten as you will. I, too, will do as I like."—"You will not long talk in that manner," said he, whilst his whole frame trembled. "I am man enough not to allow my life to be destroyed by such an obstinate creature! Do you not know that you are here in my power, and must do what I will?"—She shuddered slightly, and looked at him with flashing eyes. "Destroy me, if you dare!" said she, slowly.—"One must not do things by halves," said he, and his voice lowered. "There is room for us both in the sea. I cannot help thee, child!" (he spoke almost pityingly, as if in a dream)—"but we must go down, both of us, and now!" screamed he, and seized her by both arms. But in an instant he drew back his right hand—the blood streamed from it,—she had bitten him deeply.—"Must I do what you will?" she exclaimed, and thrust him with a sudden movement from her. "Let us see whether I am in your power!" With this she sprang over the side of the boat, and disappeared for a moment in the deep. She rose again immediately; her dress clung close to her; her hair was loosened by the waves, and hung heavily over her neck; she struck out with her arms, and without a word swam direct from the boat towards the shore. Terror seemed to have benumbed his senses. He stood bending forward in the boat, staring, fixedly, after her, as if a miracle had been performed before his eyes. Then shaking himself, he sprang to his oars, and rowed after her with every energy he could command, while the bottom of the boat became red with his flowing blood. In a minute he was by her side, in spite of her exertions. "By Maria Santissima!" he exclaimed, "come into the boat! I have been mad; God knows what darkened my reason! It came into my head like lightning from heaven, and inflamed me that I knew not what I did or said. You need not forgive me, Laurella; only save your life, and come in again." She continued swimming, although she heard nothing.—"You cannot reach the land; it is still two miles. Think of your mother. If anything should happen to you she would die with horror." She measured with a glance the distance from the coast. Then, without answering him, she swam to the boat, and seized the edge with her hands. He stood up to help her; his jacket, which lay upon the seat, slid into the sea as the boat swayed over with the girl's weight; she sprang lightly up, and clambered to her former seat. When he saw that she was safe, he seized his oars again; whilst she wrung out her dripping skirt, and pressed the water from her hair. She then, for the first time, observed the blood on the bottom of the boat. She cast a hasty glance at the hand which grasped the oar as though it were unhurt. "There," said she, and reached him her handkerchief. He shook his head, and rowed on. At last she rose, stepped towards him, and bound the handkerchief round the deep wound. Then, in spite of his opposition, she took the oar out of the wounded hand, seated herself in front of him, and—without looking at him, keeping her eyes fixedly on the oar, which was red with blood—with powerful strokes urged on the boat. They were both of them pale and silent. When they neared the shore they met some fishermen who were casting their nets for the night. They called out to Antonino, and rallied Laurella. Neither looked up, nor answered a word. The sun was still pretty high above Procida when they reached the beach. Laurella shook her skirt, that had nearly dried itself on the way, and sprang ashore.

Herr Heyse is one of those few among the younger poets of his country who really hold a mission from the Muse, and to whose future the literature of Germany may look forward with confident expectation. We shall be happy to meet him again, and doubt not that greater and

riper compositions will follow in due time studies like 'Meleager' and the 'Novels.'

Lives of the most Eminent English Poets. By Samuel Johnson; with Notes by Peter Cunningham, F.S.A. Vol. III. Murray.

The Bristol Bibliographer. Bristol, Kerslake.

UNDER ordinary circumstances, we should have been content to announce the completion of this edition of Johnson's 'Lives of the Poets,' with an acknowledgment that the last volume fully justifies the promise of the first, and our commendation. As, however, Mr. Cunningham has in his Notes more than once referred to the articles on Pope which appeared some time since in the *Athenæum* [Nos. 1393—1395],—and as he is announced as assistant editor of the long-promised edition of Pope's works,—it may be well to offer a few words of explanation where he appears to have mistaken our meaning.

Mr. Cunningham considers our argument and evidence respecting "the Unfortunate Lady" as "an ingenious attempt to identify the Unfortunate Lady with a Mrs. Weston"!—not successful, because "the verses in which she is said to be lamented as dead were actually published seven years before her death."

Now, if the reader will be pleased to refer to the *Athenæum* [No. 1394], he will see how far the facts justify Mr. Cunningham's statement and comment. He will there find that the biographers of Pope, after a century of research, had come to the conclusion that "the Unfortunate Lady" was a Mrs. Winsbury, or Wainsbury,— "the Mrs. W. of Pope's letters:"—that Pope himself had ingeniously contrived to help them to the conclusion. And we undertook to prove, and did prove, that the "Mrs. W. of Pope's letters" was neither "Mrs. Winsbury, nor Mrs. Wainsbury, nor 'the Unfortunate Lady,'"—but a Mrs. Weston, of Sutton; and that Mrs. Weston lived "years after" the "visionary sword" and "bleeding-bosom gored" had sent "the Unfortunate" to "the pitying sky!"

Whether this was an "attempt to identify 'the Unfortunate Lady'" with Mrs. Weston, we shall leave to the judgment of the reader.

Mr. Cunningham is of opinion that Mrs. Rackett was the daughter of Mr. Pope by a previous marriage, and not, as generally believed, and assumed in the *Athenæum*, of Mrs. Pope by a former husband. The facts adduced do not appear to us of much weight. "Pope's father," says Mr. Cunningham, "in his will speaks of 'my son-in-law Charles Rackett, and my dear daughter Magdalen,'" by which "it is clear the woman was nearer related to him than the man." So she would have been, whether his own daughter or his wife's daughter. But Pope, in his will, calls Magdalen Rackett his "sister-in-law"; and twice in one letter speaks of Mr. Rackett as his "brother." Magdalen Rackett herself, writing to Pope's mother, begins the letter "Dear Mother," and concludes "Dear Mother, your dutiful Daughter;" yet in the same letter she makes mention of "my mother Rackett." On another occasion she speaks of Pope as "my brother" [*Athen.* No. 1393]. What can be inferred from these contradictions, but that Magdalen Rackett, no matter whose child she was, had been brought up in a loving and beloved family, and stood in relation to them as to a father, mother, and brother? There is, however, another fact shown by the elder Pope's will, and not adverted to by Mr. Cunningham, that he bequeathed to Mr. and Mrs. Rackett *six pounds* each for mourning, and no more,—which runs, we think, counter to Mr. Cunningham's inference; for if his conjecture

be true, Mr. Pope must have given his daughter her entire fortune while he and his wife were living; in which case, considering the fortune he left to his son, he must have been a much richer man than even we had supposed,—to say nothing of the idle talk of the biographers about his poverty.

But the old stories about the poverty of the father and the profits of the translation of Homer are likely, we think, to be somewhat modified by the new Editors. We took leave [No. 1393] to doubt “the doubtless” of Dr. Johnson, that Pope purchased an annuity of five hundred a year out of the profits of his ‘Homer.’ We showed from unpublished letters that, shortly after his father’s death, Pope had about 2,000*l.*, which he was anxious to invest in an annuity. Mr. Cunningham corrects Johnson, and says the annuity charged on the estate of John of Bucks was 200*l.*—not 500*l.*—a year, which agrees with our statement.

As to the state of the Fenton MSS. of the books of Homer which Fenton translated for Pope, we have on record some strange contradictions, all the more startling when it is known that these MSS. are daily open to inspection in the British Museum. Johnson says, “they have very few alterations by the hand of Pope.” Mr. Cunningham tells us, “the first and fourth are crowded with Pope’s alterations.” Now we happen to have before us a letter, by George Steevens, a very careful observer, addressed to Dr. Johnson, on this very subject, and he confirms Johnson’s statement—indeed, makes the fact the ground for inference and argument:—

“Hampstead Heath, Oct. 27th, 1780.

“Dear Sir,—You have taken notice of a disproportion between the prices paid by Pope to Fenton and his coadjutor. I was once told (by Spence or Dr. Ridley) that Pope complained he had more trouble in the revisal of a single book translated by Broome than with all that were executed by Fenton. Three of Fenton’s books, in his own handwriting, are preserved in the Museum, and countenance, on one part, the observation of Pope; for I do not think that in any one of these he made many more than a dozen corrections. He changed, however, the two first lines of the first book, which originally stood thus:—

The man for wisdom fam’d, O Muse! relate,

Through woes and wanderings long pursued by fate.

Broome’s MSS. are not in the Museum; but, if the complaint was just, his assistance proved less valuable to Pope than Fenton’s. To the weary translator of thirty-six books of Homer a laborious revision of eight more was as unwelcome as it might be expected. Excuse the hurry in which this is written, and do me the honour to believe me your ever faithful, obliged and obedient,

G. STEEVENS.”

The date of the year is doubtful; but, from the tone of the letter, we incline to the opinion that Steevens wrote it after a perusal of the life of Broome in manuscript.

Mr. Cunningham accepts as true and repeats the story that Pope received a large sum of money, 1,000*l.*, from the Duchess of Marlborough to suppress the character he had drawn of her under the name of Atossa. We utterly disbelieve it. Mr. Cunningham refers to the well-known passage in a letter from Bolingbroke to Marchmont in proof.—

“Our friend Pope, it seems, corrected and prepared for the press, just before his death, an edition of the four Epistles that follow the ‘Essay on Man.’ I am sorry for it, because, if he could be excused for writing the character of Atossa formerly, there is no excuse for his design of publishing it, after he had received the favour you and I know; and the character of Atossa is inserted.”

By no possible ingenuity can we deduce from this paragraph proof that Pope ever received a thousand pounds, or a thousand pence, or a single sixpence from the Duchess; “the favour” may

mean anything or nothing—a courtesy, a compliment, a civility of any sort; and the fact that he did insert the character of Atossa while the Duchess was living is proof to the contrary,—for no man, out of Bedlam, would have thus idly put it in the power of that clever and unscrupulous woman utterly to ruin his character, which on such points was absolutely without stain and without suspicion. But to this letter when found was appended in pencil “1,000*l.*,” and the Editor of the Marchmont Papers conjectures that the pencil note was in the handwriting of his father, Mr. George Rose, and that the father meant thereby to intimate that a thousand pounds was “the favour” to which Bolingbroke referred. What! and is this conjectural interpretation by one person of what may have been meant by another, who could know nothing of the facts, to shake our faith in the character of a man who never asked, never sought, never accepted favours, who more than once declined them—even a pension for life from the Crown?

Respecting the epitaph “On Mrs. Corbet, who died of a cancer in her breast,” Mr. Cunningham states that it “was first printed in D. Lewis’s Miscellaneous Poems, 1730,” which we doubt; and he describes what was said on this subject in the *Athenæum* as an attempt “to show that it was really written on a Mrs. Cope.” We have no objection to this report of what we said,—although we certainly intended rather to throw out a speculative possibility or probability for the consideration of Mr. Cunningham or Mr. Croker than dogmatically to assert anything. We hoped to put the new Editors on their guard against certain mystifications in the early life and writings of Pope, which have misled all former editors, from Warburton himself to Mr. Carruthers. We proved that the early correspondence of Pope was not to be relied on; that the letters which were published by Pope, and have for more than a century appeared as addressed to Trumbull, Addison, Craggs, and others, were not one-half of them so addressed; that the famous letter to Addison of the 20th of July, 1713, “dictated,” we were told, “by the most generous principle of friendship,” and which has given rise to so much comment, was a mere manufacture; that the epitaph which figures in his works and professes to have been written on King William’s Secretary of State, Sir W. Trumbull, was written on King James’s Secretary of State, John Lord Caryl!—Seeing these things and numberless others of a like character, we thought it not improbable that the epitaph in question was really written on Pope’s humble friend, Mrs. Cope, who did die of a cancer in her breast under circumstances that, as we showed, roused all that was noble and generous in Pope’s nature and awakened his deepest sympathy, rather than on a Mrs. Corbet, with whom it is not known that he had the slightest acquaintance; whose name, or the name of whose family, is not, we believe, mentioned in all his voluminous correspondence; and whose epitaph states that she died “after a long and painful sickness,” which might, or might not, mean cancer, but which we thought described consumption or almost any other mortal disease rather than cancer. We thus concluded our reference to the subject:—

“The question, so far as the mere name is concerned, may be of little consequence; but the character of any one in whom Pope took so deep an interest [as Mrs. Cope] is part and parcel of his own life; and the outline sketch we have given of Mrs. Cope [never before mentioned by Pope’s biographers] and her sad sufferings would lose nothing of its value, even if the new Editors could produce a Mrs. Corbet and establish her right to be restored to the honours of the past century.”—[*Athen.* No. 1395.]

Now comes a critic in the mocking costume of a ‘Bristol Bibliographer.’ We are sorry for the simple bookseller; still more sorry to see that the “perverse widow”—the apology for this intermeddling—is treated as one of his “commodities,” whom he is resolved to turn to profitable uses,—sorry to see one with whom we had so many pleasant associations made as familiar as Doll Common, or as “Alexander Mackenzie, my coachman,” who so long served a celebrated quack as a text on which to write advertisements. Our reply, however, so far as the comment on the Pope articles is concerned, will be very brief, for there is not one word urged against our speculation which is not taken from our own pages; but the following note, all we shall notice, goes beyond argument:—

“I have not heard that the *autograph* of the Epitaph on John Lord Caryl has been exhibited, of which a copy is printed in the *Athenæum*, July 15, ’54, p. 876.”

—What is there strange in this? How should a bookseller at Bristol know whether an *autograph* had or had not been exhibited in London? More than a dozen persons, and those most interested in the subject, have seen the “*autograph*.” The Bibliographer himself shall see it if he will give us a few hours’ notice, any time before the 23rd of this month or after the 1st of August.

Mediæval Popes, Emperors, Kings, and Crusaders; or, Germany, Italy and Palestine, from A.D. 1125 to A.D. 1268. By Mrs. William Busk. Vol. II. Hookham & Sons.

THE submission of the Emperor Frederic to the Pope, and the Third Crusade, rendered memorable by the heroism of Saladin and Richard Cœur de Lion, are the principal incidents of the period comprised within the present volume of Mrs. Busk’s laborious work.

At the present time, the siege of Acre by Guy de Lusignan is, perhaps, the incident which will attract most attention, from the curious parallelism which it often presents to a “modern instance” with which we are all familiar.

“Guy [writes Mrs. Busk] had not numbers to shut in Acre upon its two land sides, but he pitched his camp before it to the east. Saladin . . . presently appeared with his army. He entered the town, made all requisite arrangements for its defence, established a system of signals to enable the Commandant of the garrison to receive his instructions, so as to facilitate his acting in concert with him; and then encamped upon one of the nearest hills, to watch Guy’s movements. Bands of Crusaders now began to arrive.

* * The siege was long and peculiar, the besiegers being themselves in a manner besieged by Saladin’s far larger host. From its great prolongation huts were gradually substituted for tents in Guy’s camp; and from the condition of the kingdom non-combatant Christians repaired to it, as to the capital. Queen Sybilla, with her four daughters by Guy, was domiciliated in this temporary wooden town, where huts of shopkeepers alternated with those of soldiers. For one while the frequent, often objectless fighting, was intermingled with a strange sort of social intercourse between enemies, who, despite their reciprocal intolerance, had learned to respect each other. * * During the winter, Guy continued the siege, as did Saladin his watch upon the besiegers. The latter, however, removed his camp to a somewhat greater distance; and, judging active operations over for the next few months, permitted a large part of his army to return home for the unpropitious season. Guy similarly indulged those who had homes to retire to; and amongst others Conrad withdrew with his troops to Tyre. Occasional affairs diversified the winter; but the principal occupations of the Syro-Franks and the Crusaders were fortifying their camps and constructing battering engines; that of the Sultan’s troops, watching them; and the chief casualties that occurred proceeded from disease. With the return of spring, reinforcements poured in upon Saladin from all parts of his widely-spreading

dominions. New bands of Crusaders joined Guy. * * Still, the inferiority in point of numbers of the Christians to the army watching their every move, prevented any serious attack upon the town, and induced a prohibition on the part of the King and of the crusading leaders—the Landgrave of Thuringia and the Comte d'Avesnes, who alternately held the command of the Europeans—to fight, or even quit the intrenched camp, without orders. This the inferior Crusaders considered as sheer cowardice; they had come to fight, and fight they would. Their pertinacious disobedience in breaking out for desultory skirmishes, without knights for officers, cost thousands of lives; and, with the burning of the military engines by either naphtha or Greek fire, thrown upon them from the walls, were the only incidents that diversified the spring months, passed in anxious expectation of the Emperor Frederic, but cheered by intelligence of his capture of Iconium."

Dissensions broke out amongst the allied crusaders; summer and autumn were "wasted in exploits of individual gallantry and irregular desultory fighting." Autumn brought "marsh fever," which swept away its thousands. Conrad became remiss in supplying the necessities of the besiegers, and scarcity was the speedy result. The "usual impediments to winter navigation" heightened the scarcity to actual famine, "accompanied as usual by a fearful increase of the epidemic, which often carried off as many as a hundred victims a-day." The spring brought Richard upon the scene, and although seriously ill, his military talent instantly infused "a character of vigorous activity" into the siege after it had been lingering on "for a couple of years." Until his arrival, as Mrs. Busk informs us, "the want of a commander-in-chief was deeply felt, none of the crusading princes combining the requisite qualifications for that office." Cœur de Lion aroused in the army a spirit which was irresistible, and early in July the place surrendered.

It is thus that history presents to us its warnings and encouragements; but, hurried on by the excitement and turmoil of action, how few of us have leisure to acquire a knowledge of its lessons! In such books as those of Mrs. Busk the patient reader may study them to advantage.

American Liberty and Government Questioned.

By T. Ryle. Longman & Co.

Mr. Ryle professes to scourge the American people "more in sorrow than in anger." He would imitate the Roman patriot, and weep while he condemns his friend. For, previous to his category of American sins, which range from murder to gluttony, he expresses a sentiment favourable to the republican nation:—"Personally, we regard the Americans with esteem; we consider their country, in many respects, our proudest monument." It is not very clear from this passage whether America is to be regarded as Mr. Ryle's monument, or as a trophy of the English race; but, at all events, it is a whited sepulchre, full of ghostliness and corruption. The laws, the arts, the manners of the confederated States are sordid and low. The flower of the land is blighted by base institutions. Genius is obscured; virtue is persecuted; respectability is reduced to despair. Selfishness, impudence, fraud, infidelity, and indigestion are the chronic plagues which make Jonathan at once "witty, profligate, and thin." In fact, Satan is wiser than of yore; and has founded across the Atlantic an empire after his own heart, where a few honest men seek to work out Mr. Carlyle's problem:—"Given a world of knaves, to produce happiness out of their united actions." Yet much intelligence and much probity are admitted to exist there. From the enumeration of moral qualities which Mr. Ryle draws up for

the condemned nation, whenever it is the victim of his praise, few excellencies are omitted that are likely to be found anywhere on the earth; but this testimony is contradicted by a more ponderous load of vituperation, raked together from all the factious diatribes and melancholy sermons that have been issued in the United States, to disgust human nature with itself or with its critics. Mr. Ryle, indeed, undertakes to accomplish the task which Edmund Burke said was too much for him;—he draws up an indictment against a whole people, and, being one of Pope's "ignorantly read" individuals, contrives to amass extracts sufficient for his purpose.

And when this is done, what is the result? A report, elaborately horrible, upon the normal vices of American civilization. We have two demurrers to put in:—firstly, the judge is not competent;—secondly, the impeachment is ridiculous. Nothing would be easier, for any one with the necessary time, patience, and malevolence, than to draw a picture of England representing it as less refined than Abyssinia, less humane than Dahomey, and less intellectual than China. He would only have to read a number of affecting sermons, from Edward Irving's downwards,—a variety of philanthropic pamphlets,—some morbid tracts,—and some stale French works on "the impure Babel," on the alleys of White-chapel, and on the most backward of our agricultural districts,—to collect authorities for saying all that General Piron or M. Sarrans would wish him to say of England,—or even that pleasant writer who tells the world that the English talk like wild-fowl! But he ought to have a qualification which Mr. Ryle does not possess,—that of writing artistically. Scarcely a sentence in the book before us is correct in its parts of speech or in its literary construction. The singular leads in the plural; the meaning is perpetually confused; words are employed in a wrong sense; and pages of magniloquence serve only to introduce some frivolous platitude, or some assertion astonishingly false, corroborated by evidence astonishingly weak. Sam Slick would say, this is a caution to dunces.

Mr. Ryle's method of establishing his case is extraordinary. He ridicules the American judges,—and relies on the authority of one or two among them. He disparages the American authors,—and quotes novelists where he should quote historians. He denounces the ribaldry of the American press,—and fills his volume with citations from its most ribald party satire as if they were simple truths. From another point of view, also, his demonstrations are remarkable. The proposition is submitted, that "America is the ally of Russia." In proof of this, we are informed that—"In New York, the principal hotel is dedicated to the Russian saint, Nicholas." Afterwards, he picks up the rumour that some Americans deceived the English before their attack on Petropaulovski, and contrasts their conduct with that of Mr. Grennell, a United States Whig. Mr. Grennell belongs to the wealthier classes, which "have a more aristocratic bias." Consequently, the wealthier classes are the best in the Union.

"Alas! how do such deeds compare with the conduct of some of the 'majority' of America leading our gallant sailors into a Russian ambushade at Petropaulovski to be slaughtered, when fighting the good fight of freedom—of western civilization against eastern barbarism! Here is a sad lesson of the want of principle and consistency resulting from democratic government!"

His logic brightens as it goes. Some very lax geographical statements are followed by an appeal to English honesty of thought. It is unfair, urges Mr. Ryle, to admire the United

States without recollecting the natural advantages which its people enjoy. He then refers to the Mississippi, forgetting to inform us why there are seven hundred steamers on that river, and only one on its more gigantic sister, the Amazon; but the principal "advantages" remain to be described. Firstly, "an universal system of education prevails, both of an ordinary and superior description, and the people exert all their possible influence to inculcate knowledge and information." Secondly, "a general prosperity prevails." We are required to attribute the happy condition of America to natural and "superadded" causes;—her people are well taught because they are well educated, and they are flourishing because they are prosperous. We can deny neither the first nor the second clause of the syllogism, if syllogism it be; but Mr. Ryle reminds us of Du Marsai's pupil: "the moon is round; round is an adjective; therefore, the moon is an adjective." Our economist adds, "a nation so situated must advance in spite of all obstacles," though an invisible clue leads him to the result, that the American system "fails in most essential qualities of good government." We have no mission to discuss forms of government. Still less is it our task to controvert opinions hostile to America; but we protest against books crammed with abuse, to gall the self-love of one people and to satisfy that of another.

Mr. Fenimore Cooper died some years ago. Mr. Ryle assumes that his life was shortened by the ribaldry of the American press. Mr. Barnum thrived in America (and in England). Mr. Ryle assumes that there is something rotten in the United States, though he suggests that remedies may exist even for American evils. Older and graver men, for instance, should preside over public affairs. "We think that a President and Senate ought to be forty years of age at the time of election." Mr. Ryle writes something in every page which, it is obvious, he does not mean, especially when he falls into a metaphysical discourse, and dilates on "the claims of mystery." We prefer him, however, in his more practical mood. Having minced up religion, politics, literature and manners, he deals with the human form divine, which, in America, it seems, degenerates into a haggard, sallow and attenuated anatomy. This proceeds from the restless, greedy, contentious national character. A few individuals may be seen both red and stout, but the majority have a lean and hungry look. Climate is no excuse, because the French Canadians and Mexicans are "light-hearted and fleshy." Tobacco does not extenuate the sin, because the British tar chews it also; nor can close stoves be pleaded, since these are used in Germany; while fat food is eaten in Russia as in America.

We imagine that this production will meet with as little attention in America as in England. For the lovers of scandal it is too dull; while readers of ordinary sense will decline to be troubled with a hash of garbled extracts from forgotten books and newspapers, connected by a disquisition which is scarcely intelligible.

Clytemnestra, The Earl's Return, The Artist, and other Poems. By Owen Meredith. Chapman & Hall.

THE author of 'Clytemnestra' may take his rank above the Minor Minstrels. His gifts and his faults are not the gifts and faults of gentlemen "who write with ease." He has an eye for colour, his ear is open to the cries of nature; he feels the hush of noon and the silence of midnight; and that which he thinks clearly and feels deeply, he can express with rare felicity and power. Most hopeful sign of all, if the

poet be young, he is perfect master of his fancy: his pearls are not strung at random, shapeless and ugly, though still pearls of price, but are picked with care, polished to the utmost brilliancy, and set in golden frames. Mr. Meredith is rich in trope and simile; but his figures are used sparingly, and only to throw out the sense or light up an argument. As, for instance:—

Men judge by acts—as tho' one thunder clap
Let all Olympus out;

where a debateable proposition in morals is suddenly illumined by a flash from Parnassus, and a truth is laid down that may pass into a moral axiom. As an instance of the poet's felicity of phrase, take Clytemnestra's glozing reference to her infidelity to her lord.—

In one wild hour of unacquainted joy
Thou didst set wide thy lonely bridal doors
For a forbidden guest to enter in!

Or this account of the reconciling power of Time.—

As we move
Further and further down the path of fate
To the sure tomb, we yield up, one by one,
Our claims on Fortune, till with each new year
We seek less and go further to obtain it.
'Tis the old tale.

But with all its grandeur of imagery, its sweetness of line, we prefer the "Other Poems" to 'Clytemnestra.' The poet's mind is warm and Gothic, not cold and Greek. Take as a better sample of its pictures, the opening lines of 'Good Night in the Porch.'—

A little longer in the light, love, let me be. The air is warm.

I hear the cuckoo's last good-night float from the copse below the Farm.

A little longer, Sister sweet—your hand in mine—on this old seat.

In yon red gable, which the rose creeps round and o'er, your casement shines
Against the yellow west, o'er those forlorn and solitary pines.

The long, long day is nearly done. How silent all the place is grown!

* * * * *

From the warm upland comes a gust made fragrant with the brown hay there.

The meek cows, with their white horns thrust above the hedge, stand still and stare.

The steaming horses from the wains droop o'er the tank their plaited manes.

And o'er yon hill-side brown and barren (where you and I as children play'd,
Starting the rabbit to his warren), I hear the sandy, shrill cascade

Leap down upon the vale, and spill his heart out round the muffled mill.

O can it be for nothing only that God has shown His world to me?

Or but to leave the heart more lonely with loss of beauty
.... can it be?

O closer, closer, Sister dear.... nay, I have kist away that tear.

God bless you, Dear, for that kind thought which only upon tears could rise!

God bless you for the love that sought to hide them in those drooping eyes,

Whose lids I kiss!.... poor lids, so red! but let my kiss fall there instead.

* * * * *

There's not a flower, there's not a tree in this old garden where we sit,

But what some fragrant memory is closed and folded up in it.

To-night the dog-rose smells as wild, as fresh, as when I was a child.

'Tis eight years since (do you forget?) we set those lilies near the wall:

You were a blue-eyed child: even yet I seem to see the ringlets fall—

The golden ringlets, blown behind your shoulders in the merry wind.

Ah, me! old times, they cling, they cling! And oft by yonder green old gate

The field shows thro', in morns of spring, an eager boy, I paused elate

With all sweet fancies loos'd from school. And oft, you know, when eves were cool,

In summer-time, and thro' the trees young gnats began to be about,

With some old book upon your knees 'twas here you watch'd the stars come out.

While oft, to please me, you sang thro' some foolish song I made for you.

And there's my epic—I began when life seem'd long, tho' longer art—
And all the glorious deeds of man made golden riot in my heart—
Eight books.... it will not number nine! I die before my heroine.

Such lines are their own best interpreters to the common herd of man. We shall doubtless hear of Mr. Meredith again.

Six Weeks in the Island of Sardinia—[*Six Semaines dans l'Ile de Sardaigne*]. By Edward Delessert. Librairie Nouvelle, Paris.

THE author of 'A Night in the City of London' has given six weeks to Sardinia:—in the same proportion we may expect shortly to receive an account of Three Months in Eel Pie Island, to be followed by a Few Hours in Australia. M. Delessert's Sardinian experiences are not open, generally, to those charges of prejudice and hasty judgment which we made against his little book on England. There is no rivalry between France and Sardinia;—the Frenchman watches the picturesque Sardinian riding past his pestilent marshes, or between his cactus hedgerows, with his wife and child upon his saddle, with the consciousness that he comes from a nation far ahead of the swarthy orange-growers of Milis. He can afford to be generous in Cagliari,—in London he is anxious only to assert himself. Thus, in M. Delessert's little book about Sardinia we find his artistic quality most pleasantly developed. He does not pretend to deal with the institutions of the island; he does not base a theory for its regeneration upon an omnibus ride, under drenching rains, from Sassari to Cagliari. He contents himself with an endeavour to reproduce the impressions that floated upon his mind, leaving the reader to form his own estimate of the political and moral status of a people amidst whom such squalor as that which disgusted and personally annoyed him could exist. From north to south of the island there is not a comfortable bed, not a decent dinner, not a moderately clean sitting-room, to be had. Swarms of active little animals colonize every bedroom, and are found to be conducive to early rising. The face of the country, except near the capital, presents a spectacle of neglected fertility. A general apathy—from which the Sardinian can arouse himself only to oppose fiercely any whisper of improvement—manifests itself everywhere in dirty houses and untilled lands. The pestilent marshes of Oristano might be drained, to glow presently with golden harvests, giving food instead of fever; but the Sardinian takes his precautions against the pestilence, and would resist any man who should arrive with draining materials. There is a large proportion of Spanish blood in these haughty, barbarous islanders,—a mixture to which may be traced that nature, at once indolent and proud, which refuses alien help, yet will raise no finger to save itself from ruin. With these few remarks, suggested by the perusal of M. Delessert's lively description of recent experiences, we will proceed to select a few extracts at once interesting and suggestive of the pictorial power of the writer. We begin with a description of the orange-wood of Milis.—

I had seen orange-trees growing in the open ground. I had even breakfasted one morning under these trees laden with fruit on the shores of Phœnicia, the most adorable spot of the earth, where the sea came murmuring upon golden sands at my feet; but I had never experienced the bewilderment, the intoxication, which accompanied my visit to the gardens of Milis. Here there is nothing but oranges,—not, if you please, fruit placed at regular intervals along the branches, and encompassed by verdure—but huge clumps of thirty or forty oranges dragging the branch which bears them towards the earth. Do not imagine a group of orange-trees here and there,

the perfume of which comes and goes as you approach and leave it; but try to realize the idea of a wood—a veritable forest! As far as the eye can reach under this balmy forest, it meets with nothing but oranges. Oranges in the foreground; oranges in the half distance; oranges gild the horizon! Here, too, you perceive the abuse of riches. You stumble over oranges, lying everywhere about;—you wish to indicate a distant point, you naturally pick up an orange and cast it in the desired direction; you eat the quarter of one, and, in the very excess of wealth, throw the rest away. The perfume of the blossoms intoxicates you. The mind flies to the gardens of the Hesperides;—you become so confused by the penetrating perfume, that you feel almost delirious; wonder whether you are not yourself turning to an orange-tree. You feel the leaves budding upon your arms; you grow weary, with the exertion of bearing so much fruit, and ardently look forward to the picking season. We were in the wood precisely at the time when the peasantry of Milis gather the oranges, to sell them. A gathering is a very simple process. A cloth is spread under the tree; and a man, having climbed the branches, precipitates the golden harvest to the earth, whence an inconceivable aroma arises. To give a simple idea of the extent of this forest, as large as the Bois de Boulogne (I ask pardon for my comparison of those readers who do not know this wood), it took us two hours to trot round it, at a smart pace, on horseback. At the end of our journey, we arrived before the king of the orange-trees. A man can hardly clasp the trunk of this old tree in his arms. Its huge branches stretch boldly out, like those of an oak. It bears an inscription to commemorate a visit from Charles Albert, on the 18th of March, 1829. But orange-trees do not entirely monopolize these enchanted regions. Here and there you come upon glades, where tall poplars protect their noble hosts from the violence of the winds; or upon clumps, where the wild vine creeps round the trees, to breathe the perfume of their fruit, and the climatis falls about in cascades, caressing the breeze with its sweet odour. The earth is sprinkled with violets, the periwinkle and forget-me-not:—it is a fairy land,—something fabulous, heroic, which is alone worth a journey to Sardinia, and well rewards the trouble of travelling over the barren plains and desolate hills of the northern part of the island. The woods of Milis are, in their way, one of the wonders of the world; and I owe to this oasis, loved of the gods, the grateful remembrance of the wildest enjoyment. Of the forty-eight hours we gave ourselves at Milis, I spent at least thirty in the orange woods, gathering in a store of sweet perfume for less happy times, and envying Sardinia so great a treasure!

The author, during his travels in the island, saw much of Sardinian village life. His descriptions of these experiences are fresh and vigorous. Here is a sketch of the races with which the islanders love to amuse themselves during their frequent holidays;—the scene is the village of Osilo, near Sassari.—

I cannot remember the name of the Saint in whose honour that holiday was kept at Osilo. After vespers, the crowd, male and female, proceeded towards the place appointed for the rejoicings; that is to say, towards the side of the rock which the hamlet commanded, and where dances and exercises took place. The steps of the church are close to the edge of the rock; and from these steps, blocked up with peasants, we reached a narrow, rugged, and stony valley, in which there was a path about two metres in width. This path follows the bed of the valley for about five hundred metres; it then runs along the side of the mountain opposite Osilo, losing itself over its summit at a point just marked by an almost invisible cabin. There had been a talk of all kinds of races; and I now inquired of my host, the curé, where these races were going to take place.—"Here, under your eyes," he replied, "along that road." That road was a rough path, neither of turf nor sand; it was not even cleared—long, slippery, uneven flagstones marked every yard of it, without counting the pointed rock—in short, imagine a regular little mountain route. I could not believe that races would be held upon so dangerous a course. The first race

was a foot-race among children of five or six years old. The prize, hooked upon a stick at the winning-post, awaited the winner. This prize was a long, black woollen cap, of the kind generally worn by the Sardinians. Thirty little children arranged themselves in a row under the guidance of an old man, appointed commissioner of the race-course. Another old man was at the winning-post, to decide upon the winner. At a given signal the children started off, and pushed one another, and competed, with an emulation worthy of heroic times. In a few seconds they rushed round the judge placed at the winning-post. The dispute as to the winner, in which the parents joined, became so hot, that the old judge took the prudent course of running away with the stick and cap together. But the children were not to be quieted; they ran after him; nor could he obtain peace before he had placed the cap upon the head of the competitor who appeared to have the best claim to it. During this first race the population of Osilo had taken possession of the mountain side, and had enlivened, with a thousand costumes, all the points of the rocks. The scene was most picturesque, and indeed, most elegant. In the open air very bright colours are necessary to obtain a brilliant effect; and one is apt to believe that the Sardinians fully understand this decorative principle. As the face of the rock is almost perpendicular, these good people appeared one above the other:—some on horseback perched upon a great stone, others stretched upon a soft place. The effect, I must repeat, was charming. These villagers, who had tranquilly watched the children's foot-race, now began to give evidences of excitement, for the horse-racing—really the national passion of the Sardinians—was about to begin. In a few minutes we perceived, upon an open space, several horses, which men were walking to and fro—these were the race-horses. Presently some children made their appearance, vaulted lightly upon the steeds, and took them off to their appointed stations, for the start. These jockeys, averaging between fourteen and sixteen years of age, were dressed in white from head to foot, with the exception of an embroidered silk waistcoat, which they wore over the shirt. Upon the head they had a red leather cap, and their legs were graced with long spurs, fastened by a leather above the ankle-bone. The horses' tails were tied up; for saddle they wore a piece of cloth doubled and fastened upon the back by a strap, and their heads were adorned with very shabby bridles. When the eight horses had received their riders, they came curvetting before us, and we were able to admire at our leisure the ease and grace with which these boys sat their intemperate steeds. The cavalcade followed the path, which served for race-course, to its extremity, up the mountain, and then returned to the point from which it had started. Among these horses, generally small in size, there were two or three really remarkable for their beauty. With fine limbs, open chests, a square head, the loins short and well made—only the hind-quarters left much to be desired, being low, and carrying an ill-attached tail. This general fault in Sardinian horses, although it spoils their appearance, takes nothing from the vigour and sure foot for which they are remarkable. The riders now formed themselves in line, amid the excitement of the population, which literally blackened the side of the mountain. At a given signal, all (save two horses that absolutely refused to advance) rushed down the track. I was prepared for a very slow race along a road so thickly strewn with obstacles, and would have been content to admire the skill of the riders who should find their way at a reasonable speed and without accident upon such ground. But I had then no idea of the audacity of Sardinian riders, and I may now declare that in this quality they leave the Arabs far behind; for, while the Arabs seldom mount their horses without their high saddles, which protect them materially against falls when the horse springs aside,—the Sardinians, on the contrary, ride indifferently with or without saddles. Then, again, the Arabs choose rather a flat and sandy ground for their races,—not rocks and slippery stones as in Sardinia. What was my astonishment when I saw these children start off along the narrow way, dashing against one another to get the lead in a road not wide enough for them to run abreast! Sparks flew up in thousands from the heels of the horses; one arrived

at a stony platform, slid down it for seven or eight metres, and was corrected by the vigorous use of the spur,—another struck upon a huge round flint, and went nearly to the earth,—a third, its rider finding it impossible to turn so impetuous a charger aside, sprang over a projecting rock with a terrific bound. Nothing stopped the jockeys. Some, to show their security, indulged in all kinds of feats;—now one boy threw himself forward, and lay at full length upon his stomach,—and then he suddenly cast his body backwards, and his head lay close to his horse's tail. In less than twenty-five seconds the competitors had reached that point of the course where it begins to ascend the opposite mountain. At this point, long, flat stones covered the way: and as the second horse approached, his rider could not prevent him from avoiding it, by rushing up the rocks at the side, at least ten feet above the course. The horse was evidently frightened, and feeling no longer either spur or bit, began the wildest flight. The Sardinian upon his back, without thinking of stopping him, only thought of guiding him back to the course. For a few moments the creature made bounds such as I have never seen before—his efforts were most extravagant,—till having missed the ground with his fore feet, he fell, and rolled over his insensible rider. I could not help crying out, believing that the poor boy's head must be broken. The horse ran first, and bounded off in the direction of the course; but the boy, having tried two or three times to rise and follow the animal, fell at length exhausted upon the rock. At fifty paces distant from him were about two hundred spectators, including two or three priests, whose duty, if I mistake it not, is to carry help to a brother in danger. Not one of all these moved; everybody had seen the accident, but the unfortunate boy waited till the race was over, before anybody showed him the least attention. For my own part, I had lost sight of the competitors, who, meantime, covered with foam, had reached the summit of the mountain. A prolonged cheer told me that there was a winner. The horses returned gently, and I inquired whether the boy who had fallen was dangerously hurt. "It is nothing," my neighbour replied, an old, ill-looking bandit; "it will teach him to be more careful another time." I could not help turning my back upon this man. But the Sardinian was right. For the enraged little horseman had come to his senses; had tied up his bleeding head, and was on his way back, growling at his horse, the rocks, and his own awkwardness. He asked, as a favour, that he might be allowed to begin again. But his comrades and the old people of the village only loaded him with reproaches, and predicted that he would never know how to ride. At this moment, the conqueror passed beneath us upon a noble bay horse, whose sides showed the marks of the spurs. The celebrated Artaban, whose pride has passed into a proverb, could not have shown himself prouder than this wild young jockey. His beardless face, browned by a Sardinian sun, gave promise of a brilliant horseman in the future, and assured him the love of some belle to be declared according to the ancient rites of the country.

We might select many extracts illustrative of the islanders at home, at their work, or in their social relations. M. Delessert's experiences exhibit a very rude state of society, almost passive, amid wilds of neglected fertility; the main characteristics of the people being, according to the author, a love of dirt, a toleration of priestly rule, and a hatred of foreign intervention. Amid all these drawbacks to prosperity, both physical and moral, it was strange to notice here and there, stretching away beyond Cagliari, the poles which support an African telegraph,—strange to meet, in the capital of this primitive nation, Chasseurs de Vincennes on their way to the East. We have referred to the Sardinian priesthood. A gentleman recommended M. Delessert and his travelling companions to the hospitality of one of these village lights. Here is a description of a Sardinian vicarage.—

M. Boyl had kindly given us a letter for the curé of San Luri, and this letter was sent to him while the *locanda* was ransacked for our supper. * * The curé sent back word that he would lodge us for the

night; and, at ease as to our beds, we ate in a long grange, or clay cave, in no very agreeable atmosphere. Leaving our two servants to occupy the bed and an old sofa bottomed with a deal board, we reached the curé's house through a drenching rain. Rectory,—call this a rectory!—no, it would be profanity! The reverend proprietor of this building was snoring in the kitchen. He woke up suddenly, led us up to the first floor, and left us dripping with rain in the room set apart for us, the furniture of which we might examine at our leisure. I shall not indulge in lengthy description. At the end of the little room, against the wall, we could see a chest black carved wood, in which a heap of books lay in tatters. Upon the dirty floor, around, lay books also. There were two straw-bottomed chairs, but nothing whatever in the shape of washing or toilette apparatus. Three beds, distributed about this chamber, awaited us: a near examination of them terrified us,—for the curé had not thought, for a moment, of putting them in a fit state to receive us. Add to this, that a nauseous odour, peculiar to many Sardinian houses, almost suffocated us when we first entered the apartment, and that the scene was faintly illuminated by a dreary dip, which stood upon a very dusty table near greasy snuffers, and the description is complete. "Here is a pretty place to sleep in!" exclaimed Richard, a little disappointed, for we had anticipated marvellous comforts at the hands of the curé of San Luri. Almost dead with sleep, and not wishing to succeed I did not know whom in my bed, I philosophically buttoned my india-rubber cloak across my breast, tucked my trousers into my boots (in order to diminish the chances of attack from my probable enemies), and fell asleep, after laughing at these little miseries, so amusing to look back upon. About the middle of the night I awoke—devoured; and I perceived Richard sitting up in his bed, with an expression of profound despair. The poor fellow insisted, in spite of the character of his host, that he was in the kingdom of darkness,—and declared that he must get up and leave at once. M. B.—and myself used all our eloquence to dissuade him, and we obtained two hours' respite; but at four o'clock our companion, in a state of exasperation, made a last appeal to our pity; so we walked down stairs like conspirators, and went to the *locanda*. After this experience, our omnibus appeared to be a terrestrial paradise. Nobody was stirring in the curé's house, and we might have carried away all the goods without being disturbed; but no doubt the good ecclesiastic knew his furniture too well to believe that it could lead anybody into temptation.

We might extract from M. Delessert's volume an excellent description of the pestilent marshes of Oristano;—a pretty picture of Sardinian love-making from balconies;—a town scene in Cagliari, with the donkeys turning little flour-mills in the roadside cottages;—but we hope that we have already tempted readers, who are anxious at the present moment to obtain a fair and vivid view of our new allies in their island home, to M. Delessert's light and pleasant volume.

The Fibrous Plants of India. By J. Forbes Royle, M.D. Smith, Elder & Co.

THAT our East Indian possessions are a store-house from whence we might draw inexhaustible supplies of raw material for our manufactures, is a fact well known to those who have studied the natural productions of Hindústan. Yet we do not derive a hundredth part of the materials of our manufactures from this part of the world. The causes of this are numerous. Our Government, or the East India Company, has been too busy making conquests in India to think of commerce and manufactures. The natives are indolent, and are not instructed in producing articles fit for the British markets. Our Indian possessions are very far off compared with America, Russia, and other countries supplying much of the raw material of our manufactures; and what with inferior production on the one side, and the cost of carriage on the other,

Indian produce has only found its way in small quantities to the British market. But war is not all an evil,—it frequently breaks through lazy habits, opens up new sources of wealth and industry, and develops hitherto hidden powers of production. The present war is likely to do this. Hitherto we have been dependent on Russia almost exclusively for hemp. Where are we to get hemp? has been an anxious question. The answer is—in India. India could supply in two years more hemp than England could use, were her fleets twice as large as they are, or her rogues a thousand times more numerous. The East Indies have already supplied us with some of the hemp that has worked our fleet in the Baltic.

Dr. Royle gives the following account, from McCulloch, of importations of hemp from Russia and the East Indies :—

	1831.	1847.	1851.
From Russia	506,803	544,644	672,342
„ East Indies	9,472	185,788	590,923

—This is encouraging enough, and shows that there is nothing insurmountable in the difficulties that have hitherto prevented our obtaining supplies of raw produce from the East.

Besides producing the fibres which are ordinarily used in the textile manufactures of this country, India yields many other plants the fibres of which are used by the natives for weaving. Although it might be thought that any of these would be used as soon as they were found serviceable, this is not the case. There is as much conservatism and prejudice in the manufacture of fibres as in other departments of human thought and action. Our cotton manufacturers insisted on weaving their cotton goods with a warp of linen long after Arkwright had demonstrated that one of cotton was cheaper and better. Thanks to their prejudices, Arkwright made his vast fortune, and became one of the few men who in this country have reaped an ample reward from splendid discoveries. In like manner the use of alpaca wool was resisted, and now in a few years it has converted an intelligent artisan into a *millionnaire*. The history of jute is another illustration. Upwards of 20,000 tons of this Indian product were imported into this country in 1851:—in 1841 it was hardly used in this country, although it had been known for centuries as the material of which gunny bags are made. The use of jute is still extending. It possesses the rare property of receiving the dyes of both silk and cotton, and enters into the fabrication of a hundred articles in which its presence is not suspected.

Dr. Royle's book gives a full account of the nature, culture, and preparation of this and the other fibres yielded by Indian plants. It is on this account a book demanding the study alike of the manufacturer and the statesman: of the manufacturer, that he may secure new materials for his fabrics,—and of the statesman, that he may apply himself to the introduction of those measures into India which may facilitate the produce and diffusion of its natural wealth to its own advantage and that of the rest of the world.

In the Appendix Dr. Royle gives a Report, supplied by him to the Government, on the Use of Materials for Paper-making. The desideratum in paper-making at the present day is not so much a raw material out of which paper could be made, as one that could be furnished at a rate cheaper than that of rags and make a paper equally good. Dr. Royle points out several materials for paper-making which are furnished in great abundance in the East Indies; but the question really is, at what price these materials can be delivered in the London docks? On account of the cost of carriage, it would appear that English plants, or those of North America, are more likely to succeed than those from

India. Already successful manufactures of paper from straw and from roots of the twitch grass are being carried on in this country. We have seen good paper made from other common materials. With regard to our own plants it is not a mere question of abundance: as a rule the grasses are objectionable on account of the quantity of silex they contain. This must be removed, and that at a considerable expense. The manufacture of paper from straw only pays, we understand, by the use of the alkali employed in separating the silex in the making of soap. The sawdust and shavings of deal wood, so abundant, cannot be employed on account of the difficulty of removing the small particles of resin it contains. Some vegetable matter is so hard that it cannot be easily reduced to a pulp, as the wood of stems and branches of trees; whilst in turnips, carrots, and a host of succulent plants, it is so soft that it would not make a paper sufficiently strong. We have no doubt, however, that all these difficulties will be overcome, and that before long we shall have paper sufficiently cheap to keep pace with the enormous demand.

Historical Memorials of Canterbury. With Illustrations. By Arthur P. Stanley, M.A. Murray.

CANTERBURY touches the general history of England, in an especial manner, at three important points, and in connexion with three important persons: Augustine, Thomas à Becket, and the Black Prince;—the missionary, the High Church martyr, and the warrior. Mr. Stanley's book is made up of four essays which relate to these persons—essays of different merit, and therefore of different interest. One of them is an article upon the death of Becket, published some years ago in the *Quarterly Review*. This is a paper of great interest, and of considerable research. It attracted attention at the time of its publication,—has been adopted as an authority by subsequent writers upon the same subject,—and is now worthily reprinted, with considerable additions. The other papers are made up from lectures delivered at Canterbury, the subjects being the Landing of Augustine, the Tomb of the Black Prince, and the Shrine of Becket. These latter papers are all very well. They are written upon good subjects, and two of them are set off with annotation of an illustrative character which is due to the research of Mr. Albert Way; but they are of little value in comparison with the article from the *Quarterly*; they will not add to Mr. Stanley's reputation, nor even sustain it. We notice this circumstance, in order that we may point out from it what is, probably, one of the causes of that failure of the popular interest in lectures which is now universally complained of. When Mr. Stanley writes for the *Quarterly Review*, he writes like a man writing for men. He gives himself up to research; he inquires, investigates, adopts the tone of a man in earnest, a man desirous to teach. He respects the intellect of his readers, and he treats them with proper deference and consideration. It is otherwise when Mr. Stanley takes pen in hand to write a lecture for a popular audience at Canterbury. He undervalues the people whom he thinks he is going to oblige. His inquiries are bounded within a range to which no one would apply the name of research, and in lieu of energetic and sensible writing, which brings back the past and compels it to tell over again its crimes and its lessons, Mr. Stanley occasionally adopts a style of affected simplicity, and at other times indulges in reflections designed to be didactic and moral, but which are often illogical, and

not unfrequently perfectly commonplace—matters which he would not have ventured to send for consideration to the Editor of the *Quarterly Review*. If this be the general treatment of audiences called upon to listen to lecturers, can it be a subject for wonder that lectures become unpopular? People resent being treated as children. There are opportunities enough elsewhere for men to listen to crude undigested speculations, and after being caught at the lecture-hall once or twice, they leave the benches to be occupied by persons of congenial intellect.

In treating of the pilgrimages to the Shrine of Becket, Mr. Stanley has a valuable assistant in Chaucer,—although the poet disdained to be tied down to minute accuracy, topographical or chronological. Arrived at the city of their pilgrimage, the first object of the wayfarers would be to find lodgings, and here the local knowledge of the Canon of Canterbury is able to give us a pleasant, although not novel, illustration of the account of the poet. In the Supplementary Tale we are told that Chaucer's band of pilgrims took up their abode

At "Chekers of the Hope" that every man doth know.

Well known as this hostelry might once be, it has yielded to the general fate. "Its name is gone, and its destination altered," but it has long been identified with an

"antique structure, which, with its broad overhanging eaves, forms so picturesque an object at the corner of High Street and Mercery Lane. Its vicinity to the great gate of the Precincts naturally pointed it out as one of the most eligible quarters for strangers, whose main object was a visit to the Shrine; and the remains which can be traced in the houses that for more than two centuries have been occupied by the families of the present inhabitants, amply justify the tradition. An oblong court, surrounded by a venerable tenement, entirely composed, like houses in Switzerland, of massive timber, chiefly oak and chestnut, received the pilgrims as they rode in. In the upper story, approached by stairs from the outside, which have now disappeared, is a spacious chamber, supported on wooden pillars, and covered by a high pitched wooden roof—traditionally known as 'the Dormitory of the Hundred Beds.' Here the mass of the pilgrims slept; and many must have been the prayers, the tales, the jests, with which those old timbers have rung,—many and deep the slumbers which must have refreshed the wearied travellers who by horse and foot had at last reached the sacred city. —Great, too, must have been the interest with which they walked out of this crowded dormitory at break of day on the flat leads which may be still seen running round the roof of the court; and commanding a full view of the vast extent of the southern side of the Cathedral."

Mr. Stanley conducts the pilgrims from spot to spot through the cathedral, and finally goes with them to the Shrine of the Martyr, blazing with gold and jewels. Among the latter was one of superlative brilliancy and value, to which the attention of the spectators was directed by the finger of a wooden angel pointing towards the place where it might be seen. The mode in which this jewel was acquired was curious enough.—

"It had been given to the original tomb in the crypt by Louis VII. of France, when here on his pilgrimage; but the donation was enhanced in the eyes of the pilgrims of the 15th century by a marvellous legend, quite unknown to earlier chroniclers. 'The King,' so ran the story, 'had come thither to discharge a vow made in battle, and knelt at the Shrine with the stone set in a ring on his finger. The Archbishop, who was present, entreated him to present it to the Saint. So costly a gift was too much for the royal pilgrim, especially as it insured him good luck in all his enterprises. Still, as a compensation, he offered 100,000 florins for the better adornment of the Shrine. The Primate was fully satisfied; but scarcely had the refusal been uttered when the stone leapt from the ring, and fastened itself to the Shrine, as if a goldsmith had fixed it there.' The miracle of

course convinced the king, who left the jewel, with the 100,000 florins as well; and it remained, the wonder of the church."

This glorious trophy of the power of the saint and the splendour of the sovereign who came to worship at his shrine was worn by Henry the Eighth, after the destruction of the shrine, as a thumb-ring, and glittered in a golden collar which belonged to his daughter Queen Mary, but has not been traced since her time.

The pilgrims brought away with them certain "tokens," evidences of their having visited St. Thomas. One of these was a small leaden *ampulla*, or bottle, the origin of which is thus commemorated.

After the murder of Becket, the scattered drops of the martyr's blood were piously gathered up into a basin, and the citizens, as we are told, pre-conscious of its future miraculous efficacy, rushed forward to dip their hands in the sacred blood. They even washed their eyes with it.

"One instance of its application gave rise to a practice which became the distinguishing characteristic of all the subsequent pilgrimages to the shrine. A citizen of Canterbury dipped a corner of his shirt in the blood, went home, and gave it, mixed in water, to his wife, who was paralytic, and who was said to have been cured. This suggested the notion of mixing the blood with water, which, endlessly diluted, was kept in innumerable vials, to be distributed to the pilgrims; and thus, as the palm was a sign of a pilgrimage to Jerusalem, and a scallop-shell of the pilgrimage to Compostella, so a leaden vial or bottle suspended from the neck became the mark of a pilgrimage to Canterbury."

From the Cathedral the pilgrims were conducted to another evidence of the virtue of the martyr's blood.—

"A well in the precincts, into which, as the story ran, the dust and blood from the pavement had been thrown immediately after the murder, and called forth an abundant spring where before there had been but a scanty spring; and this spring turned, it was said, both at the time and since, four times into mud and once into milk. With this water miracles were supposed to be wrought; and from the beginning of the fourteenth to the close of the fifteenth century, it was one of the greatest marvels of the place. Absurd as the story was, it is worth recording, as being one of which the comparatively late origin can be traced by us, though wholly unsuspected by the pilgrims, and perhaps by the monks who profited by its wonders; and thus an instance, even to the most credulous, of the manner in which the fables of miraculous springs have in all countries been originated."

When dismissed from the Cathedral, they usually adjourned to the Mercery Lane, which at that time was lined with arcades, like the "Rows" at Chester, under which the pilgrims could walk and turn into the stalls on either side. Here they bought what were termed their "signs,"—further evidences of where they had been, the principal being little leaden brooches representing the head of the saint, with the inscription "*Caput Thomæ*."

It is of matter like this that the lectures are composed; but the paper in the *Quarterly* is altogether of a higher tone. The calm reception by Becket of the knights, who became his murderers, is told most vigorously. Sitting on his bed in his private room or cell, surrounded by his clergy, some lying at his feet, some standing, one on whose shoulder he was kneeling sitting by his side, he bade the knights enter and deliver their alleged message. As they came into the apartment, he greeted them with a steadfast but silent gaze. Fitzurse alone met the eye of the Archbishop without flinching. "God help you!" the knight exclaimed scornfully. Becket, quailing in his turn, blushed crimson. Fitzurse proceeded:—

"The King over the water commands you to perform your duty to the King on this side the

water, instead of taking away his crown."—"Rather than take away his crown," replied Becket, "I would give him three or four crowns."—"You have excited disturbances in the kingdom, and the King requires you to answer for them at his court."—"Never," said the Archbishop, "shall the sea again come between me and my church, unless I am dragged thence by the feet."—"You have excommunicated the bishops, and you must absolve them."—"It was not I," replied Becket, "but the Pope, and you must go to him for absolution."—He then appealed in language which is variously reported, to the promises of the King at their interview in the preceding July. Fitzurse burst forth, "What is it you say? You charge the King with treachery."—"Reginald, Reginald," said Becket, "I do no such thing; but I appeal to the archbishops, bishops, and great people, five hundred and more, who heard it, and you were present yourself, Sir Reginald."—"I was not," said Reginald, "I never saw nor heard anything of the kind."—"You were," said Becket.—"The knights, irritated by contradiction, swore again and again, 'by God's wounds,' that they had borne with him long enough."

The altercation became more serious. Becket recapitulated to the knights the long catalogue of his grievances, and appealed to the fealty they owed him as tenants of the See of Canterbury. He threatened them. They believed he was about to excommunicate them. They became furious, and rushed from his presence to procure arms, and rouse the people. In the dreadful interval of suspense, the terrified monks hurried the unwilling Archbishop from his palace into the Cathedral. In spite of his proud endeavour to preserve his dignity, they urged him forward, although he repeatedly paused and asked them what they feared.—

"Some pulled him from before, others pushed him from behind; half carried, half drawn, he was borne along the northern and eastern cloister, crying out, 'Let me go, do not drag me.'"

At length they succeeded. As they did so, the armed knights were heard in the distance tumultuously entering the cloister. The monks proceeded to close and barricade the door of the church. Becket would not allow them to do so. "Away, you cowards! The church must not be turned into a castle." With his own hand, he re-opened the door, and helped in some monks who had been shut out. The knights reached the door at twilight, screaming, as they passed along, "Where is Thomas Becket? Where is the traitor?" The monks surrounded the Archbishop, and still strove to hurry him on to the portion of the building esteemed most sacred. Becket was ascending a flight of steps towards the choir, as Fitzurse entered from the cloister. The building immediately rang with his shouts of "Where is the Archbishop? Where is the traitor?" Becket paused at the sound of the well-known voice,—

"Reginald, here I am, no traitor, but the Archbishop and Priest of God; what do you wish?"—and from the fourth step, which he had reached in his ascent, with a slight motion of his head—noticed apparently as his peculiar manner in moments of excitement, Becket descended to the transept. Attired, we are told, in his white rochet, with a cloak and hood thrown over his shoulders, he thus suddenly confronted his assailants."

The monks fled. The Archbishop stood with his back to the pillar, and defended himself manfully, hurling Tracy, one of his armed assailants, to the pavement. The Saxon Grim, the only attendant who remained faithful to the Archbishop, assisted him in resisting the endeavour of the knights to drag him from the protection of the pillar. Swords were drawn. The first blow disabled Grim; and the next moment beheld the Archbishop pierced with many deadly wounds. The particulars are admirably told by Mr. Stanley; and his account of the subsequent fates of the murderers is a substantive and valuable addition to the history of this striking and most important incident.

We would recommend Mr. Stanley, when he next writes for a Canterbury audience, to dismiss from his mind all idea that he must write down to their comprehension. Let him try whether they cannot understand the merit of such a paper as this on the death of Becket.

Literary Fables. From the Spanish of Yriarte. By Robert Rockliff. Second Edition. Longman & Co.

Literary Fables of Yriarte. Translated from the Spanish by G. H. Devereux. Boston, U.S. Ticknor & Fields.

Who does not know, almost without having read them, certain poems and books having a foreign reputation,—so perpetually, we were almost ready to say so mercilessly, have they been recurred to by translators and readers of every country and calibre?—If an Italian sonnet (for instance) were mentioned late in the last or early in the present century, the Muse with her children on her knee, type of Divine Beneficence, was pretty sure to turn up. The Muse was superseded by *Italia* with her fatal gift of beauty, somewhere about the reign of George the Fourth. So, too, among Italian novels, has 'I Promessi Sposi' been put to hard duty. There are certain German apologues coming within the same category; and the incessant industry by which 'Faust' has been handled, hacked, and hewed, by persons of more worth and culture than poetical genius, has succeeded in making one of the sublimest poetical creations of modern time familiar rather than well known.

These "Literary Fables" of Yriarte seem of late years to have furnished a Spanish translating stock to the students of foreign literature,—since we have met specimens here and there in many an anthology, and now are called on to compare an English with an American version of the collection. The former (overlooked by accident on the occasion of its appearance) stands no longer in need of recommendation, as its title-page bears witness. Neither of the two translators, perhaps, represents the *borachio* of Spanish humour and expression; but, indeed, the feeling for *flavour*, as distinct from meaning and sentiment, is given to as few as a palate for wine or as an eye for colour; and when such feeling exists, it by no means follows that power to represent it shall accompany the rare possession.

This peculiar merit abstracted, we imagine that a tolerably even balance might be struck betwixt Mr. Rockliff and Mr. Devereux as translators and versifiers. In the specimens we give, our countryman, we think, has the advantage. His seventh fable tells (and tells) better than that of his far-away kinsman.—

The Big Bell and the Little Bell.

Within an old cathedral hung

A mighty bell,

Which never, save at Easter, swung

(One solemn knell;

And then, so sternly all around

Its echoes fell,

The peasants trembled at the sound

Of that big bell.

Not far from the cathedral stood

A hermit's cell,

And in its belfry-tower of wood

A little bell;

Whose daily tinklings through the year

So faintly fell,

The peasants hardly gave an ear

To that small bell.

The hermit—he who own'd the same,

And loved it well—

Resolved that it should share the fame

Of the big bell;

So tolling it but once a year

With one brief knell,

He taught the peasants to revere

His little bell.

And there are fools in vast repute,

Who, strange to tell,

Acquire their fame by being mute

Like that small bell;

These would-be sages rarely speak,
For they know well
That frequent utterance would break
The solemn spell.

In a certain cathedral a huge bell there hung
That only on solemn occasions was rung;
Its echoes majestic, by strokes three or four,
Now and then, in grave cadence, were heard—never more.
For this stately reserve and its wonderful weight,
Throughout the whole parish, its glory was great.

In the district the city held under its sway,
Of a few wretched rustics, a hamlet there lay;
And a poor little church, with a belfry so small,
That you hardly would call it a belfry at all.
There a little cracked cow-bell, that in it was swinging,
For the poor little neighbourhood did all the ringing.

Now that this little belfry might age in renown
The cathedral's huge tower, that loomed up o'er the town;
That briefly and seldom—on festivals noted—
The said little bell should be rung—it was voted.
By this cunning device, in their rustical eyes,
Its tinkle soon passed for a bell of great size.

Of true merit and excellence, many men try,
By grave airs and long faces, the place to supply;
And think that their wisdom is surely inferred
From their seldom vouchsafing to utter a word.

Indeed, it is true, in a general way,
Asses may not be known if they never should bray,
And for a wise animal safely may pass;
If one opens his mouth, then we know he's an ass.

In the very next fable, No. 8, 'The Ass and the Flute,' the American translator would win the prize "beechen cup" were he pitted against his English competitor. There is a monotony in the collection probably contemplated by the author when he decided on aiming all his fables at the class to which fabulists belong; but the books, which we here hand over to the Spanish students for nicer comparison, may be fairly described and recommended as useful and ingenious collections of verse,—in which truth is neatly set forth, and good morals are recommended.

What I Know of the late Emperor Nicholas and his Family. By Edward Tracy Turnerelli. Churton.

THE kinsmen of the late Czar have little cause to be grateful to Mr. Turnerelli. That gentleman, with an infinite deal of contempt for all other writers on Russia and her rulers, has intimated that he is the Sir Oracle alone qualified to speak of Nicholas,—and while protesting that the latter was all but divine, he has made him appear very nearly ridiculous.

When Mr. Turnerelli described Kazan and the course of life there, he spoke with the authority of a sixteen years' experience. But when he attempts to speak authoritatively of the late Czar, of whom he knew nothing more than any other man who looked at that potentate from a very respectful distance, he is guilty of a very reprehensible presumption. The intimate life, opinions and principles of the Czar are known to the people of England through Sir Hamilton Seymour. Previous to the revelations made by that diplomatist, we had been inclined to think that the heroic principle was not wanting in the character of Nicholas; but from the very words of the latter we were reluctantly compelled to believe, or to be convinced rather, that the hero "of more than human beauty and majesty," as Mr. Turnerelli describes him, could stoop to mendacity and condescend to grand larceny for the furtherance of his evil ends.

In another sense Mr. Turnerelli's book is not only presumptuous, but impertinent. He appears to think that Englishmen are incapable of doing justice to the virtues of an enemy, whereas no people are so ready as the English to respect a gallant foe. Mr. Turnerelli almost weeps to think of the alleged bitter things that have been said, since the opening of the war with Russia. But the most bitter thing ever said of Russia was expressed by the late Czar himself, when he issued his famous command for-

bidding Russian officers to massacre their wounded and helpless foemen on the field. Mr. Turnerelli may depend upon it that the individuals whose atrocity renders such an order necessary belong to a nation less civilized than the author's imaginary Russia.

But whatever the people, the Czar was irproachable; his sense of justice, and his practice of it, are, above all, favourite themes with the author. We are quite mistaken in our suspicion that the greatness of Nicholas was of a Jonathan Wild cast. "*Parole de gentilhomme!*" he never had a felonious intention; he was all virtue. Such, substantially, is the assertion of Mr. Turnerelli; and this is the evidence by which he proves what he asserts. In search of it we have examined every page, and we omit nothing to the alleged credit of Nicholas which forms any part of the author's deposition.

The Czar was distinguished for superhuman beauty; "he has been known to reach Moscow from St. Petersburg, fifteen hours sooner than ever that journey was performed by living man;" and he gave directions when the author, through his own folly, was very nearly being drowned in the Neva, whereby the latter was saved from a watery grave. It was very proper that Mr. Turnerelli should be grateful; but when he "trusts that his countrymen, when they hear of this action, will share, in some degree, the deep gratitude which he himself feels," we think that the author demands a little more than is necessary. As Mr. Turnerelli tells the tale, Nicholas could not have laid claim even to a Humane Society's medal.

And see how difficult it is to write history. Lieutenant Royer, of opera-glass notoriety, speaks of the remarkably "mild eyes" of the late Czar. Mr. Turnerelli describes them as so "terrible" that with a glance from them Nicholas frightened a Swedish Admiral into the Russian service, and so terrified a poor fellow who had strolled across his path in the Imperial Park, that the intruder was stricken with brain fever, and lost the hand of the lady he loved.

In the succeeding pages we find the Czar represented as an early riser, wonderfully industrious, domestic in his pursuits, but with a weakness for masquerades. For the practice of virtue Mr. Turnerelli puts his hero on a level with Joseph Andrews. But he cannot be mistaken. He knows the man as well as he knows the history of Russia; and when we add that he gravely tells us that after the death of Alexander, Constantine assumed the reins of government, but, "it seems, found the throne of the Czsars one which promised him neither rest nor safety," our readers may judge how intimately Mr. Turnerelli is acquainted with the history in question.

Of the hypocrisy of Nicholas to Constantine the author says not a word. Whenever the evidence against his hero is damning, he treats the matter as a political question, and will have nothing to do with it. He makes one exception even to this rule. The rage with which the Czar flung to death the men who attempted to oppose his accession to the throne, was never exceeded by the worst of the Imperial assassins of Rome. But Mr. Turnerelli applauds the murderous act. "I am not of those," he says, "who suppose his sentence cruel or unnecessary."

Of the personal courage of the Czar no man ever entertained a doubt, and when Mr. Turnerelli says he "cannot see what Englishmen can possibly gain at the present moment by thinking him the contrary," he is either very ignorant, or, as we have said before, very impertinent. No Englishman denies the Czar's physical courage, or esteems at less than its value that of the army which he sent into the

field to despoil neighbouring nations and to menace European liberty.

The chapter on the Czar's justice is intended as the apotheosis of Mr. Turnerelli's hero. Very illustrative indeed are the examples given. A General very savagely assaults an English farrier. The Czar hears of the affair, and shows his justice by immediately reducing the princely offender to the condition of a private soldier. A Russian tradesman insulted a French customer. The Czar again hears of the complaint laid against the Muscovite, and he satisfies justice by tearing the latter from his family and sending him to fight in the Crimea. Mr. Turnerelli has lived so long in Russia that these crimes assume in his eyes the shape of the justice which they affect to be. So the author detests the aroma of a cigar: the Czar equally detested the odour of the weed, and, because he disliked it, would not allow any one, under severe penalties, to smoke in the streets of the capital. Mr. Turnerelli thinks he did well, and regrets that as he walks our streets he cannot give all smokers whom he encounters into the charge of a policeman.

When the author has the Czar in the streets he makes of him a solemn actor or a terrific mountebank, resembling some of those half-mad Greek Emperors who were for ever committing all sorts of absurdities in the public highways. We can say, for our parts, that we have no wish to caricature the Czar nor to see him caricatured, and we should be sorry to believe that he was half so bad as Mr. Turnerelli has unconsciously described him to be. Indeed, we may say it at once, we have no faith whatever in this author's assertions. We speak by the card, and not without authority. A brief example will show how the inconsistency of the writer renders his evidence worthless.—

"God defend the poor foreigners resident in St. Petersburg, (I say it from experience,) should the authority, even for a day, ever get into the hands of a Russian mob—not one man, woman, or child, would escape; all would be massacred, as every foreigner who has lived in that capital will tell you. Should ever a popular revolution be successful in Russia, be sure the horrors of the French Revolution would be nothing to those which would characterise the Muscovite."

This we find written at page 33: fifty pages later we find the author quite as oracularly declaring that "a foreigner's position in Russia is better and safer than is generally imagined."

Will it be credited that the writer of these contradictory accounts has the assurance to sneer at authors who study the history of Russia in public documents and records in national libraries? Yet such is the case, and the contempt is expressed, as the volume is generally written, in very slipshod English. We should add, that Mr. Turnerelli is extremely angry that Russia, whose soldiers fire upon shipwrecked sailors as they struggle with the waves, and whose officers have been stigmatized by the command to refrain from slaying the wounded foe, should be spoken of as a barbarous nation. What does he himself make of it in the above extract? And if we believe that extract rather than the sentence in which he vouches for the security of foreigners in Russia, it is because we have ground for doing so, in the recent intimation made to the few French and English residents left in St. Petersburg, that the Government will not be responsible for their lives if they go outside the walls of the city.

Of the morality of the late Czar, Mr. Turnerelli does not vouchsafe to say a great deal, and considering that he knows as much about it as he appears to have done of other matters upon which he speaks with a most offensive assumption of authority, or an equally offensive affect-

tation of humility, we have great cause to be thankful. We will add our belief, that Nicholas was, if not irreproachable on this head, at least better than many of his predecessors. But morality is a word of great latitude of meaning; and we confess that when we saw the Emperor some years ago in the public rooms at Ems, looking on at the gaming-table, not indeed playing himself, but standing by and smiling at the frantic play carried on by the present Emperor and a half-dozen of aides-de-camp, who won and lost large sums with a variously contrasted excitement, we could not help thinking that the "Jupiter" of the Russians was but a "Jupiter Scapin" after all.

Of the present autocrat the author draws a mild and pleasing portrait. He appears to be an amiable man, with no desire of his own to deliver the world to fire and sword; but unfortunately the Czars, despots as they are, are also slaves of a system, before which they must move or be crushed. The more dangerous man is the next and rather ill-favoured brother of the reigning sovereign. Mr. Turnerelli describes him as highly intellectual and highly ambitious. He is a good linguist, and speaks Turkish as fluently as any Osmanli. He is High Admiral of the Russian navy, and "once arrived with his squadron before Helsingfors," but it was not when Sir Charles Napier and his gallant ally were there with a few ships of their squadron longing to meet him.—

"From what I know of the Grand Duke, and of his character, I feel thoroughly convinced that he is yet destined to play a prominent part, both in Russia and in Europe. He is not only a man of immense talent, but he is a man of genius, and depend upon it, the world will yet hear of him more than they have hitherto done. God grant that it may be in a way that will diminish the ills of humanity, not increase them."

Our readers will now have a tolerable idea of Mr. Turnerelli's ill-written and most absurd book. It is damaging to the personage whom it intended to flatter, and like a witness who proves too much, establishes nothing beyond the worthlessness of the evidence offered.

OUR LIBRARY TABLE.

My Own Garden. By Mrs. London. (Kirby & Son).—When Nature is putting forth flowers and buds, when in-door life becomes, all at once, distasteful to us (ungrateful as we are!), when those who are fortunate enough to have gardens begin to arrange their summer improvements, Mrs. London very kindly and opportunely comes to the aid of suburban dwellers. In her pleasant little volume we have ample directions, with figures for laying out our grounds; and it appears so pretty on paper, and so easily done, that we have misgivings about gardeners with their old saws and antiquated experience. Here are instructions for sowing, transplanting, cutting, thinning, watering all sorts of plants, with plates of the flowers of each season. Then we have the homely language so prized by the younger race of gardeners, who detest Latin and love the flower-words of Shakespeare and Spenser, and the botanical names for those clever people, in their teens, who feel disposed to air their knowledge. Such a little volume is a pleasant companion, and will make a very pretty and useful present.

The Moslem and the Christian; or, Adventures in the East. By Sadyk Pasha. Translated and revised by Col. Lach Szyrna. 3 vols. (Hurst & Blackett).—This is a spirited and interesting novel for all readers who can carry their sympathies so far away, to places and people with names so full of syllables and consonants as to appear unpronounceable to English tongues. The work bears the unmistakable impress of being written under entirely different conditions of sympathy and opinion from those which prevail amongst us. It is a tale of wild Oriental life, of love and murder, brigandage and lawful war; a mixture of the *Bride of Abydos* and

the *Arabian Nights*. It must be judged entirely by the light of its own opinions, for the code of morals is so entirely different from all European notions of right and wrong that an English reader will be confused to know which are the heroes and which are the villains. Kudjali, the chief character, is a dashing, high-spirited fellow, and, if we are to believe the notes, was a real personage, whose genuine deeds of daring far exceeded all that are attributed to him in this romance. The description of the manners and condition of the inhabitants of the Danubian Principalities is interesting, and has all the look of being written upon the spot. The interest of this book lies in its strong individuality. That which will tell against its popularity will be, that it concerns things and persons with which English readers have little in common. It is well edited and prepared for the press, and is extremely well translated.

The Statistical Register of Victoria, from the Foundation of the Colony: with an Astronomical Calendar for 1855. Edited by W. A. Archer. (Melbourne, Feres).—Mr. Archer may claim the merit of having collected a body of valuable materials for the historian of Australia. His volume contains a Register of statistical details connected with the legislation, the administration, the population, the climate, the health, the religious communities, the commerce, products, and public economy of Victoria. These subjects he has arranged upon a simple plan, intending that the work shall be extended into a series, and record from time to time the general progress of the colony. For the use of residents he has appended an almanac and rural calendar. From this we glean some interesting particulars on the climate in that part of the Antipodes. January in Victoria corresponds with July in England, being one of the hottest months of the South Australian year. May is the month of the north wind,—showery, cool, and liable to storms and lightning. In June, fog, frost, and rain visit the colony; but the changes of atmosphere are rapid and violent, so that the seasons are by no means those of Great Britain reversed. In December, for instance, a hot blast, laden with dust, has half stifled the people of Melbourne, who have panted with the mercury at 110° in the shade, while a few days afterwards artificial warmth has been necessary to protect them from sharp and chilling breezes, blowing from the Pole. Mr. Archer, in his *Rural Calendar*, describes the agricultural products and processes of the colony, with its vegetables, flowers, and fruit. The population of Victoria is stated to have been 77,345 in 1851. Ten years ago it was less than 12,000. The ratio of increase has been greater among the female inhabitants. In 1841, there were 239 men for every 100 women; at present the proportion is 148 to 100. Mr. Archer's tables show constant and encouraging progress in the civil and social condition of Victoria. His labours will, doubtless, be appreciated in the colony; while they will enable persons intending to emigrate from England to calculate their chances of success in that gold-bearing province, where an empire has already been planted.

The Works of Virgil, closely rendered into English Rhythm, and illustrated from British Poets of the Sixteenth, Seventeenth, and Eighteenth Centuries. By the Rev. R. C. Singleton, M.A. 2 vols. (Bell & Daldy).—In the course of his desultory and unusually extended preface, Mr. Singleton states the object of his work to be, to furnish tutors with the model of such a translation of the ancient poets as they ought to require from their pupils. He thinks the ordinary school renderings of these authors far too deficient in poetic expression. At the same time, he objects to all the poetical versions that have been made, as wanting in fidelity to the original,—some things being omitted and others introduced, merely to suit the translator's convenience. He aims at adhering to the original, not merely in the sense, but even in the order of the words, and to be poetical in his phraseology, rhythmical in arrangement, and Saxon in his style. That he follows his author with scrupulous care we are quite willing to allow; nor are we disposed to deny that he has

accomplished his other objects with more or less success: but we still contend that his version cannot be accepted as at all a worthy representation of the original. It is totally deficient in that finished elegance and flowing smoothness for which Virgil is so remarkable. It is neither prose nor verse, but a hybrid combination of the qualities of both, too stiff and artificial for the one, and too bald and limping for the other. Mr. Singleton carries his fondness for Saxon words to excess, using antiquated expressions more frequently than was at all necessary or desirable. Had he confined himself to giving an accurate prose version in poetical language, without any attempt to adhere to the order of the Latin or to secure rhythmical arrangement, he would no doubt have produced a more serviceable work. The most valuable part of his production are the illustrations from British poets.

The Lamp of Love. 2nd Series. By Christian Henry Bateman. (Edinburgh, Gale & Inglis; London, Houlston & Stoneman).—The 'Lamp' is freighted and lighted with a collection of simple tales, music, and poetry, varied by short sketches of the lives of great and good men, such as Oberlin, Penn, Luther, Brindle, Linnaeus, and Franklin. The sketches are written easily and touchingly, so as to engage the attention and afford matter for reflection to the youthful reader. There are also several papers, entitled 'Glimpses of God in Nature,' in which Mr. Bateman explains the motion of the earth, the effect which the seasons produce upon plants, birds, and insects, the instincts and habits of birds, silkworms, bees, and gnats; also the motion of the sea and air, all of which will be found interesting to nursery students. This is just the kind of book that a careful parent would desire to see his children amused with; for the biographical parts will lead them to try to become like "Aunt Margaret's Heroes," and improve their tempers at the same time that they improve their minds.

Woodleigh; or, Life and Death. By the Rev. George Trigwell, B.A. (J. H. Parker).—A simple tale is here naturally told; but we confess to some disappointment, as title and preface led us to expect something more than a tract. The fault of 'Woodleigh' is that it is too short,—can the author hope for a greater compliment? With the incidents he had to work with, we think he might easily have given the characters more of detail; by so doing, he might have avoided the abrupt terminations of his chapters.

Mary Beever; or, the Housemaid's Wedding. By the late J. W. (Parker).—There is in this sermon on temperance a grave illustration of the downward course of a man who is too easy to say "No" to an invitation to the alehouse; who has not moral resolve sufficient to abstain from the fatal "one glass too much." Although there is nothing in the tale that has not been told in substance a thousand times, there are so much earnestness and so much simplicity in the style that it will be acceptable on account of its truthfulness. Some sensible remarks are interspersed on the readiness with which girls enter the married state, regardless of the character, habits and associations of the man whom they choose for partners on life's journey. It is a lamentable fact, that a woman who will scrutinize closely the habits of a "maid," and the style of a milliner, will give a husband power to make her happy or wretched with scarcely a thought.

A Refutation recently discovered of Spinoza by Leibnitz: with an Introduction by Count A. Foucher de Careil. Translated by the Rev. O. F. Owen. (Edinburgh, Constable & Co.).—That Leibnitz admitted the doctrines of Spinoza is an opinion held by one sect of critics in Germany; while by another school it is strenuously denied. The connexion between the German and the Dutch philosopher seems involved in some obscurity; but a comparative analysis of their works supplies the only test by which the affinity or opposition of their ideas can be decided. M. de Careil examines a criticism of Leibnitz on the system of Spinoza, and adds the work itself, from a manuscript in the Royal Library at Hanover. His own commentary, however, fills the greater portion of the volume,—

the contents of which, we imagine, will not excite much interest out of Germany. Its object is to settle the dispute by showing that Leibnitz was in no degree a Spinozist,—and the essay contains indubitable proofs that, if there were points of union in their creeds, there were also material points of difference. However, the inquiry is too vague in its scope and too technical in its details to be accepted for general discussion. M. de Careil exhibits considerable knowledge of the opinions of the modern thinkers; but the Rev. Mr. Owen is at once lost in a wild maze of words:—"You may procure from many the varied elements which are contained in one, and perhaps each, severally, in greater strength, but the combination of the whole, once destroyed, is irrevocable. The present is the prolific day of little minds, when a myriad of Lilliputian statesmen [we disparage the word], generals, pseudo-scholars, novelists, philosophers, struggle to exhibit a questionable equilibrium against the 'great of old,' the Gullivers of a former age." Helvetius would say of this, that it proved the author possessed more intelligence than his readers, for he might understand it, and certainly they could not.

The History of the Chartist Movement, from its Commencement down to the Present Time. By R. G. Gammage. Part IV. (Holyoake.)—Several pages of this fourth part of Mr. Gammage's narrative are filled by an uncriticized list of persons condemned to fine and imprisonment for their share in the "Chartist agitation." On all such topics the writer preserves the impartial and temperate tone already noticed and praised by the *Athenæum*. We must, however, direct his attention to two points,—of some importance in a work which future historians of the period are bound to consult. He begins to sin a little on the side of exaggeration when such a phrase as "vast intellect"—applied to a favourite politician—finds a place in his repertory. Also, it were unwise to omit, in the forthcoming Appendix, references to the authorities on which some of Mr. Gammage's statements are based. We have full faith in the integrity of his relation; but scepticism is the proper condition of an historian's mind, and it is unfortunate, when a political story is told for the first time, that any link of evidence should disappear. This loose manner of recording events almost contemporary may suit those who read only to help their memories; but must produce uncertainty and confusion at a more distant period. To these remarks we should add, that Mr. Gammage's book continues to deserve credit for its intelligent spirit, and for the liberality of its views.

Tonga and the Friendly Islands; with a Sketch of their Mission History. Written for Young People, by Sarah S. Farmer. (Hamilton & Co.)—Tonga is in a flourishing condition. It has a dynasty of Georges,—it enjoys peace,—and the cocoa-nuts thrive. However, it has not long been among the halcyon isles. Within the last thirty years two terrible wars have raged over its surface and through the Friendly group. The way in which state affairs are conducted in that quarter of the Pacific resembles the practice of a sharpshooter up to his neck in a muddy hole. A few warriors take up a good position in a forest, and when a man or woman passes by rush out with axes, and cut the helpless wretch to atoms. This, at least, is the hereditary mode in Tonga; but latterly, armed parties have taken the field, and timber citadels have been besieged. Nor is a fortress of Tonga to be despised. There was lately one at the Beas nearly a mile in circumference, with a wall more than twenty feet high and several feet in thickness, formed of the butts of cocoa-palms, planted upright and braced together. Above this rampart was a bamboo screen, to serve the purpose of a boarding-net, and outside was a moat forty feet wide. Loopholes at intervals were prepared for the garrison to point their guns through against their enemies. In the erection of this stronghold, a sturdy English armorer took an active part. When it is added, that the late King George of Tonga had an ally, with the name and title of King Josiah, and that he was Pope as well as Prince, and delivered sermons in his chapel as well as decrees in his palace, it will

appear the more wonderful that a "tempest," which had been brewed in the Pacific, "burst over the island" a few years ago, without alarming and disturbing Europe. We prefer King George's civil wisdom to his military feats. Being an absolute monarch, he does not legislate, but proclaim; though he upholds the establishments of his ancestor. The maxim of the Tonga autocracy is this:—"In case of a pig being found eating the yams, the owner of the pig shall be apprised directly of it, that he may shut his pig up." Women, it seems, wear, in the Friendly group, "the lyre and laurel of triumphant song"; for Jochobod Fehiah, by profession a hairdresser, is the Sappho of those Southern isles. Miss Farmer's description of the place and people is agreeably written; though it adds little to our knowledge. We should have liked a more practical account of progress during the last thirty years. As it is, Mariner's narrative—graphic, simple, and picturesque—remains the best and most entertaining book on the Tonga Islands.

The Physical Geography of the Sea. By M. F. Maury. (Low & Co.)—This is a reprint of that portion of Lieut. Maury's 'Sailing Directions,' treating of the physical geography of the sea, reviewed *Athen.* No. 1410. The present publication is printed in a compendious form, and contains all the illustrative charts and diagrams attached to the larger work. It is dedicated to Lord Wrottesley, P.R.S.

The English Bible: containing the Old and New Testaments according to the Authorized Version, newly divided into Paragraphs, with concise Introductions to the several Books, and with Maps and Notes illustrative of the Chronology, History, and Geography of the Holy Scriptures; containing, also, the most remarkable Variations of the Ancient Versions, and the chief Results of Modern Criticism. Parts I. to IV. (Blackader.)—Such a title-page saves us the necessity of description. The design of the editor is praiseworthy, and is carried out with great care. We could have wished that he had dealt a little more boldly with the Authorized Version; but the printing the prose portion of the text in paragraphs, and the poetical books rhythmically on the system of poetical parallelism, are great improvements, although not novelties; and the marginal notes—most of them condensed from 'The Pictorial Bible' and other works of Dr. Kitto—are useful and instructive. The Notes at the end of Genesis show extensive reading and a power of critical appreciation. The work will be a valuable addition to the Biblical library.

The Recruit: a Tale of the Present War. (J. H. Parker), contains original sketches of the campaign in the Crimea. Its hero is a soldier in the British army, whose adventures, suggestive of reality, are related in a picturesque and feeling style. A good deal of movement is thrown into the account of the conflict on the Alma—a tale oft told already, but not yet wearisome to English readers, who love that thrill of the heart which is only felt when we hear of the battle and the victory, fought and won by men whom we saw ere they left, and whom we may welcome when they return. History cannot charm its heroes into life;—we quickly turn from the Spartan shield,—from the Roman pike,—from the cross-bow of Cressy,—from the culverins on Marston Moor,—from the arrows of the Tyrol,—to the lances and guns of our living legions in the East. The sentiment of the war has been caught by the author of 'The Recruit,' who has a plain, but touching, story to narrate, and who narrates it well.—Miss E. Brabazon, in *Home Happiness; or, Three Weeks in Snow*, has edification, as well as entertainment, for her readers. There is no want of diversity among her snow-drops, for they range from plaster of Paris to cinnamon oil,—from Aristotle to elephant hunts,—from the plagues of Egypt to the prophecies of our own day. In fact, she makes up a pleasant party, shut in by winter, who play a game of intellectual cross-questions. It is praise enough to add, that many a young Crichton, forced into three weeks' seclusion by sleet and thaw, might pass the days pleasantly, conning over Miss Brabazon's sketches of 'Home Happiness.'—To a less precocious generation is addressed *Bird and Blossoms; or, Light Wing and*

Bright Eye. It is a charming little fable—a fable of the golden age, when larks and throstles engaged in moral dialectics; but its grace consists in the gay, natural, child-like tone of narration, and in the pretty moral so prettily suggested.

Recent events having awakened a special interest in the Circassian tribes, we are not surprised at the publication of a Dictionary to assist Europeans in acquiring some knowledge of their language, which has claims of its own to attentive consideration. The work to which we allude is entitled *A Dictionary of the Circassian Language: in Two Parts: English, Circassian, Turkish—and Circassian, English, Turkish*, by Dr. L. Løwe. It gives as good an idea of the difficult pronunciation as can be conveyed by written signs, and is founded upon the author's personal intercourse with the Circassians.—Mr. Lund has completed his work on Geometry and Mensuration by publishing the second part, called *Geometry as an Art*. Both parts ought to be widely circulated, especially among National and British Schools.—We have received another of Mr. Parker's classical texts for the use of schools. It is, *The Satires of Horace, with Short English Notes*, and, like those that have preceded it, has the recommendation of being at once moderate in price and good in character.—The same may be said of Mr. Parker's *Short Notes to the Seven Plays of Æschylus*.—A little bit of a tract, called *Poor Letter R, its Use and Abuse*, by R. R. Rogers, was not worth publishing.—In these days of multiplied intercommunication with foreign nations Marcus's *Conversation-Guide; or, Useful and Familiar Dialogues in the English, French, German, Russian, Polish and Swedish Languages* may be found a serviceable companion.—A new pocket edition of *Walker's Pronouncing Dictionary* has been prepared by Dr. Nuttall, with all the most recent words inserted, and a good deal of useful matter on grammar, pronunciation, and other correlative subjects. We scarcely understand what the editor means by accenting several syllables of a word in the same way, a striking instance of which is the word *federary*, accented on every syllable except the last. Still less can we explain the strange blunder of placing the opening of the Great Exhibition *after* the election of the Emperor of the French in the Chronological Table, and affixing 1852 as the date of the memorable event in Hyde Park.—A new edition of *The Geography of the Globe*, by J. O. Butler, has appeared, with corrections and improvements up to the present time.—A *School Compendium of Natural and Experimental Philosophy*, by R. G. Parker, A.M., seems to be a reprint of an American work by the Author of the well-known 'Progressive Exercises in English Composition.' It is stated to have been "corrected, enlarged and improved"; but is still not without errors and room for improvement in other respects. This is the more to be regretted as the substance of the book possesses sterling value.

LIST OF NEW BOOKS.

- Arnold's (Rev. T. K.) Latin Word-Book, 12mo. 4s. 6d. cl.
 Beasley's Pocket Formulary of Pharmacy, 6th edit. 6s. cl.
 Berens's (Rev. E.) History of the Prayer-Book, new edit. 12mo. 3s.
 Burnham's (G. P.) History of the Hen Fever, post 8vo. 6s. cl.
 Chalmers's Select Works, ed. by Hanna, 7th half-vol. 2s. 6d. swd.
 Cruchley's Picture of London, new ed. 1855, 2s. 6d.; with Map, 4s.
 Curling's (H.) Recollections of the Misses Table, post 8vo. 7s. 6d. cl.
 Cyclopædia of Universal History, ed. by M. Burney & Neil, 10s. 6d.
 De Porquet's Abrégé de l'Histoire de France, 6me edit. 3s. 6d. cl.
 Ency. Met. Occult Sciences, by Smedley, &c., post 8vo. 6s. cl.
 Goodwin's (Rev. H.) Parish Sermons, 2nd Series, 2nd ed. 12mo. 6s.
 Hughes's (Rev. T. S.) History of England, 1760 to 1837, new edit. with Memoir, 7 vols. 8vo. 73s. 6d.
 Jerrold's (W. B.) Story of the Legion of Honour, 8vo. 1s. bds.
 Jones's (L.) Liturgical Class-Book, 12mo. 1s. 6d. cl.
 Jones's Principles and Practice of Ophthalmic Medicine, 12s. 6d.
 Kitty Brown beginning to Think, 18mo. 1s. 6d.
 Liebig's (J. V.) Principles of Agricultural Chemistry, 12mo. 3s. 6d.
 Life and Beauties of Fanny Fern, 8vo. 1s. bds.
 Living for Appearances, a Tale, by the Brothers Mayhew, 1s. 6d.
 New Latin Reading Book, 2nd edit. 12mo. 2s. 6d. cl.
 Nyren's Cricketer's Guide, new edit. 1855, 18mo. 1s. 6d. cl. swd.
 Parisian Etiquette, trans. from the French, 8vo. 1s. swd.
 Pictorial History of England, new edit. Vol. 1, imp. 8vo. 15s. cl.
 Plague-Gratules of the Metropolis, 8vo. 1s. 6d.
 Prideaux's Guide to Duties of Churchwardens, 7th edit. 6s. bds.
 Readings for Sundays, &c. of Christian Year, 4 vols. 8vo. 18s. cl.
 Reed's (H.) Lectures on English Literature, 12mo. 6s. 6d. cl.
 Salme's Notes on Duels and Duelling, new edit. post 8vo. 7s. 6d.
 Secret Marriage, by Miss P. Williams, 3 vols. post 8vo. 31s. 6d. cl.
 Spectator, new edit. 4 vols. 12mo. 3s. each, cl.
 Spellen's Vestry Clerk and Parish Lawyer, new edit. 12mo. 3s. 6d.
 Spencer (Dra.) A Pastor's Sketches, edit. by James, 8vo. 3s. 6d.
 Turbuck's Popular Account of Styles of Architecture, 8vo. 1s. 6d.
 Taylor's (W. E.) Geography: its Facts and its Fictions, 8vo. 5s. cl.
 Virgil, Part I., by Rushton and Young, 1s. (Weale's Class. Series.)
 Widow's Rescue, a Tale, 8vo. 5s. cl.
 Williams's Sermons on the Epistles and Gospels, Vol. 3, 5s. 6d. cl.
 Wood's Treatise on Practice of Medicine, 4th edit. 2 vols. 36s. cl.

PICTORIAL COPY-RIGHT AND COPY-WRONG.

THE state of our laws of Artistic Copyright is absolutely disgraceful; and the more so as they are calculated to raise serious and just grounds of complaint on the part of Foreign Governments with which Her Majesty has entered into conventions under our International Copyright Acts. I will, therefore, with your permission, very briefly state the British laws of Artistic Copyright; the origin of the Acts of Parliament in force on the subject; and their chief defects.

The laws which relate to British Artistic Copyright are composed of the common law of England and the statute law. The common law only protects such works as have *not* been exhibited, or otherwise published, with the consent of the artist or proprietor;—and the statute law only relates to, and protects, those works which have been engraved and published in strict accordance with the legislative conditions as to the name of the proprietor and date of publication being engraved on the plate, and appearing *upon every print taken therefrom*. Thus, where a person has drawn, painted, or engraved a subject, kept it in his own possession, and not exhibited or in any other way produced it to the public, no one, by the common law, can lawfully copy it without his consent; but where it has been made public with his consent, then his common law right ceases.

This common law right in favour of unpublished works was the only protection the authors of them enjoyed down to the reign of George the Second, when Hogarth's genius enabled him to lay the foundation of the present school of British Art. In his time there were no Exhibitions, and he was the engraver of his own pictures; the sale of copies of his engravings being not only a source of emolument to him, but also serving the additional purpose of spreading his fame as a painter. His engravings were pirated after they were published; and the common law affording him no remedy by which he could punish the harpies who preyed upon him, he had the courage, almost at his sole expense and by his own exertions and influence, to obtain an Act of Parliament "for the encouragement of the arts of designing and engraving," &c. This Act was passed in 1735, and Hogarth recorded the facts I have stated respecting it by a small plate which he engraved. In consequence of Hogarth's Act proving too limited in its operation, as it only contemplated cases such as his own, where the painter or designer was also his own engraver, it was amended by another Act in 1767. This was followed by a further amendment in 1777, which chiefly consisted in subjecting a pirate to double costs in an action against him for piracy of the copyright in an engraving. All these Acts only apply to works engraved, &c. in England or Scotland, and, consequently, down to the year 1836 any engraving which was then the subject of copyright under them could be, and was, pirated in Ireland with perfect impunity. In that year the Acts I have mentioned were for the first time extended to Ireland; but not to the Isle of Man, the Channel Islands, or our Colonies, where the proprietors of Artistic Copyright, both British and International, still remain without the slightest protection against the piracy of their works! In the Act of 1852, which was passed to ratify Her Majesty's convention with France on the subject of International Copyright, the four existing British Engraving Acts were declared "to include prints taken by lithography or any other mechanical process by which *prints or impressions* of drawings or designs are capable of being multiplied indefinitely." These five Acts of Parliament, called "the Engraving Copyright Acts," form the sole, meagre, and most imperfect protection to which, by the laws of England, British painters or engravers are entitled in respect of their published works. Three equally imperfect Acts exist on the subject of copyright in Sculpture; and this group of eight Acts, therefore, now forms the whole statute law of British Artistic Copyright. I will not trespass on your space by entering into any description of the valuable rights of British subjects in Prussia, France, and the various other States with which Her Majesty has entered into conventions under the *International*

Copyright Acts. Confining my observations to Artistic Copyright as provided for by the Engraving Acts, it must be observed that the professed objects of those Acts were to encourage the arts of designing and engraving (but the former only as accessory to the latter), and to enable designers and engravers upon the performance of certain conditions to acquire a copyright in their works from the day of their publication; after which, as before mentioned, they are no longer entitled to any protection by the common law. It is, therefore, a popular error to suppose that by our laws any copyright can be acquired in a picture, even for the purposes of engraving, unless such picture, prior to its being exhibited, has been engraved, and the print from the engraving published in strict accordance with the conditions imposed by the statute law.

I will now very shortly state a few of the leading defects of the Engraving Copyright Acts.—1. They extend only to Great Britain and Ireland, and not to the British dominions generally. 2. They afford the painter of a picture no protection against the piracy of his picture as such; nor even as a design for an engraving, unless it be engraved, and the engraving be published with certain formalities before the picture is exhibited. 3. No registration of artistic copyright exists, except as to the works of aliens under the International Copyright Acts. 4. If the registration of British artistic copyright existed, then such copyright might be assigned by entry in the register, instead of the present cumbrous and expensive mode of assignment by deed. And lastly, the want of a cheap and efficient remedy in cases of piracy. These are pointed out merely as some of the leading defects in the existing legislation upon artistic copyright; and it may be said that most of them equally apply to the Sculpture Copyright Acts, as well as to those on the subject of Engraving. The numerous minor and other defects I will now pass over without notice, as it may, perhaps, be considered that enough has been already stated to prove the lamentable condition of the existing laws of British Artistic Copyright.

One word as to the Royal Academy. Might not the number of its members, and the usefulness of that Society, be now largely extended with great benefit to the best interests of Art and artists? To do so would only be carrying out the intentions of its royal founder, King George the Third, who is said to have taken so deep an interest in its objects that he actually prepared the rules for its formation and government with his own hand;—certain it is, that one of those rules expressly stipulated that, after a certain sum (20,000*l.* I believe) had been accumulated for the benefit of the Academy, its future income was to be applied to the promotion of the general purposes of Art (see abstract of the laws, &c. of the Royal Academy published in 1797). From the commencement of this Society to the present time, it has also, by the Royal favour, enjoyed the gratuitous use of a suite of rooms forming part of the national property. It therefore seems clear, that the object of the Crown in founding and fostering the Royal Academy was not alone to benefit a select body of artists, self-elected, but to promote the general prosperity of British Art and its professors;—in short, that the Royal Academy from its foundation has been, and still is, a *public* Institution, if the intentions of its founders be respected, although legally it is only a private society.

The remedy I would suggest as the most efficient to expose and reform the mischiefs attendant upon the present state of our Artistic Copyright laws, and of the Royal Academy, is, that a Select Committee of the House of Commons should be appointed to inquire into the state of those laws; also as to the intentions of the Crown in founding the Royal Academy, as appears from the Rules, &c., under which it was founded; and whether, having regard to those intentions, any and what extension of the number of its Members and means of usefulness should be made for promoting the interests of Art and artists. This suggestion of a Select Committee being appointed to inquire into the subject of our Artistic Copyright laws emanates from, and has the sanction of, very high authority.

No one has perhaps ever understood all that relates to British copyright, both literary and artistic, better than the late Mr. Justice Talfourd; and in a letter now before me, written shortly before his death, in reference to the "grievous defects" of the statutes on Artistic Copyright, he mentions the interesting fact that, in the first Bill which he introduced into the House of Commons for amending the laws of copyright, he included a series of clauses as to artistic copyright, which were subsequently struck out by the advice of the late Sir Robert Peel, who thought the whole subject of artistic copyright ought to be investigated by a Select Committee. I know that the elevation of Mr. Justice Talfourd to the Bench alone prevented his moving for such Committee; the appointment of which, so far as regards our laws, has therefore the joint approval of two great men who were eminently qualified to form a correct judgment on the subject; but, in justice to them, I must add, that an extension of the inquiry with reference to the Royal Academy was not, so far as I am aware, contemplated either by Sir Robert Peel or Mr. Justice Talfourd. R.

April 9.

FOREIGN CORRESPONDENCE.

Naples, April 3.

OUR winter is nearly over, and with it will terminate our researches into many spots of antiquarian interest. The malaria fever is a terrible enemy to encounter,—nor would even the discovery of such a vase as that known here by the name of Darius compensate one for the aches and sufferings which that destructive malady inflicts. Now, then, is a good time to review what has been done during the season which is passing away; and I do not know that I can do better than throw my scattered information into the form of an antiquarian tour, which we shall do well to complete quickly, before the hot season comes in.

A glance at Cumæ will be necessary before we travel eastwards,—though I have scarcely a word to say for the City of the Sibyl. The Prince of Syracuse has terminated his excavations there for the present, having nearly exhausted the ground which was at his disposal. Much, however, remains to be done in land possessed by private individuals, and which His Royal Highness has been anxious to purchase, though unwilling to give the price demanded. I cannot forbear from expressing my regret that what was acquired here two years ago, with so much trouble and expense, and awakened so much European interest, should have been sold,—a portion to the Marquis Campana, the celebrated collector at Rome, and the rest to M. Fould, brother of the French Minister of Finance, it is supposed on account of the French Government. The beautiful fragments of the Temple of the Antonini, which ought never to have been removed from their original site, still remain behind the Palace of the Prince. So much for Cumæ; and now for a turn in Apulia. I have recently spoken of Canosa (Canusium), but since then other interesting details have come to my knowledge, which I must not omit to mention. The tomb which has most recently been brought to light has much of an Oriental character, as the doors narrow towards the top. The colour of the ground is of a dark red and blue. The chamber facing the entrance appears to have been devoted to the chief of the family, whilst the lateral ones were occupied by the women; and there, on beds of bronze, decorated with ivory statuettes and other ornaments, were found female skeletons. All that beauty, all that wealth ever gave could not save them from the universal lot. The ground was covered over with gold thread, which Signor Bonucci supposes to be the remains of a golden carpet or cloth; whilst round the walls were disposed more than forty vases, of various though graceful and elegant shapes. To these I have already alluded; but not to some *patere* of an enormous size, in which eggs and other eatables were found, as also the dregs of some liquids. In harmony with the idea that the deceased would resume the habits of this life in another world, the skeletons bear upon them the traces of the most magnificent

dressess. The principal female figure, for instance, was found with earrings representing two peacocks, not merely in shape but in every tint: the colour of the plumage being given by smalt upon gold. Golden bracelets of a serpent form surrounded dry bones, round which once beat the pulses of passion. Her vest must evidently have been embroidered, for garlands of myrtle, both the leaf and the berry, were found in gold, and all are clearly pierced with the holes by which they were once attached to the dress. Round the head was a diadem of various flowers, the cups of which were formed of rubies and jacinths and emeralds of great beauty, and sometimes of smalt of different colours. The beautiful ring which I described in my last I have since examined: it was found on one of the fingers of this female. The circle is formed of two clubs of Hercules, the point where they meet beneath being surmounted by a ruby; whilst on the upper and opposite part of the ring is a box, where might have been the hair of a lover or Persian perfumes: the cover is formed of a large emerald. The work is of the most delicate filagree, displaying a great variety of beautiful forms: in short, all regard it with astonishment, and doubt whether modern art could produce anything so perfect. "And when," said I to Signor Bonucci, "might this tomb have been closed upon its inmates?"—"Oh!" was the answer; "judging from the art, it might have been about the time of Alexander the Great, or, at all events, two thousand years ago."—"What a field for the play of the imagination! Two thousand years ago!" said I; "so large a period, that it seems to belong not to time but to eternity; and yet the art of the painter, and the potter, and the sculptor, and the architect of that time is brought before us as fresh as though it had been executed but yesterday; nay, more, the handiwork of the milliner and the upholsterer is shown to our wondering eyes; and, dressed in the habiliments of the drawing-room, the inmates of the tombs seem ready to receive us." I must not, however, linger longer on this spot, otherwise my imagination, instead of sober reason, will run off with me; but I must first repeat the expression of the universal hope that His Majesty will resume the excavations shortly after Easter. "*Inde Rubos fessi pervenimus*," says Horace, in his description of his journey to Brundisium; with him we have pursued our road from Canusium, and my readers will not object to travel in such good company. The modern *Ruvo*, for so now is called the ancient Rubi, has at various times been the scene of excavations, and some of the largest and most beautiful vases in the Museo-Borbonico were found there. His Majesty has recently granted permission to H.R.H. the Prince of Syracuse to excavate,—and, from all I hear, the works will be resumed there at no distant time. Perhaps, one of the best private collections of antiquities in Southern Italy has been formed at Ruvo, by Signor Presidente Salvatore Fenice. It is particularly rich in Greek vases, in scarabæi, coins, and glass. I may mention that Signor Fenice was one of the first to suggest a remedy for the grape malady in Apulia, where, in fact, the vintage last year was most successful. He asserts also that in the breath of cholera patients he discovered insects infinitesimally small, and believes that by means of these the disease was diffused. This, however, by the way. Leaving Apulia and coming nearer the capital, a new site of interest has been made known to us recently in Albanella, a small town of 1,500 inhabitants, in the Bishopric of Capaccio, from which it is distant about six miles, and is consequently not far from Pæstum. About four or five acres of ground, I am informed by one well able to give me intelligence, are covered with, or more properly cover, these tombs; and there cannot be fewer, says the same authority, than eighty tombs. Those which have been recently disinterred have been so by accident, whilst the proprietor, a Signor Albonio, was planting vines. Two of the tombs have no marked interest, except that on the walls of one of them is represented a combat of boxers, whilst opposite is a chariot. That one, however, which is the most interesting is small, and has no entrance gateway; on the long wall of the interior is painted a mortuary bed, whereon reposes a young and beautiful girl, with

her eyes closed. Behind her is a woman extending her arm over her stomach, whilst by her side is another woman in the act of dancing. Near the bed is a Faun, who plays the double pipe. Behind the bed is a woman, evidently in sorrow, with her hands crossed on her bosom,—and another, seated on a chair with a back to it, holds a crown in her hands. Opposite this wall are painted two combats,—one of gladiators, and another of boxers. On the short side of the funeral chamber is a figure on horseback; and on the other side a cock, the emblem of vigilance. Cushions worked in arabesque are painted above, and everything is executed in the style of the earliest Greek. In the interior of this tomb was found—wonder of wonders—a warrior, with the hair on his skull preserved, and with his body covered with his cuirass of bronze. This excavation took place twelve feet under ground, and was made so recently as the beginning of this year. Within the last six months nothing of importance has been discovered at Pæstum. Shortly before that an interesting tomb was brought to light by Signor Belella, but as it has been illustrated and fully described elsewhere, I shall not enlarge upon it.

Whilst it is the subject of congratulation to the artistic world that so much that is graceful and elegant has been recovered from the tomb, I cannot reflect without regret on the fact that so much has been discovered by pure accident, and that afterwards so much has been left to private enterprise. The daily labourer first broke into the interesting tombs recently discovered in Albanella and Pæstum. "We arrived in Canosa just in time to save something," says Signor Bonucci: "much had been carried off and dispersed." The beautiful vase of Darius,—the first historical vase ever discovered, and the most remarkable for its artistic merit,—he found in the hands of a private person broken into ten or twelve pieces: some fragments were wanting, and he had to open the tomb again, and almost sift the soil to find them. Happily he did so, and now this vase, carefully restored, stands the gem of this compartment of the Museum. I have myself seen the jaundiced and swollen inhabitants of Pæstum bring forth for sale antiques which they had broken into pieces, to multiply their paltry gains. Thus, through accident, ignorance, and neglect, how much has been lost or injured that can never be recovered or repaired; and how much has been scattered amongst the herd of mere curiosity hunters, who have neither taste to select, nor enthusiasm to preserve. Where, as in Magna Græcia, the whole soil teems with the riches of ancient Art, some association should be formed for the protection and preservation of what may, from time to time, be brought to light. I believe an order has been issued lately to order the Intendentes to order the Sott' Intendentes to order the Syndics to order proprietors of land when they find anything to communicate the notice of it to the Syndic, who must inform the Sott' Intendente, who must inform the Intendente, who must inform the Directors of the Museum of the fact. The links are so many that the vibration will scarcely reach the end. H.

OUR WEEKLY GOSSIP.

WE are able to state that Sir John Herschel's resignation of the Mastership of the Mint had no reference to political considerations, having been made, through Lord Aberdeen himself, in entire ignorance of the then impending break-up of the Ministry, and having reference only to his increasing ill-health and the laborious duties of his office. This announcement will be welcome to all those who share our desire to see this office finally detached from political parties: as it takes away from the "coincidence" on which we last week remarked every risk that attached to it of being converted into a precedent binding on the successors of Sir John Herschel.

Death has suddenly closed the career of a most useful public servant; and has left vacant some of the few offices by which the State recognizes and rewards scientific eminence. Sir Henry De la Beche died on Friday (yesterday) morning at ten o'clock. The intelligence reaches us just as we

are going to press. Our loss is great and sudden; but we can do no more to-day than make this sad announcement. Next week we may be able to render some account of the scientific work achieved by the deceased. Sir Henry was Director of the Geological Survey, Director of the Museum of Practical Geology, and Director of the Government School of Mines.

Eminent success has waited on the attempt to raise a Patriotic Fund by means of Art contributions. Pall Mall has been crowded daily,—and the little room on the south side, so well known as the home of the French Exhibition, has been far too narrow to receive its visitors. Ample space is also required for the pictures still pouring in, and Government has very properly offered Burlington House, in Piccadilly, to the Committee. More than eight hundred objects of Art have been received, and the fund already raised is considerable. The Queen has been a purchaser. Two hundred pounds are offered for the drawing of the Princess Royal, who is said to have timidly valued her work at a guinea! It will ultimately fall to the highest bidder. Where is that Prussian prince in whom it was said the days of chivalry were to live again? Will he suffer this prize to be carried away by other hands? or is he afraid to support—even in a way so indirect—the heroes of the Crimea?

M. Conscience, the Belgian novelist, whose works we had the pleasure of introducing to an English public a few years ago, is preparing an edition of his *Tales for the English market*, and of course in the English language. The series will commence with his most recent works, '*De Plaeg der Dorpen*,' '*The Village Scourge*,'—and '*Net Geluk van ryk te Zin*,' '*The Pleasures of Wealth*.' The first volume, we understand, will appear in a few weeks.

Manchester is to have a second Free Library and Museum, with a spacious reading room, in the Queen's Park. This park is at the opposite corner of Manchester to Camp Field, where the original Free Library stands. In time, there will, doubtless, be a Free Library in each of the public parks of that great city.

The sale of Lord Rutherford's library closed on Tuesday. There were altogether 2,573 lots, and the aggregate produce of the sale was about 7,000*l*.

On Thursday week Mr. Layard was installed into the office of Lord Rector of the University of Aberdeen.

We rejoice over the increasing prosperity and usefulness of the Booksellers' Provident Institution. Steady progress is shown in the yearly increasing income and outlay, and particularly in the amount of relief afforded. In 1840–1, the relief distributed was 110*l*.; in 1854 it amounted to 750*l*. The receipts for the past year, excluding balances, were 1,085*l*. The increase accruing from stock was 796*l*., which was invested in the purchase of further stock:—300*l*. were withdrawn. The total capital invested in stock on behalf of the Institution is 21,400*l*.

Among the amusing and instructive novelties prepared for holiday makers we must mention 'Sam Slick's Diorama,' at the Polytechnic Institution,—a 'Zoological Concert' and 'Love in all Shapes,' at Mr. Love's hall, in the Regent Gallery, —and the Model of Sevastopol, in Mr. Wyld's Great Globe. "Sam Slick" unrolls a beautiful picture of the Atlantic passage and of American cities and scenes, which he accompanies by a humorous comment. Under Mr. Pepper's spirited and intelligent direction, the Polytechnic Institution is growing daily more attractive. Mr. Love, the prince of ventriloquists, continues, in a new act, the exhibition of his marvellous powers of voice. The Model of Sevastopol, now coloured and improved, is assuredly at this moment one of the chief attractions of the metropolis. We have not yet, we think, announced the opening of Mr. Crawford's 'Scottish Entertainment,' in Regent Street.

At the conclusion of our review of Dr. Sprenker's 'Catalogue of the Lucknow Library,' in a late number of the *Athenæum*, we expressed some alarm at the circumstance of his having three unfinished works now in the press. "It may, perhaps,

relieve in some measure this not unnatural apprehension," says a Correspondent, "to learn that Dr. Sprenger, having been obliged to leave India, on account of his health, before completing the Lucknow Catalogue (which also, as you observe, was undertaken, by request, whilst engaged in his other works), he has taken advantage of this opportunity to visit Damascus, and inspect for himself some original sources of information relating to the life of Mohammed in some of the libraries there, pending access to which he had deferred the completion of that biography. There is good hope, therefore, that his present temporary removal from the cataloguing labours may afford him the means of successfully completing his more important work, and of returning in improved health to resume his excavations among the literary ruins of Lucknow."

Dr. Balfour writes:—

"I have just seen advertised in Hooker's *Journal of Botany*, and in the *Annals of Natural History* for April, among 'New Botanical Works,' 'Botanists' Vade-Mecum, containing Instructions for Classifying, Preserving, and Examining Plants, with Glossary, by Prof. Balfour and Dr. Williams.' Now I deem it right to say that I did not compile this work with Dr. Williams (whom I have not the pleasure of knowing), and that—unless so far as any information it contains may have been taken from eight or ten pages of the Appendix to the first edition of 'The Manual of Botany' compiled by me in 1848 and 1849, and the property of the publishers of the Vade-Mecum—I am not entitled to any of the merit or demerit which may attach to the work. In the same advertisement I observe 'The Manual of Botany' also noticed, third edition, revised and enlarged by Dr. Williams. I beg to state that I have had no connexion with any edition of this work except the first, published in 1849; and that the quotations appended to the advertisement of the third edition, from *Tait's Magazine* and the *Witness newspaper*, have reference to the first edition only. I am, &c., J. H. BALFOUR, M.D."

The election of a new Professor of Moral Philosophy, in the room of Dr. Whewell, at Cambridge, it is said, will take place on Tuesday, May 22.

On Wednesday last the Master and Wardens of the Apothecaries' Society gave their second microscopical *Soirée*. On this occasion there were assembled a more numerous company of microscopic observers than on the last. The visitors were received by the Master of the Company, Mr. N. B. Ward, who is known in scientific circles as one of the earliest cultivators of observation by the microscope. He is also popularly known as the inventor of the glazed cases in which plants can be grown in the smoky atmosphere of London, and the principle of which has been successfully applied in preserving living animals and plants in water, as carried out in the Zoological Society's Gardens, Regent's Park. The walls of the suite of rooms of the old Hall were decorated with enlarged drawings of microscopic objects, and upwards of a hundred microscopes were kept constantly at work by the interested company. The microscopes were arranged so as to afford an opportunity of observing objects from the mineral, vegetable, and animal kingdoms consecutively. Mr. Glashier exhibited a beautiful series of illustrations of snow crystals, which during the late severe winter fell of unusual magnificence and beauty. The Rev. J. B. Reade exhibited several interesting specimens in micro-chemistry, displaying under the microscope the progress of chemical change. Mr. Woodward contributed his beautiful polarizing apparatus, and showed its applications to practical microscopy. A number of marine polyps, brought from Dover, excited much interest. A series of objects illustrating the circulation in plants was also exhibited; and Mr. Wenham announced the discovery of cilia in the interior of the cells of those plants, thus explaining the cause of their remarkable movements. On the whole, this was one of the most successful scientific gatherings of the season.

We print the following, from the Author of the forthcoming 'Life of Nussir-u-deen,' in answer to Mr. Austin's protest. From information, privately supplied, we infer that the writer has original and ample materials for his work:—"Like most over-zealous advocates, Mr. Austin injures the cause he wishes to defend. Had he waited for the appearance of the 'Private Life of an Eastern King,' he would have discovered that the book gives only a simple account of the daily life of Nussir-u-deen, with its joys and sorrows, its amusements and its apprehensions, its caprices and its absurdities. The Indian newspapers may consider its appearance at

the present time as 'significant,' but it has no political bearing, or at least is intended to have none. If the reader discovers from it that the people were badly governed and Oude the most anarchical of kingdoms, it will be, not because it was my intention so to describe it, but because such was the fact, and no one can write truly of Oude or Lucknow without that fact being apparent. Mr. Austin supplies me with a valuable suggestion. It will be easy to give the book additional interest by adding to it an Appendix showing, from the Indian newspapers, that what the country was in my time—that is, twenty years ago—it still is."

Feminine strongmindedness—if we may coin a new word to express a new fact—is not to be held back in America or satisfied with Bloomer jackets and continuations. The Ypsilanti *Sentinel*, an American journal, learns that a number of applications will be made by females at the commencement of term for admission to the University.

Literary gossip from Australia is a pleasant novelty. The *Melbourne Argus* announces the arrival of two of the Professors, selected by Sir John Herschel, for the Antipodean University. "The University building," says the local journal, "is being slowly proceeded with. Nearly the whole of the foundation has been completed up to the level of the ground floor, and a good deal of substantial underground work, in the shape of cellars and so forth, has been constructed. The number of masons, carpenters and labourers employed on the works is about sixty, and we are informed that something like 20,000*l.* has already been expended. This sum includes the handsome fence surrounding the forty acres of ground attached to the University. A passing glance at the work does not give a very satisfactory idea of the progress made since the laying of the foundation-stone in July; but the part that has been constructed is, we understand, the most tedious part of such a building; and, as a large quantity of materials has been got ready, a speedier degree of progress for the future may be anticipated."

We read in the German papers that Dr. Kreil, formerly Director of the Observatory at Prague, has invented an ingenious instrument to measure the force, duration and direction of earthquakes. It consists of a pendulum so contrived that, whilst it can move in any direction, it cannot return. A perpendicular cylinder is attached, which, by means of clockwork, turns on its vertical axis in twenty-four hours. A pole, with a thin elastic arm, is fixed near the pendulum; this arm points towards the cylinder, and presses on it gently a pencil, by which means an unbroken line is formed on the surface of the cylinder as long as the pendulum is at rest; but, if it is put in motion by an earthquake, the pencil makes broken marks, which show the strength, direction and period of the earthquake.

The Italian journals offer a few paragraphs of literary gossip. They announce that Cardinal Wiseman will succeed Cardinal Mai as Librarian of the Vatican: from which we infer that the office is to remain a literary sinecure, and the holder of it an absentee.—Florence retains its rank as least liberal of the Italian States, not even excepting Naples. A paper recently started there took the name of a muse, 'L'Euterpe,' a very harmless, if not a very felicitous name. It was devoted to small literary talk and theatrical criticisms, playing on its pipe mildly enough; but one morning appeared a few lines signed by the terrible Guerrazzi, whose books are read in every house in Florence, and the police pounced upon and suppressed 'L'Euterpe.'—Venice, we hear, is adding music to her more romantic charms. A band is in progress of organization—a native band—for no Venetian now listens to the Austrian military strains, however good—intended for the service of the lagoons, and chiefly for serenades on the water during bathing time.—Milan, it is said, will not be fairly represented at the Paris Exhibition, especially in the departments of Fine Art, the Lombard painters and sculptors objecting to place their works under the colours of Austria. Some such feeling interfered with the completeness of the Lombard department of the Crystal Palace in Hyde Park.

Some of our contemporaries, under the pressure of the stamp debates, are taking to confessions. The proprietors of the *Shields Gazette*, telling a story which has many a counterpart, say of their journal:—

"During the past six years, the proprietors of this newspaper have invested no less a sum than 4,000*l.* net cash in its establishment; the whole amount of 10,069*l.* received by the *Gazette* during that period for news and advertisements (over and above the said 4,000*l.*) having been expended in carrying it on and improving it. During all this time, the proprietors have not received a single shilling in return, even in the shape of interest on the capital invested. It is now simply paying its way, and no more."

With the exception of a theatre, we know of no kind of enterprise so costly and so perilous as a public journal.

Letters from Sweden inform us that "Prof. E. Edlund, of the Academy of Sciences in Stockholm, succeeded last year in producing an improvement in the construction of the apparatus of the electric telegraph, by which it will be possible to send simultaneously by a single wire two reports from two stations in opposite directions, one from each station. The principle on which Prof. Edlund's apparatus is formed is particularly simple, and in all respects different from that which Dr. Gintl, of Vienna, has employed without any great success for the same object. Prof. Edlund employs at each station only one galvanic battery of equal power with that used in telegraphing by the old method. It seems that the improvement in question can be applied to all kinds of telegraph apparatus founded on the influence of electricity on magnetism or electro-magnetism. Old apparatus can, without any very great expense, be changed to new, and telegraphing proceeds in the same manner as by the old method. During last August Prof. Edlund made some trials, with the permission of the direction of the telegraphs, on the line between Stockholm and Upsala, which gave a satisfactory result. At Christmas two apparatuses were put up for real telegraphic use on the same line, and have since then been employed daily. The experience gained during this time shows that the new apparatuses work with the same certainty as the old ones, and are convenient to use,—the problem of sending two reports at the same time can consequently be considered as satisfactorily solved. As soon as new apparatuses have been prepared or old ones altered, the other telegraph stations in Sweden are to be supplied. It is, consequently, now possible to send as many reports by one wire as were before sent by two, supposing that an equal number are to go from both stations."—Such is the statement of a valued Correspondent:—but we wait for some account of the method before asserting how far the principle is new.

BRITISH INSTITUTION, Pall Mall.—The GALLERY for the EXHIBITION and SALE of the WORKS of BRITISH ARTISTS, is OPEN DAILY, from Ten till Five. Admission 1*s.*; Catalogue 6*d.* GEORGE NICOL, Secretary.

ADAM and EVE.—This great Original Work, by JOSEPH VAN LERLIS, is NOW ON VIEW at 57, PALL MALL (opposite Marlborough House), from 11 to 6 daily.—Admission, 1*s.*

PHOTOGRAPHIC EXHIBITION.—An Exhibition of the finest English, French and Italian Photographs will be OPENED at the PHOTOGRAPHIC INSTITUTION, 168, New Bond Street, on MONDAY, April 23*rd.*—Morning, open from 10 to 5. Admission, with Catalogue, 1*s.* Evening, open from 7 to 9. Admission, 6*d.*

ROYAL GALLERY OF ILLUSTRATION, 14, Regent Street.—The Railway at Balaklava, Battle of Inkermann, Storm in the Black Sea, Battle of the Alma, Cavalry Charge at Balaklava, Pictorial Map of Sebastopol, &c., are now exhibited in the Diorama, illustrating "Events of the War." The Lecture by Mr. Stocqueler. Daily at 3 and 8.—Admission, 1*s.*, 2*s.*, and 3*s.*

ZOOLOGICAL CONCERT.—LOVE'S ENTERTAINMENTS. VENTHILLOQUISM EXTRAORDINARY.—REGENT GALLERY, 69, Quadrant.—Every Evening at 8, except Saturday; Saturday, at 3.—Monday and Tuesday, Mr. LOVE, universally accepted as the first Dramatic Ventriloquist in Europe, will present his NEW ENTERTAINMENT, called 'THE LONDON SEASON,' Wednesday, Thursday and Friday the entertainments, LOVE IN ALL SHAPES and LOVE'S LABOUR'S LOST. Saturday, at 3. LOVE IN ALL SHAPES, and other entertainments. The ZOOLOGICAL CONCERT every Evening.—Pianoforte, Miss Julia Warman.—Stalls, 3*s.*; Area, 2*s.*; Gallery, 1*s.*—Tickets at Mitchell's, 33, Old Bond Street; Turner's Music Depot, 19, Foultry; and at the Rooms, between 12 and 3.

SCIENTIFIC

SOCIETIES.

GEOLOGICAL.—April 4.—W. J. Hamilton, Esq., President, in the chair.—J. E. Saunders, E. L. J. Ridsdale, G. H. Wathen, and E. W. Jackson, Esqs., were elected Fellows.—On the Palæozoic

Rocks of the Thüringerwald and the Harz,' by Sir R. I. Murchison and Prof. Morris.—The chief objects of this paper were to compare those chains of Central Germany, by showing the peculiarities of each, and by indicating how they differed from or agreed with the Silurian basin, on the east, and the Devonian rocks of the Rhenish Provinces, on the west. Their relations to British rocks of the same age was also explained in a large tabular view. The Thüringerwald was first described as containing a considerable portion of the most ancient sedimentary strata, which are unknown in the Harz,—viz., hard quartzose and slaty grauwacke, void of animal remains, followed upwards by grey slates, sandstones, conglomerates and partial limestones,—the age of which is clearly Lower Silurian, as proved by the genera and species of Trilobites, Orchis, Orthoceratites and Graptolites, which they contain. These masses, which occur in the southern Thüringerwald only, are at once overlapped by strata of Upper Devonian age, to the exclusion of the Upper Silurian, so finely developed near Prague, and of the Middle and Lower Devonian (Spirifer sandstone and Eifel limestone) of the Rhenish Provinces. Characterized by numerous species of Clymenia and Goniatites, as well as by an abundance of Cypridina and very peculiar land-plants, these limestones and schists pass up into other deposits, chiefly sandstones, which clearly belong to the Lower Carboniferous division, as proved by their imbedded plants, and by their containing, in adjacent tracts, products of the mountain limestone as well as partial layers of coal. All these ancient German strata, from the lowest sediments to the millstone grits of English geologists inclusive, have been thrown into highly inclined positions, and constitute, as a whole, those "Grauwacke" rocks of old geologists, which have been separated by modern researches into distinct natural-history groups. Whilst the inclined edges of the older rocks are here and there surmounted by their coal-bearing courses (*Kohler-Gebirge*), the chief overlying formations constitute the Permian of Murchison,—the base of which, the *Röthe-todt-liegende* (Angl. Lower Red Sandstone); the middle, the copper slate and zechstein, with their well-known fossils (magnesian limestone of England); and its summit, sandy shale and marlstone. In the Harz there are no clear evidence of the same fundamental rock and no trace of the Lower Silurian as in Thüringerwald, certain slight indications of the Upper Silurian being doubtful. On the other hand, we there meet with clear evidences of the Lower and Middle Devonian, which, unknown in Bohemia, Saxony and the Thüringerwald, are so typical of the Rhenish Provinces. The Upper Devonian is followed in the Harz by a copious development of the Lower Carboniferous, which, as shown by Prof. Sedgwick and Sir Roderick Murchison in 1839, is the real equivalent of the culm series of Devonshire, and in parts of which fossils, both animal and vegetable, are not unfrequent. Like the Thüringerwald, the Harz is enveloped by a girdle of Peruvian rocks, whose lower member in each chain is associated with much porphyry; the evolutions of which, with its accompanying piles of sediment, have obscured the original strike of the older rocks from north-east to south-west, and have produced transverse axes or watersheds, the geographical direction of the Thüringerwald being from north-west to south-east, and that of the Harz from W.N.W. to E.S.E. These and other views were elucidated by sections and fossils, and by references to the works and maps of contemporary German authorities. In conclusion, the attention of British geologists was called to the great rupture between the lower and upper members of the Carboniferous rocks, which, prevailing throughout Germany and France, is unknown in England. The memoir terminated by showing, that, notwithstanding marked discrepancies in mineral composition in formations of the same age in different localities, the omission of deposits in one tract which are seen in another, and numerous breaks and disturbances which have extended over large areas, the geologist accustomed to view nature on a great scale could only consider these as local

phenomena, since, in spite of all such obscurities, he had no insuperable difficulty in determining, by their imbedded fossils, whether these dislocated or insulated masses belonged to the Silurian, Devonian, Carboniferous, or Permian period of the primæval world.

ASIATIC.—*March 17.*—Prof. Wilson in the chair.—The Director read a communication from Sir John Bowring, containing some further accounts of his researches in quest of the Buddhist books known to have been carried from India to China in the early centuries of the Christian era, and translated from Sanscrit into Chinese by Hinan Tsang, and others. According to the notices received from Sir John, none of the originals have, as yet, been found; but a curious statement has been forwarded, to the effect that the original blocks, from which one of the translations of Hinan Tsang was printed, are still preserved in a monastery near Nankin. In addition to the works noticed in the *Athenæum* of the 2nd of December last, six more have been discovered. These have been examined by Mr. Eddins, who gives an account of their various translators. Notices of some original Chinese Buddhist works are added to the paper.—Prof. Wilson had also received a communication from M. Stanislas Julien respecting these books; and that gentleman states that the geographical work of Hinan Tsang, which has been supposed to be the result of his own observations, is, in reality, the translation of a Sanscrit geographical treatise. Prof. Wilson observed that a work of this nature is a great rarity in Sanscrit literary history: he had never met with more than a mere fragment containing geographical information in Sanscrit. M. Julien proposes to translate this work; but requires aid to enable him to publish it.

SOCIETY OF ANTIQUARIES.—*March 29.*—Admiral Smyth, V.P., in the chair.—Mr. Joseph Clarke, of Saffron Walden, and Mr. J. Barnard, of Sawbridgeworth, were elected Fellows.—Mr. Fairholt exhibited a casket of Cuir Bouilli.—Mr. Pycroft contributed a transcript of a letter of Lord Brereton, and Mr. Wylie exhibited drawings of two Frank drinking-glasses, found in a cemetery in Normandy. Mr. Durrant Cooper read some further remarks on Thomas Norton and the State proceedings in 1581-2.

ENTOMOLOGICAL.—*April 2.*—J. Curtis, Esq., President, in the chair.—It was announced that the Council had determined to distribute among the members the duplicates in the Society's Collection of British and Exotic Coleoptera and Exotic Diurnal Lepidoptera after the June meeting, hoping the members who received them would contribute as far as they were able to lessen the desiderata in the Society's collection.—It was also announced that the Curator, Mr. Janson, had accepted Dr. Gray's offer for a Catalogue of British Coleoptera, and would be happy to receive the assistance of his brother Coleopterists.—Mr. Foxcroft sent for exhibition several Lepidoptera, reared by him from larvæ found in Fifeshire, and specimens of *Papilio Machaon*, which, as well as their pupæ, presented certain constant differences of marking, divisible into two kinds, of both of which he had reared the sexes.—The subject of greasiness in insects, to which many species are particularly liable, was again introduced by Mr. Stainton, exhibiting two specimens of *Nepticula acetosa* pinned last summer, which already showed traces of verdigris on the pins.—Mr. Edward Sheppard exhibited four specimens of a Donacia, two of them on gilt and two on ungilt pins. They had been mounted about four months, and while the gilt pins had no appearance of being acted on by the greasiness of the beetles, the ungilt pins were thickly incrustated with verdigris. Mr. Edwin Shepherd said the gilt pins would remain unharmed for a time, but eventually they became affected as much as the ungilt ones.—Mr. Stevens exhibited from the collection of Madame Pfeiffer a pair of the rare beetle *Euchirus longimanus*.—Mr. Stevens read a description of a new butterfly, *Ornithoptera Brookiana*, captured by him in Borneo, and a

drawing was also exhibited. He likewise read an extract from a letter of Mr. Wallace, stating that Microlepidoptera abounded in Borneo, and that he had captured about seven hundred by means of a lamp at night.—The President read a note on oak-galls to show that he was correct in quoting the name of *Quercus petioli* for the Cynips which caused the formation of the galls recently exhibited to this Society from Devon.—Read 'Observations on the Honey Bee, in continuation of the Prize Essay of the Entomological Society for 1852,' by J. G. Desborough, Esq.—Dr. Gray said it might interest the members to know that Mr. Wollaston had transferred his collection of Madeira insects to the British Museum.

CHEMICAL.—*April 2.*—Mr. De la Rue in the chair.—A paper was read by Dr. Thomson 'On the Composition of the Metropolitan Waters during the Autumn of 1854.' The object of the investigation was to ascertain the condition of the water as supplied to the inhabitants in those houses where much mortality had prevailed during the epidemic. The result has shown, by examining the various waters in successive months, that their character is of a much more fluctuating description than is usually supposed. Water supplied from the higher sources of the Thames contains a smaller amount of soluble matter in solution during dry weather than in wet seasons, when the rains bring down soluble, earthy, and alkaline salts from the chalk and agricultural districts,—while the waters derived from the Thames in the immediate neighbourhood of London are more impure in autumn than in winter; for while the waters from the higher parts of the river possessed only 14° to 19° of impurity, those derived from a more easterly origin were characterized by an impurity of 40° to 60°, and even in one instance of 72°. The author, with the approbation of some eminent engineers of waterworks, purposes to apply a scale to indicate the relative impurity of waters. Distilled water being 0°, every grain of matter present in solution in water per gallon will be a degree; so that waters may be described as being possessed of so many degrees of mechanical, organic, and inorganic impurity respectively. The indications of the presence of sewage in some of the samples of Thames water examined were most striking. Not only was nitric acid detected in all of them, but ammonia was distilled over in considerable quantities, and sulphate of ammonia prepared by this process was exhibited to the Meeting. The mechanical impurities gave equally strong evidence to the same purport, being composed of vegetable and animal organisms, &c.,—and even the *débris* of human food can be demonstrated with the greatest facility by the microscope in the sediment derived from the service-pipes in those waters which are pumped from the lower sources of the Thames. The amount of ammonia in the Thames water has hitherto been undervalued; for, in autumn during the present investigation on the same day, while the quantity of ammonia present in the higher parts of the Thames was equivalent to .064 carbonate of ammonia, that derived from the more eastern waters equalled .840 carbonate of ammonia. There can be no doubt therefore that these waters, although questionable as to their present employment for domestic use, are admirably adapted for irrigation. Minute analyses of the waters of the various companies were given; and the paper terminated with some observations on the complete practicability of Dr. Clark's plan for softening water, and with the analysis of chalk waters before and after softening, which demonstrated the vast improvement produced in such waters by this valuable process.

SOCIETY OF ARTS.—*April 4.*—Dr. T. K. Chambers in the chair.—The paper read was 'On the Diseases of Miners,' by Mr. Herbert Mackworth, Government Inspector of Mines.

April 11.—E. Chadwick, Esq., in the chair.—The paper read was, 'On the Mineral Industries of the United Kingdom,' by Mr. R. Hunt.

MEETINGS FOR THE ENSUING WEEK.

MON. Statistical, 8.—'A Ten Years' Retrospect of London Banking,' by Mr. Gilbert.
TUES. Institution of Civil Engineers, 8.
— Royal Institution, 8.—'On Voltaic Electricity,' by Dr. Tyndall.

- WED. Society of Arts, 8.—'Notes on the Revision of Architecture, with some Account of the Ventilation of St. George's Hall, Liverpool,' by Dr. Reid.
- Geological, 8.—'On the Cassian Beds between the Keuper and the Lias in the Vorarlberg, Extract of a Letter from Prof. Merian to Sir R. L. Murchison.'—'Fossils from the Keuper at Peacock, near the Malverns,' by the Rev. W. S. Simonds.—'On a Cretaceous Formation in Natal, South Africa,' by Capt. Girden, with a Notice of the Fossils, by Mr. Bailey, communicated by Mr. Austen.
- 'On the Geology of Natal, Extract of a Letter from Dr. Sutherland to Sir R. L. Murchison.'
- Royal Society of Literature, 8.
- THURS. Royal Institution, 3.—'On Christian Art,' by Mr. Scharf.
- Artists and Amateurs' Conversazione, 7½.
- Society of Antiquaries, 8.
- Royal, 8.
- FRI. Royal Institution, 8½.—'On certain Zoological Arguments commonly adduced in favour of the Hypothesis of the Progressive Development of Animal Life in Lime,' by Mr. Huxley.
- SAT. Royal Institution, 3.—'On Electro-Physiology,' by Dr. Reynolds.
- Asiatic, 2.

FINE ARTS

Protest and Counter-Statement against the Report from the Select Committee on the National Gallery, ordered by the House of Commons to be Printed, 4th of August, 1853. J. R. Smith.

Messrs. F. Y. Hurlstone, W. Coningham, G. F. Arney, A. Stevens, R. Evans, W. S. Landor, G. Long, A. B. Richards, P. E. Barnes, C. F. Perkins, T. Wakley, J. I. Lockhart, R. Barnes, J. Hamilton, 'An Englishman,' H. Clarke, E. Mayhew, and J. Taylor have protested against the Report from the Select Committee on the National Gallery as, to use their own language, "a document unworthy of confidence, inimical to Art, and a fraud upon the nation." This is the Protest that now lies before us; and the protestors are, we see by an advertisement, about to publish a Postscript to this Protest on the subject of the appointment of Sir C. Eastlake as Director of the National Gallery, at a salary of a thousand pounds a year.

These indignant gentlemen look upon themselves as the denouncers of a betrayal of trust in a Parliamentary Committee, and of patronage and jobbery in a national institution. From Sir C. Eastlake's appointment as Director of the National Gallery, by Sir Robert Peel in 1843, the protestors date the commencement of "a disastrous system of cleaning." 'The Judgment of Paris,' by Rubens, was, they say, cleaned by Sir Charles without using the judgment of Solomon. 'Lot and his Daughters,' and 'Susannah and the Elders,' he is also accused of cleaning "without the instructions of the Trustees." In spite of the gravity of the subject, we can hardly refrain from smiling at the technical ferocity with which this vexed subject of picture-cleaning is handled. No Early Christian could have described more piteously the flaying of that St. Bartholomew, whom we see in the 'Last Judgment' holding up the mortal coil he has shuffled off, as a tailor would a pair of prize pantaloons. It is astonishing the amount of human interest the protestors throw into the subject by artfully employing words that to the uninitiated unconsciously convey a sense of pain in the picture operated on. We feel as if a dying man were struggling and shrieking under the knife. The pictures are "flayed," and "peeled," and "skinned," and "tortured," and "scraped." It seems not merely ignorance, but cruelty, that has been practised. Old gentlemen who have not time to read the whole correspondence have a vague impression that the cleaning processes are first tried on criminals, who are scorched with malignant acids, or boiled down in solutions of sulphur and oil. Another ingenious resource of the protestors—with all honest desire for truth we doubt not—is to use such strong metaphorical language as to imply to the blinded public that the pictures have been reduced to a paste, pounded into pieces, and then sewn together like a patchwork quilt, or actually scrubbed by all Wardour Street at once, just as men polish a table or brighten a shoe. We hear of hundreds of feet of canvas cleaned at the rate of so many feet an hour, just as if they had been run over by a French *frotteur* with his skate of brushes, or sand-papered by a drunken, impatient, and underpaid carpenter. More quietness and forbearance might, we think, lead both protestant and heretic several days sooner to the door of truth.

To return to the charge against Sir C. Eastlake,

—which really for violence and determination almost equals the well-known charge at Balaklava. In 1846, "emboldened by impunity," Sir C. Eastlake "seared" the large Cuyp, the "Cowley Velasquez," the 'Bacchus and Ariadne,' and the 'Peace and War,' smacking his lips when he had thus anticipated Time, and looking on, as Amrou might have done, with grim satisfaction, as the last shelf of the Alexandrian Library sunk into the flames. He expressed "his entire satisfaction at what had been done." Five colleagues applaud him,—three dealers utter a jubilee, which is re-echoed through the dusky chambers of that street which is named Wardour. In the language of the protestors, the accused "sat upon himself," and was at once acquitted. All through 1847 Sir C. Eastlake lays aside his mops and brooms, and resigns. Then Mr. Uwins, "Curator of Her Majesty's Pictures," steps on the scene. What the enraged eighteen think destroyed, he considers "more than entirely satisfactory." He never knew the value of the Rubens till then. He looks with respect and awe on restoring as an art that perpetuates Art. He grows rhetorical and ungrammatical in the ecstasies of his praise of the resigned Keeper. The restoration has become an epoch in the mind of Mr. Uwins. Lord John Russell appoints Mr. Uwins Keeper; and Sir C. Eastlake again mounts the throne, in 1850, like the restored Stuart, as President of the Royal Academy and Trustee of the National Gallery. For six years, enriching coats of street-dust and Cockney exhalations add a deeper gold to the mellowness of Claude. In 1852, the Massacre of St. Bartholomew, or to use the protestant language, "the long concerted, wholesale desecration," was completed. In the eyes of the eighteen Sir Charles is our English Siva—the Herod of Old Jewry—leagued in a fearful conspiracy, lighted with blue fire and cemented by terrible Italian oaths, to "flay, strip, crack, burn, scald, and utterly destroy" every work of the Old Masters preserved in the National Gallery.

The protestors attack the management of the National Gallery and protest against the site of the intended new building, but still the gist of their charges lies in two words—picture cleaning. The one party, to draw them to extremes, reminds us of a Dutch mother always calling in her boy from play to wash his face and hands, which will soon be of their primal colour; the other of a Gypsy father who thinks that dirt is an Egyptian and venerable thing, and a badge of honour and antiquity. Roman or Jew, Greek or barbarian, bond or free, are not parallels too strong to describe the antagonism of the two clans. Take Claude's 'Queen of Sheba,' twenty-six witnesses declare it has lost its glazing, its warm rich glow, its brilliancy, its sunniness, its delicate tint and gradations and aerial perspective. If all this were gone, what was left? is not an irrelevant question. The opposition benches declare it much improved, done with wonderful address, much more beautiful, more pleasing, more effective, more real, more appealing to humanity. The glazing was a quackery. On one side there are love and admiration tempered with awe; on the other, indignation, hatred and contempt.

But to prevent any injustice, we select the protestors' own account of the cleaning two pictures, to show the temper and taste with which they handle the keen weapons of controversy.—

"The Conversion of St. Bavo."—(Rubens.)—The witnesses examined upon the 'St. Bavo,' by Rubens, were twenty-two in number. Of these, eighteen were against the cleaning; some affirming that it was "raw," very impoverished, meagre and discordant; others that the 'body-paint had been scrubbed up'; while Mr. Roberts, the same Royal Academician who so energetically denounced the injuries inflicted on Canaletto's 'View in Venice,' declared that it seemed to him "a frightful alteration from what it was before," and that as to "the harmony and tone of the picture," "St. Bavo" was "destroyed." The four approving witnesses were three of the four compromised parties already named, and Mr. Bolton, the picture-cleaner, who thinks the 'cleaning of this picture is very good'; while Mr. Uwins "can see no deficiencies in it whatever, every part being just in the same state in which it was." The uncompromised witnesses hostile to the result of the cleaning were, in the case of the 'St. Bavo' also, all but unanimous.

"The Consecration of St. Nicholas."—(P. Veronese.)—The witnesses who gave judgment on the cleaning of the 'Consecration of St. Nicholas,' by Paul Veronese, were

twenty-one in number. Fifteen were adverse to it; Sir Edwin Landseer, another colleague of Sir C. Eastlake and of Mr. Uwins, declaring that 'the Paul Veronese had here and there been a little tortured'—that he 'must say that, speaking candidly,' others pronouncing that 'the markings which described the forms of the various objects had been absolutely taken away'; that 'it was crude, cold, and had lost a great deal of its mellowness'; that 'the whole of the master's glazing had been removed'; that 'in parts it had been completely flayed'; that its effect was destroyed; that it was irrecoverable, &c. The six witnesses favourable to the operation, comprise the four implicated parties already named, and Messrs. Bromley and Dennistoun. The importance of the last-named gentleman's opinion is considerably modified by his declaration, that when he says 'too much' has been 'taken from a picture,' he 'probably' means 'a portion of the original master's touch'; but 'that being a technical point,' and his 'technical knowledge not being sufficiently matured to speak to that,' he is unable to determine whether, by this expression, he does mean the original master's touch or not. Mr. Uwins declares that the Paul Veronese, from being 'entirely lost, so that nobody could form any conception of it, is now restored to its pristine beauty; that the colours now come out in all their splendour and glory; that in its present state it is something real—almost beyond reality—divine; that one would almost feel inclined to fall down and worship it.' The uncompromised witnesses counted fifteen against two, condemnatory of the cleaning of the 'Consecration of St. Nicholas.'

In Claude's 'Annunciation' eighteen witnesses, according to the pamphlet, condemned the cleaning. Lord Monteagle (a well-known name in conspiracies the protestors would say,) thought the change painful. Sir Charles Eastlake believed a brisk application of dust would do much good, and advised that the glass should be left off for at least a twelvemonth, that it might collect some mellowing dirt. To these unite Mr. Uwins and Mr. Bentley: the former thinks the Claude more beautiful and delicate than before, and the latter that it has been "very nicely cleaned."

In the 'View of Venice,' by Canaletto, the same contrast appears. The protestors say:—

"The witnesses examined upon the cleaning of Canaletto's 'View in Venice' were twenty-two in number. Of these, seventeen pronounced it extremely injured; one affirming, that 'the genial and pleasant warmth which belonged to it was very much damaged'; a second, that 'the distinctive attributes of the master were gone'; a third, that 'the relief had been absolutely destroyed'; others, that it was 'raw,' 'much rubbed,' &c.; even the President of the Royal Academy, finding it expedient to acknowledge that 'the lights had been too much cleaned,' and that he was 'sure those lights would be better for glazing now'; while Mr. David Roberts, R.A., a colleague of Sir C. Eastlake and of Mr. Uwins, after telling us that he 'knew this picture well, having studied it for years at the Gallery,' emphatically declared that the 'scumbings, and even the paint, had been removed, so much so as to destroy the whole harmony of the picture'; that the 'mason's shed had been scrubbed to such an extent, that the paint had been taken off altogether,'—which even Mr. Stanfield, R.A., another colleague of Mr. Uwins, 'who remembers the shed very well,' partly confirms,—'that it was now all raw and disjointed'; that 'nothing can ever remedy this Canaletto.'

In the 'View of the Grand Canal' fourteen out of twenty-one witnesses condemned the cleaning. In Guercino's 'Angels Weeping over Christ' ten out of sixteen declared against the cleaning. Mr. Bolton thought it "rather raw"; one would think he was talking of a joint. But Mr. Uwins with a genial smile "looked for any injury in vain."

Of Poussin's 'Plague at Ashdod,' thirteen out of sixteen witnesses condemned the cleaning. The Keeper thought its condition unchanged.

The pamphlet sums up the charges in the following words:—

"From the preceding analysis it will be found that, of one hundred and ninety-four decisions delivered before the Committee, on the cleaning of the nine pictures, one hundred and forty-nine were condemnatory of their altered appearance—only forty-five in favour of it; and that of the latter, thirty-one are but the multiplied self-approvals of Messrs. Seguer, Uwins, R.A., William Russell, and Sir C. Eastlake, parties impeached. If we deduct their evidence, and that of Mr. Morris Moore, the originator of the charges against the cleaning, we have the still more formidable contrast of one hundred and forty against fourteen; a clear majority of ONE HUNDRED AND TWENTY-SIX, TEN TO ONE IN SUPPORT OF THE CHARGES."

Mr. Leslie, in addition to the other witnesses, declared all were "ignorant" who maintained that the pictures were not improved; but Mr. Buchanan declares the 'St. Bavo' ruined, the 'Plague at Ashdod' stripped of its finishings, the Paul Veronese swept of its glazings, and Claude's 'Sheba' washed away.

The picture cleaning of 1846 is still more fiercely contested. Says the pamphlet,—

"The four pictures cleaned in 1846 were 'The Peace and War,' by Rubens; 'The Boar Hunt,' by Velasquez; 'The Bacchus and Ariadne,' by Titian; and 'A Landscape, with

Cattle and Figures,' by Cuyt. The TEN witnesses who condemned the cleaning declare that 'The Peace and War,' by Rubens, 'has been very much injured, thrown out of harmony, and the relative position of many of the objects in it altered; that all the warm colours in the flesh have been changed into cold colours, the beautiful greys forced into a gradation of blues or purples; that the original brilliancy and lustre are thereby materially impaired, and that it never will or can regain the glowing and rich effect it once possessed'; that 'the Velasquez "Boar Hunt" has lost its pleasing character, richness, and spirit; that 'it now looks heavy, wanting in air and distance, and that 'the injuries are owing to the process of cleaning to which it has been subjected at the Gallery'; that 'all the pictures cleaned in 1846, the two above mentioned, the "Bacchus and Ariadne," and the Cuyt, are strikingly crude, raw, very much rubbed, and generally out of tone, and out of harmony; that 'they are just as much injured as those recently cleaned, and in the same way; that 'they have not recovered their lost qualities at all; and that 'neither TIME nor DIRT can ever restore the beauty that is gone.'

To these enter for the defence, pricking in from the opposite end of the lists, Mr. Bolton, Mr. Stanfield, Sir E. Landseer, and Mr. S. Hart. They see nothing "rubbed out," "wiped away," "obliterated," or "flayed and scrubbed." To this say the writers of the pamphlet,—

"The six umpires of the Committee's own choice affirm, and with truth, that all the nine pictures have suffered extremely; that, in several instances, 'the original glazing of the master has been entirely removed'; that, in some, the very 'body colour has been disturbed'; that 'great qualities have disappeared'; that 'characteristic traits and distinctive attributes are gone'—entirely gone; that Claude has dissolved into Vernet; that 'the warm, rich glow, sunny effect, delicacy and transparency, harmony, gradations and aerial perspective, which gave value and character, have been destroyed'; that the pictures are now 'raw, crude, disagreeable to the eye, spotty and rotten'; that 'the master's touch has been very much effaced'; that 'their surfaces have been greatly injured by over-cleaning' and 'over-rubbing,' by having been 'rubbed,' 'much rubbed,' 'too much rubbed,' 'rubbed off,' 'rather scrubbed,' 'rubbed down so as to have become damaged'; that one picture is a destroyed picture'; that 'the camages are the effect of the recent cleaning'; that the pictures can never recover'; and that 'their commercial value has been very considerably diminished'; while even Mr. Stanfield admits 'that there has been some removal of details from Canaletto's "View in Venice"—a picture which he had studied and looked at frequently; that 'certain objects in it are not so vigorous as he remembers them'; that 'probably he liked the "Sheba" better before it was cleaned, because he likes a toned picture.' * * Nor are the three umpires, out of the four chosen by the Committee to record their opinions in writing, less 'vehement.' They declare that the pictures have been 'most fearfully scoured—violently treated'; that 'they have been thrown most outrageously out of harmony,' and are now 'harsh, crude, disagreeable, without luminousness, and offensive to the eye'; that 'glazings have been entirely destroyed, and that what 'formerly receded, is now cast forward'; that 'the fine sparkling and rich colours, which formed the charm of the "Sheba," have been washed away, leaving a blank in Art on the surface of this once wonderful picture, which no living man can restore to its pristine state'; that 'the various gradations of rich, warm colours have been swept away, while that space which the glorious luminary held has been washed down to the ground painting, or dead colours of the picture'; that 'the sad change the "Sheba" has undergone is a cruel loss to the National Gallery'; that 'the pictures have been flayed'; and that the effect of all the nine pictures has been 'ruined by pretended cleaning'—but real 'Vandalism.'

Sir David Brewster being called on, condemns the cleaning.

On the subject of purchasing pictures, the pamphlet condemns the Holbein, and declares that the 'Susannah and the Elders,' bought for 1,500 guineas, could have been obtained a few months previously for 750*l.* In fact, to simplify our abridgment of the charges of the protestors, they condemn everything that has been done, is done, and is going to be done.

We conclude our extracts with the following summary:—

"When it is considered that the Royal Academy, having already twelve years previously installed their President a Trustee *ex officio*, have ever since 1843 taken upon themselves the active management of the National Gallery, by placing successively in the Keepership two of their own members, Sir C. Eastlake and Mr. Uwins, whose official delinquencies and incapacity they have never failed to either secretly abet or openly defend; and that taking advantage of the ascendancy obtained over the Gallery and over the Trustees, and setting at naught the right of every British citizen to an equal share in the advantages of the institution, they have even arrogated, as though dealing with their own private property, that TWENTY places should be reserved in the NATIONAL Gallery exclusively for THEMSELVES;—when all these things are considered, it must be obvious that a Committee 'appointed to inquire into the management of the National Gallery,' who start with the determination to enter into no question and to receive no evidence which may 'tend to implicate the Royal Academy,' virtually set out resolved to evade all investigation of the causes, owing to which, after an expenditure of MORE THAN A QUARTER of a MILLION of PUBLIC MONEY, the attempt to establish a National Gallery worthy of the country has ended in failure and disgrace."

We conclude our notice of this pamphlet by lamenting the discord that seems raging among artists. It is, perhaps, an indication of a settled schism between the old and new schools, ancient and modern, English and Italian, precedent and innovation, Conservatism and Radicalism. Like a lovers' quarrel, it may be only what Ovid calls "the renewing of love." A leg seldom breaks twice in the same place. A shower clears the air. We trust, whoever convinces the public, Art will be the gainer. Both sides love Art, and should shake hands on that knowledge. Picture-cleaning must, it should be remembered, be always experimental, because it must progress with an increased knowledge of chemistry and must vary with the various treatments of every master.

FINE-ART GOSSIP.—The meeting of the Graphic Society on Wednesday was not above the average in interest, but there was enough in the variety and excellence of the articles exhibited to repay a call at University College. Two engravings of Highland scenes from the burin of Mr. Thomas Landseer excited attention by their exquisite finish and the natural flow of the light over the surface of land and loch. A view of Battersea Bridge, by Mr. Creswick, soft, delicate, and dreamy,—an unfinished picture, of an ambitious character, by Mr. Sant, with three women in a cave watching with eager passion the ebb and flow of a skirmish on the sea-beach,—and a picture of the "school" of Turner, a view of Venice, with some of the master's magical effects, and a felicity of imitation which led experienced eyes to doubt for some time whether it were not a veritable production of his easel—were the single pieces which call for most special record. M. Carl Haag exhibited some of his striking and picturesque sketches from the two shores of the Adriatic.

We see by the Scotch papers that the pedestal is now being put up in the Parliament House for the statue of the late Lord Jeffrey, which has been executed by Mr. John Steell.

Baron Marochetti, we hear, is engaged on a monument to the Princess Elizabeth, daughter of Charles the First. The monument will consist of a statue, representing the unhappy Princess in her last moments, having in her hand the Bible given to her by her father. The statue will be placed in a niche in the Church of St. Thomas, at Newport, in the Isle of Wight.

The Committee appointed to raise a public Testimonial in memory of the late General Sir Charles Napier, the hero of Scinde, have decided on the erection, in London, of a bronze statue of the gallant general. The height of the statue is to be 12 feet, on a granite pedestal 18 feet high.

The pictures and drawings of the late Mr. James Hall are announced for sale. The collection includes 'The Alcalde Ronquillo,' described as by Velasquez,—and works described as by Bassano, Titian, Agnolo, Teniers, Watteau, and several English masters.

Mr. Wornum has commenced a fresh series of Lectures on Ornamental Art at Marlborough House. Greek Art will occupy him for the rest of this month; and during May, Roman and Romanesque Decoration.

We learn that a magnificent antique statue, in red marble, was purchased for the British Museum at the late sale of M. Collet's collection at Paris. Ex-king Jerome, says the *Daily News*, attempted to become its purchaser, in order that he might present it to the Museum of the Louvre.

A new and commodious room has been opened in the British Museum. It is devoted to many of those relics of Greek Art that have for so long been lying about like lumber in the vestibules and passages of that building. To the crowds who require index-hands to point out the beautiful from the common the change of position is a great boon. Students will have more conveniences for study, and the sucking poet may wander up and down to complete his visions of Greek beauty and Greek wisdom.

The front of the Carlton Club approaches completion. It will certainly be one of the most beautiful public buildings in the Mall. It is simple,

and yet grand, rich without being overloaded, stately without heaviness, pure in detail and majestic in design. In spite of Mr. Ruskin's dictum, that ornament should be on a level with the eye, and not heaped round the garrets, we confess a predilection to the garlands of flowers, the kneeling boys, and the marble medallions. The light balustrade cuts with a cheerful Venetian effect against the fresh showery skies of April, with their shifting rack of parti-coloured clouds and snow islands floating in a sea of crystalline azure. The honesty and sharpness of the ornament, conventional as it is, seem to attest the deeper sincerity of an earnest and struggling age.

A new marble statue has recently been unveiled in the *Place du Palais Bourbon* at Paris. It represents Law in the form of a young female, seated before a table, on which are placed the books of the law. An inscription records that the statue is erected under the Imperial auspices of Napoleon the Third, in the year 1855.

The Cavaliere Massimo d'Azeglio has accepted the office of Director of the National Gallery at Turin.

The 'Last Supper' by Leonardo da Vinci in the Monastery of St. Domenico in Milan is being restored to all its original beauty. So far back as 1821 Barezzi tried his novel plan on a very small portion, and with great success. In 1852 he made a request to the Imperial and Royal Academy to be permitted to engage on this work. Three or four trials were made, which were examined by the Academy, by a Commission from Vienna, and another from Florence. The result was that full permission was given, and for eight months he has now been engaged on this work. What his secret is, is not known; he uses no brush, nor is there any retouching, but the change is miraculous. The surface is smoothed down as though it were of marble, and the blistered or broken excrescences are firmly attached to the wall,—by means of chemical agents, too, the colours have been revived in great beauty. The figure of the Saviour is nearly completed, as indeed is nearly one-half of the picture. In the middle lunette above are discovered the arms of Ludovico il Moro and Beatrice d'Este, his wife. Four several strata of lime and colour having been removed, paintings, it is said, of a surpassing beauty have been discovered, and so highly finished as to give the appearance of having been executed on ivory.

An equestrian statue of the late King is about to be erected at Hanover, at a cost of 50,000 thalers.

A new theatre is about to be built in the Buttermarket at Amsterdam, in place of the present wooden building.—The Hope Gallery is soon to be opened to the public.

The artists are busy at Düsseldorf. M. Lessing is painting 'The Capture of Pope Paschal,'—M. Karl Hubner, 'The Exile,'—M. Julius Hubner, 'Charles the Fifth in his Cell at St. Just,'—M. Hasenpflug, a cloister-scene, with a winter sunset.—Herr Knibb, of Munich, is engaged on the 'Death of the Gothic chief, Totilla.'

MUSIC AND THE DRAMA

MUSICAL UNION.—H.R.H. PRINCE ALBERT. Patron.—TUESDAY, April 17th, half-past Three.—WILLIS'S ROOMS.—Quartet, B flat, No. 78, Haydn; Trio, in D, Op. 70, Beethoven; Quintet, G minor, Mozart. Piano Solos, Mendelssohn and Taubert. Executants: Ernst, Cooper, Hill, Goffrie, Piatti, and Pauer. Visitors admission, Half-a-Guinea each. To be had of Cramer & Co., Chappell & Co., and Olivier, Bond Street. Seats reserved only for Presidents and Committee. All particulars to be obtained of J. ELLIS, Director.

SACRED HARMONIC SOCIETY, Exeter Hall.—Conductor, Mr. COSTA.—ON FRIDAY EVENING, April 27, Handel's 'ISRAEL IN EGYPT.' Vocalists: Madame Clara Novello, Madame Rudersdorf, Miss Doiby, Mr. Sims Reeves, Signor Belletti, and Herr Fornes.

ON WEDNESDAY, May 9, will be repeated Mendelssohn's 'LOBESANG,' and Mozart's 'REQUIEM.' Vocalists: Madame Clara Novello, Mrs. Lockey, Mr. Sims Reeves, and Herr Fornes. The Orchestra, the most extensive available in Exeter Hall, will consist of nearly 700 Performers.—Tickets, 3*s.*, 5*s.*, and 10*s.* 6*d.* each, may be secured by immediate application at the Society's sole Office, No. 6 Room, within Exeter Hall.

ST. MARTIN'S HALL.—Mendelssohn's 'ELIJAH' will be performed on WEDNESDAY EVENING, April 18th, under the direction of Mr. JOHN HULLIAH. Principal vocalists: Mrs. Sims Reeves, Madame Weiss, Miss Palmer, Miss Freeman; Mr. Sims Reeves, Mr. Mount Smith, Mr. Henry Buckland, Mr. Weiss.—Tickets, 1*s.* and 2*s.* 6*d.*; Stalls, 5*s.* May be had of the Musicians, and at St. Martin's Hall. Commence at half-past 7.

THE EASTER PIECES.

THE Easter pieces of this season are few; in fact, properly speaking, but three:—the theatrical *Revue*, by Mr. Planché, at the Haymarket; the 'New edition of Mother Goose's Tales,' at the Adelphi; and the burlesque on 'Lear,' at the Strand. The Princess's production is merely the adaptation of the *libretto* of a foreign opera, got-up with small cost, and evidently not intended for a long life. The Olympic produces nothing new, and the suburban theatres are sublet to ephemeral companies: the Lyceum troupe finding a temporary asylum at Sadler's Wells, and a portion of the St. James's at the Marylebone. Such have been the effects arising from the severe weather and the uncertain progress of the Crimean war. Literature and the Arts are always the first to suffer from national disasters, and other branches of both, besides the dramatic, have felt the withering influence of such adverse causes.

HAYMARKET.—The *Revue* produced at this theatre possesses even more than the usual elegance of Mr. Planché's holiday pieces. It is entitled 'The New Haymarket Spring Meeting,' and allegorizes the competition of theatres and amusements by reference to the doings of the turf. *London* and *Westminster* enter their public exhibitions as race-horses, and contend for the Handicap of 1855. Mr. Buckstone, acting as *Lord Mayor's Fool*, utters all manner of biting rhymes on the unprogressive character of the two cities. The *Lord Mayor's Show*, invisible by reason of a November fog, is satirized in mordant couplets, and as a spectacle receives illustration both by land and water from the pencil of Mr. Callcott and the ingenuity of Messrs. O'Connor and Morgan. The City theatres assert their claims in clever parodies. The City of London herself also boasts of her achievements, particularly of having carried up Cannon Street to St. Paul's, when *Time*, impersonated by Mr. Chippendale, bids her "not to stop at the corner." Westminster, too, has her clever hits—and, besides her theatres, trots out her exhibitions, particularly Mr. Wyld's *Sevastopol*, relatively to which a successful pun was perpetrated—to wit,

"Britannia rules the waves—the Czar the serf."

—Such a line may be cited as a sample of the composition. Miss Harriet Gordon, specially engaged to give effect to the part of Westminster, enacted it in high courtly fashion. The other personages were, for the most part, also appropriately represented. Full of point, well acted and illustrated, the piece must prove attractive.

ADELPHI.—The compilation of Mother Goose's tales in one new edition has been most happily accomplished by Mr. Mark Lemon, and "published," to quote from the play-bill, "with many highly-coloured illustrations." We have lately had occasion to remark on the five-act form which has been recently assumed by the minor drama, though frequently disguised under the nominal distinctions of preludes and prologues, in one and two acts, introducing plays in four and five. Not long since, we were rated for adhering to the "superstition in favour of five acts"; and now the number re-asserts itself as a convenient melo-dramatic formula. There are, no doubt, especial advantages attending it, affording as it does the opportunity of a double climax, as well as more enlarged and methodical treatment of an important theme; albeit it has been too frequently abused by incompetent writers, who have ambitiously attempted to apply its mighty energies to arguments scarcely capable of a three-act development. Mr. Lemon's extravaganza embodies five nursery legends within a single framework; and the union is so neatly contrived that the composition has the air of a natural product, though nothing more than an ingenious piece of stage carpentry is intended. The story of Mother Goose and the Golden Egg has precedence, and also involves the whole of the characters, who, in the subsequent sections, are transformed into a succession of new persons and introduced into new incidents: The action has, accordingly, an historic continuity, and might serve to point the Shaksperian maxim, with an important addition,

that "one man, and also one woman, in their times play many parts." Thus, Miss Keeley, the *Marion* of the initial tale, becomes one of the daughters in 'The Three Wishes,' *Little Red Riding Hood* in the subsequent adventure with the wolf, *Cinderella* in the affair of the glass-slipper, and the *Sleeping Beauty* in the last and crowning legend of the series. Mr. Bland, who has migrated to this stage, sustains the paternal character throughout, with a never-failing opulence of humour. Miss Woolgar is the prevailing hero and knight errant, under various names, and, as *Lively Jack*, maintains a severe combat with Paul Bedford as *General Wolf*, and rejoices in his victory through the medium of a hornpipe. All this "excellent fooling," illustrated with fun and rhyme, and quip and clinch, as well as with some picturesque scenery and costume, is not only interesting and amusing, but implies so much art, that, apparently trifling as such pieces may appear to the graver sort of wits, it is impossible to record our opinion of the present without expressing a certain degree of respect for the author's skill and tact. Our modern playwrights are certainly improving in cleverness, if not cultivating the sublimer and more solid faculties in which our earlier dramatists manifested the strength and depth of the English intellect. Less is the need, therefore, of resorting to foreign markets for the lighter ware that may be obtained of equal quality home made. This unique production was entirely successful.

STRAND.—The most disagreeable form of burlesque is that, perhaps, which parodies those high productions of the muse which have received a certain consecration in the mind, either from association or the solemnity of the theme. The tragedy of 'Lear' is of this class; and, therefore, we regret that Mr. J. Halford, clever as he has proved himself in his grotesque reductions of the sublime to the absurd, should have chosen this "great argument" for the subject of an extravaganza. We regret this the more, because the legend imposed conditions on the Poet in the earliest scenes of the play which require a merciful construction, even on the part of critics who would justify whatever our greatest dramatist may have adopted. Filial piety was never put to a severer test than by the mental aberrations of the irascible monarch. 'King Lear and his Daughters Three' is the title of the new piece; and the royal parent is personated by Mr. Halford himself, who follows the example of Mr. Robson in preserving the tragic feeling under the caricature assumption, and thereby the more impresses us with the "wrong" done to a "majestic thing," by "offering it such show of violence." The part of *Cordelia*, too, is blended with that of the *Fool*, and Miss Isaacs supports the double burthen, relieving it with snatches of songs and popular airs, which were cleverly executed. The house was well attended, and the performance received with applause; the merit of the treatment, however, is but a poor atonement for the injudicious choice of subject.

PRINCESS'S.—Few words may suffice to describe the new—but not original—piece at this house. 'The Muleteer of Toledo,' adapted from the French of M. Adam's opera of the same name, is the title of the production. The story is well known, and the defects of the drama are patent to the most cursory observation. The conduct attributed to the King of Castile is highly improbable, and the dialogue ascribed to him impossible; but, in order to preserve the surprise at the end, it was needful for the playwright to prevent his incognito majesty from saying, in his character of muleteer, anything that would indicate the mystery involved. Mr. Lacy, who performed the disguised monarch, evidently felt his position a most unnatural one, but resigned himself to the necessity with the best grace he could. The only attraction was the performance of Miss Leclercq, who, as peasant maiden and queen, spake, sang and danced like a mistress of the various accomplishments implied, and thus gave animation to the dulllest and most frivolous scenes ever witnessed. The appointments and scenery were common-place.

THE LAST LENT MUSIC IN PARIS.

How the French "Empire," which announced itself to mean "peace," has turned out "war" all Europe knows. The Imperial intent to raise the *Grand Opéra* to the topmost pinnacle of artistic magnificence seems to have been traversed by influences as powerful as those which have scattered the promises of the Bordeaux speech to the winds. Never can that theatre, an object of interest as a centre of creative art, have been in a much worse plight than it is at present. Betwixt the things which Mdlle. Cruvelli cannot and those that Madame Stoltz will do, the performances have become grotesque in their inferiority. The appearance of the latter Lady in 'Le Prophète' must long be remembered by all who saw and heard it. Madame Stoltz looks the character of *Fides* well, it is true; and she gets up one or two vehement bursts of passion, for the use and comfort of the stalls. But the real *Fides* ought to be more devoted to her companions on the stage than almost any other opera-heroine in being,—and an opposite way of playing the part lays bare all its extravagance, but destroys its emotion. The singing was such as could only be permitted at such a theatre, by a packed public and by a press (to state matters courteously) that yields to persuasions from without. To mention one novelty,—in her song of the fourth act, which is in E minor, the voice of Madame Stoltz sank so curiously that she closed the air in the key of D. We advert to this deplorable exhibition in completion of our past remarks on the improvements of Madame Stoltz as a singer, so loudly vouched for by "all and sundry,"—among others, by that melancholy jester, Signor Rossini. The chorus of the *Grand Opéra* on the occasion referred to was almost as bad as a chorus in any theatre of pretension could be. It may be gathered from the budget lately presented to Government, which undertakes to support the theatre, that the debt already accumulated at the period when M. Crosnier undertook its direction has doubled during the past twelve months, and this in spite of the magnificent receipts (according to the journals) gained by Mdlle. Cruvelli. A *coup-d'état* is required, in short, to rid the theatre of its incumbrances and to place matters on a better footing, or sink it must into contempt and discredit. There is a talk of winning back M. Roger, who will be nothing loth to be won, for "a consideration," as *Master Traplois* had it, some thousands of francs more weighty than M. Roger received while his voice was fresh and strong. It is even said that, failing such re-engagement, M. Meyerbeer will not give 'L'Africaine.' Meanwhile, the management is in sore distress for a tenor who can sing (not scream), to appear in Signor Bilella's opera: which is to succeed Signor Verdi's—not to the satisfaction of French composers. In short, confusion and complaint are everywhere.

But, to compensate for this dearth and discord, the Concert-music given in Paris, during the closing week of the Lent just over, was such as greatly to interest English amateurs. We were glad to be able to test for ourselves the praise bestowed by M. d'Ortigue, on the Symphony of M. Gounod, paraphrased in the *Athenæum* a week or two ago—on its second performance by the orchestra of the *Société des Jeunes Artistes*. Some want of proportion may be observed in certain parts of the work;—but this is the only sign of inexperience which the Symphony presents: while the ideas are varied, natural and dignified—the construction is solid and simple, and the treatment of the orchestra is clear and rich. M. Gounod wrote for a young Society, but we do not imagine that the bent of his genius leads him to affect the hearer by exaggeration:—and it is much to be able to produce, as he has done, a work so interesting without any pretext of following in the wake of the caricaturists, who alarm rather than engage attention by their eccentricity and violence. An *adagio* belonging to a Second Symphony from the same hand, performed at another Concert of the same Society, pleased us also greatly;—both as promising to France another excellent instrumental composer and as marking rapid progress.

The time is, possibly, not far off when certain critiques on M. Gounod's music may take their place in the Book of Blunders, hard by the famous "*This will never do!*" by which the *Edinburgh Review* fancied that the star of Wordsworth was destined for ever. This *Société des Jeunes Artistes*, composed of such materials as make up our *Royal Academy Concerts*, is a thriving establishment. The orchestra—in which some young boys take principal instruments, is good enough to make the English "cover their faces with shame,"—a band to which no composer need fear to entrust a work of moderate difficulty. The players play with precision, energy, and apparent enjoyment. The wind instruments are very good. The conductor is M. Pásdeloup.

"To keep the balance true," let it be mentioned, to England's credit, that Mr. Henry Smart has been invited from London to take the organ part in the coming performance of the '*Te Deum*,' by M. Berlioz, which, we still hear, is to be produced in the Church of St.-Eustache, on the 30th of this month.

Of '*L'Enfance de Christ*,' which was performed for the fourth time in Paris on Easter Eve, it is not possible for us to offer any decided opinion, after hearing it at the *Opéra Comique*,—since a duett, or rather dialogue, between an admirer and an abuser of the work in the stalls hard by us was eager and incessant enough to make us lose many effects, passages, and purposes of the composer. M. Berlioz is not one of those writers who should be judged after having been heard only by halves. Still, since the work has made a noise in Paris, has been generally praised, and draws large audiences, we must state, that our impression is a strong preference for the second part,—"La Fuite,"—the portion first published, and written by M. Berlioz (as his pleasant letter to Mr. Ella has informed the world) in masquerade. There seemed nothing to us in either '*Herod's Dream*' or the '*Arrival at Sais*' for clearness, expression and antique simplicity approaching the narrative air, from "*La Fuite*," sung by Signor Gardoni at our Philharmonic Concert and given in Paris by M. Jourdan, and deservedly *encored*. The first and third parts of the Oratorio, to our present apprehension, are in the author's wonted manner, on which we need not again record our opinion. The preference of this, by one who can write so clearly when it pleases him to write as other men have done, and the selection of confusion (not arrangement) of details, as an individuality, seems to us among the most perplexing examples of self-delusion that the history of Art has presented,—belonging, it may be, to the days in which we are living, but therefore none the less signal and strange. M. Berlioz in '*L'Enfance*' has, like Herr Wagner, been his own librettist, and has arranged his book with taste and dramatic contrast. How far this union of poet and musician in one leads to a complete expression in music of the poet's thought,—how far it may tempt him (being fully possessed with his own purposes) to forget that his audience is not so deep in his confidences to indicate *merely* that which a co-operating artist would work out clearly, is a speculation which has frequently recurred to us of late days, and never more strongly than on Saturday last, while following the words of '*L'Enfance de Christ*,' or listening to the sounds with which they have been mated by their writer. But these are too delicate and difficult matters to be settled at the close of a sketch of a Lenten week in the French capital.

MUSICAL AND DRAMATIC GOSSIP.—The *Royal Italian Opera*, Covent Garden, opened on Thursday night with '*Il Conte Ory*.' Next week we may offer some remarks on the performance and on the prosperity of the operatic season.

Something concerning the value of a "star," and throwing light, also, on the gains which can accrue to the French author and musician, when their labours are successful, is to be found in a late column of the *Messenger des Théâtres*. This sets forth that the gains of MM. Scribe and Meyerbeer, on the first hundred and one performances of '*L'Etoile*,' have amounted to 1,350*l.* for each gen-

tleman:—this sum not including any sums realized by sale of the *libretto* or of the music, nor from right of representation in provincial or foreign theatres.

The treasurer of Drury Lane Theatre for a long period, and connected with it for fifty-eight years, Mr. William N. Dunn, died at Norwood on the 3rd instant. He was originally placed in the office of assistant clerk to the theatre, at the age of fifteen, by Mr. Sheridan, and afterwards became secretary to the proprietors. His acquaintance with dramatists and actors was accordingly extensive; and his anecdotes of Sheridan himself, to whom he had acted as private amanuensis, were numerous. Living thus nearly all his life behind the scenes, his manners were nevertheless untainted by theatrical artifice; and, in fact, his character was distinguished for its simplicity and earnestness. He possessed, it is said, much literary taste.

MISCELLANEA

Public Galleries on Saturday.—"Some time since you called attention to the fact of the closing of the British Museum and National Gallery on Saturday, in connexion with the early closing of the warehouses in the City, and even at the West-End, on that day. Now, although this early closing movement has progressed, and is still progressing (you announced last week the Publishers having joined the movement)—no attempt has been made to open these places to the great numbers of young men and women, many of them of a very intelligent class, quite capable of appreciating, and desirous of availing themselves of, the benefit of them, but prevented from so doing on every other day in the week. Not only the National Gallery and the British Museum, but the Vernon Gallery, the Soane Museum, and, I believe, several others of our public exhibitions are entirely closed, and the Crystal Palace is virtually so to the classes referred to, from the fact of the price being so high on that day. I have heard it suggested, and with much reason, that it would be a great boon to open them for perhaps one day in the week at a very early hour in the morning, as it is now light at about six o'clock,—but even this would not meet the evil. Is it impossible to alter the days of admission? Surely, if it is necessary to close them for two days in the week, Saturday need not be one of those. Earnestly entreating your attention to this subject, and, if possible, your influence to promote a change, I am, &c. E. T. P."

The Golden Lecturer.—A Correspondent says:—"I have waited to see whether the statement in the *Athenæum* of March 24, that Henry Melvill, the schoolfellow of James Silk Buckingham, was the present 'Golden Lecturer,' would be contradicted, for I cannot help thinking that it is a mistake. Henry Melvill, the Golden Lecturer, was born, I believe, in the year 1799,—James Silk Buckingham in the year 1786,—a difference of thirteen years,—much greater than is often found between contemporaries even in the public schools where boys remain till they are of an age to enter the Universities. But it appears that Buckingham went to sea at nine years old, four years before the present Henry Melvill was born; unless, therefore, he returned to school after his voyage, there must be an error as to the identity of his schoolfellow."

Wellington Clock.—"You have once or twice spoken approvingly in your journal of the elegant clock-tower which now adorns the south end of London Bridge; perhaps you are not aware that although finished many months ago, as far as the stone-masons, painters and glaziers are concerned, the horologist might have gone to add the organ of order to certain *crania* in the Crimea, or he may be thus engaged at home, for any sign which the hollow-eyed case yet exhibits of the clock. A word in your columns would, no doubt, draw forth the reason of the delay, and, may be, expedite the movements of those whom we have to thank for it. As one of the many who cross London Bridge twice a day, I speak from experience in saying that the completion of the Wellington Clock would be a great boon, if only to correct the chronic derangements of many of its neighbours. I am, &c. A. C."

Chouse.—"Possibly your Correspondent may not be aware, and may be glad to be informed, of a very interesting note on the subject of the word 'Chouse,' by the late Sir Henry Elliot, one of our most distinguished Orientalists, in his '*Bibliographical Index to the Mohammedan Historians of India*,' published in Calcutta about 1849. I regret that not having my copy of the work in this country, I am unable to specify the page. I am, &c. R. M."

TO CORRESPONDENTS.—Leta—B. T.—L.—W. B.—W. T.—S. R.—A. M. D.—C.—E. L.—Blackheath—M. N.—received.

For the convenience of Subscribers residing in remote places, the weekly numbers are reissued in Monthly Parts, stitched in a wrapper, and forwarded with the Magazines.—Subscriptions for the Stamped Edition for the Continent, for not less than Three Months, and in advance, are received at BAUDRY'S LIBRARY, 3, Quai Malaquais, Paris, or at the Publishing Office, 14, Wellington Street North, Strand, London. For France and other Countries not requiring the postage to be paid in London, 2*fr.* or 1*l.* 2*s.* the year. To other Countries, the postage in addition.

VISITORS' COMPANION to the PARIS EXHIBITION.
Just ready, Fifth Edition, with important additions, and a Key
to French Pronunciation, in a portable pocket volume, price 3s.
in limp cloth; or post free on receipt of 60 stamps.

LE PAGE'S FRENCH PROMPTER:
A General Handbook of Conversation in English and French,
alphabetically arranged, containing all the words and phrases in
constant use.

By Mons. LE PAGE, Author of 'L'Écho de Paris,' &c.
"It supplies travellers, families, and students with a ready and
complete translation of their thoughts, on all common occur-
rences."—*Economist*.

EASY LESSONS IN FRENCH for JUVENILE PUPILS.
New Edition, with additions, price 3s.

**LE PAGE'S FRENCH MASTER for BEGIN-
NERS; or, Easy Lessons in French, for Juvenile Pupils.**

"Le Page's tabulation of the verb is as complete as it is
good; his Syntax is lucid and scholar-like; and his Exercises are
well graduated, and likely to exercise the student's mind with his
memory."—*Gentleman's Magazine*.

Now first published, price 5s. cloth,
**LE PAGE'S JUVENILE TREASURY of
FRENCH CONVERSATION.** With the English before
the French.

"We do not know of a better book for the student than this."
Weekly Times.

Just out, the Twenty-second Edition, price 4s. neatly bound,
LE PAGE'S L'ÉCHO de PARIS; being a
Selection of Phrases a person would hear daily if living
in France. With a Vocabulary of the Words and Idioms.
"This is decidedly the best book we have seen for aiding the
instruction of English children in the rudiments of the French
language."—*Morning Post*.

KEY to LE PAGE'S L'ÉCHO de PARIS.
Now first published, price 1s. 6d.

**LE PAGE'S FINISHING EXERCISES in
FRENCH CONVERSATION;** being a Key to 'L'Écho de
Paris.'

"This Key will add materially to the convenience of the teacher,
and facilitate the progress of the pupil."—*Morning Advertiser*.

Tenth Edition, with Notes, price 5s. neatly bound,
**LE PAGE'S GIFT of FLUENCY in FRENCH
CONVERSATION;** a set of Exercises for the Learner of
the French Language, calculated to enable him, by means of prac-
tice, to express himself fluently on the ordinary topics of life.

KEY to LE PAGE'S GIFT of CONVERSATION.
Third Edition, price 1s. 6d. sewed.

LE PAGE'S LE PETIT CAUSEUR; or,
First Chatterings in French; being a Key to the Gift of
French Conversation. The key gives the correct translation of
the same into French, thereby showing which is the proper ex-
pression for every topic of life.

**MONS. LE PAGE'S COURSE of INSTRU-
TION in the French Language** is unquestionably the easiest
and quickest hitherto adopted.

"Without attempting any royal road to the attainment of the
French Language, and without pretending that it can be acquired
at sight, or learned without a master, M. Le Page has, in his
excellent series of educational works, rendered a thorough know-
ledge of that language comparatively easy. His system is pecu-
liar and original, and has long since been stamped with public appro-
bation."—*Edin. Weekly Messenger*.

Edinburgh Wilson, 11, Royal Exchange; and Messrs. Longman.

MR. NEWBY'S
NEW PUBLICATIONS.

A Second Edition, in 3 vols. 48s. (in the Press.)
**THE LITERARY LIFE and CORRESPONDENCE
OF THE
COUNTESS of BLESSINGTON.**

By R. MADDEN, Esq.
Author of 'Travels in the East,' 'Life of Savonarola,' &c.
"We may, with perfect truth, affirm, that during the last
fifty years there has been no book of such peculiar interest
to the literary and political world."—*Morning Post*.
"The book is rich in matter which must interest, and will fur-
nish its quota of anecdote to the literary records of the first half
of the century."—*Athenæum*.
"Since the 'Life of Hazdon' this is the most interesting bio-
graphy which has been published. Dr. Madden knows how to make a
book readable."—*Douglas Argosy*.
"It contains something about every one who has been anybody
for the last quarter of a century, of either sex and all countries,
from the Duke of Wellington to Lola Montes—from Brougham to
Bonaparte—from 'Boz' to Rachel, from Charles Mathews to the
Queen of England."—*Liverpool Advertiser*.

In 1 vol. with coloured Plates, 10s. 6d.
**NINE YEARS' RESIDENCE IN
RUSSIA,**
From 1815 to 1854.
By ROBERT HARRISON.

THE POPULAR NEW NOVELS.
THE DWARF.

"The author of this book possesses no common mind or attain-
ments. The dignity and eloquence of a sage speak forth in every
page, and the result is a novel that Scott or Bulwer may have
equalled, but has never surpassed."—*Herald*.

In 3 vols. 31s. 6d.
THE STORY of a NUN.
"We must congratulate Mr. Newby on his 'mille resources' of
clever writers when he can send us three such good specimens as
'The Warhawk,' 'The Story of a Nun,' and 'Married Women.'"
Freemasons' Mag.

In 3 vols. 31s. 6d. (this day.)
THE CAREER of a RISING MAN.
By the AUTHOR of 'ARTHUR CLIFTON.'

SIR CHARLES LYELL'S WORKS.Now ready, *Fifth Edition*, thoroughly revised, with 750 Woodcuts, 8vo. 14s.**A MANUAL OF ELEMENTARY GEOLOGY;**

Or, the ANCIENT CHANGES of the EARTH and its INHABITANTS, as illustrated by its GEOLOGICAL MONUMENTS.

By SIR CHARLES LYELL, F.R.S.

"It is now more than three years since the appearance of the last Edition. In that interval the science of Geology has been advancing as usual at a rapid pace, making it desirable to notice many new facts and opinions, and to consider their bearing on the previously acquired stock of knowledge. In my attempt to bring up the information contained in this Treatise to the present state of the science, I have added no less than 200 new illustrations and 140 new pages of text, which, if printed separately and in a less condensed form, might have constituted alone a volume of respectable size."—*Author's Preface*.

Also, *Ninth and revised Edition*, Woodcuts, 8vo. 18s.

LYELL'S PRINCIPLES of GEOLOGY; or, the Modern Changes of the Earth and its Inhabitants, as illustrative of Geology.

Also, *Third and Cheaper Edition*, Map, 4 vols. post 8vo. 6s. each,

LYELL'S TWO VISITS to NORTH AMERICA, CANADA, and NOVA SCOTIA: with GEOLOGICAL OBSERVATIONS.

JOHN MURRAY, Albemarle-street.

THE INFALLIBLE PROCESS in PHOTOGRAPHY.

Just ready, 2s. 6d. bound in cloth; by post, 3s.

THE CALOTYPE PROCESS.—A HANDBOOK to PHOTOGRAPHY on PAPER.

By THOMAS SUTTON, B.A., of Corpus College, Cambridge.

The Process described in this treatise is so certain that it may fairly be called infallible. It gives the utmost clearness and sharpness of definition, and renders admirably the atmospheric effects of landscape. The certainty of this Process consists in the fact, that the mode of development is adapted to the exposure that may have been given to the picture, so that over-exposure is scarcely possible, and the details of the deepest shadows may in this way be fully brought out without injury to the lights; and intense blacks may always be obtained. It is peculiarly the Process for the tourist, and pictures of immense size may be taken with great certainty.

The author will be in attendance at the Photographic Institution for a few weeks, for the purpose of demonstrating the Process to Pupils, at a charge of Three Guineas each.

Photographic Institution, 168, New Bond-street; and Low & Son, 47, Ludgate-hill.

Just published,

THE THEORY and PRACTICE of NOTES of LESSONS, adapted for the use of Teachers, Students in Training, and Pupil-Teachers; with numerous Examples. By JOHN JONES, Certificated Teacher, Head Master of the Countess of Harcourt's School, Hinkley.

London: Simpkin, Marshall & Co. Stationers' hall-court.

This day is published, demy 8vo. price 1s., Part III. of

POLAND: its HISTORY, CONSTITUTION, LITERATURE, MANNERS, and CUSTOMS.

By COUNT VALERIAN KRASINSKI.

Author of 'The History of the Reformation in Poland,' 'Pan-Slavism and Germanism,' 'Sketch of the Religious History of the Slavonic Nations,' &c.

* * * To be continued on the 1st of each month, and completed in Six Parts.

The object of Count Krasinski's book is two-fold: to show that the past of Poland was not shameful, and that her future is not desolate; and, as far as he has yet written, he displays the spirit of an historian, and brings his countrymen to judgment freely; but, with no disposition to convert history into advocacy, he lays open the annals of a brave, free, and liberal people, exhibiting in their rashness proofs that indomitable courage which is the soul of patriotism, and which, in their prostration, forbids them, like the Roman and the Venetian, to despair of their commonwealth.

Althowana.

London: Chapman & Hall. Edinburgh: Johnstone & Hunter.

TO LEGATEES, EXECUTORS, SOLICITORS, INSURANCE OFFICES, &c.

Price 5s.

GOVERNMENT SUCCESSION DUTY TABLES, for the Use of Solicitors and others concerned in the payment of the NEW DUTIES now levied on Successions.

Computed by ALEXANDER GLEN FINLAYSON, Actuary of the National Debt and Calculator of the Tables of the Values of Life Interests Scheduled with the present Act.

By the recent Act, 16 and 17 Victoria, Cap. 51, every description of property whatsoever inherited by any person is liable to a tax on the value of the Succession, the amount of which duty depends on the degree of consanguinity or position of the Inheritor in relation to the Testator. The interest also of every Successor in real property is now subjected to the payment of the value in ready money of a Life Annuity equal to the yearly value of such property, and is similarly taxed in proportion to the degree of relationship. The value of the Inheritance is settled with the proper authorities at the Legacy Duty Office on the basis of the Tables now advertised. And these Tables show at a glance the different per-centages to be paid from 1 to 10 per cent., as the case may be, on the value of the Succession, which is also set forth in their contents.

London: Chapman & Hall, 193, Piccadilly.

Just published, price 2s. 6d.

ON GOUT and RHEUMATISM; and the CURATIVE EFFECTS of GALVANISM; with Cases.

By R. M. LAWKANCE, M.D.

Also, a large assortment of ROSS'S Portrait and Landscape LENSES.

PHOTOGRAPHY ON PAPER.

Every requisite for practising the Calotype process may also be seen in the Apparatus room, including Buckle's Brushes, Shallow Glass Dishes for developing negatives, with case and covers, Deep Porcelain Dishes, for Washing the Iodized Paper, &c. &c.

An excellent Negative Paper, well adapted for lodizing, after the method followed and recommended by Mr. Sutton, price 4s. per quire, or 3l. 10s. per ream, 18 by 15.

N.B. The stock (50 reams) has now been kept two years. This paper may also be had ready iodized.

XYLO-IOIDE OF SILVER.

This important photographic preparation is exclusively used at all the Photographic Establishments. Its superiority is universally acknowledged. Testimonials from the best photographers and principal scientific men of the day warrant the assertion that hitherto no preparation has been discovered which produces uniformly such perfect pictures, combined with the greatest rapidity of action.

In all cases where a quantity is required, the two solutions may be had at wholesale price in separate bottles; in which state it may be kept for years, and exported to any climate. Full instructions for use.

CAUTION.—Each bottle is stamped with a red label, bearing my name and address.

RICHARD W. THOMAS, CHEMIST,

10, PALL MALL,

to counterfeits which is felony.

NITRATE OF SILVER BATH for the above preparation may be always obtained of R. W. Thomas, ready made, at a cost little more than the price of ingredients used.

CRYSTAL VARNISH.

PREPARED FROM THE FINEST AMBER.

This valuable Varnish, for protecting Negative Pictures, does not require the application of any heat to the plate. The coating will be found free from stickiness, hard, and transparent. It dries immediately.

HYPO-COLOURING BATH.

FOR RENDERING THE POSITIVES ON PAPER DARK AND RICH IN COLOUR.

CYANOGEN SOAP.

FOR REMOVING ALL KINDS OF PHOTOGRAPHIC STAINS.

The genuine is made only by the inventor, and is secured with a red label, bearing this signature and address,

RICHARD W. THOMAS, CHEMIST,

The business of the Company comprises Assurances on Lives and Survivorships, the Purchase of Life Interests, the sale and purchase of contingent and deferred Annuities, Loans of Money on Mortgage, &c.

This Company was established in 1807, is empowered by the Act of Parliament 53 Geo. III., and regulated by Deed enrolled in the High Court of Chancery.

The Company was originally a strictly Proprietary one. The Assured now participate quinquennially in four-fifths of the amount to be divided.

To the present time (1854) the Assured have received from the Company, in satisfaction of their claims, upwards of 1,300,000l.

The amount at present assured is 3,000,000l. nearly, and the income of the Company is about 130,000l. per annum.

At the last Division of Surplus, about 120,000l. was added to the sums assured under Policies for the whole term of Life.

The lives assured are permitted, in time of peace, without extra charge, to reside in any country (Australia and California excepted) north of 33 degrees north latitude, or south of 33 degrees south latitude, or to pass by sea (not being seafaring persons by profession) between any places lying in the same hemisphere, and not within those limits.

Assurances effected by persons on their own lives are not rendered void in the event of death occurring by suicide, duelling, or the hands of justice, unless such death take place within one year from the date of the Policy.

All Policy Stamps and Medical Fees are now paid by the Company.

The Annual Reports of the Company's state and progress, Prospectuses and Forms, may be had, or will be sent, post free, on application at the Office, or to any of the Company's Agents.

E. R. FOSTER, Resident Director.
ANDREW FRANCIS, Secretary.

Compasses, used on board Her Majesty's Yacht. Ladies' Gold Watches, 8 guineas; Gentlemen's, 10 guineas. Strong Silver Lev

CLEOPATRA NEEDLES.—Never Rust.—Manufactured and warranted by **LINNEUS GEORGE BANKS**, (son of George Banks, F.L.S., designer and founder of the Royal Devonport Arms, &c.), Cleopatra's Needle Works, Redditch, N.B. These Cleopatra Needles, the very best, and in never-rust envelopes, do not burst their cemented nor strew the needle drawer all 'sides and evens,' said as the old style of paper quivers, paper paste, and gum wrappers, &c.—Caution: Beware of base imitations and base imitators, as none are genuine except on which this name is stamped, "L. G. Banks, Redditch." Sold by all respectable houses in London and throughout the known world. Samples of 100 sent free on receipt of 13 stamps.

RUPTURES.—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of a steel spring, so often painful in its effects, is here avoided; a soft and elastic bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAN PAD and PATENT LEVER fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the enclosed form of the two inches below the hips, being sent to the Manufacturer, Mr. WHITE, 325, Piccadilly, London.

ELASTIC STOCKINGS, KNEE CAPS, &c.—VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price, from 7s. 6d. to 16s. each; postage 6d.
MANUFACTORY, 225, PICCADILLY, LONDON.

BERMUDA ARROWROOT, unremoved from the tin cases in which it is shipped, weight, case exclusive, 261 lb., price 50s. Small quantities can be had at 2s. 6d. per lb.
JAMES EPPS, Homoeopathic Chemist, Egyptian Hall, Piccadilly; 112, Great Russell-street, Bloomsbury; and 82, Old Broad-street, City.

THE IMPROVED CHARCOAL RESPIRATOR.—The only Respirator (excepting the original cumbersome one) in which the object sought by Dr. Stenhouse, viz. the purification of an impure or infected atmosphere, is entirely effected; the construction of this Respirator completely prevents the inhalation of any air that has not come in contact with the charcoal. As an instrument for simply warming the air it also supersedes the ordinary Respirator.
To meet the expressed views of Dr. Stenhouse, "that inventions for the prevention of disease ought to be sold at the lowest possible price," we have offered it to the public at as low a cost as we believe a perfect instrument can be constructed.—Price 5s. 6d.; or post free on receipt of 6s. DABRY & GOSDEN, 140, Leadenhall-street, London.

DINNEFORD'S FAMILY MEDICINE DIRECTORY, containing a variety of Practical Information especially adapted for the Clergy, Ladies, Schools, and Heads of Families, in the absence of Professional Assistance. New Edition, price 2s. 6d., by post 3s.
MEDICINE CHESTS in great variety; a large Assortment of Patterns, at prices from 10s. to 101.
172, New Bond-street, London.

DINNEFORD'S PURE FLUID MAGNESIA has been for many years sanctioned by the most eminent of the Medical Profession as an excellent remedy for Acidities, Heartburn, Headache, Gout, and Indigestion. As a Mild Aperient it is admirably adapted for delicate Females, particularly during Pregnancy; and it prevents the Food of Infants from turning sour during digestion. Combined with the ACIDULATED LEMON SYRUP, it forms an Effecting and Pleasant Draught, which is highly agreeable and efficacious.—Prepared by **DINNEFORD & CO.**, Dispensing Chemists, (and General Agents for the Improved Horse Hair Gloves and Belts), 172, New Bond-street, London; and sold by all respectable Chemists throughout the Empire.

THE "BABY'S" NEW FEEDING BOTTLE.—From the *Lancet*.—"We have seldom seen anything so beautiful as the nursing bottles introduced by Mr. Elam, of Oxford-street. Whether for weaning, rearing by hand, or occasional feeding, are quite unrivalled."—**BENJAMIN ELAM**, 196, Oxford-street. 7s. 6d. Each bottle is stamped with my name.

METCALFE & CO'S NEW PATTERN TOOTH BRUSH & PENETRATING HAIR BRUSHES.—The Tooth Brush has the important advantage of searching thoroughly into the divisions of the Teeth, and is famous for the hairs not coming loose. An improved Clothes Brush, incapable of hurting the hair, and a Penetrating Hair Brush, with the durable unbleached Russian bristles. Fish Brushes of improved graduated and powerful friction. Velvet Brushes, which act in the most successful manner. Smyrna Sponges.—By means of direct importations, Metcalfe & Co. are enabled to secure to their customers the luxury of a Genuine Smyrna Sponge. Only at **METCALFE & CO'S** Sole Establishment, 130B, Oxford-street, one door from Holles-street.
Caution.—Beware of the words "From Metcalfe's," adopted by some houses.
METCALFE'S ALKALINE TOOTH POWDER, 2s. per box.

LONDON and RAMSGATE.—T. M. ORDISH, the celebrated HAIR-CUTTER and DRESSER, Hair worked in Bracelets, Chains, Rings, and other articles.—9, Wigmore-street, nine doors from Cavendish-square; and at 6, Harbour-street, Ramsgate.

BEAUTIFUL HAIR, WHISKERS, &c., are invariably produced in Two or Three Weeks by **COUPELLE'S CELEBRATED CRINUTRIAR**, which is universally acknowledged as the only preparation to be really depended upon for the unfading production of Hair, as also checking Greyness, Baldness, &c., and rendering the Hair luxuriant, curly, and glossy.—*Mr. Williams, 8, Leathers-lane, Liverpool.* "I can now show as fine a head of hair as any person, solely from using your Crinutriar."—*Sergeant Croxon, Longford Barracks, Ireland.* "Through using your Crinutriar, I have an excellent moustache."—*Mrs. Carter, Pangbourne, Berks.* My head, which was quite bald, is now covered with new hair."—Price 2s. per packet, through all Chemists, &c.; or sent free for 24 penny stamps, by **ROSALIE COUPELLE**, 60, Castle-st., Newman-st., Oxford-st., London.—"FIVE MINUTES' ADVICE" on the Hair; with numerous startling and indisputable Testimonials; List of Country Agents, &c., post free for two stamps.—Beware of imitations under closely similar names.

KNOW THYSELF!—Miss GRAHAM gives truthful Delineations of Character from an examination of the handwriting. Send a specimen of the writing of self or friend, and state the sex and age, with 13 penny post stamps to Miss Graham, 40, Chichester-place, King's-cross, London, and you will receive a minute detail of mental and moral qualities, talents, tastes, affections, virtues, failings, &c. of the writer, and many other things hitherto unsuspected.

THE HUMAN HAIR.—Miss GRAHAM'S NIUKRENE is infallible in reproducing the hair in baldness from any cause, strengthening weak hair, preventing its falling off and checking greyness, and is guaranteed to produce moustaches, whiskers, &c. in two or three weeks. Upwards of 12,000 testimonials, received during the last eight years, sufficiently attest its extraordinary value. Sent post free on receipt of 24 penny post stamps by Miss Graham, 40, Chichester-place, King's-cross, London. Dr. Wilson, in his work, says—"I know of no stimulant for the hair equal to Niukrene." Dr. Ryan says—"It must be useful in the greater majority of cases."

MISS KIRBY, 29, Mortimer-street, Caven-dish-square, having received numerous Orders for her **EXQUISITE POMADE for RESTORING the HAIR**, has appointed the following Agents:—Forster, 52, and Baker, 77, King's-road, Brighton; Savory & Moore, High-street, Cheltenham; Wells, Sturges-street, Dover; Clatter, Chemist, Watford; Morris, 29, High-street, Kensington; and 25, High-street, Islington; M'Donnell, 174, Regent-street; Adolphus, 128, Oxford-street; and Barclay, Farringdon-street.

DR. DE JONGH'S LIGHT BROWN COD LIVER OIL.

This OIL, long known, extensively prescribed, and highly appreciated on the Continent, has now, in consequence of its proved superior power and efficacy, acquired the general and entire confidence of the Medical Profession in this country. It is of the purest and finest quality, free from admixture and adulteration, or the usually repulsive and nauseous flavour, or sickly after-taste of the pale Oil, or of the coarse brown Oil commonly sold, though totally unfit for medicinal use. It is as low in price per ounce as any other genuine Cod Liver Oil, whilst its regular and speedy effect render it incalculably cheaper. Medical and scientific testimonials of the highest character delivered or forwarded gratis on application.—Sold in bottles, capsuled and labelled, with Dr. de Jongh's Stamp and Signature, without which NONE ARE GENUINE, by **ANSAR, HARRISON & CO., 77, STRAND, LONDON**, Dr. de Jongh's Agents; and by sole accredited Chemists in Town and Country.—Half-pints (16oz.) 2s. 6d.; Pints (20 oz.) 4s. 9d.; Quarts (40 oz.) 9s. IMPERIAL MEASURE.

NO MORE TOOTHACHE nor EXTRACT-ION OF TEETH.—Every one should use **MOULLER'S TOOTH ELIXIR**, for the PRESERVATION and BEAUTIFYING OF THE TEETH. Toothache, that HITHERTO INCREASED maddly, can now be EFFECTUALLY cured, and is better prevented, by the use of this Elixir, which entirely SUPERSEDES extraction and all the present INFECTUAL METHODS.—Sold in boxes at 5s. and 2s. 6d. each, or postage stamps, by **GEORGE JAS. HOHEN, 21, Salisbury-street, Liverpool.**

NO MORE PILLS NOR ANY OTHER MEDICINE.—For Indigestion, (Dyspepsia,) Constipation, Nervous, Billious, and Liver Complaints, Asthma, Bronchitis, Cough, Consumption, and Debility. By **DU BARRY'S** delicious **REVALENTA ARABICA FOOD**, which saves fifty times its cost in medicine.

A few out of 50,000 cures are here given.
Cure No. 71, of dyspepsia, from the Right Hon. the LORD STUART DE DECLES.—"I have derived considerable benefit from Du Barry's Revalenta Arabica Food, and consider it due to yourselves and the public to authorize the publication of these lines."
STUART DE DECLES."

From the Dowager-Countess of Castlesuart.
Cure 52,002.—"Received Countess of Dowager, 9th December, 1851. The DOWAGER-COUNTRESS OF CASTLE-STUART feels induced, in the interest of suffering humanity, to state that Du Barry's excellent Revalenta Arabica Food has cured her, after all medicines had failed, of indigestion, bile, great nervousness and debility of many years' standing. This food preserves the confidence of all sufferers, and may be considered a real blessing. Inquiries will be cheerfully answered."

Cure No. 49,832.—"Fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness at the stomach and vomiting, have been removed by Du Barry's excellent food."

MARIA JOLLY, Waltham, Ling, near Diss, Norfolk.
11b, 2s. 9d.; 21b, 4s. 6d.; 51b, 11s.; 121b, 22s.; super-refined, 11b, 6s.; 21b, 11s.; 51b, 22s.; 101b, 38s. The 101b and 121b carriage free on receipt of a Post-office order.—Barry Du Barry & Co., 77, Regent-street, London; London Agents, Fortnum, Mason & Co., Fenchurch-street, 152, Piccadilly; and also at 60, Gracechurch-street; 49, Bishopsgate-street; 4, Chapside; 330, and 451, Strand; 55, Charing-cross; 54, Upper Baker-street.

COLES'S ALGA MARINA is the Concentrated Essence of the Sea-weed, containing in a highly condensed form all the virtues of those plants, to which medical authorities ascribe the principal benefits derivable from a residence by the Sea. It affords speedy relief and a certain cure in all cases of Acute or Chronic Rheumatism, Rheumatic Gout, Neuralgia, and other pains in the limbs and joints. It is now rapidly superseding all other external remedies in cases of Weakness, Relaxation, Contraction, Paralysis, Stiffness, Deformities, Swelling, Tumors, Scrofulous Diseases, and the Malformations of Rickets or Badly-nursed Children; and in all cases where friction is recommended, it will greatly increase its good effects. Sold in bottles, 2s. 9d., 4s. 6d., and 11s. each, by T. KEATING, 79, St. Paul's Church-yard, London, and all Chemists.
"All who should read the Preface to this book, which may be had, gratis, on application, and by post on inclosing six postage stamps."

DEAFNESS and NOISES in the HEAD.—Free of Charge, for the Protection and Instant Relief of the Deaf, a Book of 30 pages.—An extraordinary Discovery.—Just published, sent free by post, to any deaf person writing for it, by **STEPHEN A. HICKEY**, of the "Ear and Throat," who has cured extremely Deaf, by means of this book, permanently cure themselves, in any distant part of the world, without pain or use of any instrument. Thousands have been restored to perfect hearing, and for ever rescued from the snares of the numerous advertising dangerous unqualified pretenders of the present day. It contains lists of starting cures, published by Dr. F. R. HOGHTON, Member of the London Royal College of Surgeons, May 2, 1845; L. A. C. April 30, 1846; Consulting Surgeon to the Institution for the Cure of Deafness, 9, Suffolk-place, Pall Mall, London, where all letters are to be addressed.—Personal consultations every day between 11 and 4 o'clock.—Sufferers deaf 40 or 50 years have their hearing perfectly restored in half-an-hour without a moment's inconvenience. Testimonials and certificates can be seen from all the leading members of the Faculty, and from Patients cured.

PERFECT FREEDOM FROM COUGHS is insured by **DR. LOCOCK'S PULMONIC WAFERS**.

From Mr. J. W. F. Counsell, Bookseller, Ross, June 7, 1854.
"I have sold your Wafers, but not had time to say so, by those who use them;—I have found them excellent in Coughs myself."

Dr. LOCOCK'S PULMONIC WAFERS give instant relief and a rapid cure of Asthma, Coughs, and all disorders of the breath and lungs.

POSSIBLE and PUBLIC SPEAKERS they are invaluable for clearing and strengthening the voice. They have a most pleasant taste. Price 1s. 10d., 2s. 9d., and 11s. per Box. Sold by all Chemists.

HOLLOWAY'S PILLS singularly efficacious in CURING BILE and INDIGESTION.—These Pills act so peculiarly on the bowels, and have so good an effect on the system, that persons suffering from bile, indigestion, headaches, dimness of sight, loss of appetite, debility, nervousness, liver or stomach complaints, should have immediate recourse to them, as there is no other medicine to be compared with the properties they possess. They not only cure the bowels, but they also cure all the evils of life. The cures effected by their use convince every one that they are the very best family medicine extant.—Sold by all Venders of Medicine; and at Professor Holloway's Establishments, 244, Strand, London, and 80, Maiden-lane, New York.

*In Weekly Numbers, price 3d.; and Quarterly Volumes, price 4s. 6d.,
Handsomely Bound in Cloth,*

ORR'S CIRCLE OF THE SCIENCES:

A SERIES OF TREATISES

ON THE FUNDAMENTAL PRINCIPLES AND PRACTICAL APPLICATIONS OF SCIENTIFIC KNOWLEDGE.

WITH NUMEROUS ILLUSTRATIVE ENGRAVINGS ON WOOD.

THE FOLLOWING SUBJECTS ARE ALREADY COMPLETED, AND MAY BE HAD, STITCHED IN AN ORNAMENTAL WRAPPER, OR IN CLOTH, AT THE PRICES QUOTED:—

PHYSIOLOGY of ANIMAL and VEGETABLE LIFE. By Dr. BUSHNAN. Price 1s. sewed; 1s. 6d. cloth.

SIMPLE ARITHMETIC and its APPLICATIONS. By J. R. YOUNG, late Professor of Mathematics at Queen's College, Belfast. Price 6d. sewed; 9d. cloth.

THE PRINCIPAL FORMS of the SKELETON and the TEETH, as the Basis for a System of Natural History and Comparative Anatomy. By Professor OWEN. Price 1s. sewed; 1s. 6d. cloth.

GEOLOGICAL SCIENCE: including Practical Geology and the Elements of Physical Geography. By Professor ANSTED. Price 2s. sewed; 2s. 6d. cloth.

VARIETIES of the HUMAN SPECIES, introductory to the Study of History. By R. G. LATHAM, M.D. F.R.S. Price 9d. sewed; 1s. cloth.

ELEMENTS of ALGEBRA; with Definitions and Explanations of its Principles. By Professor YOUNG. Price 9d. sewed; 1s. cloth.

ON SERIES and LOGARITHMS. By the Rev. J. F. TWISDEN, M.A., late Scholar of Trinity College, Cambridge, and Mathematical Professor, Sandhurst College. Price 6d. sewed; 9d. cloth.

The completion of the above Treatises marks an epoch in this undertaking which the Conductors venture to think will justify them in an appeal to those among their fellow-citizens who are interested in the promotion of sound scientific knowledge. To CLERGYMEN, SCHOOLMASTERS, and DIRECTORS OF INSTITUTIONS for Adult Education and for Self-instruction more especially, they would point out the existence of a Work, recommended at once by the names of the eminent men who have contributed to its pages, and by the very moderate price at which it is published.

In the CIRCLE OF THE SCIENCES it has been the aim of the Conductors to have every subject treated in a philosophic spirit; not merely reproduced abridgments of larger Works or dry details of Art Processes, but a series of Treatises exhibiting the fundamental principles on which each branch of Science is based. It will probably be admitted that they have taken the best means of attaining their object when the names of Professor OWEN, Dr. LATHAM, Professors YOUNG and TWISDEN, Professor TENNANT, the Rev. WALTER MITCHELL, and Professor ANSTED are given as the writers of the Treatises already completed, or on the point of completion.

Amid so great a variety of subjects as the Work embraces, there are some which must involve references to the very foundations of philosophic speculation. It is proper, therefore, to indicate the path which in this respect, will be pursued. In treating of Physical Science, and the various phenomena by which the subject is illustrated, these Treatises will indicate the Baconian rule, that nothing in the phenomena themselves but uniform law is discoverable; but they will sedulously maintain the doctrine—without, however, going out of their path to do so—that Nature does manifest the existence of a Law Giver as well as a Law—of a personal Omnipotence superior to law—of a Creator who made the universe by His Fiat and maintains it by His Power.

The Volumes of the Series already completed, price 4s. 6d. each, cloth lettered, are as follows:—

ORGANIC NATURE, Vols. I. & II. | The MATHEMATICAL SCIENCES.
INORGANIC NATURE.

THE SUBJECTS NOW IN COURSE OF PUBLICATION ARE AS FOLLOWS:—

THE NATURAL HISTORY of VERTEBRATED ANIMALS. By W. S. DALLAS, F.L.S. **MECHANICAL PHILOSOPHY.** By the Rev. W. MITCHELL and ROBERT SCOTT BURN, Esq.

THE CHEMISTRY OF IMPONDERABLE BODIES.

MRS. LOUDON'S LADIES' FLOWER GARDEN.

ORNAMENTAL ANNUALS,

4to. cloth, price 1l. 15s.

ORNAMENTAL PERENNIALS,

4to. cloth, price 3l.

ORNAMENTAL BULBOUS
PLANTS,

4to. cloth, price 2l. 2s.

ORNAMENTAL GREENHOUSE
PLANTS,

4to. cloth, price 1l. 11s. 6d.

EACH SUBJECT FORMING A SEPARATE AND
INDEPENDENT VOLUME.

THIS series of works on Floriculture, though ranged in a consecutive form, is essentially distinct, and only presents to the reader the most *Ornamental Flowers*, which are described and illustrated in coloured groups.

Each Work being arranged according to the natural system, the whole series forms a comprehensive illustration of the different orders of Plants, which not only affords a general idea of their arrangement, but greatly facilitates the study of Botany.

The authoress, in addressing her readers, especially those of the gentler sex, judiciously remarks:—"The love of flowers is calculated to improve our best feelings, and subdue our bad ones; and we can hardly contemplate the beauty and richness of a flower-garden without feeling our hearts dilate with gratitude to that Almighty Being who has made all these lovely blossoms, and given them to us for our use."

Lithographed and richly-coloured Plates of about a thousand ornamental flowers illustrate the volumes, which are accompanied with a Glossary of botanic terms, an alphabetical List of the Authorities quoted, and a copious Index.

BRITISH WILD FLOWERS.

BY MRS. LOUDON.

"Ye Field Flowers! the gardens eclipse you, 'tis true;
Yet, wildings of Nature, I dote upon you;
For ye waft me to summers of old,
When the earth teemed around me with fairy delight,
And when daisies and buttercups gladdened my sight,
Like treasures of silver and gold."—CAMPBELL.

UNIFORM with the above. This volume is descriptive of British Wild Flowers. The object of the authoress has been to enable the uninstructed reader to ascertain the name, and some particulars respecting the genera, of any pretty flower picked up; therefore the volume will be found highly useful to those who have neither time nor opportunity to consult the larger works on the subject.

The volume is illustrated with sixty Plates, representing upwards of three hundred carefully drawn and highly coloured figures of the rarest ornamental wild flowers; and a copious Index completes the general attraction and utility of the work.

London: HOULSTON & STONEMAN, 65, Paternoster-row; WM. S. ORR & CO. Amen-corner, Paternoster-row.

THE ATHENÆUM

Journal of English and Foreign Literature, Science, and the Fine Arts.

No. 1434.

LONDON, SATURDAY, APRIL 21, 1855.

PRICE
FOURPENCE
Stamped Edition, 5d.

PRACTICAL GEOLOGY.—KING'S COLLEGE, LONDON.—Prof PENNANT, F.G.S. will commence a Course of TWELVE LECTURES on GEOLOGY, having especial reference to the important applications of the Science to MINING, ENGINEERING, ARCHITECTURE, and AGRICULTURE.—The Lectures will commence on WEDNESDAY Morning, April 23, at 9 o'clock. Fee 12. 11s. 6d.
R. W. JELF, D.D. Principal.

ROYAL AGRICULTURAL SOCIETY OF ENGLAND.
A LECTURE, by PROFESSOR WAY, 'On the Recent Researches on the Composition of the Atmosphere in relation to Agriculture,' will be delivered to the Members, at the Society's House, No. 12, Hanover-square, London, at Noon, on WEDNESDAY, April 25.
By order of the Council,
JAMES HUDSON, Secretary.

HORTICULTURAL SOCIETY OF LONDON.

Admittance 1s. Catalogues 6d. Open from 10 till dusk.

PATRIOTIC FUND for the RELIEF of the WIDOWS and ORPHANS of BRITISH OFFICERS engaged in the WAR with RUSSIA.—The Field of Battle, drawn by H.R.H. the Princess Royal.—The Committee, having obtained Her Majesty's most gracious Permission to publish an ENGRAVING in Chromo-lithography and Colours, by Drawing by H.R.H. the Princess Royal, the entire Profits to be devoted to the above-named object, beg respectfully to announce, that the PRINT will be a perfect fac-simile of the Drawing; that the execution of it has been intrusted to Mr. VINCENT BROOKS, and is rapidly advancing towards completion. Price 12. 1s. Subscribers' Names received by all Print and Bookellers in Town and Country; by the Publisher, J. HOCARTH, Haymarket, London; and at the Gallery, 121, Pall Mall.

EDUCATION.—The MISSES SMITH, late of Mornington-crescent, Regent's Park, inform their Friends that they have removed a few miles into the Country, and will be prepared to receive their usual number of PUPILS at their residence, THE BROADWAY, Plaistow, Essex, on TUESDAY, May 1st. Prospectuses, with terms and references, on application to the Rev. J. C. Harrison, 24, Queen's-road, Regent's Park; Rev. W. Spencer Edwards, 36, Gloucester-road, Regent's Park; Robert Johnston, Esq., 4, Camden-street, Camden town; Charles Wyatt Smith, Esq., Surgeon, High-street, Poplar; and the Misses Smith.

ST. JOHN'S WOOD PROPRIETARY COLLEGIATE SCHOOL, 25, St. John's Wood Park.
Head Master.—The Rev. THOMAS MARKBY, M.A., late Scholar of Trinity College, Cambridge, and Classical Master in King's College School, London.
Second Master.—H. DEIGHTON, Esq. M.A., Scholar of Queen's College, Cambridge.
The School is supported by the Proprietors holding transferable Shares of 21s. each, and by the Fees paid by the Pupils.
Each Proprietor has the right of nominating one Pupil at a time to the School at reduced fees.
R. HUDSON, Hon. Sec.
The Second Master RECEIVES BOARDERS at 24, Boundary-road.
The next Term will begin on TUESDAY, the 1st of May.

HYDE HOUSE SCHOOL, WINCHESTER.
—Dr. BEHR, assisted by Graduates from the Universities of Oxford and Cambridge, and foreign Masters (several of whom are resident with him), undertakes the EDUCATION of a LIMITED NUMBER of PUPILS, the Sons of Noblemen and Gentlemen, with a view to prepare them for the Public Schools, Naval and Military Colleges, or any of the various Professions.
His system of instruction is as follows:
1. The CLASSICS and MATHEMATICS—in which the Pupils will be thoroughly well grounded, according to the most approved methods.
2. The MODERN LANGUAGES—to which especial attention will be paid, and for the acquisition of which more than ordinary advantages are afforded.
3. The USUAL BRANCHES of an ENGLISH EDUCATION—all, or any of which, may be made more or less prominent in the plan of study, as may be deemed desirable in any particular instance.
4. FORTIFICATION, DRAWING, FENCING, and MILITARY TACTICS—in which the Military Class receives regular instruction.

The Establishment is divided into an Upper and a Lower School. Pupils in the latter division are thus kept separate from their seniors, both in the hours of study and recreation.
References may be made to the parents of Pupils and others, including several Noblemen, Dignitaries of the Church, and individuals of high standing in society.
Terms.—If under twelve years of age, 50 Guineas per annum; above that age, 60 Guineas. No extras whatever, except Books and Medical Attendance.
THE SPRING TERM COMMENCED ON TUESDAY, April 10.

DR. KINKEL'S CLASSES FOR LADIES, in GERMAN and the HISTORY of ART and MADAME KINKEL'S CLASSES in SINGING and HARMONY, will RECOMMENCE, after April 16, at their residence, 6, Eastbourne-terrace. Twelve Lectures, in English, on the History of Modern Art, from the Sixteenth Century. An advanced German Class, for the History of German Literature during the Nineteenth Century, with practice in Composition and Conversation. Two German Evening Classes for Gentlemen.—Particulars in the Prospectus, to be applied for to Dr. KINKEL, 6, Eastbourne-terrace, Paddington.

A SOUND CLASSICAL, MATHEMATICAL, SCIENTIFIC and GENERAL EDUCATION is afforded on moderate Terms at the LICHFIELD GRAMMAR SCHOOL.—For Prospectus apply to the Rev. J. G. CUMMING, M.A. F.G.S., Head Master.

BRIGHTON.—EDUCATION.—There are VACANCIES in a first-class Establishment where only Twelve Young Ladies are received. A Parisian Governess resides in the house, Signor F. Labache, Herr Kuhn, Messrs. E. de Paris, Michau, and other eminent Professors attend. References to Parents of Pupils.—For Terms, &c. address Misses B., care of Mr. Rolandi, 30, Berners-street, Oxford-street, London, where Prospectuses can also be had.

HOME EDUCATION.—A Married Lady, residing in a healthy village, 12 miles from London, having two little girls of her own, wishes to take charge of a few more, to EDUCATE with them. They will have the advantage of a superior Governess, with maternal care and solicitude. The highest references will be given and required. Terms moderate.—Address A. S. Post-Office, West Wickham, near Bromley, Kent.

MISS POLE, having made arrangements for the reception of EIGHT YOUNG LADIES as RESIDENT PUPILS, in addition to her Morning Pupils, has the honour of announcing that the Studies commenced April 4th, at her residence, 24, Grosvenor-bath, where the Plan of Study and Prospectuses may be obtained.

PRIVATE TUITION.—A Married Clergyman, with no Parochial Duty, who is preparing a few Pupils, two for Addiscombe and others for Woolwich and Eton, will have a VACANCY after Easter for a Pupil, to whose health or Education great personal attention is required.—Address the Rev. E. R., Post-office, Tonbridge, Kent.

A GRADUATE and SCHOLAR of CAMBRIDGE wishes for an ENGAGEMENT as TRAVELLING TUTOR to any Nobleman or Gentleman. He speaks French well, and has good testimonials.—Direct X. Y., care of Mr. C. Wilson, 37, Wigmore-street.

LESSONS in LITERATURE and COMPOSITION.—Manuscripts prepared for the Press.—Address to A. B. 31, Newman-street, Oxford-street.

EDITOR.—A Gentleman who is now editing a Newspaper of large circulation in the West of England, will in several weeks be open to a fresh ENGAGEMENT.—Address to W., care of John Corderoy, Esq., 3, Kennington-green, Lambeth.

TURKISH LANGUAGE.—WANTED, INSTRUCTION in. Address X. Messrs. May, King-street, St. James's.

THE SEAT OF WAR.—The Undersigned has established himself at CONSTANTINOPLE, as Agent for Steamers and Sailing Ships engaged in the TRANSPORT SERVICE. He will be prepared to make ADVANCES to Captains on LETTERS of CREDIT, also to take Charge of Parcels or Letters and be glad to make his services generally useful.
Constantinople, March 15, 1855. WILLIAM HADFIELD.

WANTED, a copy of the ABBOTSFORD EDITION of ROB ROY and IVANHOE, also a copy of Vols. III. and IV. of the same Edition.—Apply, stating price, &c. to No. 349, Street Brothers, 11, Serle-street, Lincoln's Inn-fields, London.

TO BOOKSELLERS' ASSISTANTS.—WANTED, a YOUNG MAN, of good address, to take the active management of a business, for thirty years established, in a Commercial and Shipping City, with a population of 400,000 inhabitants. As he would be admitted into the concern with the ulterior view of becoming a Partner, one with some little capital would be preferred. The receipts for the last four years have been above 8,000l. annually.—Address Mr. Brooks, care of Mr. Scripps, Advertising and Newspaper Agent, 13, South Molton-street, Bond-street.

A YOUNG ARTIST would be glad to find EMPLOYMENT in making Drawings on the Block, or in illustrating a Book or Periodical. Specimens and testimonials can be seen on addressing Giorro, M. Botyville, 5, Bartholomew-close, City.

TO ARTISTS, SCULPTORS, SCHOOLMASTERS, &c.—TO BE LET or SOLD, at Kijburn, near the Gate and Railway Station, a HOUSE, containing Dining, Drawing, and Breakfast Rooms, five Bed Rooms and Dressing Room, Housekeeper's Room, two Kitchens, &c., small garden, with or without a large Studio, well lighted, and built expressly for a Painting House. Immediate possession may be had.—Apply to Mr. MILLAR, 4, Wellington-road, St. John's Wood; or Mr. GLASIER, 41, Charing-cross.

INVESTMENT and APPOINTMENT.—A Gentleman wishes to MEET WITH a COLLEAGUE, who can command about 300l., to assist without risk in carrying out a successful undertaking, and to act as Managing Director. The Appointment would suit a Barrister, Retired Officer, or Gentleman desirous to increase his income by employment of a small portion of his time. The best references will be given and required. None but Principals or their Solicitors will be treated with.—For address and personal interview apply to X. Y. Z., Secretary, Messrs. Wm. Thomas & Co., 19 to 21, Catherine-street, Strand.

TO PUBLISHERS and Others.—A PRINTER having a Composing-Room unoccupied, would be glad to undertake any Periodical or other Publication on very low terms. The situation is central. For further particulars apply, by letter only, to H. H., 8, King's Bench-walk, Temple.

BRIGHTON.—A HOME for INVALID and ORPHAN CHILDREN of the Higher Classes, in a superior Mansion in the most delightful and healthy part of Brighton. Only a limited number taken, and from the age of one month to twelve years. A Governess, Nurses, and every suitable accommodation. References permitted to several eminent Medical Men and Clergymen.—Address A. C. L., care of Mr. Wallis, 5, Bartholomew-close, Brighton.

ENGRAVINGS BROUGHT WITHIN THE REACH OF ALL.—Immense quantities of first-class Subjects (chiefly from Sales, at unheard-of prices. One instance:—'Morning' and 'Evening' (pub. at 21s.), 3s. 6d. per pair. Such an instance has never before occurred to adorn the Wall and enrich the Folio.—For Catalogue of some of the chief subjects, see the Athenæum of March 31st, 1855.—J. MABLEY, 9, Wellington-street North, Strand.

TO NATURALISTS.—Naturalists' Postage Boxes, 2s. per doz.—Circular glass-topped Boxes of various sizes for collections of Eggs, Shells, Seeds, &c. from 1s. to 4s. per doz.—Marine Shell-dresses, 24s. each.—Insect Pocket-collecting Boxes.—Botanical Cases.—Geological Hammers.—Naturalists' Packing Boxes, &c.—On Sale at 30, Tavistock-street, Covent-garden.—ROBT. BURCH, Agent.

TO AUTHORS.
ROBERT HARDWICKE, Printer and Publisher, 26, Duke-street, Piccadilly, begs to inform Authors and Possessors of MSS. desirous of publishing Works on any topic requiring extensive and immediate publicity, that he has at his command ample founts of Type and Machinery expressly adapted for printing Books, Pamphlets, Essays, Poems, &c., with the utmost Despatch and Economy.
Requests to Authors, with Specimens of Type and Sizes of Pages, post free on receipt of six stamps.

DR. ALTSCHUL, EXAMINER Royal College of Preceptors, Member of the Philological Society, London, gives LESSONS in the GERMAN, ITALIAN, and FRENCH LANGUAGES and LITERATURE. Pupils may study TWO Languages in the same Lesson, or alternately, without any addition to their terms.—CHANDOS-STREET, CAVENTISH-SQUARE.

INSTITUTE of PHOTOGRAPHY, 179, REGENT-STREET.—Portraits, Copies of Pictures, Sculpture, &c. taken, and INSTRUCTIONS in the art of photography, by Mr. A. K. H. B. LEWIS COCKE. Photographic Apparatus of all kinds, with the necessary Chemicals, constantly on Sale.

MR. LAROCHE begs to inform his Patrons and the Public in general, that having succeeded in the late important action of Talbot v. Larocche, in establishing that the Photographic process as practised by him is different from, and very superior to, the Talbotype, he continues to take these much-admired PORTRAITS, by his instantaneous method, at his Rooms, 65, Oxford-street, two doors from Wells-street, where an inspection of the life-size and other Portraits is respectfully solicited.

MAYALL'S PORTRAIT GALLERIES, 224, REGENT-STREET, Corner of Argyl-place. DAGUERRETYPE and STEREOGRAPHIC MINIATURES in the highest style of Art taken daily.

Mr. Mayall has proved his mastery over the art by producing photographic portraits of the full size of life & v without the slightest sacrifice of definition, or the smallest approach to distortion;—indeed, the errors and peculiarities of former impressions appear to be corrected.—"Athenæum," July 22, 1854.

Mr. Mayall's portraits represent the high art of the daguerretype; they are as superior to the generality of such pictures as a delicate engraving is to a coarse woodcut.—"Art-Journal," Nov. 1853.

"More pleasing, and far more accurate than the generality of such pictures."—"Times," July 17, 1854.

Catalogues now ready; if in the Country, six postage stamps required.

Important and very valuable Collection of Oil Paintings, by Old Masters, at Singleton House, Singleton Brook, Higher Broughton.

MR. CAPES has the honour to announce, that he has received instructions from **JOHN WILSON, Esq.**, who is retiring from business, in consequence of ill health, to **SELL** by **AUCTION**, without reserve, on **WEDNESDAY, May 16**, at 10 o'clock in the morning, at his residence, Singleton House, Singleton Brook, Higher Broughton, near Manchester, about **FIFTY Important and Valuable PAINTINGS**, by **Ancient Masters**; comprising, the Horrors of War, by Rubens, the picture which excited so much attention when publicly exhibited in London a few years ago—St. Jerome, by Carlo Cignani—a most superb copy of Correggio's finest work at Parma—a River Scene in Holland, by Van Meert, in all respects a magnificent production—The Death of Procris, by Paul Veronese, a very important and finely coloured picture, and in a beautiful state—The Marriage of Rebecca, in a noble landscape, by Claude—Susannah and the Elders, by Domenichino, a marvellously fine example of this favourite artist—The Good Samaritan, by Carracci, a very grand and solemn picture—The Holy Family, by Paul Veronese, remarkable for the depth and beauty of its colour—The Entombment, by Bassano, a work which for richness of colour, vigour of handling, and pictorial power, can only be equalled in the present day by Linnell—a Magdalen, by Schidoni, a most elegant and delicate example—The Death of Adonis, by Rubens and Vandyke, a highly esteemed and valuable picture, from the collection of the late Major Sirr—The Woman taken in Adultery, by Caravaggio, a very grand work, exhibiting great power of light and shadow—View of the Grand Canal at Venice, by Canaletti, perhaps one of the finest examples of the man to be met with, and in perfectly pure condition—The Marriage at Cana, by Paul Veronese, a brilliant example of colour and composition, no doubt the finished sketch of the original picture in the Louvre—Christ's Agony in the Garden, by Andrea Schiavone, an extraordinary example of rich and powerful colour—Christ Driving the Money-changers from the Temple, and Christ at the Pool of Bethesda, by Paul Panini, two exceedingly fine pictures, in a very pure state—Virgin and Child, by Pintoretto—The Ascension, by Murillo; with several fine Portraits by Cuyt, Sir Peter Lely, Rubens, Vandyke, Velasquez, Frank Hale, and other desirable specimens by various artists of renown.

The house will be open for view on Friday and Saturday, May 11 and 12; and for the convenience of gentlemen at a distance, the Pictures can also be seen on Tuesday, the 15th, between the hours of 11 and 5.

Catalogues (of the Pictures only) can be forwarded by post on prepayment of 6, and of the Furniture also, of 18 stamps, on application to Mr. Capes, 22, Princess-street, Manchester.

A Splendid Collection of Oil Paintings, by Modern, Living, and Deceased Artists, at Singleton House, Singleton Brook, Higher Broughton.

MR. CAPES has the honour to announce that he has received instructions from **JOHN WILSON, Esq.**, who is retiring from business in consequence of ill health, to **SELL** by **AUCTION**, without reserve, on **THURSDAY, May 17**, at 10 o'clock in the morning, at his residence, Singleton House, Singleton Brook, Higher Broughton, near Manchester, upwards of **FIFTY Important and Valuable PAINTINGS**, comprising choice Works by Naish, Rothwell, Hilton, R.A., Barrett and Gilpin, Newenham, Komney, Singleton, John Wilson, jun., E. J. Cobbett, Richard Wilson, Crewick, R.A., Sant, S. R. Percy, Parrott, Baxter, Linnell, Pickersgill, A.R.A., Hoole, A.R.A., Eady, Macleise, R.A., Barry, R.A., Sir Joshua Reynolds, and Gainsborough.

The Auctioneer feels it unnecessary to state more than that the specimens alluded to by Living Artists are genuine productions of unquestionable authenticity, and that amongst them will be found some exceedingly Choice Works of a few of the leading men in the kingdom.

The house will be open for view on Friday and Saturday, May 11 and 12; and for the convenience of gentlemen at a distance, the Pictures can be seen also on Tuesday, the 15th, between the hours of 11 and 5.

Catalogues (of the Pictures only) can be forwarded by post on prepayment of 6, and of the Furniture also, of 18 stamps, on application to Mr. Capes, 22, Princess-street, Manchester.

Splendid Sale of CHURCH FATHERS and CLASSICS at AMSTERDAM.

FREDERICK MÜLLER, at AMSTERDAM, begs to leave to announce that he will **SELL**, on the 23rd of APRIL, and five following days, the **MAGNIFICENT COLLECTION** formed by the late Prof. Dr. D. J. VAN SENNEP, at Amsterdam, containing Walton's Polyglot, with Castells Lex—Biblia Gr. by Aldus, 1518, red mor.—Nov. Testam. by Wetstein, 2 vols.—the best Editions of the Holy Fathers, principally the Benedictine: all in the finest condition. The Classics are of the highest importance; and among these occur 40 Editions of the 15th Century, 39 Editions Principes, 22 Aldine Editions, and 120 very rare Editions of the 15th Century. Most of these are in green or red mor. gilt edges. Also a fine Collection of Modern Philological Books, old History, Statistics, Numismatics, Egyptian and Gothic History and Literature.

Catalogues, postage free for six stamps, to be had of Mr. D. Nutt, Strand; C. J. Stewart, King William-street, London; Deighton & Co. Cambridge; Macmillan & Co. Cambridge; and J. H. Parker, Oxford.

- XI. CRITICAL NOTICES.

The NORTH AMERICAN REVIEW has now been published without intermission for forty years. It is by far the oldest American periodical devoted to general Literature and Science, and its reputation has been steadily maintained, both in America and in Europe, as the leading journal of the United States within its appropriate department.

Price 6s. per Number, or a Subscription, paid in advance, 21s. per annum, secures the regular delivery of the Review on the day of publication.

Sampson Low, Son & Co. English and American Booksellers and Publishers, 47, Ludgate-hill.

This day, the First Number, 8vo. 5s. of the
QUARTERLY JOURNAL OF PURE and APPLIED MATHEMATICS.
Edited by J. J. SYLVESTER, M.A., F.R.S., late Professor of Natural Philosophy in University College, London; and N. M. FERRERS, M.A., Fellow of Gonville and Caius College, Cambridge.

Assisted by G. G. STOKES, M.A., F.R.S., Lucasian Professor of Mathematics, Cambridge; ARTHUR CAYLEY, M.A., F.R.S., late Fellow of Trinity College, Cambridge; and M. CHARLES HERMITE, Corresponding Editor in Paris.

London: John W. Parker & Son, West Strand.

THE HOMILIST for May, No. XXIII.,

- price 1s. will contain, amongst other Articles,
1. The Spiritual Universe, by the Rev. David Thomas.
2. On Family Reunions, by the Rev. D. G. Watt, M.A.
3. Religious Tested, by the Rev. D. Thomas.
4. The Spiritual Qualification for the Reception of the Spiritual, by the Rev. H. R. Reynolds, B.A.
5. Glances at Great Preachers—Chrysostom, by the Rev. C. Willis, M.A.

"Most heartily and conscientiously do I recommend 'The Homilist' to all classes of readers. Young preachers should study it. It will greatly benefit them. Laymen (unhappily so called) should read it. It will create in them a thirst for something better than what they commonly hear from our pulpits, and stir up in their souls feelings and aspirations of the nobler sort."

Samuel Davidson, D.D., LL.D.

Now ready, price 2s. 6d. cloth.

NEW WORKS
PUBLISHED THIS DAY.

I.
HISTORY of MODERN ITALY,
from the First French Revolution to the Year 1850. By
RICHARD HEBER WRIGHTSON. Post 8vo. 10s. 6d.
"This work displays great originality of thought and purpose;
and the historical information contained in these pages would be
sought for in vain in any other history of Modern Italy."
Britannia.

II.
WORLDS BEYOND THE EARTH.
By MONTAGU LYON PHILLIPS. Small 8vo. with an
Illustration. 6s.
"The great question of 'plurality of worlds' is here handled
with great boldness and originality."—*John Bull.*
"This work stamps Mr. Phillips as a scientific inquirer and
writer of the first class. The style of the work is clear and forcible
—the argument strongly and logically followed up."
Brighton Herald.
"Written in a truly popular style. It displays a great mass of
general knowledge, and an intimate acquaintance with the geo-
logical, astronomical, and chemical sciences."—*Morning Herald.*

III.
JESSE'S MEMOIRS of the COURT of
ENGLAND under the STUARTS, including the PROTEC-
TORATE. 3 vols. crown 8vo. with Illustrations, 18s.
"Without it no library in the kingdom can be called complete."
Times.

IV.

London: RICHARD BENTLEY, New Burlington-
street,

(Publisher in Ordinary to Her Majesty).

13, GREAT MARLBOROUGH-STREET.
HURST & BLACKETT,
Successors to Mr. Colburn,
HAVE JUST PUBLISHED
THE FOLLOWING NEW WORKS.

VOLS. III. and IV. of THE
DUKE of BUCKINGHAM'S ME-
MOIRS of the COURT and CABINETS of GEORGE III.,
from Original Family Documents. Comprising the
Period from 1800 to 1810, and completing the Work.
In 8vo. with Portraits. (Next week.)

* Those who desire early copies of this work are re-
quested to give their orders immediately to their Book-
sellers.

The MOSLEM and the CHRIS-
TIAN; or, ADVENTURES in the EAST. By SADYK
PASHA. Revised, with Original Notes, by COLONEL
SZYRMA, Editor of 'Revelations of Siberia.' 3 vols.

"Sadyk Pasha, the author of this work, is a Pole of noble birth.
He is now commander of the Turkish Cossacks—a corps organized
by himself. The volumes on 'The Moslem and the Christian,'
partly fact and partly fiction, written by him, and translated by
Colonel Szirma, display very well the literary spirit of the soldier.
They are full of the adventures and emotions that belong to love
and war; they treat of the present time; they introduce many
existing people; and have the Danubian Principalities for scene of
action. Here are sources of popularity which the book fairly
claims. As a translation it is excellent."—*Examiner.*

SAM SLICK'S NEW WORK,
'NATURE and HUMAN NATURE.' 2 vols.

"We enjoy our old friend's company with unabated relish.
These new volumes are full of fun and fancy."—*Athenæum.*
"These volumes are full of merry stories, told in Mr. Slick's
peculiar vein. Every page of the book is amusing."—*Examiner.*
"It will not be easy to find two volumes more full of fun and
genuine good sense."—*Daily News.*

THE ROMANCE of the FORUM;
or, Narratives, Scenes, and Anecdotes from Courts of
Justice. SECOND SERIES. By PETER BURKE, Esq.
2 vols.

"We are quite satisfied that the popularity of Mr. Burke's
second series of 'The Romance of the Forum' will equal that which
attended the first. His book is equal in interest, whilst it is supe-
rior in instruction, to the romantic conceptions of the most accom-
plished novelist."—*Morning Post.*

Also, just ready, in 3 vols.

The HEIRESS of HAUGHTON.
A New Novel. By the Author of 'Emilia Wyndham,'
'Two Old Men's Tales,' &c.

THE MONARCHS of the MAIN.
By GEORGE W. THORNBURY, Esq. 3 vols.

THE NEW NOVELS.
CONSTANCE HERBERT. By
GERALDINE E. JEWSBURY. 3 vols.

From the *Athenæum*.—"Constance Herbert" is a poem in its
beauty and its lofty purpose—a romance in its variety and fascina-
tion. The tale, as a tale, is deeply interesting; full of quiet pathos
and a calm and beautiful morality. It will be read with rare
pleasure and remembered with heartfelt interest.
From the *Examiner*.—"Constance Herbert" is deeply interest-
ing—full of power and earnestness.
From the *Morning Post*.—"Constance Herbert" is, in our judg-
ment, the most successful of Miss Jewsbury's performances.
From the *Messenger*.—"Miss Jewsbury may be said to occupy the
same place in the present time which Miss Austen held in the
past."

THE SECRET MARRIAGE; or,
CONTRASTS in LIFE. By Miss FANNY WILLIAMS.
3 vols.

MAMMON. By Mrs. GORE.
3 vols.

"We prefer 'Mammon' to either of the other novels which Mrs.
Gore has given to the public since her re-appearance in print."
Athenæum.

THE WIFE'S TRIALS. 3 vols.

"The Wife's Trials" is one of the best novels which we have had
the pleasure of reading for some time, and we have but little doubt
that it will become a great favourite. It is hardly possible for us
to do justice to the plot in a mere sketch, so fruitful are the inci-
dents and so numerous are the characters which appear on the
scene; but we must say that we scarcely ever remember a work in
which all the details are so well harmonized, and in which the
thread of the story is so elaborately and, at the same time, so excel-
lently worked out."—*Morning Chronicle.*

"The lovers of fiction will derive both pleasure and profit from
the perusal of this impressive and instructive tale."—*Britannia.*
"The Wife's Trials" is one of those pictures of the inner life of
society which charm at all seasons. The story will command a
large circle of readers."—*Messenger.*

"This novel is very full of characters, and abounds in life and
spirit."—*Examiner.*

A. & C. BLACK'S

REVIEWS

An Inquiry into the Credibility of the Early Roman History. By the Right Hon. Sir George Cornewall Lewis. 2 vols. Parker & Son.

THE political importance of literary men was perhaps never more fully recognized than at the present time. They are no longer objects of aversion at Court, as under the first George;—nor do our leading statesmen regard them with the ill-natured suspicion which Walpole is said to have entertained towards them;—nor have they any reason to complain of such neglect on the part of the nobility, as Johnson, in one of his most savage moods, attributed to the Earl of Chesterfield. On the contrary, literary eminence is considered a fair title to Royal favour; our Premiers are either themselves literary men or anxious to render due honour to the profession, not merely by recommending them to the favourable consideration of the Crown, but by admitting them to their councils and securing for them appointments to high offices in the State; and our aristocracy, whatever may be their failings, are certainly not chargeable with any indisposition to admit their just claims. The Fourth Estate was never more numerous represented in the third than now, there being more proprietors, editors and correspondents of public journals in the present House of Commons than at any previous period. Among the leading debaters in that house are to be found some of the most powerful writers of the day; our Chancellors of the Exchequer are men who have occupied equally distinguished positions in literature, and our Lords Lieutenant of Ireland are elegant essayists, pleasant versifiers, and accomplished authors of diaries. In fact, the distinction and antagonism between the worlds of Politics and Literature seem fast dying out—to the advantage of both, we would fain believe. While the one becomes more enlightened, it is to be hoped the other will gain in robustness and healthiness of tone.

A striking illustration of the above remarks is supplied by the case of the author with whom we have now to do. Well known as a scholar with whom few can compare, as the writer of several works of rare merit, and as the editor of the *Edinburgh Review*, he has been hardly less prominent as a politician; and scarcely had he resumed his seat in the House of Commons, after a temporary absence, when he was appointed to the high office of Chancellor of the Exchequer,—an appointment which gave more general satisfaction than almost any other consequent upon the recent Ministerial changes. One of the fruits of his brief exemption from the cares of public life appears to have been the work before us, which, if not a full equivalent for the loss of his political services, may possibly insure him a more lasting remembrance than would have been otherwise awarded to him. The subject is not perhaps one of very general interest, but for scholars it has many attractions; and nothing but a little reflection on the many ties which connect modern civilization with that of ancient Rome, as well as the analogy between the gradual political development of our own country and that of the former mistress of the world, is needed to gain for it the attention of a much wider circle of readers. Those who are familiar with Sir Cornewall Lewis's previous literary efforts will scarcely require to be told that the subject of these volumes is discussed with a degree of carefulness, research, and judgment by no means common. On the other hand, they will be prepared for hearing that the general mode of treatment is not distinguished

by any remarkable originality. The work appears to have been suggested by a perusal of the first volume of Mr. Grote's 'History of Greece'—at least it exhibits the application to early Roman history of the principles of positive philosophy which Mr. Grote has brought to bear with so much effect upon the legends of ancient Greece. It may be described as an echo of that remarkable production, or—to adopt the phraseology of musicians—a variation upon the same theme.

The object which Sir Cornewall Lewis has in view is to submit the remains of the early history of Rome to the same tests of credibility as are employed in modern historical and judicial investigations. He complains, not without reason, of the much greater laxity with which we are apt to receive statements relating to antiquity than accounts of recent events, and contends that the rules for ascertaining the truth are the same in both cases. The first few chapters are devoted to a consideration of the various sources from which the accounts of early Rome now in our hands were derived; the remainder of the volumes being taken up with an exhibition of the narrative in detail, accompanied by a critical examination of both the external and internal evidence as to its credibility. The inquiry extends from the original occupation of Italy to the Expedition of Pyrrhus, in the year B.C. 281, up to which time, but not earlier, the author considers we have the evidence of contemporary witnesses to guide us. In traversing this ground he naturally has frequent occasion to refer to Niebuhr, from whom—without attempting to depreciate unfairly the value of his great services—he dares to differ on several important points. In the negative portion of Niebuhr's investigations—those in which he explodes the historical character of the accounts of early Rome—Sir Cornewall Lewis generally concurs; but he questions the soundness of his attempts to restore the true history and build up a solid edifice out of the ruins which he has made. He thus describes and comments upon the reconstructive efforts of Niebuhr and others:

"The main cause of the great multiplicity and wide divergence of opinions, which characterize the recent researches into early Roman history, is the defective method, which not only Niebuhr and his followers, but most of his opponents, have adopted. Instead of employing those tests of credibility which are consistently applied to modern history, they attempt to guide their judgment by the indications of internal evidence, and assume that the truth can be discovered by an occult faculty of historical divination. Hence, the task which they have undertaken resembles an inquiry into the internal structure of the earth, or into the question, whether the stars are inhabited. It is an attempt to solve a problem, for the solution of which no sufficient data exist. The consequence is, that ingenuity and labour can produce nothing but hypotheses and conjectures, which may be supported by analogies, and may sometimes appear specious and attractive, but can never rest on the solid foundation of proof. There will, therefore, be a series of such conjectural histories; each successive writer will reject all or some of the guesses of his predecessors, and will propose some new hypotheses of his own. But the treatment of early Roman history, though it will be constantly moving, will not advance; it will not be stationary, but neither will it be progressive; it will be unfixed and changeable, but without receiving any improvement; and it will perpetually revolve in the same hopeless circle. Like the search after the philosopher's stone, or the elixir of life, it will be constantly varying its aspect, under the treatment of different professors of the futile science; but truth and certainty, the aim of all rational employment of the intellect, will always be equally distant. Each new system of the early Roman constitution will be only (to use Paley's words) one guess among many; whereas, he alone discovers who proves. There is indeed no doubt that long habit, combined with a

happy talent, may enable a person to discern the truth where it is invisible to ordinary minds, possessing no peculiar advantages. This may be observed, not only in historical researches, but in every other department of knowledge. In order, however, that the truth so perceived should recommend itself to the convictions of others, it is a necessary condition that it should admit of proof which they can understand. Newton might have perceived, by a rapid and intuitive sagacity, the connexion between the fall of an apple and the attraction of the earth to the sun; but unless he could have demonstrated that connexion by arguments which were intelligible and satisfactory to the scientific world, his discovery would have been useless, except as a mere suggestion. In like manner, we may rejoice that the ingenuity and learning of Niebuhr should have enabled him to advance many novel hypotheses and conjectures respecting events in the early history, and respecting the form of the early constitution, of Rome. But unless he can support those hypotheses by sufficient evidence, they are not entitled to our belief. It is not enough for a historian to claim the possession of a retrospective second-sight, which is denied to the rest of the world; of a mysterious doctrine, revealed only to the initiated. Unless he can prove as well as guess; unless he can produce evidence of the fact, after he has intuitively perceived its existence, his historical system cannot be received."

With Mr. Grote, our author objects to all attempts to rationalize or elicit historical facts from narratives which are admitted to be in a great measure legendary. His principle is, that we have no rational alternative between accepting or rejecting such narratives as they stand, as we have no means of deciding with safety what are the proportions of truth and fiction, nor any criteria for distinguishing the one from the other. Thus, in connexion with the origin and foundation of Rome, after having given no less than twenty-four different versions of the circumstances attending them, he makes the following forcible observations:—

"It is indeed impossible, with our means of information, to form a well-grounded opinion upon the origin of the received story of Romulus, and to assert that no part of it is true. It is however possible to maintain with confidence the position that, a person holding this story to have been formed, centuries after the time of the alleged events, from legendary materials and oral relations, is not entitled to select certain points from the aggregate, upon mere grounds of apparent internal credibility, and to treat them as historical. Those, for example, who consider Romulus and Tatius as fabulous, and not real personages, as mere names of actors in a fictitious drama, cannot with propriety regard their joint sovereignty as implying the separate existence of a Roman and a Sabine community on the site of Rome, and the rape of the Sabine women as typical of the absence of a right of intermarriage between them. What criterion is there for distinguishing between the fabulous and the historical parts of the narrative? By what test is the fact to be separated from the fiction? Before the historical character of any part of the narrative can be admitted, some probable account must be given of the means by which a true tradition, even of a single fact, was preserved until the period of Roman historiography. Those who maintain, for instance, that the extant narrative proves the existence of separate Roman and Sabine communities at Rome, in the eighth century before Christ, before the foundation of the first Greek colony in Sicily, are bound to explain how this gulf of ages was bridged over, and to show what was the ark in which authentic accounts of the time of the fabulous Romulus floated down the stream of five centuries to the age of Fabius Pictor. Who shall undertake to trace, even upon conjecture, the chain of tradition through this long, obscure period? Who can venture to affirm that it had an authentic beginning, and was preserved unfalsified until it was accurately recorded? Nor is this the only stumbling-block in our way; but we are also called upon to believe that a modern historian is able to recast the traditions which were thus preserved through the dark ages of Rome, and

to extract the truth which is embedded in them, although in their existing form they are false. We are first to believe that a tradition was, in substance, faithfully conveyed from the eighth century before Christ to the Second Punic War, and then to believe that, although it is not literally true, it is typical of some truth which can be discerned under its covering for the first time, by a writer of our own age. This doctrine of historical types is more difficult to reconcile with reason and experience than even the supposition that some authentic facts may have been preserved, through a long series of years, in an unaltered state, by oral tradition. It is in fact nothing more than an ingenious and refined application of the rationalist method of interpreting the marvellous legends of mythology, so much employed by the ancient historians. It is only another form of the system of reduction, by which the god Mars, in the sacred grove, was converted into an armed man in disguise, who overpowered Ilia, and the wolf of Romulus was transmuted into a courtesan. One imitation may be executed by a coarse and clumsy hand; the other may be performed with all the resources and skill of modern learning—but still they are both no better than historical forgeries."

—Other points on which Sir Cornewall Lewis differs from Niebuhr, and defends his own views with great ability, are Niebuhr's version of the story of Coriolanus, his treatment of the narrative relating to the capture of Veii, his notions with regard to the early constitution of Rome,—particularly his identification of the original *populus* with the patrician *curiæ*—and his hypothetical theories on the derivation of early Roman history from epical poems or narrative ballads, and the ethnology of primitive Italy,—respecting which last he says—

"The method adopted by the rationalizing mythologists of antiquity—such a process, for example, as that by which Hercules with the oxen of Geryon is converted into a general at the head of a great army—by which Cacus, the ogre, and cattle stealer, is turned into a petty tyrant, and his cave into a hill fort—is treated with contempt by the modern critical historian. His contempt is just; but the process by which he extracts ethnological facts from legendary stories—and sees, for instance, a migration of Siceli in the alleged flight of a certain Sicelus—is only another form of the same historical method, and leads to results not more certain. When the earliest of the Greek and Roman historians began to collect their accounts of these remote times—times which preceded their own by many centuries—all memory of the events had perished, and no authentic oral traditions were in existence. Hence the stories respecting them which have descended to us are devoid of historical substance: they are mere shifting clouds of mythology, which may at a distance deceive the mariner by the appearance of solid land, but disappear as he approaches and examines them by a close view. However credible a witness an historian may be with respect to the events of his own time, his accounts of a bygone age, whose history had not been preserved, are necessarily unworthy of belief. Thus the account given by Thucydides of the Siceli having crossed into Sicily 300 years before the foundation of Naxos, that is, more than 550 years before his own birth; and of the Sicani having been, at a still earlier time, driven into Sicily by the Ligyes, from the river Sicanus in Iberia, may be safely placed among unauthenticated legends, because there was no channel by which a contemporary record of such events could have reached him. They may be placed on a level with his amended version of the Trojan war; with his assumption of the residence of the Phæaciens in Corcyra; with his adoption of the fable of Tereus and Procne; with his reference of Charybdis, the Cyclopes, and the Læstrygonæ, to the Straits of Messina and Sicily; with his account of Hellen the son of Deucalion, and of the maritime ascendancy of Minos. It is therefore unjust to censure an ancient writer for mistaking events of primitive history, and for neglecting to investigate the early ages with the same industry as he investigated the transactions of his own time. For, in truth, no authentic records of that early period were in existence, and whatever diligence he might have used, he would never have arrived at any

certain result. If Dionysius and Livy and the other ancient historians had no authentic materials for the primitive ethnology, and the early national movements of Italy, still less can the modern inquirer hope to arrive at any safe conclusions on this subject; or by any combinations or conjectures, however ingenious, to supply the defect of credible testimony and positive matter of fact. Hence all the investigations into the Italian nations, before the commencements of Roman history, may be regarded as equally unfounded, and therefore equally worthless. All the elaborate researches of modern scholars respecting the primitive history of the Pelasgians, the Siceli, the Tyrrhenians, the Etruscans, the Aborigines, the Latins, and other national races, must be considered as not less unreal than the speculations concerning judicial astrology, or the discovery of the philosopher's stone and the elixir of life. Not only the results of the uncritical Italian historians—such as Micali—but those arrived at by the most learned and sagacious of the German inquirers—as Niebuhr and Otfried Müller—must be rejected, when they relate to this unknown and undiscoverable period."

The readers of Mr. Grote will remember that he maintains views exactly similar to the above in reference to the ante-Hellenic occupation of Greece. To give some idea of the general result of our author's investigations, we will venture upon one more extract.—

"Upon taking a general review of the results at which we have hitherto arrived, it is impossible to say that we have been able to discover any solid or stable foundation for the history of the first four and a-half centuries as it is delivered to us by Dionysius, Livy, and other classical authors. Much of it, indeed, if we confine ourselves to internal evidence, has an historical aspect, particularly for the period after the burning of the city. We have likewise sufficient grounds for believing that a chronological series of the annual magistrates, more or less complete, was preserved for the chief part of the Republic, and that since the Gallic conflagration there was an official annalistic record, in which the principal events of each year were registered. How far this outline was filled up by accounts derived from funeral orations or family records, from popular poetry and from oral traditions; by whom and in what manner these supplementary materials were obtained; and how far they were authentic and trustworthy, are questions which we are unable to solve. Hence it follows that during the first four and a-half centuries, the historical narrative is principally composed of events which we can trace to no determinate source."

As a natural consequence of such conclusions, Sir Cornewall Lewis maintains that all attempts to construct a reliable history from these materials, "by conjectural omissions, additions, alterations, and transpositions, must be nugatory. The workers on this historical treadmill may continue to grind the air, but they will never produce any valuable result." At the same time, he is careful to guard the reader against supposing that, because the history of Rome during the first four centuries and a half is altogether uncertain, that of the subsequent period of the Republic and the Empire is undeserving of attention; and he very properly recommends the study even of the picturesque narratives which make up the earlier history, as they stand in the original writers. We cannot conclude without noting the temperate and philosophical spirit in which his work is written. Abounding in free criticisms on the views of others, it exhibits no traces of pugnacious dogmatism, still less of offensive remark, but is calm and judicious throughout; while at the same time it contains a mass of information which many who are no mean scholars will be thankful to receive.

Travels in Europe and the East. By Samuel Irenæus Prime. 2 vols. New York, Harper Brothers; London, Low & Co. Mr. Samuel Irenæus Prime had a year's leisure, and made the worst of it. His reason for tra-

velling seems to have been that of Lord Chesterfield's son, who wanted to descend into a coal-pit "just to say he had been there." It will be a great thing for Mr. Prime, all his life, "just to say he has been there";—that is, in "England, Scotland, Ireland, Wales, France, Belgium, Holland, Germany, Austria, Italy, Greece, Turkey, Syria, Palestine, and Egypt,"—and that it took him no more than twelve months to study men and cities in this vast arena. Anna Seward could translate an Horatian ode while curling her hair; another pedant talked of writing a whole volume with one quill; but Mr. Prime comes, and sees, and conquers in the twinkling of an eye. Being sentimental as well as dogmatic, it may be conceived how his language gushes,—how his conclusions race together,—and how little time he takes to poise his divining rod, before deciding on the character of a few millions of people. His countryman's lamp, which was so bright that it woke up the chickens for twelve miles, goes out like a spark in a vault when compared with Mr. Prime's power of illuminating any topic on which he pauses to reflect.

No doubt England is favoured with a good opinion from Mr. Prime. Its scenery imbued him with particular admiration, especially the Isle of Wight,—“an apple of gold in a picture of silver.” The metropolis, also, is described in magniloquent terms, such as Marco Polo used in depicting the wonders of Quinsai. It is “a city thirty miles in circumference, with a quarter of a million of houses, and two millions and a quarter of people.” In Cheapside “you may see more than seventy thousand persons pass by in a single day.” In “the Parks” Mr. Prime lost himself “in a wilderness of forest, lake and stream, with bubbling fountains, flocks of sheep, or herds of deer;—not a house in sight, not a sound to be heard,” although “millions of people are all around,”—and “whichever way you go, you are constantly coming upon open squares, laid out with shaded walks and fountains playing.” Finsbury itself might blush at this, as Piccadilly might have blushed at the recent glorification, in a French novel, of its gardens and cottages, its flower-twined porches and paddocks adjoining.

But Mr. Prime sees more in English ornamental waters and façades than in English public men. His levelling criticism detracts sadly from the intellectual proportions of our orators and statesmen, and even from the good-breeding of our ladies. At a Richmond dinner he was shocked by the rudeness of a jewelled dowager;—in the House of Commons honourable gentlemen astonished him by reclining in the easy Grecian style, instead of preserving the straight and stiff attitude of Memnon in the Desert or of the great god Fo.—

“Between the head of Lord John Russell and Lord Palmerston were the feet of a member of Parliament, and between Russell and Sir James Graham were the feet of another learned member, and three or four more were taking their comfort in the same way.”

In the House of Peers his remarks were no less candid and disparaging. The pulpits satisfied him better; but the manners of Oxford gave a finish to his notions of academic courtesy.—

“As I was going to my hotel I met a student wearing, as all of them must in the street, the cap and gown, and I asked him, ‘Can you tell me, sir, the whole number of students at present in all the colleges?’ His answer was the following: ‘I can’t tell you, I am shaw, faw I don’t know.’”

This sort of free sketching is lively and harmless. But as a further illustration of the knowledge communicated by Mr. Prime to his countrymen, compare the paragraphs following. The first describes an incident at an English inn.—

"A little girl, a pretty thing of fourteen, waited on us, and as I went down stairs in the morning, happy in the blandness of a May-day and the repose of nature in such a quiet spot as this, I heard the landlord sternly demanding of the little maid, why she was not earlier at her work. He took her into a private room, and I heard the blows and the shrieks, as the poor thing was beaten by that harsh wretch, who had no more feeling or compassion than an Arkansas overseer. What shall we say of the horribleness of that brutality which inflicts stripes on the servant for not being at work at sunrise? But the sufferer is only a little English girl, with no friends, and born to be a servant, and fit for nothing else!"

The second refers to Italy.—

"A friend of mine who has resided in Italy for some years, and is thoroughly familiar with the highest forms of its society, and the habits of its people, repeatedly assured me that no such principle as *virtue* can be honestly affirmed of either sex in Italy! In the upper circles, every lady of mark, though provided with that convenient appendage a husband, has also her *cavaliere servente*, a friend whose attentions she receives in public and in private, and who is known to be received as her *confidante* and lover. At the door of the assembly room he meets her, carries her from her carriage to the ball, stands by her to comply with her slightest wish, and to display his tender and absorbing passion. Where is the husband all this time? He is doing the same good turn to some other lady in the same room. The game is one that two can play at, and both lose! The passions have full play in this Italian clime. The religion of the people is no restraint. And it may be truly said of Italy, 'Like people, like priest.' I have no resentments to gratify in this remark. It is notorious and undeniable. There is no *morale* as the basis of society. The foundations are out of place. And there is no hope for the future."

We know not how many days were spent by Mr. Prime in Italy, but there is something inexpressibly simple in the tourist's moralizing generalizations, and in his ready acceptance of "a friend's" "repeated assurances" that nothing like virtue can be found among the people of so many states and kingdoms. If anything could be better, it is the sequel:—"And there is no hope for the future." A man travels to some purpose when he makes discoveries such as this. It might, indeed, have sufficed him to set the Italians down as a body of profligates, without an impertinent parenthesis concerning an English lady, resident in Florence.—

"I felt the profoundest respect for this eminent woman, and was proud to have made her acquaintance. I cannot say this, or anything like it, of Mrs. Trollope—the Mrs. Trollope who once travelled in America, and now resides here in easy circumstances, living on the earnings of her miserable pen. She has published a hundred novels, and is now making more; they are read eagerly in England, and bring her a handsome income."

Mr. Prime improves in manner when he describes wilder scenes and more natural incidents. In his passages of adventure among the marauders of the Eastern Desert there are some original touches; but, from first to last, we have read his book with the persuasion that any person of common intelligence might learn more from the perusal of one good narrative of travel, than our American has learnt in his breathless journey through the best parts of Europe.

History of French Literature in the Eighteenth Century. By Alexander Vinet. Translated from the French by the Rev. James Bryce. Edinburgh, Clark.

EIGHT years have elapsed since Prof. Vinet began a course of lectures on French Literature which excited a gradually increasing attention, but which were brought to an abrupt close by sickness and death. The course then included from D'Aguesseau (1668—1751) to Rousseau (1711—1778),—and we may add, that the first

and last subjects are the most skilfully handled of the whole series.

Prof. Vinet spoke from notes; these have been collated with the "memoranda" made by four of his pupils during the delivery of the lectures,—and by dint of a little dove-tailing and other workmanship, more or less skilfully accomplished, this volume has been produced. The result is not very satisfactory; but the book will be found useful to those who, having little knowledge of French, desire to be introduced to a French literary party of the last century.

This party consists of twenty-seven individuals; and these are rather shadows than substances,—in some cases the shadows themselves are but extremely faint outlines. D'Aguesseau, however, is finely sketched,—but he has not had full justice rendered to him. He was something more than clever, and he had more originality of genius than M. Vinet suspects. He showed this in his dissertation upon "love of country"; and he was the first "brilliant Frenchman" who ever thought of writing upon so stirring a theme. Curiously enough, considering the period at which he wrote, he was inclined to believe that there was more love of country under a republic than under a monarchy,—as if a man must necessarily be unpatriotic when his government is mal-administered.

The most instructive part of D'Aguesseau's life has been entirely overlooked by the Professor. He does, indeed, allude to the fact, that "already under Louis the Fourteenth he was subjected to a sort of disgrace occasioned by the Bull *Unigenitus*;" but there was more than this worth telling. D'Aguesseau refused to register in Parliament the royal declaration which accepted a Bull by which not only the liberties of the Church but the dignity of the Throne may be said to have been placed under the heel of the Pope. He was bitterly persecuted for this refusal, but his noble wife bade him endure all things save dishonour. He wrote and spoke grandly in support of the course he had taken, and when Quirini tauntingly asked him,—"What arms are these you employ against the Church?"—he replied:—"They are not arms, but shields."

But see what poor human nature is. Under Louis the Fifteenth D'Aguesseau, without scruple, registered the offensive declaration. The registration was eloquently opposed by Perelle. "Where," said the now courtly Chancellor to the patriot,—"where did you find such exquisite arguments in behalf of your cause?"—"Where!" answered Perelle,—"where, but in the pleadings of the deceased Chancellor D'Aguesseau?"

We must be more brief with the other individuals of this party. Cochin has a niche allowed him, and deservedly, for he was the first French lawyer who cared more for facts than for fees, and who denounced systems of law which sanctioned the plunder of families by Chancery, and punished a half-famished individual for stealing a turnip. St.-Simon is here principally represented by an extract from his own pen-and-ink sketch of the Duc de Bourgogne. The translator supplies comment, by stating that St.-Simon's meaning is seldom to be got at without an expenditure of some thought. This is singularly incorrect. We hope, however, that Mr. Bryce has not suffered by the outlay. The last contributor to the Rev. Mr. Gleig's series of educational books tells us that the brain is diminished by exercise of thought. The statement must be highly consolatory to those who never think,—provided they do not meditate thereon too long. We fancy that the study of St.-Simon cannot much have injured Mr. Bryce.

Rollin is ably treated. We agree with M. Vinet that the cutler's son was by no means either a dull or a dry writer. Neither did he lack wit. The lecturer forgot to cite a sample of its readiness. Rollin was a liberal-minded Christian. Fleury was a professing Christian, not liberal at all. When the former presented to the powerful ecclesiastic the first volume of the Roman History, Fleury, turning to an officer of the Guards, said contemptuously, "Why do you not convert this man?"—"Oh, Sir," remarked Rollin, quietly smiling the while, "the gentleman would lose his time: I am an inconvertible man."

The position taken by Louis Racine is undisturbed by M. Vinet. We should rather say the position assigned him by Voltaire, whose judgment was thus delivered: "The good versifier Racine, son of Racine the poet."

Whilst Louis Racine was pouring forth his devotional poetry, Crébillon, the misanthropist, amid his sick cats and dogs, was writing heavy tragedies, like Whitehead's. M. Vinet thinks that the great defect of Crébillon's tragedies, and indeed of French tragedy generally, is the *romantic* spirit therein abounding! He might as well have said that the distinguishing trait of Mrs. Hannah More was her looseness of morals. As for Crébillon, he went on for fifty years striking sparks from an anvil: they imparted neither warmth nor light, and where they have left a trace, it is not a pleasant one. As M. Vinet says, Crébillon lacked an intellectual soul. Le Sage, his contemporary, was, on the other hand, both intellectual and "sensible"; and if, like Mr. Moncrieff, he wrote hosts of plays of a secondary order, he was the author of a romance that has never been equalled. Crébillon worked long, and is almost forgotten. Le Sage toiled intensely but briefly, fell early into second childhood, and died in the house at Boulogne which is well known to most visitors of that ancient town. Who has read 'Rhadamiste'?—and who has not read 'Gil Blas'?

Destouches (1680—1754), whose comedies were very badly adapted to our own stage, and have been but indifferently relished in France since the golden days of Damas and Baptiste *ainé*, is perhaps the only man who ever ran away from home to turn strolling player, and who became an ambassador not in a theatrical but a real court. It is almost incredible, but it is gravely related, that among other missions he was entrusted with one by Cardinal Dubois to George the First, and that the object of such mission was to induce our Protestant king to persuade the Regent to appoint Dubois to the archbishopric of Cambray! It is added, that the mission was not without effect.

While Destouches was writing sparkling comedies, the Abbé Prévost was enchanting even the grave, who shook their heads as they read, with still more sparkling stories, of which 'Manon Lescaut' has been the favourite. We may appropriately add, that this queer Abbé established the first literary paper which France ever possessed. It was called *Pour et Contre*; and we speak of it with respect, as the father of the race. It sometimes, however, made sad mistakes,—in their way as fatal as that of the medical man who, called in to Prévost in a fainting fit, declared him to be dead, and proceeding to open him for the benefit of science, killed him outright. If he could only have killed the works as well as their author, he would have deserved well of posterity.

Among the succeeding portraits we have Madame de Lambert,—a lady who did not "violate the common duties of life and give pleasant little suppers." She was a sort of Mrs. Chapone, wrote 'Advice to a Son'—which would make an English mother smile,—and

annoyed the gallants of Paris by interdicting gambling at her parties. We have a graceful companion portrait to this in the sketch of the light yet truthful waiting-maid to the Duchess of Maine, Mdle. de Launay, afterwards Madame de Staël.—Fontenelle is represented, and deservedly, as being something better than a man who had as good a heart as man could have whose heart was made of brains. We wish we could as much commend the judgment rendered upon blind and inconsistent La Motte, who wrote in verse against poetry. M. Vinet says (p. 156) that good sense prevails in the writings of the Author of 'Inés,'—but his blasphemies are only spoken of a hundred pages later. Mari-vaux has established a name for over-minute-ness,—*marivaudage*. "He fatigues me and himself," said a lady, "by making me travel twenty leagues on a piece of wood three feet square." His comedies, however, still please, if we may say so now that Mdle. Mars is no longer their heroine. His romances are elaborate about little, but he could say a good thing upon impulse. M. Vinet has not remembered his ridicule of the credulity of infidels in trivial matters, and his especial application when he said to Bolingbroke: "If you do not believe, it is not for want of faith." For our own parts, we are disposed to say that if Mari-vaux deals largely in dust, it is frequently in gold-dust.

La Chaussée, who developed the sentimental comedy introduced by Destouches, and at whose comedies the public cried as heartily as it laughed at his tragedies, deserves to be noticed with commendation, as being the first who gave dignity to conjugal love in his light pieces. But such examples on the stage were useless when men like Hénault, a philosophical historian, maintained an intimacy, peculiarly French, with Madame du Defand. That society could bear to be instructed while it deliberately acted in opposition to the teaching is seen in the popularity of Vauvenargues the moralist, who was Voltaire's good genius. "If Vauvenargues had lived," says M. Vinet, "Voltaire, it appears, would not have gone so far astray." He was the Wolsey of the literary despot; and we may add, that his abundant stores of maxims, morals and similes have been ruthlessly and piratically plundered by many succeeding writers, who have complacently flourished on the proceeds of their booty.

Montesquieu, who, like Goldsmith, wrote so well and spoke so ill, is a favourite with the Professor. As good an idea of the combined vanity and good humour of the man may, however, be obtained from an anecdote which describes him as refusing to sit for his portrait to the medallist Dassier. "Do you not think," said the latter, "that there is as much pride in refusing as in granting?" Montesquieu knew that there was,—and having exhibited that pride, sat quietly down to have his portrait taken. The concession was another phase of the same pride.

Of Voltaire, one of the longest of the subjects in these lectures, it may be said, that the literary character is more exclusively contemplated in a pietist view than in any other in the book.

D'Alembert, Diderot, Helvetius, Raynal, D'Holbach, Grimm and Buffon naturally follow Voltaire. In his account of Raynal M. Vinet forgets to tell us that this clever and worthless person not only hired the Abbé Yonn to write the theological articles in the *Encyclopædia* which passed as the productions of Raynal, but cheated the labourer of his hire. He was a man not too mean to implore refuge from kings whom he had ridiculed; and when our House of Commons suspended business till Raynal descended from the gallery to a seat in the

body of the house, it did as foolish a thing as our Lord Mayor did when he publicly entertained Madame du Barry at a dinner at the Mansion House. D'Alembert, the natural son, was a worthier man than Raynal. He was neglected by those to whose passions he owed his existence; but he was like those fruits which ripen all the better for being early cut off from the parent tree. Whatever his faults may have been, and they were not few, he was at least free from the dishonesty of Raynal and from the vanity of Buffon,—that natural philosopher who boasted that the world had seen but five great geniuses, "Newton, Bacon, Leibnitz, Montesquieu and myself." We question if it was not gratified vanity rather than parental affection which made Buffon burst into tears when he saw the memorial which his son had raised in his garden, and on which was inscribed,—

Excelsæ turri humilis columna,
Parenti suo filius Buffon, 1785.

"My boy," said the delighted father, "you will be a great man,"—a prophecy which was cut short by the guillotine.

Of Helvetius, D'Holbach, and Grimm, M. Vinet says little,—which is scarcely as much as the subject demanded. He, on the other hand, says much of the minor moralist Duclos; but in many pages he does not say more than is implied in the happy words by which Duclos was described in his lifetime,—"*Droit et adroit*." The long catalogue ends with Jean Jacques. To our thinking, Rousseau treated society and social proprieties just as he did Madame Clot's *marmite*, and laughed as heartily afterwards at the recollection of what he had done and how he had done it. M. Vinet's judgment hardly reaches this conclusion; and we must allow with him that Rousseau,—

"who appeared to destroy, and perhaps has destroyed much,—continues to be one of the most synthetic geniuses of his time, that is to say, one of those whose mode of thinking endeavours to construct, to edify, and not to overthrow, especially if he be compared with Voltaire."

The above is a fair sample of the Professor's discriminating power; and perhaps the following answer to the inquiry as to the ground on which depended the vast influence exercised by Rousseau, both in politics and literature, will be thought scarcely less true,—yet not quite so true.—

"It partly depended, no doubt, on this, that more than any one else, he was the apostle of independent ideas, and that he brought them into the domain of social questions. Independent opinions are favourable to a certain kind of eloquence; but this influence is attached, too, to the serious appearance which the nature of Rousseau impressed on his words. Man, at the bottom of his heart, remains a serious being; whosoever speaks to him in a serious way has a better chance of being listened to with attention. This remark applies to the labouring classes, where the primitive characters of humanity are better distinguished,—the people, when men laugh with them, think they laugh at them. The masses are serious. Rousseau was then the most powerful writer of his age. In one point, however, this power found its limits. He undertook to give a religion to France. He pretended to substitute for the dull and dry Deism of Voltaire, an attractive Deism, heightened with fancy and sentiment; but it only tended to prove the insufficiency of Deism as a consolation and support of humanity. By the mouth of Rousseau, Deism has spoken its last word. The world will never go into Deism. It will either become Christian, or it will become something which I am reluctant to express."

This passage exhibits M. Vinet's object, as well as his thoughts and style;—and with it we leave the book to the consideration of the curious.

THE WAR.

The Crimea and Odessa: Journal of a Tour, with an Account of the Climate and Vegetation. By Dr. Charles Koch. Translated by Joanna B. Horner. Murray.

THE publication of Dr. Charles Koch's interesting travels through Russia in 1836-38,—his subsequent 'Wanderings in the East,'—his 'Contributions to the Eastern Flora,'—as well as his careful map of the Caucasus and Armenia,—had prepared us to receive with respect any work from so conscientious an author.

Dr. Koch is not a traveller who gives us merely a flimsy account of his own sayings and doings,—of what he saw and felt in foreign parts, or what he fancied,—leaving us on all material points as much in the dark as ever. He exhausts his subject with German patience and diligence. He goes into the most minute points of history,—and he compresses the labours of all the best-informed writers on the subject of which he treats into every one of his pregnant and truthful chapters. The reader must not, indeed, expect mere light fancies and sparkling thoughts in Dr. Koch's pages;—he must read them carefully as a serious study; and he may always fearlessly refer to them as a respectable authority on disputed points,—a dictionary of curious and interesting facts.

It is almost consoling to learn, therefore, from so trustworthy a source, that our recent disasters in the Crimea were scarcely to have been averted even by prudence and forethought; for that the best information we could have obtained on the subjects which chiefly interested us was as scanty as valueless.—

"No country in Europe [says Dr. Koch] is perhaps so frequently misapprehended as the Crimea; and even in Russia, especially in St. Petersburg, equally incorrect notions are entertained respecting it as by ourselves. When it was first seized by Catherine II., and she was desirous of becoming personally acquainted with a peninsula so celebrated on account of its fertility, as well as from its romantic and beautiful scenery, the great Empress, during her residence in these parts, was intentionally deceived on grounds which are quite inexplicable to me; and temporary villages were erected on all sides wherever the imperial procession passed. Had she remained a longer time, she might probably have had an opportunity of convincing herself of the true state of affairs; but she was suddenly compelled to abandon her unostentatious cottage in Sevastopol, in order to escape as rapidly as possible from the lawless [?] designs of fanatical [?] Tartars. Thus century after century the erroneous opinion of the great fertility of the Crimea has been maintained, and has not even now been sufficiently refuted by the more accurate accounts of travellers."

The fact which Dr. Koch has explained may serve in some measure to appease the indignation raised against our Commissariat; and we may learn to think more leniently of their deficiencies when we find out that they were taught to expect in the Crimea a country abounding with provisions, and found a mere wilderness of bare hills and poisonous marshes,—"*a gloomy land which the ancient Cimmerians*" confessed to be "*wholly wrapped in mists and darkness, where Helios never looks down with his illuminating sunbeams.*"

After a graphic picture of the desolation of the Crimea, Dr. Koch, however, leads us at last to a more cheerful subject when he speaks of the Crimean wines.—

"Our civil landlord [at Theodosia] placed before us a good German dinner. I had heard so much of the Crimean wines that I was curious to become acquainted with them in the neighbourhood of the spot where they were prepared. 'What wine do the gentlemen require?' was the reply of our host to our demand. 'Will you have Forster Traminer,

Johannisberger, or Leisterwein? or are you perhaps less patriotic in your tastes, and prefer the wine produced from the French, Spanish, or Cape vines? I should then recommend a countly Bordeaux of the first quality!—"We have no wish for foreign wines, my dear countryman, but for those of the Crimea," we replied.—"I see, gentlemen," returned our host, "that it is your first visit to the Crimea; for you would otherwise have been aware that all the wines I have proffered to you are prepared from grapes which ripen here. The proprietors of our vineyards have procured the best vines at great expense from every country, even from America; but they continue to call the wine after the original vine which has supplied the grapes. For instance, my Rhine wine is not prepared on the Rhine, but on the southern coast here; and as I before said, only from the grape which was brought from the Rhine. As the estates of Count Woronzoff (he was not then Prince) produced the best wine, all that is good also obtains the name of countly, even if not produced on the Count's vineyards." Thus enlightened, we drank in succession those which had the highest reputation,—Johannisberger, Steinwein, St. Julien, Champagne, Madeira, Cape wine."

—A circumstance which will enable our readers better to account for the enormous quantity of wine consumed under these names in Russia; and we dare say that many of our officers now in the Crimea will thank Dr. Koch for so valuable a bit of practical information, and that they will proceed to find out the "civil" German landlord as soon as their duties will admit of their so doing. There is a pleasant German simplicity and homeliness, however, in the style of this extract which alone would have induced us to transcribe it; and it is also welcome as the result of Dr. Koch's own experience,—a rare piece of egotism without vanity. The following is a curious page of history, and gives us a clear insight enough into the tortuous policy which has been pursued by Russia in extending her frontiers.—

"Only one individual bearing the name of Ghiray, and deriving his origin from Dgenghis Khan himself, now remains in the Crimea. Sahin-Ghiray, the last Khan, appointed and maintained in his position by the Russians [!], weary at length of the internal dissensions which occasioned so much mischief to his country and people, resigned his Government much as George XIII. did at a later period in Russia. The latter did not voluntarily surrender his kingdom to Catherine II., but rather was compelled by circumstances; notwithstanding which, it is only inch by inch that the Russians have been enabled to gain possession of the land. The miserable Sahin-Ghiray no longer found repose in his own country, and retired to Constantinople, where the former vassal was received very ungraciously, and banished to the Island of Rhodes, whither it was customary for those to go, who, having once borne high honours, had afterwards fallen into disgrace. Ere long the unhappy man received the silken cord as a special favour, that is to say, in Turkish fashion, he was compelled to use it to take away his own life. The former rival, Khan Selim Ghiray, fled, with all the nobles of his kingdom, to Circassia, and thereby largely contributed to maintain the ancient enmity and hatred of the inhabitants of that country towards Russia. Only one member of the ruling family now remained, and there his son still resides, though leading a most retired life. Married to an English woman, his children are brought up as Protestants; and, in 1844, his daughter was engaged to be married, if I am not mistaken, to a M. von Gersdorf, a Silesian by birth, but in the Russian service. Strange fate! that the last of the fanatical family who were the arch-enemies of Christianity,—more than once threatening destruction to all Christendom,—should be herself a Christian, and, though surrounded by adherents to the Russo-Greek Church, which alone professes to render the believer blessed, a Protestant, and married to a Protestant. 'Would that the Allied Powers [writes Dr. Koch,—suggesting at least one manner of solving our difficulties which may be of use at those puzzling Vienna conferences] could re-instate the ancient Tartar Kingdom in a new Chris-

tian form, and bestow it on one of the Protestant descendants of Dgenghis Khan.'"

Referring our readers for much new and important information about Sebastopol to Dr. Koch's own pages, we conclude our extracts with the Doctor's account of the Black-Sea fleet at the time of his visit.—

"In the autumn of 1844," he assures us, "the fleet of the Black Sea consisted of:—15 line-of-battle ships, 6 frigates (2 were still at sea), 5 corvettes, 11 brigs, 7 cutters, 6 tenders, 2 yachts, 18 transport ships, 14 ordinary steam-vessels, 2 guard ships, 1 bomb vessel, with three masts. Altogether 87 vessels. These form two divisions, each consisting of three brigades and nine equipages. These last are not always equally strong, as, for instance, there are two, neither of which possesses a single line-of-battle ship nor a frigate, and are each composed of only one corvette and several smaller craft. One division consists of only eight equipages in the Black Sea, as the ninth, composed of 4 brigs, 1 tender, 2 smaller steam-vessels, and 15 other smaller craft, forms the flotilla of the Caspian Sea."

Such is the force, probably materially strengthened of late years, by which Russia has been accustomed to maintain the terror of her name in the Black Sea. The mere enumeration of it is sufficient to show how hard will be the task of Lord John Russell and M. Drouyn de l'Huys at Vienna to carry any point in their negotiations which may virtually involve the annihilation of such a power, and thus destroy all that influence which her wily diplomacy has acquired from the coast to Herat and the frontiers of Cabool. We regret that we cannot give unqualified approbation to the labours of the translator; but, as the title-page informs us that we are now speaking of the merits of a Lady, we will only say that the spirit of German phrases may be much better rendered than by a literal translation word for word into English. A little reflection might have often enabled Miss Horner to curtail them with advantage to their clearness and force; and, though we are by no means unmindful of the wearisome difficulty of the task, we venture in all courtesy to suggest that we think she might have performed it a little more gracefully and well.

The painful subject of *Scutari and its Hospitals* (Dickinson Brothers) is handled by the Hon. and Rev. S. G. Osborne in a book which is very pretty to look at and sickening to read. Were it not that the official revelations obtained from witnesses by the Parliamentary Committee have confirmed in the minutest parts the facts here stated, some of them are so shocking as to have defied belief. 'Scutari and its Hospitals' will be one of the saddest monuments of the war; and, in the eyes of posterity, the sternest impeachment of our "system."—Lieut.-Col. Shafto Adair, of the Suffolk Militia Artillery, publishes a work on *The Militia of the United Kingdom* (Furnivall & Parker), in which he describes the excellencies and defects of that body as an instrument of defensive warfare, and offers valuable suggestions on the permanent organization of the force. The author goes lightly and intelligently over the literature of defence, marking the special aptitudes and proposals of the several writers on the subject. His book is very interesting as a scientific explanation of our means of resistance in case of attack.

To the pictorial and geographical illustrations of the war already chronicled in our pages we may add a large and carefully-drawn folding *Map of Europe*, issued with descriptive letter-press by Messrs. Black, of Edinburgh,—a pretty lithograph of *Prince Arthur* as a British Grenadier,—a rough and ready likeness of *General Sir De Lacy Evans*,—a recollection of the *Emperor Nicholas*, by Sir Edwin Landseer,—an *Episode at the Battle of the Alma*,

—a series of splendid *Views in the Baltic*, chiefly of the English and French ships, under various aspects of war, tempest and calm, from sketches by Mr. Brierley,—a *Plan of an Artillery Defence of East Suffolk*, by Lieut.-Col. Adair, showing the points to be fortified with batteries, dams and other works,—and, by the same Author, a *Military Sketch-Map of England and Wales*, drawn up in militia brigade districts, and showing the primary hill, river and railway systems of the country, as well as the militia depôts.—Mr. Stanford, of Charing Cross, has issued a coloured *Bird's-Eye View of the War in the Crimea*.—To these publications we must add two topographical and panoramic sketches, intended to illustrate the *Assault of Sevastopol*, drawn by Capt. M. A. Biddulph, and intelligible, we should think, to none but professional readers.

The Language of the Walls: and a Voice from the Shop Windows; or, the Mirror of Commercial Roguery. By One who Thinks aloud. Manchester, Heywood; London, Tweedie.

IF Nature by the brook-side and among the moorland heather gives us stones among which poets can find sermons, Art affords us walls on which want and falsehood, honest endeavour and lying praise, imprint their brevities. The stream of human faces along Cheapside offers a record full of whimsy and pathos to the pilgrim moderately exercised in Lavater's science,—but the tales imparted by the screen of planks which protects *Mr. Bohed's* great warehouse during the process of rebuilding, or by the barrier interposing betwixt the cares of *St. Alphage's* churchwardens, on mediæval restoration intent, and the curiosity of common passers-by, are of their kind as significant. The politics—the modes—the crimes—of the hour are all there, written in a strange short-hand or displayed in coarse hieroglyphics. Where the body is to be most advantageously clothed,—who can best minister to the mind diseased,—how folly may be amused the most foolishly,—in which way trade shall be taken most quickly and most cheaply about its business, are to be learnt by one able to read the parti-coloured pages of this book of popular prose. The subject, as a subject, is one of the best which a popular writer, having the requisite knowledge, could take up. Though "One who Thinks aloud" cannot be said to have treated it well, or always to have respected the limits of sound taste, nevertheless his "language," "voice," and "mirror" claim a passing attention and afford a momentary amusement.

After a preliminary flourish or *fantasia* (as musicians say) on the subject, the work begins with a weak and brief chapter on electioneering placards, which is succeeded by a satirical anatomy of the "Liberty of the Press." Concerning the latter subject, whether we agree or disagree with our Thinker-aloud and Mirror-holder in his estimate of the iniquities of *such* a journal, or the indirect bribery brought to bear on *another* leading article, is immaterial; but we must ask, as Mrs. Siddons did of the poor gentleman who died in his "bureau,"—"How gat he there?" What have the offences of the *Thunderer* to do with the literature which tapestried the boards that screened London's "lasting shame," the Nelson Column? The "mercenary and sycophantic" misdeeds of the newspaper press on the occasion of "the late meetings held in several of the leading towns of Scotland, in order to petition against the opening of the Crystal Palace on Sundays," probably were written on the walls of the Scottish towns; but still "the Fourth Estate" appears to us needlessly dragged into a

book, the direct and legitimate subject-matter of which was already ample, various, and suggestive enough. In the advertisements of "Theatrical and Clerical Stars," and in the "florid Gothic" style of the auctioneer, our author has a fair field. A good collection of the invitations to unwary purchasers put forth by gentry of the clan Robins, and couched in a phraseology, equalled neither by Gibbon, nor Lady Morgan, nor Mr. Carlyle, in the fullness of their several individualities, would furnish nearly as much matter for mirth as that stone volume of doggerel elegies—an old-fashioned country churchyard. But the "Thinker-aloud" does not know how to make the most of an opportunity. Both texts are dismissed without due improvement.

From these, our fragmentary friend goes on to anatomize social horrors,—denouncing the abuse of burial clubs and of burial-money, the hideous desire for which has led miserable creatures, calling themselves English mothers, to destroy their offspring. Next he shows up "an editorial galloping article" from the *Times* upon the Maine Law. What has either question to do with the "Language of the Walls"?—"Medical Quackery" is a more legitimate topic, though too professional a subject for a general journal. Nevertheless, a page good for extract is yielded by the harangue of that *Dulcamara*, who, one market-day, was heard and seen by our author dispensing his trash at Bradford.—

"My friends, I stand here before you independent, free, and untrammelled by connexion with any sect, party, profession, or denomination. I thank God I am no human butcher or wholesale poisoner. I don't come to you with bad Greek and corrosive minerals, the one to charm you and the other to send you to your long homes. No, my friends, you see these vegetables spread out before you: these are the produce of your own lovely hills, valleys, and green fields, and during the summer months many of them lend the charm of beauty to your meadows by their varied colours, and make the air balmy by their sweet fragrance. Not one of these, my friends, but possesses a life-giving essence or a health-restoring principle. The royal poet, who danced before the ark, said that man is wonderfully and fearfully made; and his Son proclaimed the everlasting truism that man was born to trouble as the sparks fly up.—(John, give that lady a twopenny box of pills).—Yes, my friends, notwithstanding your liability (another box, John,) to disease and death,—(Did you say a twopenny box, sir? Another box, John,) here is a safe and speedy remedy (attend to that gentleman, John,) for every disease 'mortal flesh is heir to.' My friends, you do well to supply yourselves while I am here.—(Two penny boxes, John.) During the course of the ensuing month I am obliged, by previous arrangement, to visit the following towns—(twopenny box, John);—to-morrow morning I leave here for Sheffield (attend to the lady with the child in her arms, John), and from there to Chesterfield; (cure the headache did you say? Why my dear fellow one box would cure a horse's head, which is four times the size of yours); then on to Derby.—(Give the child two pills at bed-time and continue the dose for a month.) From there I go to Nottingham, Newark-upon-Trent, (hand these pills to the lady, John,) Gainsborough, Lincoln, Brigg, and Barton-upon-the-Humber; ('tis well I told you I would be away for a month; take my advice, and lay in a good stock,) then I go to Hull, Beverley, Driffield, Bridlington, Scarborough, Whitby, and Stockton-upon-Tees, (two large boxes for that lame gentleman, John,) Darlington, Durham, Sunderland, Shields, and Newcastle-upon-Tyne; (ah! poor man, your swimming in the head arises from long hours of labour at a sedentary employment; two large boxes, John,) then I go to Hexham, Haltwhistle, Brampton, and Carlisle (my friends, your anatomical mankillers would transport me if they had the power. Thank God, I hold my authority from a higher power than that which deposes them to poison and kill by the knife); then

I go to Penrith, Shap, Kendal, Lancaster, Preston, and Manchester."

—The reader will not have forgotten the president at the "rooge-et-nore" table on the Egham race-course, so wonderfully daguerreotyped by Mr. Dickens in 'Nicholas Nickleby.' The above is almost a companion figure, worthy of that worthy.

"The Literature of Polite Puffing," again, though it be not written in the alphabet of mural language, would, if smartly handled, make a pleasant book. Think of the electroplated paragraphs which excited scandalous wonder and elegant curiosity in the days of the "silver-fork" novels!—Think how many a time the jovial banker's Lady, in Stratton Street, was announced in asterisks, which were no disguise, as about to figure in the coming tale!—Think of that mysterious, yet flimsy veil, under which *Lord de Nigel's* fraudulent whist at Graham's was displayed as the real source of "thrilling interest" which was calling "the unprecedented attention of the aristocracy to 'the Ace of Hearts,' Mrs. —'s new novel, &c. &c."!—But as with conundrums, so also with puffs,—the silly—not the solid—ones are the best,—such, for instance, as the following, which is from our own private collection, not from the book under treatment.—

SINGULAR COINCIDENCE.—*Penelope* was the name of the wife of Ulysses,—and *Penelope* is the title of a novel this day published by Messrs. *Etcetera & Alias!*

Our author belongs to a younger world than that which was guided in its studies by the eloquence and fancy just referred to; but he is great in describing the manner in which local writers have puffed "Ben Rhydding,"—a natural pot, pan, or pipkin, in Yorkshire, in which dyspeptics wash away their stomach sins, and from whence they go home with digestions of forty-ostrich power. To judge from his "Passing Hour,"—a sweet tale of a Glasgow dinner-party,—St. Mungo's capital must boast a tailor as adroit, poetical and circuitous in recommending his "camlomeres," his cutters, his coats, his capes, his doekskins and his *ditto's*, as Mr. Moses himself.

"Servants' perquisites" (a sore subject) and "Christian brotherhood"—as illustrated in a war to the knife and vitriol bottle 'twixt Calvinists and anti-Calvinists—come next in this strange book. But they are merely peeped at and played with as topics, not illustrated from the walls, from the shop-windows, or from the Exeter-Hall placards, as, perhaps, they might have been. In the paper on 'Yankee Puffery' our author has collected a queer advertisement or two,—e. g., the following:—

"Cardinal virtues are rarely to be met with, but—good printing can be obtained at Gordon's, No. 84, Nassau-street, at very low prices."

This is, perhaps, only an imitation of our English inscription under the innkeeper's sign—"Put your trust in God, for this is the sign of the Black Sow!" After all, the Yankees seem to be beaten by the Glasgovians.—In the following there is a tipsy touch of lyrical and musical association, which should sweetly appeal to the countrymen of McNeill and Tanahill:—

"It is an old adage that a man is known by the company he keeps; beware, therefore, of being seen with a bad hat!! 'Meet me in the willow glen,' or at 63, Old Vennal, Trongate."

While he was talking of shop-puffery, our historian of wall language might justly have included the eloquence of rivalry and depreciation. We remember, many years ago, to have seen a pair of rival drapers' shops in Liverpool, within sight of each other, garnished with antagonistic placards, printed in

gigantic capitals. On one of these, A. accused B. of forcing a business, by flinging away goods at a terrible sacrifice, thus making of his emporium of silks, woollens, cottons, calicoes and laces, &c. &c. a

BLEEDING TRUNK!!!

from every pore and vein of which life was welling. On the other, B. retaliated, by assuring passers-by that

DEATH-LIKE STILLNESS!!!!!!

reigned in A.'s establishment!

We have gone far enough in anatomizing such an anatomy of folly and knavery. This one, moreover, errs, inasmuch as it is at once incompletely and too completely executed. We have mentioned, in the foregoing paragraphs, that some matters are only named, which, if treated in detail, might have yielded rich matter for sarcasm. Towards the later portion of his book, our author becomes more diffuse, minute and gossiping; but in a fashion as objectionable as the reserve and meagreness referred to. While dealing, for instance, with the Adulteration of Food,—whose work is he doing when he prints receipt after receipt, nostrum after nostrum, under pretext of showing to the shrinking public to what extent, and by what clever and easy methods, they are "poisoned in jest"? We have heard of an empiric who drove his gig in white gloves, and travelled from place to place as a "disagreeable smell disperser." There is a quackery besides those noticed above—that of the quack denouncer!—The witch-finder of olden times was nearly as noxious a professional character as the witch.—Books for the instruction of the young are to be suspected if they describe too minutely the divers forms and manners in which naughty children can misbehave themselves. Here we have page after page, showing with what "sweet adulteries of art" (to misuse the poet's phrase) the staff of life and the waters of comfort can be depreciated by the introduction of cheap and counterfeit matter for the temptation of the unwary, and to the damage of the credulous. But we must stop:—in truth, the nonsense contained in this book is not flagrant enough to give it a wide circulation, nor its sense subtle and serpentine enough to make it dangerous.

Rig-Veda Sanhitā: a Collection of Ancient Hindu Hymns, constituting the Second Ashtaka, or Book, of the Rig-Veda. Translated from the original Sanskrit by H. H. Wilson, M.A. Allen & Co.

NEARLY five years have elapsed since Prof. Wilson presented the English public with a translation of the First Ashtaka, or Ogdoad, of the Rig-Veda [*Athen.* No. 1209]. He has now published his translation of the Second Ashtaka; and, should the work continue to advance at the same rate, we may look for its completion in about a quarter of a century from the present time! This delay is no doubt attributable rather to the necessarily slow progress of Dr. Müller in his difficult task of collating the text, than to any supineness on the part of the translator,—whose labours, moreover, are, meanwhile, abundantly visible in other quarters. Be this, however, as it may, our impatience to see the work completed cannot but be considerably calmed by the perusal of what is already before us. Unquestionably it is most desirable that the Vedas, "the primitive record of the religious belief and observances, and of the archaic institutions of Hindú society," should be translated. The antiquity of these writings, and the veneration in which they have been held for ages by countless myriads of the human race, might fairly claim for them the careful scrutiny of the greatest scholars of this enlight-

ened age. *A priori*, too, it might have been expected that much information would have been derived from books so ancient and so revered. But these anticipations are disappointed, if not destroyed.

In these first two Ashtakas there are 239 hymns, which follow one another without any apparent connexion,—the very date of their composition being a matter of uncertainty. Of these hymns sixty-seven are addressed to Agni or Fire,—eighty-four to Indra or the Firmament,—and nearly all the rest to the Maruts or Winds, to the Aswins or Sons of the Sun, and to the personified Dawn. There is nothing striking or poetical in the invocations addressed to these uninteresting deities. In general, they are told in simple, sometimes in rather undignified, language, that offerings of clarified butter, and the perpetual Soma-juice, are ready for them; and they are requested in return to give “ample and notorious food, posterity, riches.” There is little or no expression of devotional feeling. The act of worship is an affair of business. Indeed, it is very plainly hinted, both on the side of the deity and of the sacrificer, that there is to be a fair exchange of benefits. Thus, at p. 161, Indra says, “Wherefore, brother Agastya, dost thou, who art my friend, treat me with disregard? Verily, we know what is in thy mind: thou dost not intend to give us anything.”—To which Agastya replies, “Thou, Vasupati, art the lord of riches; thou, Mitrapati, art the firm stay (of us), thy friends: Declare, Indra, along with the Maruts, (thy approval of our acts), and partake of the oblation offered in due season.”

The style is most elliptical and obscure; and but for the Commentary of Sáyana, a learned Brahmin, and Minister of the Rajah of Beejanuggur, who flourished in the 14th century of the Christian era, it would be unintelligible. Even with his assistance, little can be made of such verses as the following:—“The showerer (of benefits) is invigorated (in one form), by eating with the tongue of another; in a different form, the restrainer (of all) consumes the forest trees”;—and, “The cow, holding her calf underneath with her fore-feet, and then above with her hind-feet, has risen up: whither is she gone?—to whom has she turned back when half-way?—where does she bear young? it is not amidst the herd”;—or again, “Maruts, lightning-armed, who (standing) amongst you, sets you of yourselves in motion, as the jaws are (set in motion) by the tongue: as falling rains (are essential) for the obtaining of food, so (those desirous of sustenance) excite you in various ways, like a horse in (his) daily (training).” It must be remembered, too, that the words in parentheses are inserted by the Commentator; and from these specimens it may be inferred how thick the darkness would be without his assistance. Prof. Wilson has noticed this difficulty in his Introduction, and very justly asks what the European scholar is to make of such sentences as “The grandson of the waters has ascended above the crooked —”; “the broad and golden — spread around”; “Do you, Indra and Parvata, sharpen our —.” German writers, as Prof. Roth and others, have ventured to fill up many of these blanks rather according to their own conjectures than under the guidance of the native Commentaries; but the English translator, notwithstanding his profound acquaintance with Sanscrit literature, has, we think with much good sense, chosen a different course. At the end of his Introduction, he says, with taste and discernment:—

“The several translators agree tolerably well in the close; but their discrepancies in a passage of less than ordinary perplexity may be considered as bearing witness to the utility or even to the necessity of

a competent interpreter, such as we have in Sáyana Achárya, although he may not be infallible: at any rate I gratefully acknowledge the value of his assistance, and without it I should not have ventured to attempt a translation of the Rig-Veda.”

It remains that we notice a few passages which throw a dim light on the history of the early ages of the Hindú race. In several places the river Sindhu or Indus is mentioned. At p. 246, it is said:—

“He [Indra] tranquillized this great river, (so that it) might be crossed; he conveyed across it in safety (the sages) who had been unable to pass over it, and who, having crossed, proceeded to realize the wealth they sought. * * By his great power he turned the Sindhu towards the north: with his thunderbolt he ground to pieces the waggon of the dawn, scattering the tardy enemy with his swift forces.”

Sáyana supposes the great river to be the Irivati; but it seems more natural to consider it as the Indus, and view the passage as referring to the eastward progress of the great Aryan nation from the countries west of that river. In many other places, confirmation may be found of the now generally-received theory which regards that race as having originally entered India from the north-west. Time is reckoned by winters, as would naturally be the case in a cold climate. The gods are continually invoked for protection against wolves. The lion is often mentioned, the tiger not at all. Nor does there seem to be any allusion to the *nága*, or cobra, which is peculiar to India, and subsequently makes such an important figure in the religion of the Hindú. But perhaps the most interesting passage in the book, and that which of all others seems to establish most conclusively the Northern origin of the Vaidik people, is the 162nd Hymn, in which the Ashwamedha, or sacrifice of the horse, is celebrated. We give a portion of this, commencing with the 8th verse.—

“May the halter and the heel-ropes of the fleet courser, and the head-ropes, the girths, and any other (part of the harness); and the grass that has been put into his mouth; may all these be with thee, (horse), amongst the gods.

“Whatever the flies may eat of the raw flesh of the horse; whatever (grease) is smeared upon the brush or upon the axe; (what is smeared) upon the hands or the nails of the immolator, may all this be with thee, (horse), among the gods.

“Whatever undigested grass fall from his belly; whatever particle of raw flesh may remain; let the immolators make the whole free from defect, and so cook the pure (offering) that it may be perfectly dressed.

“Whatever (portion) of thy slaughtered (body) fall from thy carcass when it is being roasted by the fire, (escaping) from the spit; let it not be left on the ground, nor on the (sacred) grass, but let it (all) be given to the longing gods.

“Let their exertions be for our good who watch the cooking of the horse; who say, It is fragrant; therefore give us some: who solicit the flesh of the horse as alms.

“The stick that is dipped into the caldron in which the flesh is boiled; the vessels that distribute the broth; the covers of the dishes, the skewers, the knives, all do honour (to the horse).

“May the place of going forth, of tarrying, of rolling on the ground; the foot-fastening of the horse, (the water) that he has drunk, the grass that he has eaten;—may all these be thine among the gods.

“Let not smoke-smelling Agni cause thee, (horse), to utter sound; let not the glowing caldron, odoriferous (with its contents), be overturned: the gods accept a horse that has been selected (for sacrifice); that has been led (round the fire); that has been devoutly offered, and has been consecrated by (the exclamation), *Vashat*.”

Prof. Wilson observes on this:—

“Although some of the expressions are obscure, and perhaps contradictory, yet it is undeniable that

the hymn describes the actual sacrifice of a horse, the subsequent dissection of his limbs, partly boiling and partly roasting of his flesh, the presentation of part, with fire, to the gods, and the eating of a part by the persons present: a rite worthier of barbarous Scythians than civilized Hindús, and which may possibly have originated with the former.”

Such passages are, no doubt, worth examination; but we regret that it is necessary to wade through such a sea of uninteresting matter to reach them.

MINOR MINSTRELS.

Lyrics of the Heart and Mind. By M. F. Tupper. (Hall & Co.)—This little volume, with its title very unfairly copied from Mr. Alaric Watts's collected and illustrated edition of his Poems, is called by its author “the crop of occasion and circumstance.” We trust the explanation is intelligible, for we cannot ourselves undertake to say what is meant. We can say that the “crop” is *not* poetry, and *not* prose,—*not* verse, and *not* rhyme. But we are restricted to negatives. In another place, Mr. Tupper insinuates that it is “a cairn of pebbles”; but as we have never seen a cairn of “pebbles,” the illustration does not help us much. Indeed, confusion of imagery is the observable characteristic throughout.—

Haste, for Time shall be no longer,
All creation seems to tend
In a rapid ever stronger,
To that cataract the End,

cries the minstrel; but why anybody should haste to be thrown over a cataract we do not see; and that a cataract is the “end” of anything is a fact now discovered, we apprehend, for the first time. We had an impression that cataracts were to be avoided; and that they were at the beginning of rivers rather than at the “end.”

One Hundred Sonnets. Translated after the Italian of Petrarca, with Notes and a Life of Petrarch, by Susan Wollaston. Second Edition. (Saunders & Otley.)—How seldom can we hope to see a good translation of a foreign poet when we remember that such work can only be done by our best men, and that best men do and always will prefer original writing to mere translation. In the present case, the “gentlest lover” of the fourteenth century, the fair lawyer's son of Arezzo, has fallen into good hands. Perhaps the lover of Laura, whose sonnets are only so many modulations of an amorous sigh, has fittingly obtained a female translator, who terms him “the best of men, the noblest of lovers, and the loftiest of poets.”—One hundred of his sonnets, written in ink “tempered with love-sighs,” embrace the finest pages of his nightingale laments. In spite of one-and-twenty years expended in punning on Laura's name, and re-arranging and straining every metaphor that needy troubadours had heaped on their unworthy or imaginary mistresses, Petrarch found time to study law, grammar, and rhetoric, to write long Latin poems, to pen eulogies of Rienzi, to dabble in diplomacy, visit dukes and emperors, and reprove popes. On a summer evening, in the year of grace 1374, in the calm sunset of a good old age, the poet-sage was found dead in his study, his head resting on an open book. We do not think that Petrarch can ever be a very popular poet in England; but we still are glad to welcome a translation so long needed, at least by the literary student. The most violent contemner of Petrarch's sweet monotony must confess the vast powers of a mind that could compose so noble an outburst of patriotism as ‘Italia Mia,’ and so swan-like a dirge of more than woman's tenderness as ‘Padre del Ciel, dopo i perduti giorni.’ We do not think the present edition improved by

the omission of the Italian text. As a specimen of the graceful ease of Miss Wollaston's translation, we select the version of the one hundredth sonnet, in which Petrarch laments the errors of his life and prays for divine assistance.—

I mourn the wasted life I had begun
In loving that, was doom'd alas! to die;
Whilst vain the wings Heav'n gave, that I might fly,
And soaring—leave the track I nobly won.
Oh Thou! invisible! immortal One!
Who seest the grief, my spirit should defy;
Oh! that thy grace, my weakness, may supply,
Support the soul, that knows not ill to shun!
Tho' war and tempest mark my earthly course,
Oh! let a peaceful haven greet its close—
Tho' vain my life—a Christian let me die!
Thou knowst thou art alone, my soul's resource,
Oh guard the life, thy mercy yet bestows,
And when in death, thine aid do not deny!

Abdul Medjid: a Lay of the Future, and other Poems. By H. B. Macdonald. (Edinburgh, Hogg; London, Groombridge & Sons.)—We have men who write like women, and women who write like men. This book is an instance of a poet, not without fancy and capacity, who warbles with much of Mrs. Hemans's tenderness and plaintiveness, but with little condensed force; there is a musical hurry about the lines and a diffuse haste that give the poetry an air of being rather the result of a momentary feeling hastily versified than any strong forging of the hammer of the reason on the stithy of the imagination. In 'King Ring: a Scandinavian Ballad' a jagged force would have suited the subject better than Della Cruscan softness. The language is involved and diffuse, because the thought it embodies is vague:—to be simple, the thought must be clear as that of an old ballad. As with all such writers, the simplest metrical experiments are the best. Of these, we select the following richly-flowing lines:—

Not in the pale early time,
Daughter of the summer prime—
In the slow relaxing fold
Of the frost king's dying hold,
Beams when faint, and dews are cold,
Thou art coming! Thine the way
Where th' ambrosial odours play,
Where the sunbeams are enroll'd
On the sward, like gems and gold,
And the summer's blending bloom
Maketh a purpur'd gloom,
Where the birds and fountains meet,
In commingling music sweet.

Zehn Schottische Lieder verdeutscht. Von W. B. Macdonald, von Rammerscales. Schottische und Deutsch. (Edinburgh, Lizars.)—Mr. Macdonald has done his work well, and Germanized with much spirit some of Hogg's and Burns's most beautiful songs. We trust they may delight Uhland's ear, and rouse him to still higher soarings, just as larks challenge each other to overtake a cloud rising through a sunset. 'Green grow the Rushes O!' looks so natural as 'Grün wächst die Binse O!' that we begin to think Burns borrowed it after all.

Leaves from Life. By L. N. R. (Bagster & Sons.)—These religious poems (probably by the hand of a Lady) are divided, with graceful fantasy, into Olive Leaves, Cypress Leaves, Myrtle Leaves, Ivy Leaves, Orange Blossoms, and May Blossoms. Many of these verses seem written for children, and are unsuitable for a promiscuous public, however indulgent. Others are on subjects interesting only to a domestic circle. No genius, even if he wrote on such subjects, could throw much interest on 'Mosses seen through a Microscope,' or 'Lines on a Box of Water Colours':—the Sostenanto Piano and a Musical Party are scarcely subjects for any but the Tenth Muse, and she is not yet born. Sweet and powerless as a musical-box, we select a passage beyond the average.—

The night hath rest! its worth the weary know;
Balm doth its shades on tired limbs bestow:
Sleep, gentle handmaid, waits
At the still entrance-gates,
Soft lulling anxious thought and aching woe.

* * * * *

Sabbaths have rest! when the soul shakes her wings,
In Zion's courts, awhile from meaner things;
Forgets her week-day care,
Or learns its weight to bear,
While dews of heaven around the Spirit flings.
And heaven hath rest—the Sabbath of the sky!
No weary feet shall walk the world on high;
No tear of trouble falls
Within those jasper walls.
To gain this rest for me did Jesus die.

Poems upon Various Subjects. By J. R. Withers. (Cambridge, Naylor; London, Wertheim & Macintosh.)—Of the small poets, the self-educated are generally the least bearable. They are the crudest, evince the worst taste, are more restricted in subject, oftener plagiarize, and seldom confine themselves to scenes with which they are conversant. Mr. Withers is no exception to the rule. He is, it appears, the son of a Cambridgeshire shoemaker, and has never received any education but from his mother. Originally a gardener, at his father's failure he turned cobbler, and is now, with his wife and three children, in a Union, where he still writes verses, and has contrived to publish a volume by subscription.

OUR LIBRARY TABLE.

A Hint from Modesty to the Ladies of Great Britain on the Fashion of Low-Dressing. By Fred. Andax. (Wheeler.)—Cowley proved, from the examples of Nature, that men ought to drink; though, when he sang of the sea drinking up rivers, and of the sun drinking up the sea, he by no means intended to be the Anacreon of water. Shelley, imitating his bacchanal hymn, showed by analogy the virtue of kissing; and asked, if mountains, waves, and zephyrs kissed, why should not he? Mr. "Fred. Andax" plagiarizes this inductive trick; and puts natural philosophy to the torture that he may extort evidence against "the fashion of low-dressing." The Gothic spire is beautiful when ivy-wrapped,—the gable, when adorned with pendent moss,—the shaded stream,—the sky dappled with clouds,—the moon half lost under a fleecy veil. Then, the galaxy is almost invisible; though our moralist forgets to add that the Milky Way is the least splendid among the assemblages of stars. Moreover, the nightingale sings in a dim place; and therefore ladies ought to wear high dresses. All this inconsequential logic is urged in heavy paragraphs, made up of epithets, ejaculations, and apostrophes, such as we find in amateur annuals, and the epics of young Virgils who celebrate "nonentity with circumambient wings." Mr. Andax, however, can see through an eclipse; since he praises the invisible sun, and lays it down as an axiom:—"Some things appear to most advantage when entirely concealed!" If such stupendous nonsense does not warn the reader not to meddle with this Ladies' Lictor, we will add that "Piety asks, would they sing psalms in that dress?"—for Mr. Andax proceeds to explain his notions of piety, which appear to mean that the throat should be carefully muffled. A new edition of 'Stubbs on Manners and Follies' might include the satirist as well as his low-dresses.

Letters on Music: Collected and Published—[Lettres, &c.] By C. Estienne. (Paris, Fontaine.)—There is so little reading about music of any kind to be had that the amateur may be well excused who looks eagerly into every volume with the magic word on its title-page searching there for teaching, speculation, and anecdote. M. Estienne's miscellany, however, will scarcely yield a grain of any of the three aforesaid things to the most hungry or the most easily-contented student. Though his letters treat on subjects some of which are not exhausted, such, for instance, as Nourrit, Baillot, Onslow, they are the smallest of small reading—and may have been written, we imagine, for one of the small journals, where, betwixt talk about the toilette and some weak romance continued from month to month, it would be waste to treat the *Célimènes* of Paris, or their Abigails, with anything precious concerning "the sweet new opera" or "the darling tenore" in

vogue. The first three letters of the first series are devoted to the characters of the different keys of music. On this subject almost every musical amateur has loved in his turn to expatiate; and yet we hardly know a question in which speculation can lose itself so easily or be so immediately answered by counter-speculation. We remember a lecture and debate on the topic, in which, by common consent, the key of G major was scouted as the least valuable, interesting or effective of keys, till some speaker disturbed the unison, and, by citing Handel's choruses—'For unto us a Child is born' and 'See the conquering Hero'—and Haydn's 'God preserve the Emperor,' rendered null and void all the theorizing, in which so many ingenious persons had been so comfortably agreeing. But we need not take M. Estienne's book as a peg on which to hang our own whimsies of exception, sympathy and association, since it is valueless, because of the meagreness of its contents and the common-place style in which they are treated.

Cosas de España; or, Going to Madrid via Barcelona. (New York, Redfield; London, Trübner & Co.)—Very much of this book might have been written in America or Arabia as well as in Spain. No one figures in it so conspicuously as the Author. With him Emerson's "permanent me" is all-in-all. An Imperial "progress" could not be more pompously described than his exit from Lyons, alone, in the coupé of a *Berline Parisienne*. Pages are occupied with imaginations on an Englishwoman's foot, seen by the writer among the myrtles at Nice. Other trifles afford similar opportunities for this outpouring of exhaustless egotism, so that the reader advances from chapter to chapter with only a glimpse now-and-then of scenes or groups on the wayside. Nevertheless, as the tourist, apart from his conceit, is extremely merry, and loves the sunny side of Nature, his notes of travel, with their long preambles and perorations, are not unamusing. His route lay from the Pyrenees, down the Rhone, to Marseilles, whence he proceeded to Nice, to Barcelona, to Valencia, and to Madrid. The mock Carnival, *olla podrida*, bull-fights, beggars, priests, serenaders and gipsies,—the usual concomitants of Spanish adventure,—are retouched in a lively, if not edifying, strain. To such as are willing to entertain an hour of idleness with a volume of this kind, we may promise, at least, that the whole of it is equally frivolous, and that it is mixed up with no solemn absurdities.

Trübner's Bibliographical Guide to American Literature; being a Classified List of Books published in the United States of America during the last Forty Years. (Trübner & Co.)—The compiler of this catalogue undertakes to refute Sir Archibald Alison's assertions concerning American literature. The labour was somewhat unnecessary, if intended only to prove that Sir Archibald Alison had been guilty of misrepresentation; but the result is useful. Here we have a well-arranged survey of literary progress in the United States during forty years. It embraces the title, author (if known), size and price of each book, often omitting, however, the publisher's name, place of publication and date, which is a fault in the plan. Among the statements of the volume is one which implies that during the twelve years preceding 1842 there appeared "in America" 623 original works and 492 reprints, excluding reprints of novels and tales, and placing 115 under that head in the "native" list. For 1853, the numbers as here given are:—733 "new works," 278 reprints, and 35 translations. In 1854, however, the compiler says, there were 185 American books reproduced in England. He declares himself, though faintly, in favour of international copyright.

History of Christian Churches and Sects. By the Rev. J. B. Marsden. Part IV. (Bentley.)—The present part contains the conclusion of the author's account of the Church of England, his notices of the Free Church of Scotland, and the French Protestant Church, with a portion of his account of the Quakers. The book is not at all devoid of merit; but it is flimsy, and without the learning and care which one would like to see applied to such a grave and important subject.

The author has evidently written in haste, and published without sufficient consideration.

The Certainty of Christianity: a Sketch. By a Layman. (Edinburgh, Constable & Co.)—Treatises upon the evidences of Christianity are of two kinds: those calculated to confirm the convictions of persons already disposed to believe, and those designed for the consideration of unbelievers. The present little volume is of the former kind. It proceeds upon the principle of abstaining from reference to the New Testament, substituting for its testimony the statements of heathen writers. The argument is simply this: the great historical facts of Christianity can be proved to have occurred, as foretold in the Jewish prophetic books, by the testimony of Pagan authors. The tone of the author's remarks is liberal and candid, and there are persons, doubtless, to whom his labours will be acceptable.

Speeches of Eminent British Statesmen during the Thirty-nine Years' Peace. First Series. (Griffin & Co.)—Does not this title promise more than the volume fulfils? The "Speeches of Eminent British Statesmen," from the close of the War to the passing of the Reform Bill, are reduced to one from each of the following:—Earls Liverpool, Durham, and Grey; Mr. Huskisson and Mr. Canning; Sir Samuel Romilly and Sir James Mackintosh; Viscount Castlereagh, the Duke of Wellington, and Lord John Russell. Surely, the eloquence of the English Parliament during that stirring period is not adequately represented here. Lord Palmerston, Sir Robert Peel, and Mr. Macaulay are reserved for a Second Series, headed by Lord George Bentinck. This is a proof of little discrimination on the collector's part. Nor do we consider that the best speeches have been fixed upon to illustrate the oratorical powers of the Senate. Indeed, another principle seems to have guided the editor, for the Earl of Liverpool's address can scarcely be referred to as a specimen of British oratory. Again, in the instance of the Duke of Wellington persuading the House of Lords to concede Catholic emancipation, the weight of the peer's advice is mistaken for the effect of eloquence. The style of the Duke, however, was characteristic. In Lord John Russell's noble and logical speech on the Reform Bill, we remark that hardly a metaphor occurs, except one of a kind rarely employed in English political debate:—"It is the nature of English liberty that her nightingale notes should never be heard from within the bars and gratings of a cage; to preserve anything of the grace and sweetness, they must have something of the wildness of freedom." On the same subject Lord Brougham's splendid argument as Lord Chancellor ought not to have been omitted. But the narrowness of the plan renders it impossible for this series to accomplish its professed object, and represent the body of British parliamentary eloquence. Such a design, well executed, would add some important volumes to our political library, since it would exhume from Hansard the materials for a critical study of English methods of legislative debate. There are distinct and permanent peculiarities in our latter-day orations, which have an obvious connexion with the national character and with the institutions of the age. This alone would confer a lasting value on any selection of the kind, judiciously made.

Among late "installments" (as the Irish Lady called *instalments*) belonging to the foreign "Diamond Library" of M.M. Kiessling, Schnee & Co. which have been forwarded to us, come six volumes of 'The Mohicans of Paris,' by M. A. Dumas.—These "Mohicans" are not exactly equivalent to our "Mohocks" of old London, being merely, so far as can be guessed, a city tribe of those "Bohemians," in which race modern French ethnologists have agreed to include all that is semi-gifted, vagabond, and imperfectly respectable. At present, however, we can only "guess";—since these six volumes contain but the prologue of the new story, and, for aught that we know, it may be protracted to the length of 'Le Grand Cyrus' ere it is finished. But—no scandal against Mdlle. de Scudéri—we fancy that the new romance, should it run to sixty volumes, may, unlike the 'Grand Cyrus'—keep us rivetted to its last page.

Under the title of a "Roving Englishman" we

have a reprint of some very pleasant sketches from a weekly contemporary.—Among books in course of publication, we may announce the first volume of a collected edition of the *Works of Henry Lord Brougham*, containing 'The Lives of Philosophers of the Time of George the Third,'—reserving the subject of Lord Brougham's place in literature for discussion when the series shall be more advanced.—We have the second and third volumes of Mr. Jesse's *Court of the Stuarts*,—the third volume of Mr. Bell's reprint of Hughes's *History of England*,—and the sixth volume of Mr. Knight's *Stratford Shakespeare*.—The *Autobiography of Francis Arago* has been translated, by Prof. Powell, for the Messrs. Longman's "Traveller's Library," in which series has also appeared a translation, by Mr. R. Martineau, of Gregorovius's *Corsica*.—From America we have another reprint of the same author's work on *Corsica*, translated by Mr. E. J. Morris.—Mr. L. Wraxall has translated from the German Gerstaecker's *Frank Wildman's Adventures on Land and Water*.—Among tales, new or old, printed or reprinted in the shilling libraries, we have *The Serf-Sisters*; or, *the Russia of To-day*,—two several editions, one marked "the Author's," of *Wolfer's Roost*, by Mr. Washington Irving.—*Pictures of Town from my Mental Camera*, by Werdna Retnyw, M.D.,—*Life and Beauties of Fanny Fern*,—*The Lost Heiress*, by Mrs. Southworth.—Among books of which the interest is more or less ephemeral, we have on our table *Our Heroes of the Crimea*, a series of biographical sketches, chiefly from newspaper accounts,—and a translation of Charles Koch's *Crimea, with a Visit to Odessa*.—The "Parlour Library" has been enriched by the addition of *Sir Jasper Caven*,—and the "Railway Library" by that of *Electra*.—In second editions, we have before us Mr. Murchison's *British Mines*,—*The Modern Orlando*, by Dr. Croly,—*Poems*, by Bessie R. Parkes,—Mrs. Wright's *Globe prepared for Man*,—Mr. Marx's *The Serf and the Cossack*,—and *Osman*; or, *the Eastern War*, by Mr. W. Molyneux.—In third editions, we have Kugler's *Handbook of Painting*, with Notes by Sir Charles Eastlake,—the *Ballad of the Alma*,—*Mensuration made Easy*, by Mr. C. Hoare,—and *The Violet*; or, *Select Poetry for all Times*.—Mr. Locke's spirited and useful essay, *Ireland's Recovery*, appears in a fourth thousand,—and we have fifth editions of Sir Charles Lyell's *Manual of Elementary Geology*,—and of Mr. Francis's *Analysis of British Ferns*.

LIST OF NEW BOOKS.

Adventures of Frank Ogilby, by Rev. W. Wickenden, 8vo. 7s. 6d. cl.
Angus's (Dr.) Christ our Life, 2nd edit. 8vo. 5s. cl.
Annals of England, Vol. 1, 8vo. 5s. cl.
Blind Fisherman and his Three Sons, 4to. 2s. 6d. bds.
Bonnet's Family of Bethany, 13th ed. 8vo. 5s. cl.
Brougham's (Lord) Works, Vol. 2, 'Lives of Men of Letters,' 5s. cl.
Burns's Popular Lib. 'Witch of Melton Hill,' 8vo. 2s. 6d. bds.
Burns's Popular Lib. 'Pictures of Christian Heroism,' 2s. 6d. bds.
Cochran's New Guide to Paris, 17th edit. 1s. 6d.; with Map, 2s. 6d. cl.
Cornish's Treatise on Purchase-Deeds, new edit. 8vo. 10s. bds.
Cumming's Lectures for the Times, 4th edit. 8vo. 5s. cl.
Cumming's Readings from New Test., 'St. John,' 8vo. 6s. cl.
Drew's (J.) Practical Meteorology, 8vo. 5s. cl.
Eadie's (Dr.) Divine Love, 8vo. 5s. cl.
Edgeworth's Parent's Assistant, new edit. 1 vol. 6s. 6d. cl.
Englishwoman's Domestic Magazine, Vol. 3, post 8vo. 2s. 6d. cl.
Everest's (Rev. R.) Journey through United States, 8vo. 5s. cl.
Green Boy, and other Stories in Verse, with Pictures, 4to. 2s. bds.
Gwynne's Word to the Wise, 6th edit. 18mo. 1s. cl.
Heath's (Rev. D. J.) Exodus Papyri, 8vo. 5s. cl.
Hind's Principles and Practice of Arithmetic, 7th edit. 4s. 6d. bds.
History in all Ages, 2nd edit. 8vo. 7s. cl.
Howitt's Boy's Adventures in Wilds of Australia, new edit. 4s. cl.
Israel Potter, by Herman Melville, 8vo. 1s. bds.
Johnson on Epidemic Diarrhea and Cholera, post 8vo. 7s. 6d. cl.
Johnson's Instructions for Analysis of Soils, 3rd edit. 8vo. 2s. 6d. cl.
Katie Stewart's 2nd edit. 8vo. 5s. cl.
Krummacker's Christ and his People, 8vo. 5s. cl.
Lawrence (R. M.) On Gout and Rheumatism, 8vo. 2s. 6d. swd.
Lectures to Young Men's Christian Association, 1864-5, 8vo. 4s. cl.
Library of Biblical Literature, Vol. 3, 8vo. 1s. 6d. bds.
Life of St. Paul, the Apostle, 8vo. 1s. 6d. swd.
Malan's (Rev. S. C.) Who is God in Christ? 8vo. 7s. 6d. bds.
Margaret, and other Poems, 12mo. 2s. swd.
My Brother's Keeper, 8vo. 5s. cl.
Outlines of History of British Church, 7th edit. 18mo. 1s. cl.
Parkes's (Miss) Poems, 2nd edit. 8vo. 5s. cl.
Paul's (W.) Handbook of Villa Gardening, 8vo. 2s. 6d. swd.
Phillips's (Miss) Shower of Pearls, 18mo. 1s. cl.
Potter's (R.) Elementary Treatise on Mechanics, 3rd edit. 8s. 6d.
Pride of the Mass, 8vo. 1s. 6d. bds.
Rosa and Lillie Stanhope, by Miss M'Intosh, 18mo. 1s. cl.
Routledge's Books for the Country, 'Doyle's Small Farms,' 1s.
Saratina on the Holy Eucharist, trans. by Denison, 8vo. 7s. 6d. cl.
Simpson and Wise's Readiest Reckoner, 10th edit. 12mo. 5s. roan.
Smith's (R. B.) Italian Irrigation, 2 vols. 8vo. 30s. cl.
Sunbeams for Little Children, 8vo. 2s. cl.
Swiss Family Robinson, new edit. 1 vol. 8vo. 3s. 6d. cl.
Tupper's (M. F.) Lyrics, 2nd edit. 8vo. 3s. 6d. cl.
Whish's (Rev. J. C.) The First Fringe, 8vo. 10s. 6d. cl.
Woman and her Master, by Lady Morgan, new edit. 2 vols. 7s. cl.

[ADVERTISEMENT.]—MR. S. C. HALL'S PICTURES.—We would direct attention, for more reasons than one, to

the sale by Messrs. Foster, on Monday, 23rd inst., of a collection of cabinet pictures and drawings by British artists of celebrity, formed during a series of past years by Mr. S. Carter Hall, editor of the *Art-Journal*; including specimens by D. Roberts, R.A.; T. Creswick, R.A.; F. Goodall, A.R.A.; E. M. Ward, R.A.; T. B. Cooper, A.R.A.; R. Redgrave, R.A.; Sir W. Allan, R.A.; W. Collins, R.A.; W. F. Frith, R.A.; J. B. Pyne; W. Müller; E. W. Cooke, A.R.A.; W. Mulready, R.A., &c. The occasion of the sale is a reason why we should especially allude to it. For many years, as editor of the journal in question, Mr. S. C. Hall has waged war against the sale of mock old masters and other dishonourable practices in picture dealing. He has put the public on their guard against impositions. In doing this, he recently set forth the proceedings of a certain picture-dealer in a way that brought upon him an action for libel; and although the jury marked their opinion of the case by giving 40s. damages, the costs have fallen upon him. To meet this, instead of falling back upon his ordinary sources of income, he has chosen, it seems, to sell his pictures. For the course he has pursued, modern artists owe him deep thanks, for it must have aided very materially in turning the current of expenditure from old to modern Art, where imposition was less easy.—*The Builder*.

[ADVERTISEMENT.]—Quoted in the *Quarterly Review* of September, No. 190, pp. 171, 181, and 182, described as "very clever," and no over-statement, LONDON LABOUR and the LONDON POOR. By HENRY MAYHEW. A Cyclopædia of the Social Condition and Earnings of Those that work, Those that cannot work, and Those that WILL NOT work; with Engravings of the Scenes and People described, copied from special Daguerreotypes by "BEARD." A few more Copies of this valuable Work, in Numbers, Cloth, and Half Morocco, will be ready on Monday next, price 15s. and upwards. GEORGE NEWBOLD, 8, Regent Street, Westminster; and of all Booksellers.—N.B. The main portion of the Work can be supplied without the section relating to Those who will not work, which is to some objectionable from motives of delicacy.

[ADVERTISEMENT.]—MINIMUM PREMIUMS for LIFE ASSURANCE.—The following are the Life Premiums for Assurance of 100*l.* at death, charged by the SCOTTISH AMICABLE LIFE ASSURANCE SOCIETY, on the terms stated below:—

Age.	20	30	40	50	60
£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.
1 8 6	1 16 7	2 9 7	3 10 9	5 7 2	

These rates have been formed on the principle of applying the bonus additions to reduce the premium, on the assumption of a bonus at the rate of $\frac{1}{2}$ per cent. If the addition be more, the Policy will be increased—if less, it will be diminished. The rates of addition at the investigations at 31st Dec. 1832, and 31st Dec. 1839, were $\frac{1}{2}$ per cent.; at 31st Dec. 1846, 2 per cent.; and at 31st Dec. 1853, $\frac{1}{2}$ per cent.

WILLIAM SPENS, Manager.

J. E. C. KOCH, Resident Sec., London.

43, Lombard Street, London, March 17, 1855.

LIFE ASSURANCE. Reduced Rates for Short Periods.

Age.	One Year.	Seven Years.
£. s. d.	£. s. d.	£. s. d.
60	3 4 0	3 15 0
55	1 14 6	2 9 6
50	1 9 0	1 14 0
45	1 8 7	1 9 6
40	1 5 6	1 8 2

The above are extracted from the new Table of Rates for Assurance of 100*l.*, if death occur within one or seven years. Parties desirous of effecting such insurances will find these rates lower than those of other Offices.

WILLIAM SPENS, Manager.

J. E. C. KOCH, Resident Sec., London.

Scottish Amicable Life Assurance Office,
43, Lombard Street, London,
March 17, 1855.

SIR HENRY THOMAS DE LA BECHE.

Sir Henry De la Beche was an example of that rare combination, a man of science and a man of the world. He succeeded in obtaining the end at which he aimed; and he has left in the Geological Survey and the Museum of Practical Geology enduring monuments. A notice of the labours of such a man,—who was thoroughly practical before the commencement of this practical age, and who aimed at educating the people in science long before the Great Exhibition made scientific education a fashion,—cannot but be of interest.

Henry Thomas De la Beche was the eldest son of Col. De la Beche: his family being descendants from the Barons De la Beche, who were settled at Aldworth, Berks, in the time of Edward the Second. He was born in London in 1796; but his youth was passed amidst the lovely valleys of Devonshire: his first education having been received at the school of Ottery Saint Mary. There is little doubt that the geological tendencies which were subsequently developed were due to the contemplation of nature in this locality and in the scenes around Charmouth and Lyme

Regis—rich in organic remains,—which places were for some time the residences of his parents.

In 1810, Mr. De la Beche entered the Royal Military College, then at Great Marlow, but afterwards removed to Sandhurst; on leaving which he entered the army: but in a little time he resigned the profession of arms for the pursuits of science. For a man of wealth and fashion to devote himself to any study was in those days a phenomenon; and the adoption of a science then in its infancy and struggling into life, through the prejudices of the ignorant and the timid, was not a little remarkable.

Mr. De la Beche, however, gave himself up to the study of Geology, and made it the business of his life. In 1817 he became a Member of the Geological Society, then in the tenth year of its existence. In 1818 he married the daughter of Capt. Charles White, of Lough Brickland, County Down, Ireland, who died in 1844, leaving one daughter.

The year 1819 was spent by Mr. De la Beche in an examination of the geological formations of Switzerland and Italy, and his zealous prosecution of similar inquiries led to his being elected in that year a Fellow of the Royal Society. In 1820 a paper by Mr. De la Beche, 'On the Temperature and Depth of the Lake of Geneva,' the result of a most careful examination, was published in the *Edinburgh Philosophical Journal*. In his geological investigations of the British rocks the Rev. Wm. Conybeare, now the Dean of Llandaff, was, to some extent, connected with Mr. De la Beche; and his first communication to the Geological Society was the joint production of these two geologists,—announcing the discovery of a new fossil animal of the Saurian family, in the lias limestones of Bristol, which they named, as being distinctive of its species, the *Plesiosaurus*. From this time the name of De la Beche became closely connected with the science of the day. Many valuable papers were communicated to the Geological Society, including an elaborate account of the Geology of Switzerland; the Fossil Plants found at the Col de Balme, near Chamouny; a communication on the Geology of the Coast of France; and several papers on the Geology of various districts in the British Isles,—especially of Southern Pembrokeshire, of Lyme Regis, Dorsetshire, and of Beer in Devonshire.

Mr. De la Beche possessed extensive estates in Jamaica. He now visited his property,—Halse Town, in the neighbourhood of Spanish Town,—and on his return, in 1825, he communicated to the Geological Society his remarks on the geology of that West Indian island, of which nothing had been known previously.

Between 1827 and 1830, Mr. De la Beche published numerous important Geological papers in the *Transactions* of the Society, the *Philosophical Magazine*, and the *Annals of Philosophy*, and also a tabular proportional view of the superior, supermedial, and the medial rocks. In 1830 his first book, 'Geological Notes,' appeared; and in the same year, 'Sections and Views of Geological Phenomena.' Great skill in the use of the pencil enabled the author to furnish the whole of the drawings for these works, and to them all subsequent illustrators have been indebted. 'The Geological Manual' was published in 1831, and was speedily translated into French and German,—becoming a text-book for geologists throughout Europe, and passing through several editions. In 1832 Mr. De la Beche proposed to the Government to supply the data for colouring geologically the maps, then in progress of publication, of the Ordnance Trigonometrical Survey. This offer was accepted, and at the Land's End, in Cornwall, was commenced the great work of this eminent geologist's life. Mr. De la Beche, who bore himself the greater part of the expense of the Geological Survey of Cornwall, devoted several years to a careful investigation of all the conditions, lithological and mineralogical, of Western England; and he published a series of maps of Cornwall, Devonshire, and Somerset, which exhibited a correctness and detail such as had never before been attained. This Survey was fairly established under

the Ordnance. "It was,"—says Sir Henry De la Beche, in his Inaugural Discourse, delivered at the opening of the School of Mines, on the 6th of November, 1851,—"It was while (in 1835) conducting the Geological Survey then in progress, under the Ordnance, in Cornwall, that being forcibly impressed that this Survey presented an opportunity not likely to recur, of illustrating the useful applications of geology, I ventured to suggest to Mr. Spring Rice (now Lord Monteagle), then Chancellor of the Exchequer, that a collection should be formed, and placed under the charge of the Office of Works, containing specimens of the various mineral substances used for roads, in constructing public works or buildings, employed for useful purposes, or from which useful metals were extracted, and that it should be arranged with every reference to instruction; as by the adoption of this course a large amount of information, which was scattered, might be condensed, and those interested be enabled to judge how far our known mineral wealth might be rendered available for any undertaking they are required to direct, or may be anxious to promote, for the good or ornament of their country."

Being supported in this recommendation, the nucleus of the Museum of Practical Geology was formed in an apartment in Craig's Court. This collection in a short time filled one house; and even when the Earl Marshal's Office adjoining was added to it, the Museum, by the exertions of its founder, was soon found to outgrow these buildings. A Laboratory was added to the Museum, and placed under the care of the late Richard Phillips. The business of the Geological Survey was greatly extended; and the Palæontological Department was superintended by the late Edward Forbes. The Mining Record Office was also, at the recommendation of the British Association, united to the Museum. In 1839, the sanction of the Treasury was obtained for Lectures on Geology, and its associated sciences, in their application to the useful purposes of life. Owing to the deficiency of room, it was not possible to commence these lectures until 1851; when the building in Jermyn Street received the valuable collections of the Museum and furnished the theatre, in which Sir Henry De la Beche delivered the Inaugural Address from which we have quoted.

In 1848, the honour of knighthood was bestowed on the Director of the Geological Survey; and in addition to this honour, in 1853 Sir Henry De la Beche was elected, by the suffrages of forty-seven members, Corresponding Member of the Academy of Sciences of Paris. The Order of the Dannebrog was bestowed on him by the King of Denmark; and he received the Order of Leopold from the King of the Belgians.

Beyond the works and papers which we have enumerated, Sir Henry De la Beche published a voluminous report on the 'Geological Survey of Cornwall, Devonshire, and West Somerset,' 'Researches in Theoretical Geology,' and 'How to Observe.' In the various journals will be found forty papers and memoirs; and in 1851 Sir Henry De la Beche completed his last work, 'The Geological Observer,' founded upon his former work 'How to Observe.' In all these productions will be discerned a minuteness of detail and an excellence of illustration which mark the rare union of a skilful scientific observer and a finished illustrative draughtsman.

Although paralysis was seen by his anxious friends to be slowly but surely spreading its fatal influences over his once energetic frame, Sir Henry De la Beche would not allow himself repose. The labours of the Geological Survey and the business of the Museum engaged his attention daily,—and even two days before his death he spent several hours in the Museum directing the business of that establishment with his usual acuteness, although then powerless to move himself.

Sir Henry De la Beche raised for himself a splendid memorial of his talents and his zeal, and he created for the public an establishment which cannot but prove eminently useful, if it be carried onward in the spirit and with that well defined idea—which has been the creative power and the sustaining influence—under which the

Museum of Practical Geology and the School of Mines were formed and have been supported.

G. B. GREENOUGH.

SELDOM does it fall to our share of melancholy duty to record two such losses in one week as De la Beche and Greenough. The two men had something in common besides devotion to a common pursuit and the coincidence of their deaths. Both were men of fortune. Both were designed for a worldly career. Both abandoned more ambitious schemes in favour of science. Both achieved solid reputation. Both were hard workers as well as clear thinkers; and they enjoyed in common that faculty for organization which is rarer in Englishmen than the faculty of observation. The Geological Society is the monument of Mr. Greenough, as the Museum of Practical Geology is that of Sir Henry De la Beche.

Mr. Greenough, born in 1778, and consequently seventy-seven when he died, was educated at Cambridge and Göttingen, and served in Parliament for the famous, or infamous, borough of Gattton. But he made no great figure in the House of Commons. His genius was a genius for map-making, not for speeches and legislation; and the records of his zeal which remain to tell posterity of his useful labours are 'The Geological Map of England and Wales,' the map of 'Hindustan,' and the 'General Sketches of the Physical Features of British India.' He was on a journey to the East, in hopes of collecting materials for new maps, when he died at Naples: and it is understood that he has left behind a vast accumulation of materials, some of which will doubtless be available for the press.

Mr. Greenough had a great reputation among men of science, without being very widely known to the British public. He was a worker, not a writer. More than thirty years ago he published his one volume, 'A Critical Examination of the First Principles of Geology.' Addresses and discourses to scientific Societies followed from time to time; but not with that persistence of assault by which literary fame can alone be carried. Yet was Mr. Greenough considered by English geologists as the leader of their band, and he was one of the founders and was the first President of the London Geological Society.

GREENOUGH AND DE LA BECHE.

THE following graceful tribute to the memory of the two great geologists who have passed away from our sides, written by Dean Conybeare and Sir Roderick Murchison, two of the most eminent servants of the science who are still left with us, will be read with emotion and interest.—

16, Belgrave Square, April 16.

The decease of these two eminent geologists having led me to address my valued friend, the Dean of Llandaff (W. Conybeare), on the heavy loss our science had sustained, I have received a reply, from which I extract a few passages, whilst I omit, for personal reasons, certain paragraphs laudatory of those who are endeavouring to fill up the ranks in that body which I had called "*la vieille garde*" of the geological forces.

"Now, within six weeks of the close of my threescore and eighth year (writes Dean Conybeare), I must expect to see the allies and associates of the pursuits of my own more vigorous years of life gathered. One of them (Greenough) was my first instructor and guide in our common line, the other (De la Beche) a most efficient companion and collaborator during my long residence in the most interesting field of Somerset, and the successful completer of all I had imperfectly sketched in the geology of Glamorgan. Perhaps I most deeply feel (as I ought) for my old leader. He was truly the first President of the Geological Society of London, in the widest possible sense of the expression, at the very earliest influx of geological science into England, and he was in every way qualified to take the lead. His long residence on the Continent, his general literary acquaintance with all, and his personal intimacy with many of the principal scientific men, made him the channel of connexion between us

insulated folks and our Germanic and French allies; and this alone was one of the points most important at our first start. Then, his sagacity in detecting and industry in collecting all the scattered information that bore upon the physical geography, not of England alone, but of the globe, was in itself truly admirable. His geological map of England is a full record of his work for our country, and his recent map of Hindústan attests equally his minute and detailed information respecting the most distant localities.

"Of my later friend and associate, De la Beche, let me say that to his active aid I owed as much in my Saurian researches as I owed to Greenough when I wrote 'The Geology of England and Wales.' The Museum of Practical Geology will truly remain the great memorial of his importance in our field, and one which will make his value more and more appreciated every year."

The loss of Greenough, advanced as he was in years, was wholly unexpected; for shortly before his death, at Naples, he wrote to me a letter full of animation, kindness and bright intellect; whilst the departure of my school-fellow De la Beche was daily and mournfully anticipated by many friends, who like myself had watched with anxiety the progress of his fatal disease.

No words of mine are required to raise either of these two remarkable persons in the estimation of their associates, for I well know that their loss is sincerely felt by all those who were acquainted with them; but let me impress on the minds of the general public the deep respect in which we, of the same calling as the deceased, hold the character of the two men, the elder of whom was the first President of the Geological Society of London, the younger the founder of the first great national establishment ever raised in the British isles for the advancement of Natural History science, and especially for the diffusion of sound geological and mining knowledge.

May the arrangement and classification exhibited in that admirable establishment, as completed by De la Beche and his truly eminent coadjutor Edward Forbes, be vigorously sustained by those who may be appointed to succeed them! Such a proof of our estimation of their labours will be the best testimonial we can offer to their memory.

ROD. I. MURCHISON.

EXPEDITION TO CENTRAL AFRICA.

RELIABLE news of Dr. Barth have at length been received, giving us the welcome assurance that the rumour of his death turns out to be a mere fabrication, which had been too readily credited by those who interpreted and transmitted it. The circumstance that during four months after the rumour had first been circulated in Europe no confirmation of its being founded on fact should have been received, was in itself almost sufficient evidence that it could not be true, for the communications by means of caravans and pilgrims are so extensive in Northern Africa, and the name and journeys of Dr. Barth so well known throughout that region, that I believe the news of his death would have spread during such a period from one end of the continent to the other, and been received by Europeans at various points of the coast. But we have more positive proof,—a letter from Dr. Barth himself, dated as recently as the middle of November last, after his death had been surmised to have taken place some five months previously. In this letter, written at Kano, and addressed to Col. Herman, Dr. Barth states that he intended to proceed homeward, *vid Kuka* and Murzuk, and hoped to be in Tripoli in about four months from that date.

As regards Dr. Vogel, he had failed in meeting the Chadda Expedition, as is already known. Unable to proceed, as was his original intention, to Yakoba by the unfriendly disposition of the Sultan of Bornu, he moved upon Mora, the capital of Mandara. His reception from the ruler of that country was most unfriendly. He was confined to his quarters, his bat animals were seized, the surrender of all his baggage was demanded, and his life was threatened. From this strait he, by a well-timed admixture of tact and resolution, hap-

pily extricated himself, and effected his retreat upon Kuka, during which he beat off an attack of the natives. He had suffered much from illness and fatigue, but was comparatively well when he wrote, though compelled to pay the strictest attention to diet.

A few days previous to Dr. Vogel's return to Kuka, the Sultan Abd el Raman, by an insurrection of the people, was deposed; and his brother ascended the throne. Indeed, the state of the whole of the countries round Lake Tsad seems to be very unsettled; and as hostilities between Bornu and Waday are imminent, it may prove impracticable for Dr. Vogel to proceed in that direction. It is to be hoped that Dr. Barth may have reached Kuka in safety, and joined Dr. Vogel, in which case he would assume the command; and that both may now be on their way home. For after the discovery of that great and important natural highroad into the very heart of Inner Africa, the Chadda-Benuéh,—and after its incomparable superiority over other lines of communication into that continent yet known has been proved,—it would be mere folly to waste any more lives and money, or even time and energy, in travelling through the Great Desert, or in regarding Lake Tsad as a good basis or starting point for exploring Inner Africa. After the failures of the Congo and former Niger Expeditions, and up to the recent return of the Chadda exploring steamer, it was firmly believed by most persons that of the various ways of penetrating into Africa, that by ascending the rivers was the most dangerous—nay, even impossible,—and that travelling in and crossing the Sahara was much more practicable and much less dangerous. Now, things have changed. By studying the nature of the rivers,—the hydrographical phenomena they are subjected to,—their influence on the climate,—in short, the physical geography of those regions,—difficulties which formerly seemed insurmountable have vanished. To be able successfully to conquer the climatic obstacles of Tropical Africa, and safely to traverse the dreaded waters of the Niger, is a triumph of man's intellect and perseverance, which may be ranked with the greatest discoveries and achievements of our age. The importance of the success of the Chadda Expedition, as bearing on all our future relations with Africa, cannot be too much insisted upon. The Great Desert, as a line of communication, or a basis for exploration, ought now to be no more thought of,—for while the means of locomotion on land and water all over the globe have made prodigious progress, travelling in the Sahara alone has remained the same that it was hundreds of years ago, and is likely to be so for hundreds of years to come.

AUGUSTUS PETERMANN.

OUR WEEKLY GOSSIP.

IN the early part of this century our literary tendencies lay towards the Elizabethan writers. Not only was there a worship, as there ever must be, of the greater, but of the lesser, lights of that great era,—an eager and a sympathizing welcome for its philosophy, poetry, drama, divinity,—accompanied by an absolute indifference about everything later in date than the Restoration. Now, a change appears to have come over us—the Restoration is once again in the ascendant—Queen Anne is in fashion; and hundreds of volumes that heretofore encumbered the book-stalls are taking their place amongst the choice treasures of our choice libraries. Dryden, and even Oldham, Addison, and Pope, and Swift, are all in process of re-publication. The new number of the *Quarterly* has its article on "Sir Richard Steele," the *Westminster* rejoices over Dryden, and the *London* triumphs in Addison. In this apparent unanimity there is, we suspect, now as of old, a good deal of mere fashion—a large amount of make-believe. A substantive opinion is not increased in power by the echo, babble as it may. If we are to do justice to Queen Anne's men, as they are called, there must be a finer and wiser discrimination than heretofore—a more critical and scrupulous consideration of the positive and comparative merits of the different writers. At present,

public opinion is merely traditional—even Mr. Macaulay has been misled by it; and the writer in the *London*, who appears to have no other light for his guidance, talks reprovingly of the "coarse and selfish" Swift—the intellectual giant of his generation—perhaps the only giant; and of that kind-hearted, fine-tempered genius, "Dick Steele," as "a very worthless fellow." This will not do. Contemporary fame has its own great and pleasant reward; but neither contemporary fame nor contemporary abuse may pass current with posterity without cautious re-examination. We bate no admiration for Addison, but we protest against the popular injustice done to Steele, and rejoice over the pleasant paper in the *Quarterly*, in which the balance is more critically adjusted, and held with a strong and even hand. Addison had, and deserved, all the benefit of worldly success. The politic wisdom of Addison and the impulsive geniality of Steele had their reward and punishment while the parties were living. So it is with regard to genius. All the honour and respect which difference in age gave to Addison at the Charter-House, the grateful and devoted Steele continued to pay him through life; but when this modest deference was held to be a measure of proportion—when the public mistook a feeling for a fact, respect for a proof of inferiority—and when an endeavour was made to justify the assumed disproportion by exaggerating the moral worth and genius of the one as compared with the other,—it was to be desired that some one should come forward to vindicate the truth; and this has been so well and gracefully done in the *Quarterly*, that we invite especial attention to the vindication.

As yet we have not heard of any appointment to the chair of Natural History at Edinburgh, left vacant by the death of Edward Forbes:—yet the new Professor will be expected in the Scotch Athens, ready to commence his course of lectures in a few days from the present date! Scotch papers are now repeating the old story of a division of the chair being "under consideration." Surely there has been delay sufficient. Poor Forbes was hurried to his grave before the time by that official carelessness which postpones necessary duty to the eleventh hour. Almost his last words were—"They have killed their goose of the golden egg." A loss so grievous, a loss that might have been postponed—if not prevented—should be a warning to those concerned. Edinburgh, very reasonably, expects to have its scientific attractions made complete before the summer session commences, and under whatever strain of mind the hurry may occasion to the new Professor, the Town Council will, doubtless, wish him to begin his labours in May. In face of such an exigency, it is scarcely creditable to those officially concerned in the choice to have withheld the appointment of Forbes's successor so long.

Another case of official procrastination occurs nearer home, which we refer to with reluctance, but in the full belief that it is only necessary to call attention to the delay in order to put an end to it. Before Lord Aberdeen retired from power, or on the eve of his retirement, the final dispositions were made with regard to the re-organization of the National Gallery. Sir Charles Eastlake received intelligence of his appointment as salaried Director of the Gallery,—Mr. Wornum of his appointment as Secretary. This was some months ago. Yet, we have not hitherto heard that either gentleman has been officially informed of his appointment. What can be the meaning of this delay? In the mean time, is the National Gallery left without officers? General Thwaites resigned six months ago; and Mr. Wornum, it appears, is not yet installed in his new office, but is labouring at his old employments at Marlborough House. Sir Charles Eastlake, having acquired none of the sweets of office, has nevertheless become a target for the stray shafts of wit and malice shot by critic, cleaner, dealer, painter, amateur, and general public against state mis-management in Art. This is scarcely a fair division.

Next week the City dines with the friends and supporters of the Printers' Pension Society,—the Lord Mayor presiding, with the Sheriffs on his right and left, and lines of Aldermen and municipal

celebrities along the tables. Literary personages are fewer than is usual at the gatherings of this Society; but for once it is well that City men should do their spiritings in their own bountiful and splendid way in behalf of a guild which is allied to business on one side as well as to literature on another. Upwards of 600*l.* a-year—mainly, we are told, contributed by its working members—is now expended by this Society in the relief of printers and printers' families.

Several attempts have been made in this country to found a practical Mining School, but hitherto without much success. At length, it has been resolved to establish a Mining School at Truro, in Cornwall; and it is so far organized, that the teachers have been appointed. These are—Mathematics and Applied Physics, Rev. J. Hobson; Chemistry and Mineralogy, Mr. Hodge; Practical Mining and Surveying, Mr. Richard. A sum of nearly 2,000*l.* has been subscribed, and large support in the shape of annual subscriptions, presentations, &c. may be fairly calculated on from the owners of the important mines in Cornwall.

The *North British Daily Mail* announces that Prof. Maconochie has resigned the Chair of Civil Law in the University of Glasgow, and that Sheriff Skene has received the appointment of the Crown to that office.

A new report from the Edinburgh Philosophical Institution bears witness to steady progress. The members increase in number,—though not the feminine members. During three years past the Ladies have been quitting the Society—*why*, the report does not say—in a regular law of secession. Strength, however, has been gained, even while grace has been sacrificed. In twelve months three hundred masculine subscribers have leapt into the seats vacated by fifty ladies; nearly a thousand volumes have been added to the library; the classes maintain their full activity, and the lecturers have devoted their time to useful rather than to showy subjects.

Mr. Sainthill, a Devonshire numismatist, in a concluding paragraph to a privately printed paper, 'Numismatic Crumbs,' proposes a medal to commemorate the discovery of the North-West Passage. Mr. Sainthill says, by way of practical suggestion:—"We have to record a discovery, which has occupied the thoughts and exertions of Europe for centuries, and England has now determined the geography of our globe. The medal should therefore communicate this splendid achievement to the world (present and to come), in the most perspicuous manner possible, and this I submit will be best accomplished by giving a map of the North Pole, and showing on it the line of communication from one sea to the other, distinguishing 'The Passage,' either by a line of arrows (as usual to denote the flow of a river), or by ships sailing on it, or by combining both, which perhaps would be still more decisive. I think that the maritime nature of the medal might also be indicated, by changing the uppermost line of the Tiara worn by Her Majesty, and rendering it a naval crown, by substituting the hull for the cross pattée, and the sail for the intermediate floral ornaments. Clasps, with the names of Her Majesty's ships, and the years of their respective services, would classify the different Expeditions."—Mr. Sainthill proposes that every surviving member of the Expeditions, from Parry to Franklin, should receive this medal. But why the survivors only? Should the suggestion be adopted by the Admiralty, we trust the line will be extended. A medal to record such services as those of Franklin should not, we think, be refused to Franklin's consort:—and to the representatives of those gallant men who have laid down their lives at the feet of geographical science and died in her cause. A medal is a monument as well as a record; and it would be unjust to deny the custody of such a monument to the families of those who have sacrificed most largely for the glorious object commemorated.

Mr. James Finn, Her Majesty's Consul at Jerusalem, to whose intelligent care of literary and antiquarian interests in the Holy Land our readers are indebted for much agreeable information, writes—

"Jerusalem, April 2.

"Outside of this city, towards the north-west,

and not far from the Nablus Road and the Tombs of the Kings (so called), are some considerable heaps of blue grey ashes, on which no grass or weeds ever grow. One of them may be 40 ft. in height. They are remarkable objects in themselves, especially as contrasted in colour with the dark olive groves around them. These are commonly believed by the people of the city to be heaps of refuse from the soap-boilers' works of former times. Some of our English residents here, having conceived a different idea of their origin, namely, that it was not impossible they should be ashes from the ancient sacrifices, begged of Dr. Roth, of Munich, when here in 1853, to carry away samples for analysis in Germany, which he did; and Dr. Sandreczki has now laid before the Literary Society of Jerusalem an account, in English, of a letter received from Dr. Roth on the subject. After some remarks on the beetles and mollusca which he collected in Palestine, and tendering generous offers of assistance, he proceeds thus:—"Hitherto it has been questionable whether the two ash-hills without the Damascus Gate have been heaped up from the ashes of the burnt sacrifices, or from the residuum of the produce of potash in the soap manufactories here. Dr. Roth, who had taken with him two samples, states 'that their analysis in our famous Liebig's laboratory bears evidence to the supposition that those ashes are the remnant of the burnt sacrifices, because they are chiefly of animal, and not of vegetable origin; and even contain small fragments of bones and teeth burnt to coal; and yet it would be impossible to ascertain the species of the animals to which they belonged.' The analysis exhibits a small percentage of *silicic acid*, which is never found in the ashes of flesh or bones. Dr. Roth is of opinion that we may account for this circumstance by supposing that the ashes of the *meat-offerings* in which silicium may be found, were likewise carried off to the hills in question. The samples were taken both from the top and the basis of the larger hill,—not just from the surface, nor from a considerable depth either. Dr. Roth intends to send the whole account of that analysis, together with a new analysis of the mineral waters near Tiberias.

Result of the Analysis.

	Ashes from the Top.	Ashes from the Basis.
Soluble silicic acid	1.212	1.421
Alkalies	1.150	0.820
Oxide of iron	0.762	0.875
Calcium	45.230	44.654
Magnesium	6.785	4.996
Residuum, red-hot but insoluble	6.965	6.637
Carbonium	1.706	3.750
Phosphoric acid	0.716	0.849
Aluminum	3.750	2.866
Carbonic acid	30.610	32.540
	98.896	99.408
Loss	1.114	0.592
	100.000	100.000

This almost unexpected result is one that leads to important antiquarian consequences,—not only exciting wonder at the confirmation of Holy Writ, and bringing our feelings back to immediate contact with those of the Aaronic priesthood, but as helping among other facts to determine the course of the ancient walls, since these ashes must have been thrown beyond the wall.—Yours, &c.

"JAMES FINN."

At the Meeting of the British Association at Liverpool, a very important discussion arose on the influences exerted by iron ships upon the mariner's compass, as our readers know. This matter was felt to be of such importance that a Special Committee was then appointed to collect facts and make observations. The interest has increased with the enlargement of the inquiry; and the Compass Committee, having consulted with the Marine Department of the Board of Trade, resolved on appointing a Secretary qualified to carry out a large series of experimental observations, with a view of determining all the conditions of error. This office has been given to W. W. Rundell, Esq., who has for ten years filled the office of Secretary to the Royal Cornwall Polytechnic Society.

ADAM AND EVE.—This great Original Work, by JOSEPH VAN LERUUS, is NOW ON VIEW at 57, PALL MALL (opposite Marlborough House), from 11 to 6 daily.—Admission, 1*s.*

THE NEW SOCIETY OF PAINTERS IN WATER-COLOURS WILL OPEN their TWENTY-FIRST ANNUAL EXHIBITION ON MONDAY, the 23rd inst., at their Gallery, 33, Pall Mall.—Admission, 1*s.*; Season Tickets, 3*s.* JAMES FAHEY, Secretary.

PHOTOGRAPHIC EXHIBITION.—An Exhibition of the finest English, French and Italian Photographs IS NOW OPEN at the PHOTOGRAPHIC INSTITUTION, 165, New Bond Street.—Morning, from 10 to 5. Admission, with Catalogue, 1*s.* Evening, from 7 to 9. Admission, 6*d.*

ZOOLOGICAL CONCERT.—LOVES' ENTERTAINMENTS.—VENTRILOQUISM EXTRAORDINARY.—REGENT GALLERY, 69, Quadrant.—Every Evening at 8, except Saturday, at 3.—Monday and Tuesday, Mr. LOVE, universally accepted as the first Dramatic Ventriloquist in Europe, will present his NEW ENTERTAINMENT, called 'THE LONDON SEASON.' Wednesday, Thursday and Friday the entertainment, LOVE IN ALL SHAPES AND LOVE'S LABOUR'S LOST. Saturday, at 3. LOVE IN ALL SHAPES, and other entertainments. The ZOOLOGICAL CONCERT every Evening.—Pianoforte, Miss Julia Warman.—Stalls, 3*s.*; Aisle, 2*s.*; Gallery, 1*s.* Tickets at Mitchell's, 33, Old Bond Street; Turner's Music Depot, 19, Poultry; and at the Rooms, between 12 and 3.

SCIENTIFIC

SOCIETIES.

BRITISH ARCHÆOLOGICAL ASSOCIATION.—*Annual General Meeting.*—April 11.—S. R. Solly, V.P., in the chair.—The Report of the Auditors, together with the balance-sheet of receipts and expenditure for the year 1854, was received, from which it appeared that the sum of 525*l.* 9*s.* 3*d.* had been received and 449*l.* 0*s.* 7*d.* expended, leaving a balance of 76*l.* 8*s.* 8*d.* in favour of the Association upon the year. Eleven members were reported as deceased during the year, and twenty-two had retired, to meet which the Association had elected forty-two new Associates and one Foreign Corresponding Member. Contributions to the Donation Fund to pay off a debt to the Treasurer and support the extent of illustration of the Journal were announced amounting to 167*l.* 2*s.*,—and it was resolved that application should be made still further to increase the amount. The thanks of the Society were voted to the Auditors, to the Officers and Council of the past year, and in particular to the Treasurer, T. J. Pettigrew, Esq., for his undeviating and valuable services to the Association. A ballot was then taken for Officers and Council for the ensuing year, and Mr. Pretty and Mr. S. Wood having been appointed Scrutators declared the following to have been elected:—*President*, The Earl of Perth and Melfort; *Vice-Presidents*, F. H. Davis, Sir F. Dwaris, J. Heywood, M.P., Dr. J. Lee, T. J. Pettigrew, S. R. Solly, E. G. Harcourt Vernon, M.P., and Sir J. Gardner Wilkinson; *Treasurer*, T. J. Pettigrew; *Secretaries*, J. R. Planché, H. Syer Cuming; *Foreign Secretary*, Dr. W. Beattie; *Curator and Librarian*, G. N. Wright; *Draftsman*, H. C. Fidge; *Council*, W. F. Ainsworth, A. Ashpitel, W. H. Black, Rev. J. E. Cox, G. Godwin, N. Gould, J. O. Halliwell, R. Horman Fisher, G. V. Irving, C. Lynch, W. C. Marshall, W. Meyrick, D. Roberts, Capt. A. C. Tupper, W. Wansley, J. Wimbridge, and A. Woods; *Auditors*, T. Gunston, and J. Turner. Thanks were voted to the Scrutators and to the Chairman.

STATISTICAL.—April 16.—Sir J. P. Boileau, Bart., V.P., in the chair.—The Earl of Carnarvon, Lord R. Cecil, M.P., Sir C. Trevelyan, W. Brown, M.P., P. Hardy, F. Hendriks, J. K. Aston, T. A. Welton, and R. Hunt, were elected Fellows.—'A Ten Years' Retrospect of London Banking,' by J. W. Gilbert, Esq.—The author commenced by reciting the provisions of the Bank Charter Act of 1844 in respect to shareholders, and entered into an analysis of the London banking establishments. The number of private banking firms who attended the clearing-house in 1855 was 25, having an aggregate of 103 partners. The number of private banking firms east of Temple Bar who were not members of the clearing-house was 21, having 54 partners. The number of private banking firms west of Temple Bar was 13, having 48 partners,—making a total of 59 London private banking firms, having a total of 205 partners. The author then proceeded to classify the London Joint-Stock banks:—they were 6 in number, and had in 1855 an aggregate of 4,323 shareholders, viz., 3,176 gentlemen and 1,147 ladies. Among the gentlemen were 64 officers in the army, 20 officers in the navy, and 144 clergymen. Analyzing the female shareholders of 5 out of the 6

banks, it appeared that 73 were married, 329 were widows, and 693 were spinsters. In 1845 the proportion of female shareholders to gentlemen was 18 per cent. In 1855 they were 36 per cent., indicating thereby that during the last 10 years the ladies had become more enamoured of London Joint-Stock banks than gentlemen. In 1855 the Joint-Stock banks carried on business in 23 localities in London. The paid-up capital of the London Joint-Stock banks in 1855 was 2,772,795*l.*, the surplus fund, 486,217*l.*, and the deposits, 26,338,588*l.*

HORTICULTURAL.—April 3.—Sir Philip de Malpas Grey Egerton, Bart., M.P., in the chair.—Lieut.-Col. Crabbe, K.H., T. B. Simpson, J. H. Hedge, and C. Fletcher, Esqrs., were elected Fellows.—This second spring meeting, notwithstanding the backwardness of the season, was the occasion of bringing together a good exhibition of flowers, fruit, and vegetables, and a crowded attendance of Fellows and their friends.—Among miscellaneous subjects were specimens of bast, from Messrs. Paul, and also from the East India Company. These were strong, though somewhat hard and coarse; Messrs. Paul are of opinion that theirs might be sold for about one-third less than Cuba bast.—Mr. Rivers contributed a perforated circular tile or cover for keeping newly-sown seeds from birds, &c., and Mr. M'Laughlin, foreman to Messrs. Wood & Ingram, showed a square Orchid basket made of cylinders of burnt earthenware, holed at the ends to allow of their being fastened together with wire.

INSTITUTION OF CIVIL ENGINEERS.—April 17.—J. Simpson, Esq., President, in the chair.—The paper read was 'On the Construction of Railway Switches and Crossings,' by Mr. B. Burleigh.

ROYAL INSTITUTION.—March 16.—Sir H. Holland, Bart., V.P., in the chair.—'On the Constitution of the Hydro-carbons,' by Dr. W. Odling.

SYRO-EGYPTIAN.—April 10.—Dr. W. Camps in the chair.—Mr. Bonomi read a paper 'On the Assyrian divinity Nisroch,' illustrated by drawings of the eagle-headed figure from Nineveh; and which Mr. Bonomi argued to be the particular divinity of Sennacherib—the god of conquest and rapine—from the word *Nisr*, meaning eagle or vulture, and in its root, to tear, and hence applied to birds of prey. The last letter or syllable is presumed, from other Chaldee words, to mean chief or lord; hence eagle-chief or eagle-lord. The word composed of the same three letters, *N S R*, in the Arabic, also means to conquer or to subdue, particularly applicable to the character of Sennacherib, as well also to his predecessor.—Dr. Benisch 'On the Outhite Idol Nergal' remarked, that if the worship of Malik Taus, or King Cock, can be considered, as advocated by Mr. Ainsworth, as an essential and ancient characteristic of the Izedis, their existence may from Rabbinical sources be traced back to a high antiquity; for the Babylonian Talmud treatise 'Sanhedrin' (folio 63, p. 2), offers the following explanation of 2 Kings xvii. 30, which states that the men of Cuth made Nergal their god. And what was it? A cock. Another Rabbinical allusion to the cock, as connected with the evil principle, is the following, which is taken from the same Talmud treatise (Beracoth, folio 6, p. 2):—"He that wisheth to know them (the evil spirits), let him take sieved ashes and lay them on the bed, and in the morning he will perceive thereon footsteps of a cock." Mr. Ainsworth exhibited in further proof of the worship of the cock among the Babylonians or people contemporary with them, as in the present day is the case among the Izedis, two drawings, one of a gem obtained by Mr. Layard at Babylon, being an agate cone, upon the base of which is engraved a winged priest or deity standing in an attitude of prayer before a cock on an altar,—another of a cylinder in the British Museum, upon which is represented a similar subject.—Mr. Ainsworth also made some remarks upon the Cuthan and Persian, as also the Syro-Arabian or Semitic roots of the word *Nergal*, the first syllable signifying in both five or eight.

MEETINGS FOR THE ENSUING WEEK.

- MON.** Society of Antiquaries, 2.—Anniversary.
Geographical, 8½.—Commercial Notes on the State of California, by Mr. Aikin.—Letter addressed by Dr. Vogel to Consul Herman, dated Kuka, September 15, 1854.—Letter addressed by Dr. Barth, dated Kano, November, 1854, to V. Consul Gagliuti.—Letter from Lieut. Burton from Aden, announcing his return from Hurrar in Abyssinia.—Account of the late Earthquake at Brussa, by Consul Sandison.
- TUES.** British Meteorological, 7.—Council.
—Syro-Egyptian, 7½.—Anniversary.
—Institution of Civil Engineers, 8.—'On the Distribution of Material in the Sides of Wrought Iron Beams,' by Mr. Barton.
—Zoological, 9.
—Royal Institution, 3.—'On Voltaic Electricity,' by Dr. Tyndall.
- WED.** Royal Society of Literature, 3.—Anniversary.
—Society of Arts, 8.—'The Public Works of India, with special reference to Irrigation and Roads,' by Lieut.-Col. Cotton.
—British Archaeological, 8½.—Notices of deceased Members, by Mr. Pettigrew.
- THURS.** Numismatic, 7.
—Royal, 8½.
—Royal Institution, 3.—'On Christian Art,' by Mr. Scharf.
- FRI.** Philological, 8.
—Royal Institution, 8½.—'On the Origin of certain Traits of Erratic Blocks on the Western Borders of Massachusetts, U. S.,' by Sir Charles Lyell.
- SAT.** Royal Institution, 3.—'On Electro-Physiology,' by Dr. Du Bois-Reymond.

FINE ARTS

Essay on the First Century of Italian Engraving.
By F. J. Palgrave. Murray.

THIS essay—repeatedly printed—appears also in a new edition of Kugler's 'Handbook of Italian Art.' The author begins with Finiguerra, the inventor, in 1452—or rather not the mere experimentalist, but the first professed engraver—Baccio Baldini, the Florentine goldsmith, in 1460—1480, down to Marc Antonio, in 1520,—the artist who put into currency the works of Raphael.

Botticelli, the second engraver, was a pupil of Lippi, who illustrated Dante and celebrated the triumph of Savonarola. A new feature was then added to engraving in the desire to imitate the hatchings of pen-drawings, in addition to the previous chiar-oscuro and elaboration in ornament. Padua gave birth to Mantegna. He is remarkable for firm outline, and his drawing is masterly. Venice, later than her sister cities, produced Mocetti, a pupil of Bellini. His drapery is vigorous, and the expression of his faces calm and austere. Brescia furnished Gian Maria and the eclectic Gian Antonio. The school of Ferrara is free and spirited, but fantastic in design. Bologna had but its one distinguished engraver, Giacomo Francia.

The three great engravers of Rome, Marc Antonio, Agostino, and Marco Dente, were all provincial born:—the first at Bologna, the second at Venice, and the third at Ravenna. Marc Antonio's 'Martyrdom of St. Lawrence' Mr. Palgrave considers the commencement of the decline of engraving. The finish is complete, the drawing bold and truthful, but lavished on a revolting design of Bandinelli, loathsome, bigotted, and disgusting.

Lectures on Gothic Architecture, chiefly in relation to St. George's Church in Doncaster, delivered in the Town Hall there at Christmas, 1854. By E. B. Denison, M.A. Doncaster, Brooke.

THESE Lectures are interesting, as they convey a good and sensible account of an old church that has been destroyed, and a new one that is to be built. It is almost too purely business-like and local to furnish us with an extract. Mr. Denison denies that church restoration is a "Papist thing," or that men pray better in white-washed churches or high pews. He condemns Mr. Ruskin's arrogance and dogmatism, his frequent inconsistency, his extravagant theorizing, his inconclusive and sometimes childish logic, and his offensive habit of attaching nicknames to what he dislikes. We are glad, however, to find Mr. Denison allowing that, with all his complaints of Mr. Ruskin's lengthy and prolix dissertations, he allows him to be the great writer who has proved the religious purpose and sublimity of Gothic architecture. He has given us all reasons for liking Mediaevalism, and what was once a sentiment is now a belief.

A Popular Account of the Styles of Architecture, their Rise, Progress and Present Condition. By Ed. L. Tarbuck, Architect. Hagger.

THIS essay obtained the medal from the Royal Institute of British Architects, and therefore needs

no praise from us. The Institute presented the author with the Order of Merit;—the profession have nothing to do but to write an order for the book. Mr. Tarbuck begins at the eternal stone heaps of Egypt,—strides on to Babylon and the plains of Mesopotamia,—glances at Solomon's Temple,—forgets not the Porcelain Pagoda or the Mexican Pyramid,—turns from Phidias to the Coliseum builder, from the Alhambra to the Gothic cathedral,—and ends by leading us into the palaces of Italy, in which Palladio sought to rival the dreams of Augustus.

On modern architecture Mr. Tarbuck speaks with much good sense. He remarks, that we cannot call it an imperfection of Greek art that the designers of the Greek temples did not render them perfectly suitable for a shop-front in the Minorities. They did not think that their children's mind, after 2,000 years' additional growth, would be only copying, and that badly, the work of their fathers. Our shops are Greek, Roman, Saracenic, Italian, and Barbaric, but never English,—never invented to answer the necessities of our age and the soil, or the accidents of our climate. Sculpture and architecture seem dead, while all else is progressive. Our architecture—if architecture does show the character of the people who build—indicates an unrefined, short-sighted, selfish materialism. Our drawing-rooms are gold and crystal, because they are the shrines of vanity and the sanctuaries of private enjoyment. Our house fronts are smoky stucco, because the "outsiders" are not worth pleasing, and we should have to hire a house opposite in order to enjoy our own. In our house fronts we show our patriotism and our national pride. When Athens was great—when Rome was great—when Venice was great, their citizens, warmed by a noble pride, built noble houses as monuments and trophies. Our greatness is satisfied with gilding instead of gold, and mud-mortar instead of concrete.

Handbook of Light and Shade, with especial Reference to Model Drawing. By Mrs. Merrifield.
—*A Guide to Oil-Painting.* Part II. *Land-scapes from Nature.* By A. Clint.—*A Guide to Painting on Glass.* Rowney & Co.

OF these guides, all simple and practical, Mr. Clint's seems to us the best,—dwelling much on material and on those small and perplexing technicalities which masters too often take for granted are known to the pupil. We think that, after a time, Messrs. Rowney would do well to publish, in a single volume, an epitome of all their handbooks. The frequent issue of such works is a gratifying proof of the growth of a love of Art amongst the educated classes. When it once becomes a necessary part of education, and is taught, as we hope to see it soon, at every village school, we may hope that it will begin to elevate and refine the lower classes.

NEW PUBLICATIONS.

Royal Gallery of Art.

THIS pretty series of engravings from the pictures in the Royal Collections at Windsor, Pimlico, and Osborne, has reached its fifth monthly part without losing that character of judicious selection and careful handling which won our commendation for the first number. One or two of the subjects scarcely deserved the trouble bestowed on them; but the majority are admirable as pictures and well adapted to the engraver's art.

Thirty Illustrations to 'Childe Harold.'

THESE illustrations, which have been prepared for the subscribers to an Art-Union, are of various merit:—some of them being pretty and in good taste,—artistic expositions of a story lending itself with great felicity to pictorial illustration. Many of the thirty are poor and coarse, bad in drawing, and unsustained in fancy.

FINE-ART GOSSIP.—The case of poetical injustice by which Mr. Naylor had a number of first-class pictures seriously damaged by a railway train, has been before the Courts at Liverpool. Mr. Naylor laid his damages at 4,500*l.*; but the lawyers compromised the case before a judgment was pro-

nounced, taking 2,500*l.* damages, together with costs.

A Correspondent wishes to offer a suggestion to the Members of the Royal Academy through our columns. He writes:—"If not too near the eleventh hour, I beg to suggest your advocacy that the pictures in the approaching Royal Academy Exhibition shall each bear on the frame the designation of the subject and the name of the painter. I cannot think this being done would interfere with the sale of the Catalogues,—most assuredly it would be a vast relief to be spared the necessity of continual reference thereto while looking at the pictures,—and they would still be indispensable for reference to aid the memory at home. If too late to have the inscriptions written on the frames now, some copies of the Catalogue being worked off on yellow paper, cut up, and the designations, with the names of the artists, attached to the respective pictures, might yet enable this suggestion to be carried out, as it were, by way of experiment."—This suggestion has been made before, but it is worth while to keep it before the public. At present, we do not deceive ourselves with the hope that the "Forty" will adopt it; for we cannot believe, with our Correspondent, that it would not affect the sale of the Catalogue. If the Royal Academy were a National Academy, and it were allowed to do that which is best for the public without regard to that which is most profitable to itself, such a reform would be instantly adopted. But the inconvenience pointed out is only one of the fines imposed on public patience for the benefit of "the irresponsible corporation."

Pictorial copyright engages the attention of numerous correspondents. An artist who has addressed us before on the subject writes:—

"Now that the remedy to prevent picture forgery has been proposed, and various suggestions have been made in furtherance of the leading idea, viz. that of stamping, it may not be altogether out of place to consider the advantages that most probably will result to all those principally concerned, when an act for stamping pictures has been obtained. The artist, the picture-dealer, and the collector, have the greatest interest in a law being made,—so that the reputation of the first, the respectability of the second, and the satisfaction of the third, should not be at all compromised. As the case now stands, the pecuniary loss to the artist is less an object of consideration than his reputation, though the former, by the required act, will no doubt be lessened, whilst the latter will be protected from injury arising from bad copies of his works, which must materially affect him everywhere. The honest picture-dealer will rejoice that he can then place himself in a position whereby he may be readily distinguished from the less conscientious in his profession, by refusing to pass any picture through his hands which has not some warranty for its originality (since the most experienced amongst them can be deceived). And the collector will have his share of pleasure when he knows that he can confidently rely upon the certainty of not being imposed upon, and feel that he really has the work of the artist he so much coveted. Again, the commissions to the artist will be more numerous—his receipts will be greater, for in proof that the price is a less important consideration with purchasers, witness the public sales, where pictures have been brought to the hammer and sold for more than double the original sum received by the artist. Has it not frequently occurred, where a collector has commissioned an agent to procure him a painting by some particular artist, that the agent finding the artist had not one immediately at hand, has gone away and manufactured one to satisfy his customer? Has it not occurred when a collector has called upon a dealer to purchase an original picture, that he has been shown the original, and been requested to place his seal or mark upon the back of it, when all the time the original has been covering a spurious copy, and that copy has been hung in the gallery of the collector with every confidence because he identifies the mark he made on the back of it? The necessity for a protective law to the artist, the honest dealer, and the collector, is indeed great; and could but a fraction of the tricks so long practised with impunity be brought to light, the extreme necessity for such a law to protect these three classes of men would be self-evident. Much has been hinted about the custom of copying pictures for study, by young artists. If it were possible to interfere with that, it would be unwise. The young artist must study his profession, and this is part of his means. All that is intended by the act is, a mark and warranty whereby to distinguish these copies from the originals. The copies themselves may be sold, but only as copies. Apologizing for so long a letter, I remain, &c., J. C."

—Another writer breaks new ground.—

"I have great reason to believe that copyright in pictures was never thought of until Mr. Boyer, of Pall Mall, tempted Sir Thomas Lawrence to lend him the picture of the Duke of Wellington, for a consideration of 500*l.* I believe that the necessity of that great artist, rather than his inclination, induced him to accede to Mr. Boyer's request. From this event may be dated the great revolution in patronage, picture purchase, and picture hiring. Previously, distinguished painters—Sir Joshua Reynolds at their head—encouraged good engravers, by permitting them to engrave

their works, and stimulated them to improve their skill, in order that they might obtain the patronage of the ablest painters. This was the true way to secure the progress of the beautiful art of engraving and of insuring a faithful delineation of any great work of Art. This is obvious; but when these advantages became matter of purchase and speculation, the object became gain rather than improvement in graphic imitation,—consequently, pecuniary reward is now more considered than honourable distinction. I am, &c. M. M."

Three of the great works of the late John Martin, the painter, 'The Last Judgment,' 'The Great Day of His Wrath,' and 'The Plains of Heaven,' are on exhibition in the City.

MUSIC AND THE DRAMA

SACRED HARMONIC SOCIETY. Exeter Hall.—Conductor, Mr. COSTA. ON NEXT FRIDAY EVENING, April 27, Handel's 'ISRAEL IN EGYPT.' Vocalists: Madame Clara Novello, Madame Rudersdorff, Miss Dolby, Mr. Sims Reeves, Signor Belletti, and Herr Fornes.

On WEDNESDAY, May 2, will be repeated Mendelssohn's 'L'UBESANG,' and Mozart's 'REQUIEM.' Vocalists: Madame Clara Novello, Mrs. Lockey, Mr. Sims Reeves, and Herr Fornes. The orchestra, the most extensive available in Exeter Hall, will consist of nearly 700 Performers.—Tickets, 3*s.*, 5*s.*, and 10*s.* 6*d.* each, may be secured by immediate application at the Society's sole Office, No. 6 Room, within Exeter Hall.

ST. MARTIN'S HALL.—Mr. ALFRED MELLON respectfully announces that his SECOND GRAND ORCHESTRAL UNION CONCERT will take place, at the above Hall, on MONDAY EVENING, May 7.

PHILHARMONIC SOCIETY.—The programme of the third Philharmonic Concert was made up of matter familiar to every concert-goer, with the exception of Beethoven's Pianoforte Concerto in B flat, played by Mr. Sloper. The music was badly conducted: a more loose and careless performance of Mendelssohn's Symphony in A we do not remember, nor ruder and slacker accompaniments to the *solo* and to the vocal music. In the overture to 'Euryanthe,' and Beethoven's well-known C minor Symphony, indifference was exchanged for exaggeration; but the orchestra was, as before, loose in execution and coarse in expression. The attendance was thin; and now that the discriminating cordiality with which the English welcome all strangers, as strangers, has subsided, we cannot see how Herr Wagner will sustain himself in London as head of an orchestra,—since, though his plan of conducting elect music by heart is calculated to impress and startle the innocent, the average concert-goer would prefer to this wonder a good execution of all the pieces chosen, without obvious contempt for certain portions, balanced by vehemence and affectation in others. The Concerto by Beethoven was welcome to us as a graceful and expressive specimen of the master's early manner. The *cadenza* introduced by Mr. Sloper was much what a *cadenza* should be: exhibiting the player's skill and fancy in forms so spontaneous as to resemble improvisation: it was, further, commendable as not being too long. Madame Rudersdorff was principal vocalist: whereas, at Exeter Hall, she had restrained herself, and been there effective,—in the Hanover Square Rooms the Lady screamed the usual screams that afflict us in her stage performances. Thus her singing, though in some respects artistic and intelligent, was unpleasant and painful.

CONCERTS OF THE WEEK.—This has been a busy musical week. Besides those entertainments of which separate notice has been given, there have been many concerts, better in quality than our average concerts used to be.—Another *Bishop Concert* was held, in Exeter Hall, on Monday.—The *Musical Union* commenced its season on Tuesday, with Herr Ernst as leader, Herr Pauer as pianist, and Signor Piatti as *violoncello*. Beethoven's superb *trio* in D major, Op. 70, was performed.—On Wednesday evening the *Harmonic Union* gave its third Concert, at which Herr Molique's *Violoncello Concerto* was capitally played by Signor Piatti. The composition is one which gains on being heard again;—the slow movement especially is delicious.—The other important features of this concert were, Mendelssohn's 'Midsummer Night's Dream' music and 'Walpurgis Night.'—On the same evening Mr. Hullah was conducting 'Elijah,' in St. Martin's Hall.—Up to this time, therefore, it would seem as if "young Germany" had done little in the way of deposing such well-meaning dotards as Handel, Haydn, Mozart,

Beethoven and Mendelssohn from the pedestals on which they have been placed by English folly and prejudice.

ROYAL ITALIAN OPERA.—The opera season at Covent Garden promises well. The list of principal performers is ample and sufficient, (provided that Mlle. Jenny Ney can render herself acceptable in the occupations assigned to her).—The wise determination of Madame Grisi not to wear out her reputation by re-appearing with diminished powers before her favourite public, must be attended by acceptable novelties and changes in the repertory. The band and chorus are kept up at their known point of excellence;—and preparations have been set on foot for representing M. Meyerbeer's last opera, 'L'Étoile,' (arranged with recitatives to be sung, and additional airs by the composer,) in a manner calculated to satisfy M. Meyerbeer. The other opera, as yet unheard in England, which the management pledges itself to produce, is 'Il Trovatore,' by Signor Verdi.

The season, too, has been pleasantly inaugurated by the revival of Signor Rossini's delicious 'Il Conte Ory.' A word or two were said with regard to this opera as a musical work last summer [*Athen.* No. 1397], but the beauty of the composition is not a topic to be very easily exhausted. The story is a silly one,—though not a mystery of iniquity, which it has been represented to be by some consistent persons who accept 'Don Juan,' and doat on 'Lucrezia Borgia'; but the opera, considered as music, is "a jewel," (to use the word in the old English sense as a noun of number,) made up of many gems. How many of the pieces may belong to Signor Rossini's 'Viaggio a Rheims' is not to be told,—but the opera has in no respect the air of a piece of patchwork, and, its dramatic structure considered, is alike free from weak points and from reminiscences. The introduction may have been foreshown in the introductions to 'La Gazza' and 'Cenerentola,' but the air of the Preceptor, No. 2,—the duet (No. 3) betwixt Count and Page, and the whole *finale* to the first act,—have the freshness and sparkle of Signor Rossini's best time, and a finish and delicacy which his early works do not exhibit. Further, the opera rises as it proceeds. When was ever scene more melodious, easy and graceful than the duet and chorus of Ladies on which the curtain rises for the second act,—passing off into the storm, with the sweet and holy, yet hypocritical, pilgrims' chaunt heard without, by way of contrast! The drinking bout of the enterprising Count and his companions, in their nuns' gear, is as rakishly chivalresque in its jovial spirit, as the night-music for the cloistered Ladies is elegantly noble. It is not needful to dwell on the *trio* (No. 11) as perfect after its kind,—that being one of the few portions of the opera which is universally known, and as universally relished. To follow such a work through, and then to think of what Italian music has sunk to since it was written,—to recollect the groups of trite notes which must now pass for melody,—the screams called out under pretext of dramatic passion,—and the style of instrumentation which now gives a trumpet a unisonal melody with the *soprano*, and allots to every recitative its grumbling *tremolando* by way of support,—is to receive as sad an illustration of the "mutability of things" as modern art can furnish.

If, however, in one respect 'Il Conte Ory' sent us home disconsolate, in another the performance gave us pleasure, as reminding us of changes for the better which we have lived to see. The opera "goes" as no opera could be made to go in London at the time when 'Il Conte' was written. Madame Bosio sings the part of the heroine with great brilliancy, and looks it gracefully. Is it vain to ask this Lady to consider what she says more carefully? A *solfeggio* in costume is not a part; and up to the present time we have not heard a word from her lips. Mlle. Marai is satisfactory as the *Page*; but more to our liking is Madame Nantier-Didé, in the smaller part of *Ragonda*. The quality of this Lady's voice makes her effective in concerted music. Then Signor Gardoni, as the second-hand *Don Juan* who gives his name to the opera, is well fitted for the character, both by his voice and by his personal appearance. He sings

well, he plays agreeably, and he is supported with due spirit and enjoyment by MM. Tagliafico and Zelger. It is long, we repeat, since a season has opened more auspiciously for the lovers of music.

The state visit of "France and England" to the Opera on Thursday implied the *début* there of the new German *prima donna*, Mdlle. Ney, in 'Fidelio.' The excitements of the evening, however, referred to the auditors of Beethoven's opera, and not to the actress in it; and we shall, therefore, defer notice of the Lady and of her reception till another day.—We learn that since Mr. Gye's *programme* was issued Madame Rudersdorff has been added to his company.

MUSICAL AND DRAMATIC GOSSIP.—It would appear from the following paragraph, published in a morning journal of Wednesday last, as if the *Moniteur* and our own *Gazette* had been premature in their limitation of the stay in London of the French Emperor and Empress, since we find them advertised "as under" by the Directors (?) of Dr. Wylde's Society.—

"The Emperor and Empress of the French have been pleased to join their names with that of Her Majesty as patrons of the grand performance to be given by the New Philharmonic Society on Wednesday, April 25, in aid of the funds of the Brompton Hospital for Consumption. Under such patronage, and with the attraction of the immense resources of the New Philharmonic Society, which purposes performing Beethoven's magnificent Choral Symphony, the greatest expectation is entertained that the hospital will derive that amount of benefit which the excellence of its object deserves. The performances of the New Philharmonic Society have now acquired a world-wide reputation, apart from their benevolent objects, and their Imperial Majesties could scarcely have chosen a better opportunity of hearing what this country can do in musical art than by honouring the performance on the 25th of April with their presence."

—We are sorry to be compelled again to call public attention to puffery so dishonourable (if it have any meaning whatever) as that which the above passage contains. The "immense resources" of the *New Philharmonic Society* are in no department more immense than in appeals like these to the credulity of persons who read without consideration, and who fancy that every newspaper paragraph, whether it announce a new *Kalydor* triumph or hold out the bait of a possible visit of the Emperor and the Empress of the French to Exeter Hall, must have some reality, or else that people would not be wicked enough to write and hardy enough to publish it.

The new Opera at Drury Lane began, on Monday last, with the *not* new 'Sonnambula,' conducted by Mr. Tully, with Madame Gassier for *Amina*, Signor Bettini for *Elvino*, and M. Gassier for *Rodolfo*. For analysis of the performance of so well-known an opera, the reader may placidly wait. A sketch of the peculiar gifts of the *prima donna* was offered by us last October [*Athen.* No. 1408]. At that time we imagined the Lady less familiar with her art than we have since learnt is the case;—neither were we then aware that she formerly appeared in London, when she was Signora Pasini, with Signor Castigliano and Signor Bencich, at *Her Majesty's Theatre*, in 1846 [*Athen.* No. 960]. To M. Gassier as an accomplished and steady vocalist, honour was given last autumn. How far these artists have been wise in venturing at Drury Lane remains to be seen, no *programme* having come before us, to aid in unravelling the mystery of the future.

The Birmingham Musical Festival is to commence on the 28th of August.

The experiments made with the grand Piano-forte, introduced into the Crystal Palace at Sydenham, have been satisfactory as regards the effect produced. But the question of resonance, in such a vast space, was already in great measure decided by the distinctness with which Madame Novello's unsupported voice told last year, when the building was opened.—Other of the musical arrangements at Sydenham have been attended by results less harmonious. The band and Herr Schallehn, conductor of the band, appear to have arrived at a state of substantial disagreement. There have been memorials, protests, dismissals, to an extent and of a publicity which seem to imply that bad management and bad temper have on this occasion,

as on most others, kept intimate proportion and close company.

Among other amusements talked about as in projection for Paris during the coming Exhibition season, is mentioned a company of Italian actors, headed by Signora Ristori. The Lady is reputed in her own country to be equally excellent in grave and in gay drama.

The anniversary of Beethoven's birthday, the 26th of March, was kept at Munich, with artistic state and ceremony. A new statue of the composer, from the renowned foundry, was placed in the hall of the Odeon, where a concert was given on the occasion. Before the concert a prologue by Herr Dingelstedt (whose skill in prologue-making we have more than once had occasion to admire) was recited by Mdlle. Damböck, the leading tragic actress at the Munich theatre.

"Paltry" is the epithet which befits the music of the new opera, 'La Cour de Célémène,' just produced at the *Opéra Comique* of Paris, by one who promised to write something better than merely paltry music,—we mean M. Ambroise Thomas. The book, by M. Rosier—another version of the Italian comedy 'La Capricciosa corretta'—offers some opportunities to a composer; since the court of *Célémène* (Madame Miolan Carvalho) consists of a dozen suitors:—four youths (represented by Mesdames Talon, Decroix, Révilly, and Bélie), four gentlemen, and four old men.—These three quartets supersede the introduction of a chorus. A novelty somewhat similar was afforded in the book of Mr. Balfe's 'Quatre Fils Aymon,' but he had not the science to avail himself of it; nor does M. Thomas seem to have appreciated the effects which might have been developed by a discreet and fanciful adjustment of such materials. The principal characters have not been happily fitted with occupation. We remember the graceful love-making of M. Jourdan and the quaint comic acting of M. Battaille; but neither air, concerted piece, nor effect of instrumentation meriting a place by the side of the better portions of M. Thomas's earlier operas—'Mina' and 'Le Caid.'

A singer, M. Darius,—who used to *double* M. Lais at the *Grand Opéra* of Paris,—and who is rated in French newspaper paragraphs as one hundred and two years old, appeared the other day at a charity-concert at Rouen in two of the opera airs which he used to sing "sixty years since."

We have received the following from a Correspondent:—

"In noticing the new Adelphi Easter piece, last week, it might have been pointed out perhaps, without unfairness, that the clever writer has in some measure availed himself of a French idea. This all must admit who are familiar with 'Les Contes de la Reine de Navarre,' by MM. Scribe and Legouvé,—in which the well-known novels are assembled, interwoven, and employed in working out the plot with a masterly ingenuity. Y."

So spiritedly did the Amateur pantomime which was enacted at the *Olympic Theatre* on the last day of Lent "go off," that it is in contemplation (we are told) to repeat the performance for another benevolent purpose in the presence of Her Majesty. Shall we, next, hear of an amateur *ballet*?

MISCELLANEA

The Wellington Clock Tower.—In answer to your good-tempered Correspondent "A. C." I (not being in the Crimea) hasten to state that although the above tower has now been finished for some time, it is still so damp as to be totally unfit to receive the clock, which has been ready for it for several months. We are now endeavouring to dry it by artificial means, but even so I fear it will be another month at least before we shall be able to give the correct time to the many thousands who daily and nightly pass over London Bridge. I need not state that it is both my wish and my interest that there should be no avoidable delay. I am thankful to your Correspondent for giving me an opportunity of answering through your columns the numerous inquiries made respecting it, which are particularly gratifying to me, as they are an evidence that this elegant building will not only prove an ornament to the metropolis, but will really (as I anticipated) supply a public want.

I am, &c

G. W. BENNETT.

Blackheath, April 17.

TO CORRESPONDENTS.—Justice—W. B.—S. R.—B. T.—L. S.—received.

Erratum.—P. 430, col. 1, line 11 from bottom, for "kneeling," read *leaning*.

Schott & Co. 159, Regent-street; and all Book and Music-sellers in Town and Country.

FRENCH IN ONE VOLUME.

Second Edition, just published.

THE COMPLETE FRENCH CLASS-BOOK; or, Grammatical and Idiomatical French Manual: with Progressive Illustrations and Exercises, and Conversational Lessons, on a new and practical plan.

By ALFRED HAVET,

French Master in the Glasgow Athenæum, &c.

"Great experience is displayed in selecting the sentences which form the illustrations and exercises. No author seems hitherto to have exactly understood what English learners required in studying French, and no French master ever attempted to combine in one volume such a progressive and complete course of grammar, conversation and composition."—*North British Mail*.

"M. Havet's treatise is a complete exposition of the principles and peculiarities of the French language."—*Athenæum*.

"There is something attractive in the very appearance of the work; and our delight to luxuriate among its ample pages, replete, as they are, with excellent and clearly arranged matter, explanatory and illustrative of the French language."—*Scottish Educational Journal*.

"M. Havet's 'Class-Book' is one of the best arranged and most complete French manuals yet published in this country. The new features that it possesses are chiefly, that it makes frequent comparisons between the English and French idioms, and that it contains CONVERSATIONAL LESSONS, calculated to impart information, as well as to exercise the learner in speaking the language."—*The Educational Examiner*.

"The various principles, illustrations, and exercises, are presented to the pupil at a single coup-d'œil; and advance from the mere rudiments of the tongue, by easy and agreeable stages to the higher form of its development. . . . M. Havet has supplied what teachers long felt to be a desideratum—a work combining, within reasonable limits, the ordinary grammars, phrase-books, and readers, which have hitherto been only procurable separately, and at a large expense to the pupil. The introduction and arrangement of a regular system of questions, to which the ingenuity of the student must devise the adequate reply, is an innovation upon the usual method, and one calculated to sharpen the faculties of the student, and give him such a command of colloquial French as no other plan has ever succeeded in doing."—*Edinburgh Guardian*.
London: Dulau & Co.; W. Allan.

ELEVEN THOUSAND COPIES HAVE BEEN SOLD OF THE DICTIONARY OF DOMESTIC MEDICINE AND HOUSEHOLD SURGERY.

By SPENCER THOMSON, M.D.

"A good and safe Book on Domestic Medicine, should form a portion of the library in every family." "No Emigrant should leave home without it." "All residing at a distance from Medical Advice should possess it." "In Emergencies it is invaluable." Such are the Opinions of the Reviews. It is profusely illustrated with wood Engravings. It is arranged in the alphabetical form; "altogether," as the *Athenæum* remarks, "it comes nearer to the standard of what such a book should be than any we have yet seen."

* * * Order Thomson's Medical Dictionary, price 7s., of any Bookseller in Town or Country.
Groombridge & Sons, Publishers, 5, Paternoster-row, and at the Office of the 'Family Economist.'

Second Edition, price 5s. elegantly bound in cloth.
WANDERINGS AMONG THE WILD FLOWERS; How to See and How to Gather them. With Two Chapters on the Economical and Medicinal Uses of our Native Plants.

By SPENCER THOMSON, M.D.

Fellow of the Botanical Society of Edinburgh. Author of 'A Dictionary of Domestic Medicine and Household Surgery.'

Illustrated with 170 Engravings.

"A pretty volume devoted to Botany. The author has evidently a love of plants, and throws a sufficient amount of feeling into his descriptions of the parts of plants, to render them less dry and tedious than such are usually found. As an introduction to Botany in this country, we can recommend Dr. Thomson's 'Wanderings among the Wild Flowers.'"—*Athenæum*.

"A book of remarkable beauty."—*Christian News*.
Groombridge & Sons, Publishers, 5, Paternoster-row, and at the Office of the 'Family Economist.'

FRENCH, GERMAN, AND ITALIAN DICTIONARIES. SCHNEIDER and JAMES' COMPLETE DICTIONARY OF THE GERMAN AND ENGLISH LANGUAGES for General Use, with the Accented and Unaccented Pronunciation of every Word, and the Terms of Science and Art, of Mechanics, Railways, Marine, &c. Compiled from the best and most recent Authorities by GIUS. GRASSI and W. JAMES. Square 8vo. strongly bound, 6s.

MOLÉ and JAMES' COMPLETE DICTIONARY OF THE FRENCH AND ENGLISH LANGUAGES for General Use, with the Accented and Unaccented Pronunciation of every Word. Fourth Stereotype Edition. Square 8vo. strongly bound, 6s.

GRASSI and JAMES' COMPLETE DICTIONARY OF THE ITALIAN AND ENGLISH LANGUAGES for General Use, with the Italian Pronunciation and the Accented and Unaccented Pronunciation of every Word, and the Terms of Science and Art, of Mechanics, Railways, Marine, &c. Compiled from the best and most recent Authorities by GIUS. GRASSI and W. JAMES. Square 8vo. strongly bound, 6s.

* * * This Series of Dictionaries, though in a compact form, are exceedingly full, both with respect to words and explanations; they will be found quite sufficient for all ordinary purposes.

* * * The full usual allowance to Booksellers or Teachers, 13 copies of any one Dictionary for 2l. 8s. cash.

London: Williams & Norgate, 14, Henrietta-street, Covent-garden.

Second Edition, with Portrait of the Author, 2s. 6d.
THE ELEMENTS OF BANKING; with Ten Minutes' Advice about Keeping a Banker.
By J. W. GILBERT, F.R.S.
General Manager of the London and Westminster Bank.
London: Longman & Co. 39, Paternoster-row.

On the 25th instant, will be published, in small post 8vo. price 7s. 6d. cloth extra,

FAIRY TALES.

By the COUNTESS D'AULNOY.

Translated by J. R. PLANCHÉ, Esq., and Illustrated with a Portrait from Original Sources, and 11 Engravings, by JOHN GILBERT.

"The 'Fairy Tales' of the Countess D'Aulnoy are now, for the first time, presented to the English reader in their integrity. This assertion may appear startling to many who are familiar with English versions of the most popular of them; but it is, nevertheless, a fact, as the examination of this Edition of them will prove."—*Extract from the Preface*.

London: GEORGE ROUTLEDGE & Co. Farringdon-street.

In foolscap 8vo. fancy boards, price One Shilling, or free, by post, Eighteen Pence,

THE STORY OF THE LEGION OF HONOR,

Its History and its Utility.

London and Glasgow: RICHARD GRIFFIN & Co.

Now ready, Gratis and Postage Free,

A LIST of SURPLUS COPIES of RECENT WORKS withdrawn from MUDIE'S SELECT LIBRARY, and offered to the Secretaries of Literary Institutions and others at greatly reduced prices for cash.

CHARLES EDWARD MUDIE, 510, New Oxford-street, London, and 76, Cross-street, Manchester.

This day, Octavo, 5s.

THE EXODUS PAPYRI, translated by D. J. HEATH, M.A., Vicar of Brady, late Fellow of Trinity College, Cambridge.
With an Introductory Chapter by MISS F. CORBAUX.
London: John W. Parker & Son, West Strand.

Now ready, in 2 vols. post 8vo. with Portrait,
MEMOIRS OF THE LATE

RIGHT HON. RICHARD LALOR SHEIL.

By TORRENS M'CULLAGH, Esq.

"Such a man as Sheil eminently deserved a biography; and Mr. M'Cullagh has, we think, proved himself an exceedingly proper person to undertake it. His narrative is lucid and pleasant, sound and hearty in sentiment, and sensible in dissertation. Altogether, we may emphatically call this book an excellent biography."—*Daily News*.

Also, just published, embellished with Portraits,

LIVES OF THE PRINCESSES OF ENGLAND.

By Mrs. EVERETT GREEN.

The SIXTH and CONCLUDING VOLUME, comprising the Conclusion of the Life of the Queen of Bohemia—Mary Princess of Orange—Henrietta, Duchess of Orleans, &c.

Published for H. COLBURN, by his Successors, HURST & BLACKETT, 13, Great Marlborough-street.

Now ready, in post 8vo. Vols. I. and II. with a Portrait engraved by G. T. Doo from a recent Miniature, price 21s.

AUTOBIOGRAPHY OF JAMES SILK BUCKINGHAM:

Including his VOYAGES, TRAVELS, ADVENTURES, SPECULATIONS, SUCCESSES, and FAILURES, frankly and faithfully narrated;

With CHARACTERISTIC SKETCHES of PUBLIC MEN with whom he has had personal intercourse during a period of more than Fifty Years.

London: LONGMAN, BROWN, GREEN, and LONGMANS.

Mr. S. W. FULLOM'S NEW WORK.

Now ready, in 2 vols. post 8vo. dedicated, by permission, to Her Majesty the Queen of Hanover, a

SECOND and REVISED EDITION of

THE HISTORY OF WOMAN,

AND HER CONNEXION WITH RELIGION, CIVILIZATION, AND DOMESTIC MANNERS, FROM THE EARLIEST PERIOD.

By S. W. FULLOM,

Author of 'THE MARVELS OF SCIENCE,' 'THE GREAT HIGHWAY.'

"With much eloquence Mr. Fullom has placed before our eyes the history of the better half of mankind. The pages of his interesting work display considerable learning and research, which have never degenerated into pedantry."—*Morning Chronicle*.

"No writer of our own day possesses in a greater degree the faculty of appropriating the popular elements of his subject. Hence the extreme popularity of the works he has previously published, and hence also the peculiar fascination of the present narrative."—*Morning Post*.

"As we read these records of woman, it seems that a ray of more than earthly glory has illuminated the darkest pages of history."—*Lady's Newspaper*.

"The work must not be considered a bare recital of facts, but a spirited summary of incidents, enlivened by judicious reflections, in which the author shows discrimination of character and knowledge of human nature."—*Morning Herald*.

London: LONGMAN & CO.

This day is published, in 8vo. price 16s. Vol. I. of the

OBSTETRIC MEMOIRS AND CONTRIBUTIONS, INCLUDING THOSE ON ANÆSTHESIA,

OF

J. Y. SIMPSON, M.D.

PROFESSOR OF MIDWIFERY IN THE UNIVERSITY OF EDINBURGH.

Edited by W. O. PRIESTLEY, M.D. and H. R. STORER, M.D. Boston, U.S.

Edinburgh: ADAM & CHARLES BLACK. London: LONGMAN & Co.

CHAMBERS'S NEW AND IMPROVED ATLAS FOR THE PEOPLE.

Edited by W. & R. CHAMBERS.

Conductors of 'CHAMBERS'S JOURNAL,' and other Publications.

It will consist of *Thirty-two Quarto and Four Folio Maps*, beautifully printed in colours, along with a *Descriptive Introduction*; and will likewise embrace a *Consulting Index*, so copious that it will for the most part supersede reference to a Gazetteer. As regards the Maps, every attention has been paid to insure their clearness and accuracy. The work will possess a beautifully Engraved Title-page.

MODE OF PUBLICATION.

To be published in Monthly Numbers, each containing at least Three Maps and a Sheet of Letter-press, in a printed wrapper. The Work will be completed in Twelve Numbers. Price of each Number, *One Shilling and Twopence*.

. The First Number will be issued on May 1.

W. & R. CHAMBERS, 47, Paternoster-row, London, and High-street, Edinburgh;
W. GILLING, Liverpool; T. DINHAM, Manchester; H. CAMPBELL, Glasgow; J. M'GLASHAN, Dublin; and all Booksellers.

PHOTOGRAPHIC CHEMICALS, APPARATUS, and LENSES.

R. W. THOMAS,

CHEMIST, &c., 10, PALL MALL,

SOLE MAKER OF THE XYLO-IODIDE OF SILVER,

AND

MANUFACTURER OF PURE PHOTOGRAPHIC CHEMICALS AND APPARATUS.

In the APPARATUS DEPARTMENT of this Establishment every kind of first-class Photographic Apparatus may be seen, including—

CAMERAS, folding and rigid, of superior construction.

Folding and other STANDS, of the best make.

GLASS BATHS, arranged for carrying the Silver Solution, thus dispensing with the use of a bottle and funnel.

GUTTA-PERCHA BATHS, mounted, to carry the Silver Solution for Glass Plates, up to 15 by 12 inches.

Jointed LEVELLING-STANDS and SPIRIT-LEVELS.

COLLODION PLATE-HOLDERS, for preparing large plates with facility. Pneumatic, ditto. PLATE-CLEANERS.

COLLODION GLASSES.

A Choice Collection of PASSEPARTOUTES, made expressly for this house, from original patterns.

Albumenized and other PAPERS, French and English.

A great variety of Glass, Porcelain, and Gutta-Percha DISHES.

Also, a large assortment of ROSS'S Portrait and Landscape LENSES.

PHOTOGRAPHY ON PAPER.

Every requisite for practising the Calotype process may also be seen in the Apparatus room, including Buckle's Brushes, Shallow Glass Dishes for developing negatives, with case and covers, Deep Porcelain Dishes, for Washing the Iodized Paper, &c. &c.

An excellent Negative Paper, well adapted for lodizing, after the method followed and recommended by Mr. Sutton, price 4s. per quire, or 3l. 10s. per ream, 19 by 15.

N.B. The stock (50 reams) has now been kept two years. This paper may also be had ready iodized.

XYLO-IODIDE OF SILVER.

This important photographic preparation is exclusively used at all the Photographic Establishments. Its superiority is universally acknowledged. Testimonials from the best photographers and principal scientific men of the day warrant the assertion, that hitherto no preparation has been discovered which produces uniformly such perfect pictures, combined with the greatest rapidity of action.

In all cases where a quantity is required, the two solutions may be had at wholesale price in separate bottles; in which state it may be kept for years, and exported to any climate. Full instructions for use.

CAUTION.—Each bottle is stamped with a red label, bearing my name and address.

RICHARD W. THOMAS, CHEMIST,
10, PALL MALL,

to counterfeit which is felony.

NITRATE of SILVER BATH for the above preparation may be always obtained of R. W. THOMAS, ready made, at a cost little more than the price of ingredients used.

CRYSTAL VARNISH.

PREPARED FROM THE FINEST AMBER.

This valuable Varnish, for protecting Negative Pictures, does not require the application of any heat to the plate. The coating will be found free from stickiness, hard, and transparent. It dries immediately.

HYPO-COLOURING BATH.

FOR RENDERING THE POSITIVES ON PAPER DARK AND RICH IN COLOUR.

CYANOGEN SOAP.

FOR REMOVING ALL KINDS OF PHOTOGRAPHIC STAINS.

The genuine is made only by the inventor, and is secured with a red label, bearing this signature and address.

RICHARD W. THOMAS, CHEMIST,
No. 10, PALL MALL,

Manufacturer of Pure Photographic Chemicals and Apparatus. And may be procured of all respectable Chemists, in pots, at 1s., 2s., and 3s. 6d. each, through Messrs. EDWARDS, 67, St. Paul's Churchyard; and Messrs. BARCLAY & Co., 95, Farringdon-street. Wholesale Agents.

BOOKBINDING.—W. HOLMES, Practical Bookbinder, 195, Oxford-street, London. Books bound in Morocco, Russia, or Calf, both plain and elegant, on the lowest terms. Gentlemen waited upon with patterns. Estimates given for large or small Libraries.—Address, 195, Oxford-street.

ROSS'S PHOTOGRAPHIC PORTRAIT AND LANDSCAPE LENSES.—These Lenses give correct definition at the centre and margin of the picture, and have their visual and chemical acting foci coincident.

Great Exhibition Jurors' Report, p. 274.
"Mr. Ross prepares lenses for Portraiture having the greatest intensity yet produced, by procuring the coincidence of the chemical, actinic and visual rays. The optical aberrations are very carefully corrected, both in the central and oblique pencils."
"Mr. Ross has exhibited the best Camera in the Exhibition. It is furnished with a double achromatic object-lens, about 3 inches in aperture. There is no stop, the field is flat, and the image very perfect up to the edge."

Catalogues sent upon application.
A. Ross, 2, Featherstone-buildings, High Holborn.

PHOTOGRAPHY, WHOLESALE, RETAIL, AND FOR EXPORTATION.

OTTEWILL & CO. 24, CHARLOTTE-TERRACE, ISLINGTON.—OTTEWILL'S REGISTERED DOUBLE-BODY FOLDING CAMERA, with Rack-work Adjustment, is superior to every other form of Camera, and is adapted for Landscapes and Portraits.—May be had of A. Ross, Featherstone-buildings, Holborn; and at the Photographic Institution, Bond-st.

Catalogues may be had on application.

REMOVAL.—HOCKIN & CO., from 289, Strand, to 38, DUKE-STREET, MANCHESTER-SQUARE.
IODIZED COLLODION, uncoloured, in sensitiveness and density of negative.—LENSES, warranted achromatic, Quarter Plate, double, 2s.; Half, 3s.; Whole, 10s.—Waxed and Albumenized Papers.

PRACTICAL HINTS ON PHOTOGRAPHY, by J. B. HOCKIN. Price 1s.; per post, 1s. 4d.

THE NEW COLLODION, manufactured by BLAND & LONG, 153, Fleet-street, London, will bear comparison with any other preparation offered to Photographers. Price 9d. per oz. Can be had separate from the Iodizing Solution. Nitrate of Silver, 4s. 6d. per oz.; Pyrogallol Acid, 1s. 6d. per drachm; Glacial Acetic Acid, 6d. per oz.; Hypophosphite of Soda, 1s. per lb.

CAMERAS, LENSES, and every description of Apparatus, of first-class workmanship.

Chemicals of ABSOLUTE PURITY, and every material required in the Photography of Art, of the finest quality.

Instruction in all the processes.
Catalogues sent upon application.

BLAND & LONG, Opticians, Photographical Instrument Makers and Operative Chemists, 153, Fleet-street, London.

PHOTOGRAPHIC LENSES, CAMERAS, CHEMICALS, and APPARATUS, at C. BAKER'S OPTICAL INSTRUMENT WAREHOUSE, 243 and 244, HIGH HOLBORN.

PORTRAIT LENSES, of Double Achromatic combination, with Rack adjustment, for size 4½ by 3½, 12s. 6d.
LANDSCAPE LENSES, with Rack adjustment, from 22s. 6d.
Larger Lenses, for Views or Portraits, of the first quality, at equally low prices.

WALNUT WOOD CAMERAS complete, from 14s.
FRENCH POLISHED MALAGANY ditto, from 25s.
TRIPOD STAND from 10s. 6d., and every article required in the practice of Photography at equally low prices.

C. BAKER begs to call attention to his first-rate ENGLISH MANUFACTURED LENSES. At prices but little higher than the Foreign, every one is warranted to give the finest and most correct depiction, or immediately exchanged.

Catalogues by post free upon application.
ESTABLISHED 1765.

STEREOSCOPE PICTURES.—Great Economy.—Beautiful PHOTOGRAPHIC VIEWS, on paper, of the Continent and England, at ONE SHILLING EACH; French-published Malagany Stereoscopes, with brass eye-pieces, 7s. each. The largest assortment of Stereoscopes in London, Glass Pictures, Daguerreotypes, &c.—Clerkenwell Wholesale Photographic Depot and Manufactory, 26 and 29, Middeletown-street.

RAILWAY ACCIDENT INSURANCE.—16,221/5s. have already been paid as compensation for Fatal and other Railway Accidents, by the RAILWAY PASSENGERS' ASSURANCE COMPANY.

EXAMPLES.
1,000/ was paid to the Widow of J. G. killed on the 24th February, 1852, secured by a payment of 1/.
250/ was paid to C. H. J., who had his leg broken on the 31st Aug. 1853, secured by a payment of 1/.
200/ was paid to W. P., severely injured on the 19th September, 1854, secured by a payment of 1/.

For the convenience of frequent travellers, Periodical Insurances are granted, which now cover the risk of Fatal Accidents while travelling in any class carriage on any Railway in the United Kingdom or on the Continent of Europe, and insure compensation for Personal Injury in any Railway Accident in the United Kingdom only.

To insure 1,000/ at an Annual Premium of 20s.

Ditto 200/ do do
Insurances can also be effected securing the same advantages for terms of five or ten years, or for the whole of life, at greatly reduced rates, which may be learned from the Company's Prospectus, to be had at the Office, and at all the principal Railway Stations.

A new class of Insurance has also been established in case of Death by Railway Accidents alone, without compensation for Injury.

To insure 1,000/ at an Annual Premium of 5s.
Ditto any sum not exceeding 1,000/ for the whole of life by a single payment of 6s. percent.; thus one payment of 34 will secure 1,000/.

The Premiums charged include the Stamp Duty, this being the only Company insuring against Railway Accidents empowered by Special Act of Parliament to pay a commuted Stamp Duty.
Railway Passengers' Assurance Office, WILLIAM J. VIAN, 3, Old Broad-street, London. Secretary.

BANK OF DEPOSIT, NATIONAL ASSURANCE AND INVESTMENT ASSOCIATION, No. 3, PAUL MALL EAST, LONDON.
Established A.D. 1844.

Empowered by Special Act of Parliament.
Parties desirous of INVESTING MONEY are requested to examine the plan of this Institution, by which a high rate of interest may be obtained with perfect security.

The Interest is payable in January and July at the Head Office in London; and may also be received at the various Branches, or through country bankers, without delay or expense.

PETER MORRISON, Managing Director.

CHARLES JELICOE, Esq.

The business of the Company comprises Assurances on Lives and Survivorships, the Purchase of Life Interests, the sale and purchase of contingent and deferred Annuities, Loans of Money on Mortgage, &c.

This Company was established in 1807, is empowered by the Act of Parliament 53 Geo. III., and regulated by Deed enrolled in the High Court of Chancery.

The Company was originally a strictly Proprietary one. The Assured now participate quinquennially in four-fifths of the amount to be divided.

To the present time (1854) the Assured have received from the Company, in satisfaction of their claims, upwards of 1,480,000/.

The amount at present assured is 3,000,000/ nearly, and the income of the Company is about 150,000/ per annum.

At the last Division of Surplus, about 150,000/ was added to the sums assured under Policies for the whole term of life.

The lives assured are permitted, in time of peace, without extra charge, to reside in any country (Australia and California excepted) north of 33 degrees north latitude, or south of 33 degrees south latitude, or to pass by sea (not being seafaring persons by profession) between any places lying in the same hemisphere, and not within those limits.

Assurances effected by persons on their own lives are not rendered void in event of death on the ground of suicide, duelling, or the hands of justice, unless such death take place within one year from the date of the Policy.

All Policy Stamps and Medical Fees are now paid by the Company.

The Annual Reports of the Company's state and progress, Prospectuses and Forms, may be had, or will be sent, post free, on application at the Office, or to any of the Company's Agents.

GREAT WESTERN RAILWAY.—COALS.

—Orders for the best RUABON HOUSE COALS, equal to the finest Durhams, may be executed at 25s. per Ton (cash price), delivered within 4 miles of the Paddington Station.

These Coals are bright and durable in burning, and contain only one-half per cent. of dust.

They are now for the first time introduced into the London Market by the recent opening of the Great Western Railway into North Wales.

Address the Superintendent of the Company, Paddington Station.

FLOWER-POTS and GARDEN SEATS.—JOHN MORTLOCK, 250, Oxford-street, respectfully announces that he has a very large assortment of the above articles in various colours, and solicits an early inspection. Every description of useful CHINA, GLASS, and EARTHENWARE, at the lowest possible price, for Cash.—250, Oxford-street, near Hyde Park.

F. DENT, 61, STRAND, and 84 and 35, ROYAL EXCHANGE, Chronometer, Watch, and Clock Maker, by appointment to the Queen and Prince Albert, sole Successor to the late E. J. Dent in all his patent rights and business at the above Shops, and at the Clock and Compass Factory, in Somerset-square; Maker of Chronometers, Watches, Astronomical Instruments, and other Clocks, Dupleidoscopes, and Patent Ship Compasses, used on board Her Majesty's Yacht, Ladies' Gold Watches, &c.; Gentlemen's, 10 guineas. Strong Silver Lever Watches, 6/ 6s.

ELKINGTON AND CO., PATENTERS OF THE ELECTRO PLATE MANUFACTURING SILVERSMITHS, BRONZISTS, &c.

Respectfully urge upon Purchasers to observe that each article bears their Patent Mark, "E. & Co. under a crown," as no others are warranted by them.

The fact frequently set forth of articles being plated by "Elkington's" process affords no guarantee of the quality. These producers were honoured at the late Great Exhibition by an award of the "Council Medal," and may be obtained at either Establishment.
